Looking at forming a committee to revisit UGC equity rules: Govt to Supreme Court

Opposed by general category groups, OBC and Dalit sections, regulations stayed in Jan

Ananthakrishnan G
New Delhi, November 5

THE CENTRE told the Supreme Court Thursday that it is planning to put in place a committee to reconsider the University Grants Commission (Promotion of Equity in Higher Education Institutions) Regulations, 2026, which were stayed by the court earlier this year after petitions questioned neutrality of the rules.

"The government is contemplating appointing a committee," Solicitor General Tushar Mehta told a three-judge bench comprising Chief Justice of India Surya Kant, Justice Joymalya Bagchi and Justice V Mohana.

Mehta said this after the bench asked the government to consider taking a relook at the provisions. "Why don't you revisit these regulations so that the next generation is taken care of? They should protect the interest of every student," the CJI said.

Notified on January 13 this year, the UGC (Promotion of Equity in Higher Education Institutions) Regulations, 2026, snowballed into a political issue after drawing objections from both general category groups and sections of Dalit and OBC communities.

In the eye of the storm is regulation 3(1)(c) which defines caste-based discrimination as discrimination on the basis of caste or tribe against members of the Scheduled Castes,

e EXPLAINED

Ahead of UP, Punjab polls

The Centre's declaration that it may ask a committee to revisit the UGC equity rules is significant because the regulations impact voter bases in key states. In UP and Punjab, where Assembly polls are due early next year, there are significant SC and OBC populations alongside politically influential groups of the general category.

TWO ECs HAD EXPRESSED CONCERN, WRITTEN TO CAB SECY

Election Commission reaffirms oversight of IT chief in new order

Commission says DG (IT) will report to Senior Deputy EC; that it never implemented July 28 order removing oversight

Damini Nath
New Delhi, November 5

THREE MONTHS after a change in the work allocation of its officers led two Election Commissioners to express concern and raise the matter with Cabinet Secretary T V Somanathan, as reported in *The Indian Express* investigation published September 23, the Election Commission of India Wednesday issued a new work allocation order which, among other changes, reaffirmed and underlined the layer of oversight over Director General (IT) Seema Khanna. The oversight layer had been removed by a July 28 order which the EC said was never implemented following a decision on July 30.

In the Commission office order issued Wednesday, Senior Deputy Election Commissioner, Pawan Kumar Sharma, was given charge of "IT/ICT". In the case of Khanna, the order said: "She would put up files of above-mentioned functional divisions through Sr. DEC (PKS)."

In the July 28 work allocation order, the subjects of IT and ICT were removed from the work allocation of then-DEC Sanjay Kumar and mentioned only against Khanna's name, thereby making it clear that she would have reported

Indians set to invest record $4 bn in foreign stocks, debt in FY27

7% surge over last week, Nifty still down 6% in 2026

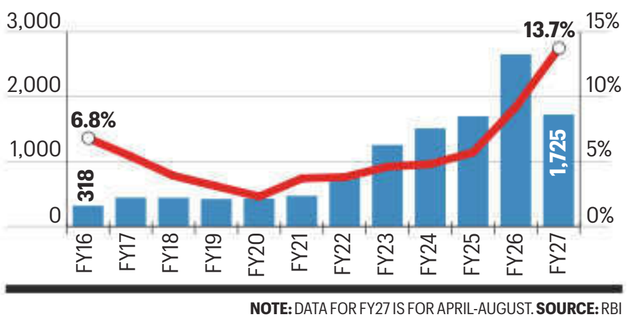

Akash Mandal & Siddharth Upasani
Mumbai, New Delhi, November 5

LAST WEEK, artificial intelligence giant Anthropic filed documents with the US capital markets regulator, the Securities and Exchange Commission (SEC), for its Initial Public Offering (IPO). Interest is sky-high, with Anthropic aiming for a valuation of up to $2 trillion. And while Indians may find it difficult to directly invest in the IPO, some will surely look to snap up some shares once the company is listed, possibly as soon as in two weeks' time. Why? Because it might 'pop'.

Starved of returns in the domestic stock market — Nifty is still down 6% in 2026 despite a 7% surge over the last week — Indians are increasingly investing abroad to the tune of

Nearly 3-fold jump in serious adverse events caused by medical devices: New data

6-year data disclosed first time by Indian Pharmacopoeia Commission on CIC order

YOUR RIGHT to know
AN EXPRESS RTI APPLICATION

Ritu Sarin
New Delhi, November 5

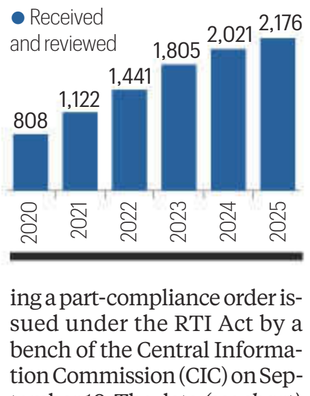

THE INDIAN Pharmacopoeia Commission (IPC) has, for the first time, disclosed the number of Serious Adverse Events (SAEs) caused by the use of medical devices in the country since 2020: 9,373, with a nearly three-fold jump across six years, from 808 to 2,176 in 2025.

SAEs are medical events that may result in life-threatening conditions or prolonged hospitalisation for patients. *The Indian Express* accessed the data on October 27 following a part-compliance order issued under the RTI Act by a bench of the Central Information Commission (CIC) on September 10. The data *(see chart)* relates to the volume of SAEs "received and reviewed" by the IPC, which is an autonomous Central body that publishes official standards for drugs.

The IPC has been providing

24-hr deadline for production before magistrate starts with detention: SC

Amaal Sheikh
New Delhi, November 5

HOLDING THAT any attempt to draw an artificial distinction between 'arrest' and 'detention' would dilute or negate the fundamental protection guaranteed by the Constitution under clause (2) of Article 22, the Supreme Court Thursday ruled that the 24-hour deadline for producing a person before a magistrate begins from the time of detention, and not formal arrest

The bench, comprising Justice Ujjal Bhuyan and Justice Atul S Chandurkar, said, "The 24-hour timeline as mandated under Clause (2) of Article 22 of the Constitution of India would commence from the date and time of detention of the person detained when his liberty stands curtailed and not from the time of his formal arrest."

Article 22 guarantees protection against arrest and detention and requires that such a person be produced before a magistrate within 24 hours. It bars detention beyond that period without a magistrate's approval.

The top court's judgment came during the hearing of appeals filed by accused booked

Working in Delhi slum to Mayor office in LA: Long journey West of Keralam-born Raman

Nithya Raman with her family after voting in Los Angeles. AP

Shaju Philip
Thiruvananthapuram, November 5

ON TUESDAY, as counting in Los Angeles's high-profile mayoral race got underway, the *LA Times* captured the mood of quiet optimism in the speech of Indian-American Nithya Raman. A Democrat, Raman was contesting the high-stakes race against incumbent Karen Bass, also a Democrat, and the newspaper described her as jubilant.

"I'm hopeful. I'm very hopeful," Raman told a raucous crowd fuelled by tequila and chicken tenders. "I'm also really superstitious. So we're all just going to be cool, OK? Very cool."

By Wednesday, as vote counting continued, the 45-year-old Thrissur-born Raman had widened her lead over Bass, securing 51.67 per cent of the votes counted against the incumbent's 48.33 per cent. However, with about 67 per cent of the expected vote counted, the race remained too close to call. Her victory, when

REPUBLICANS CALL FOR TRUMP TO CHANGE COURSE FAST

DAY AFTER ROUT, TRUMP DEFLECTS BLAME

Threatened by BJP MLA during Odisha flood duty: IAS officer

Sujit Bisoyi
Bhubaneswar, November 5

A CONTROVERSY has erupted in Odisha after a BJP MLA from Asika, Saroj Padhi, was accused by an IAS officer of misbehaving with and threatening him while he was deployed on flood management duty. The officer submitted a police complaint against the legislator Thursday.

Samir Kumar Jena, a 2022-batch IAS officer, posted as chief development officer-cum-executive officer, zilla parishad, Ganjam, alleged in his complaint that Padhi entered his chamber Tuesday and shouted at him over the distribution of relief materials. Jena had been assigned to oversee relief and restoration work in the Asika area.

The officer did not respond to calls seeking comment. "Because of this incident, I am highly demoralised," he noted in the complaint.

Padhi, responding to the allegations, said, "We have mutually discussed whatever misunderstandings we had, and the matter has already been resolved. I am aware of the police complaint, and I have already discussed the matter with the officer. All of us were busy with flood duty, and some misunderstandings happened."

UGC equity rules

Scheduled Tribes and Other Backward Classes.

Petitioners who challenged it said this excludes general category students and faculty from specific protection against caste-based discrimination. At the same time, the regulations' broader definition of "discrimination" covers unfair or differential treatment on the ground of caste against any stakeholder, they said.

The regulations stem from a 2019 petition filed in the Supreme Court by the mothers of Payal Tadvi and Rohith Vemula, who died by suicide over alleged caste-based discrimination in 2019 and 2016, respectively. They had sought the enforcement of robust anti-discrimination mechanisms across higher education institutions.

Staying the notified regulations on January 29, the court put forward a set of questions:

lWhether Clause 3 (1) (c) "bears a reasonable and rational nexus to subserve the object and purpose of the 2026 UGC Regulations, particularly in light of the fact that no distinct or special procedural mechanism has been prescribed to address caste-based discrimination, as opposed to the exhaustive and inclusive definition of "Discrimination" provided under Clause 3(e)".

- Would the introduction of the term "caste-based discrimination... have any bearing on the existing constitutional and statutory sub-classification of the Most Backward Castes within the Scheduled Castes, Scheduled Tribes, and Other Backward Classes, and whether the (new rules) provide adequate and effective protection and safeguards to such Extremely Backward Castes against discrimination and structural disadvantage".
- Whether the inclusion of the expression "segregation... in the context of allocation of hostels, classrooms, mentorship groups, or similar academic or residential arrangements, albeit on transparent and non-discriminatory criteria, would amount to a "separate yet equal" classification, thereby infringing the constitutional guarantees of equality and fraternity under Articles 14, 15 as well as the Preamble to the Constitution".
- Whether the omission of the term "Ragging" as a specific form of discrimination constitutes "a regressive and exclusionary legislative omission? If so, whether such omission is violative of unequal treatment of victims of discrimination by creating an asymmetry in access to justice and thus falls foul of Articles 14 and 21 of the Constitution".

[FROM PAGE 1 | FULL REPORTS ON WWW.INDIANEXPRESS.COM]

EC

directly to the Commission, instead of a DEC.

The IT division of the EC handles the ECINet, a digital platform facilitating citizen engagement and participation in the electoral process, and ERONet that helps EC officials maintain the electoral system. The two ECs had in separate internal noting said officers on the ground had conveyed to them that they were not getting proper access to ERONet and this was leading to a "centralisation of electoral rolls".

The July 28 order had Election Commissioners Sukhbir Singh Sandhu and Vivek Joshi writing to Somanathan the very next day, saying that Senior DEC Maneesh Garg had issued the same without the Commission's approval.

The July 28 work allocation order had not been amended until now.

The EC said it was never implemented following the concerns raised by the two ECs. In effect, Khanna had continued putting up files through Senior DEC Garg, who had been in charge of IT as the link officer after DEC Kumar left the EC in August.

"The work allocation order is as per unanimous decision of the Commission. There is no change in the reporting structure of DG IT. She has always been reporting to a DEC level officer," an EC source said Thursday.

On July 30, an internal note signed by Sandhu and Joshi, and circulated within the Commission, said, "...Therefore, till the time a consensus is reached in the Commission with regard to the change in the work allocation, the previous work allocation issued by order dated 23.09.2025 shall continue."

After *The Indian Express* investigation on September 23 revealed that the two ECs had written to the Cabinet Secretary, the EC had in a September 26 press note said, "The letter to the Cabinet Secretary was not related to any policy matter of the Commission or IT division, but related to working of an officer on deputation to ECI. The work re-distribution orders issued by the concerned officer were not actually implemented after the orders of the two Commissioners and the oversight over the IT division by the DEC was never actually withdrawn."

On October 26, in an affidavit before the Supreme Court, the EC said, "In view of the joint direction dated 30 July 2026 by the two Election Commissioners, the order of 28 July 2026 was never implemented."

In his letter to the Cabinet Secretary, Joshi had pointed out that the July 28 order issued by Garg was not approved by the Commission and that when he had asked for the relevant files, it was not provided to him.

"In the said order, he allocated work to himself as well as to officers who are senior and equivalent to him," Joshi had written. Apart from the change in the work allocation for IT, Wednesday's order also took into account recently-appointed DEC, Prakash Rajpurohit, who was given subjects of election planning, Model Code of Conduct and delimitation, among others. On election planning, he will support Senior DEC Garg, it stated.

Nearly 3-fold jump

the number of Medical Device Adverse Events (MDAEs) logged in 775 monitoring centres located across the country in its annual reports, while keeping the figures for SAEs as restricted information.

The reports for the last three years, for instance, provide the broad figures for MDAEs but with "serious" events not categorised separately. The items flagged under "suspected devices" in these reports include relatively minor articles, too, such as surgical gloves, syringes, urine bags — and, in the 2022-2023 report, even a male condom that was listed as a "counterfeit device".

In the 11-page order for data on SAEs, following an appeal by this newspaper, Information Commissioner Jaya Varma Sinha cited the plea by the IPC that public disclosure of the category of medical device involved and its manufacturer would be a violation of "commercial confidence".

The order stated that brand details and a description of every medical device for which an MDAE has been logged could not be disclosed since "it is not conclusively established whether they arose due to a procedural lapse or due to the medical device itself".

The IPC's plea before the CIC stated that "the information sought regarding the name of the manufacturer of the medical device is exempted from disclosure under Section 8(1)(d) of the RTI Act, 2005, as it relates to commercial confidence and third-party information, the disclosure of which may harm the competitive position of the concerned entity".

In 2018, as part of Implant Files, the investigative series on the medical devices industry and its nexus with doctors and hospitals, The Indian Express first reported on the categorisation of MDAEs, which showed that coronary stents manufactured by the pharma major Abbott accounted for over 50 per cent of the entries. In all, 566 MDAEs had been logged that year, 290 of them for the coronary stents of the global major. Abbott had said at the time that its stents were recognised as "among the world's most used and studied" with "an unparalleled safety record".

The Indian Express subsequently filed several RTI requests for an update of the 2018 dataset, but the information was denied, citing provisions of the Act. The six-year dataset was released following a final appeal filed by this newspaper before the CIC in 2025.

The IPC contended before the CIC bench that details such as category and manufacturer of each and every MDAE were "too voluminous" and that their dissemination "requires collection and collation which would divert the time and resources of the public authority".

According to the IPC's annual reports, it logged 14,584 MDAEs for the financial year 2024-2025, with only 22 cases forwarded to the Central Drugs Standard Control Organisation (CDSCO) for "necessary action". The list of 22 "suspected devices" mainly comprised items such as surgical gloves, syringes and urine bags along with one instance each of a mechanical ventilator and blood transfusion set. Similarly, for 2023-2024, the IPC listed 10,269 MDAEs, forwarding a list of only 16 cases to the CDSCO. This list contains "suspected" faulty medical devices, such as pregnancy test kits, catheters and BP monitors, and one instance of a drug-eluting stent.

A total of 3,868 MDAEs were listed for 2022-2023, when 12 cases were forwarded to CDSCO, along with one case of a "suspect" inhaler, an incubator and a coronary stent. The 12 "suspect" medical devices that required "further action", the IPC committee said, included a male condom.

The compilation of MDAEs is done by the IPC under the Materiovigilance Programme of India (MvPI) launched in 2015. The IPC has developed the Adverse Drug Monitoring System (ADRMS), an online portal to streamline reporting of adverse events related to medical devices. All SAEs are required to be reported to the IPC within 15 days, with global norms requiring that it be classified as "serious" if the event leads to death, extended hospitalisation, life-threatening situation and disability, among others.

At the global level, for instance, the USA has the Manufacturer and User Facility Device Experience (MAUDE) database, a public repository that contains reports of adverse events and problems associated with all categories of medical devices. It contains granular information on medical device-related deaths and injuries, and allows users to access details such as brand, manufacturer, model and type of adverse event reported.

Indians set to invest $4 bn

billions of dollars. In fact, 2026-27 may see these investments in foreign equity and debt cross $4 billion for the first time.

According to data from the Reserve Bank of India (RBI), investment in equity and debt under the Liberalised Remittance Scheme (LRS) was at $1.73 billion in April-August 2026, averaging just under $350 million per month. More importantly, the $1.73 billion invested abroad in the first five months of the fiscal is more than double the $823 million in the same period last year. For 2025-26 as a whole, the figure was $2.65 billion — these numbers are much smaller than what individuals invest domestically. In September alone, around $3.4 billion was put in the domestic stock market via SIPs of mutual funds.

Viram Shah, Founder and CEO, said business is brisk for global investment platforms such as Vested, which saw its new active users rise by 133% in 2024 and 79% in 2025, with the figure for 2026 until October already 33% higher than that of 2025. In terms of deposits, the rise has been similarly rapid: 250% in 2024, 140% in 2025, and 20% until October this year.

"Overall, annual deposits have grown nearly 10-fold since 2023, reflecting the increasing adoption of global investing among Indian investors. This suggests that international equities and other global assets are gradually becoming a more meaningful part of portfolio diversification," Shah told *The Indian Express*.

Vested manages $1.5 billion worth of assets and has around 1.5 lakh active investors.

But it's not just individuals who have been investing abroad heavily in recent years. Even Indian companies' direct investments abroad — or, outward FDI — have shot up. From $85 billion in the six years from 2018-19 to 2023-24, FDI by Indian companies has jumped to $82 billion in the subsequent two years and five months due to geopolitics and reshoring of production by developed economies.

Add these two outflows to foreign investors booking profits on past FDI into India and the widening trade deficit due to elevated energy prices, and the sharp weakening of the rupee over the last year-and-a-half is not hard to explain.

Which is why the authorities have looked to encourage inflows: eliminating withholding and capital gains taxes for foreign investments in government debt, bearing the exchange rate risk of banks' Foreign Currency Non-Resident deposits, and floating the idea of removing long-term capital gains and transaction taxes on equities too.

Pressure on the rupee has also been alleviated through certain regulatory measures which have made it more expensive to get protection from a weaker rupee. But how tenable would it be to reduce the $250,000 per-year-limit on outward remittances under LRS?

Introduced in February 2004 with an initial annual cap of $25,000 per individual, only once has the RBI ever reduced the limit. This was back in August 2013, in the midst of the global turmoil caused by the US Federal Reserve's taper tantrums. The move led to the RBI being accused of implementing 'capital controls' – or imposing restrictions on the outflow of money.

Indians putting their money to work in overseas markets is not just to make higher returns but to diversify their portfolio with assets from across the world — no one wants to put all their eggs in one basket. And while foreign stocks are crucial, "there is growing interest in fixed-income strategies, private credit, private market funds and other alternative investments available through the GIFT City ecosystem", said Gautami Gavankar, President, Kotak Mahindra Bank. "Investors are using GIFT City or other routes to complement their India exposure by accessing global opportunities, diversifying currency risk and participating in sectors and themes that may not be readily available in domestic markets like AI infrastructure, semiconductor, defence technology, chip making, biotechnology, and space tech either through fund route or direct exposure to unlisted or listed companies," Gavankar said.

24-hour deadline

under the Narcotic Drugs and Psychotropic Substances (NDPS) Act, 1985.

"The Constitution does not recognize any detention dehors arrest," the Supreme Court said. "Any attempt to draw an artificial distinction between 'arrest' and 'detention' would dilute or negate the fundamental protection guaranteed by the Constitution under clause (2) of Article 22."

Rejecting this distinction, the top court said that Article 22(2) did not permit investigating agencies to keep an individual in custody without formally recording an arrest and thereby postpone the start of the 24-hour period. "Article 22(2) does not sanction creation of any buffer zone where the liberty of an individual is curtailed for investigating purposes but not formally shown as arrested. Creation or contemplation of such buffer zone is unconstitutional," it said

The Bench said that "arrest" and "detained in custody" under Article 22(2) have to be read together, and that the protection begins when a person's liberty is curtailed.

"Therefore, the declaration that the period of 24 hours for the purposes of Article 22(2) commences from the completion of such search and seizure and only from the time of arrest recorded by the arresting authority is not only unsustainable in law but is entirely unconstitutional," it said.

The court directed the magistrates to record the actual date and time when an accused's liberty was first curtailed and calculate 24 hours from that point. If the deadline has been breached, the magistrate must order the person's immediate release, it said.

The magistrate can refuse remand if they believe that the investigating agency has kept an accused in custody for longer than necessary, even if the 24-hour deadline has not expired.

In the NDPS Act case, the bench set aside the Tripura High Court order, and directed that the accused be produced before a Special Court within seven days and released on bail.

On September 29, 2025, the police, after intercepting the accused, seized methamphetamine tablets known as Yaba in Tripura. The persons were detained from around 2 pm that day, with the authorities formally recording their arrest only after 11 am on September 30. They were produced before the magistrate at 4.45 pm.

In March, a special judge rejected their bail applications. In April 2026, Tripura High Court also denied them bail, stating that under Section 37 of the NDPS Act — which imposes strict conditions for bail involving commercial quantities — the right to personal liberty can be considered within the framework of Section 37.

The accused said they had been detained for more than 24 hours before being produced before the magistrate. The State submitted that the accused were "merely intercepted...and not formally detained," and that the hours before their arrest were spent on search, seizure and questioning.

Rejecting the argument that the time spent on search, seizure and other procedures under the NDPS Act could be excluded from the 24-hour deadline, the top court said, "The only period which is permitted to be deducted from the 24 hours mandate is the time necessary for the journey from the place of arrest to the court of the magistrate. The Constitution does not permit any other time period to be excluded from the 24 hours period."

The top court disapproved of the views taken by the Orissa High Court in the Aryaman Pattanaik case, the Madras High Court in the Kannan case and the Kerala High Court in the Arun K Thomas case, which had permitted the period of detention before formal arrest to be excluded while calculating the 24-hour deadline.

The court also noted there was an 18-hour gap between the completion of the search at 5 pm on September 29 and formal arrests the next morning. The investigating officer had not explained this delay. "18 hours in custody without judicial oversight is a long period, with misuse and abuse of authority a clear possibility," the court said.

Keralam-born Raman

sealed, will make her LA's first mayor of South Asian descent.

For Raman, this was a significant milestone in a journey that began in Kerala, went through Delhi and ended in the heart of LA politics.

Raman has been serving as an LA City Council member since 2020. Born in 1981 in Thrissur, Keralam, Raman briefly lived on Ramasamy Kovil Street in East Fort, Thiruvananthapuram, where her father, Venkitaraman, worked at KELTRON, a state-run public enterprise, and her mother, Sudha Kechery, worked with India Overseas Bank. A few years later, when her father flew to the US for higher studies, the family moved back to Thrissur, where she attended kindergarten.

Raman's family moved to the US when she was around six and initially settled in Burlington, Massachusetts. She eventually secured a degree in social studies from Harvard University, where she met her future husband, Vali Chandrasekaran, a TV screenwriter from Tamil Nadu.

"Thrissur is her mother Sudha's hometown," Prof Devanarayanan, a close relative in Thrissur, said. "The family migrated to the US when Nithya was in Class I. She's still in touch with us and came down for a family event in 2019. She can understand Malayalam."

Another cousin, Vidhya Shankar, added: "It was an academic ambition, rather than career growth, that transplanted R Venkataraman to the US. Nithya's younger brother Akash, who works in the financial sector, is 15 years her junior."

When Raman returned to India in 2010, she did the unexpected – she worked with NGOs engaged with slum dwellers and led movements against their eviction ahead of the 2010 Commonwealth Games. Later that same year, Raman moved to Chennai, where she founded the nonprofit Transparent Chennai. Together with her co-founders, she pushed the city to invest in sanitation facilities in unmapped slums using data, mapping public toilets in the city's poorest neighbourhoods, documenting bus routes and campaigning against policies that led to slum evictions.

For Raman, these movements were significant — they set the stage for her future political career and interventions in Los Angeles.

In 2013, Raman returned to Los Angeles, where she initially worked as a management trainee at the city administrative office. There, she was tasked with preparing a report examining the city's expenditure on homelessness to help address the issue. In 2017, her work led her to found the SELAH Neighborhood Homeless Coalition, a nonprofit organisation addressing homelessness at the neighbourhood level in Los Angeles.

Soon, that engagement drew her into local politics. In 2020, she made history by defeating incumbent David Ryu to become the first challenger in 17 years to unseat a sitting Los Angeles City Council member. She retained her District 4 seat in 2024.

Back in Thrissur, her relatives are ecstatic. "It's a matter of pride that Los Angeles will have a mayor who can follow our language," Devanarayanan said. "We spoke to Sudha on Thursday after hearing the news. She told us to wait until the final results are out. But they understand our excitement."

The excitement is palpable among relatives in Thiruvananthapuram too. Here, another cousin, Vidhya Shankar, said that family members who were in the US actively helped with Raman's campaign. "The family back in Kerala has been constantly getting videos and photos of the election mood in Los Angeles," she said. "My sister and her family from Indianapolis were part of the campaign. Nithya's uncle and his family too joined from Ohio."

In a post on X, Thiruvananthapuram MP Shashi Tharoor hailed it as the victory of "a daughter of Thiruvananthapuram".

"And with @ZohranKMamdani in New York, America's two biggest cities will be run by people of Indian origin! I'm sure they will do a far better job than their counterparts back in India, who are reduced to powerlessness by a British-era system that disperses authority and budgets, leaving Mayors here without any real means to govern their cities effectively," he said in a post on X.

NDRF personnel carry out rescue operation on Thursday. ANI

NARROW LANES IN OLD DELHI'S CHAWRI BAZAAR HAMPER RESCUE OPERATIONS

Two dead in building collapse, rescuers clear debris manually

Pragynesh
New Delhi, November 5

MOHAMMAD NAEEM was having his morning tea at his decades-old house in Gali Sitara, a roughly 3-ft-wide lane in Old Delhi's Chawri Bazaar, when he heard a loud bang on Thursday. It sounded, he said, "like an earthquake".

"I thought my building had collapsed. Then my wife and I came out and saw that the building at the back, which was under construction, had fallen," he said.

The collapse of the ground-plus-three floor building killed two persons, injured two others and left several feared trapped, as rescue personnel struggled to reach the site through the congested lanes of Chawri Bazaar.

The deceased were identified as Kishori (40), and Sanjeet (45), both labourers working at the site. The injured were Sahdev Chaudhary (25), and Firoz (37), also labourers. All four were residents of Railway Colony in Mandawali. Police said the four to five labourers could still be trapped under the debris.

The collapse was reported around 9.50 am from Gali Sitara, near Chawri Bazaar Metro station. Officials said slabs were being poured on the third floor when the building gave way under its weight.

The narrow approach road leading to the building. AMIT MEHRA

Six fire tenders were rushed to the spot but could not enter the narrow lanes. Fire and rescue personnel, National Disaster Response Force (NDRF) teams and police officers had to reach the site on foot and begin clearing the debris manually. They managed to rescue persons stuck under the debris. They are currently undergoing treatment at Lok Nayak Hospital.

The rescue operation was complicated by the building's location. A Delhi Fire Services (DFS) official said the structure was attached to adjoining buildings on three sides. "When it collapsed, the debris collapsed into a heap. Cranes and earthmovers were needed to clear such debris, but the narrow approach made it nearly impossible to bring in heavy machinery."

Also, the lane opposite Chawri Bazaar Metro station, near Sheesh Mahal, was too narrow for fire tenders or cranes. On the right side, a four-foot-wide passage narrowed further to about three feet before opening into a cluster of closely packed buildings. Further, the collapse weakened neighbouring structures, prompting police to evacuate their residents. Iqbal, a local resident, said encroachments had made the area inaccessible to emergency vehicles. "Any ambulance or fire tender won't be able to enter this area. People won't even be able to run if something happens here," he added.

Tahir Shah (74), who has lived in a neighbouring building since childhood, said his family was asleep when the collapse occurred. "I thought a bomb had exploded. My wife and I came out and saw that one floor had collapsed, and some workers were holding on to a pole. In 15-20 minutes, two more floors collapsed," he added.

The building, spread over around 45 sq yards, had been under construction for three to four months. Neighbours identified the owners as two brothers — Ayub and Barkat. "Their father owned around 100 sq yards, and the two brothers each inherited half. The building was being built by Barkat. Ayub's house, adjoining the under-construction building, had already been constructed," said a neighbour.

By evening, with heavy machinery unable to reach the site, rescuers began breaking through the wall of an adjoining building to create an alternative access route.

Sudhir Kumar was seen searching for his brother Vipin. "He had been working on the site. It's been 9 hours and they are still telling me that he will come out. When? He is going to die like this," he said.

Nearly 5 lakh families to get permanent homes under new slum rehab policy

Chief Minister Rekha Gupta at the statue unveiling ceremony of Syama Prasad Mookerjee on his 125th birth anniversary, at Shyama Prasad Mukherji College for Women on Thursday. AMIT MEHRA

Alok Singh
New Delhi, November 5

FOR NEARLY five lakh families living in Delhi's slum clusters, the prospect of a permanent home may now be a step closer. The Delhi government on Thursday notified a new rehabilitation policy that seeks to provide eligible families with permanent housing, preferably at their existing locations or within a 3-km radius, so that they can remain close to their workplaces, children's schools and other essential facilities.

The Delhi Slum and Jhuggi Jhopri Relocation and Rehabilitation Policy, 2026, is expected to benefit around 4-5 lakh families, covering nearly 20 lakh people, according to government officials.

The policy extends the eligibility framework to families living in slum settlements established before January 1, 2025. It aims to giving a fresh opportunity to those who may have been excluded from earlier rehabilitation schemes, officials said.

Chief Minister Rekha Gupta said the objective was not merely to clear slum settlements or redevelop the land, but to ensure that eligible families could move into permanent homes and lead a life of dignity and security.

Under the policy, in-situ rehabilitation will be the preferred option, with the government seeking to provide alternative accommodation at the existing site or within 3 km of it. "The approach is intended to prevent families from being displaced far from their livelihoods, schools and established social networks," Gupta said.

Under the scheme, eligible families will be provided one-bedroom, hall and kitchen (1-BHK) flats. Further, the policy provides for separate housing units for independent families occupying different floors of the same structure, provided they independently meet the eligibility and documentation requirements. This could benefit households that have been living separately despite sharing a single dwelling. Families with persons with disabilities will get priority for ground floor accommodation. In the case of married couples, the housing unit will be allotted jointly.

Housing allotments will be made through a computerised lottery. The policy also provides for a grievance redressal and appeal mechanism for applicants.

Gupta said the policy was inspired by Prime Minister Narendra Modi's vision of Garib Kalyan and Antyodaya, adding that "families who had contributed to Delhi's growth through their labour deserved secure housing and a better quality of life".

"The government wanted to ensure that rehabilitation meant more than providing a roof over people's heads, and that families also had access to basic amenities, security and opportunities for their children," she added.

MCD suspends 2 engineers, says owner built floors in guise of repairs

Drishti Jain & Pragynesh
New Delhi, November 5

THE OWNER of the building that collapsed in Chawri Bazaar on Thursday allegedly constructed the second and third floors under the guise of repair work, in violation of building bye-laws and conditions laid down by the Municipal Corporation of Delhi (MCD).

According to an official from MCD, in a preliminary inquiry, the civic body found that the owner of the building as per its records, Samiullah, had undertaken fresh construction without obtaining the requisite permissions or informing the MCD, despite an advisory issued to him on April 28, asking him to carry out strengthening and corrective measures.

The advisory required the owner to submit a structural stability/safety certificate from a qualified structural engineer empanelled with the MCD after completing the work. "The advisory specifically clarified that it should not be construed as permission for reconstruction," the official said.

"The shuttering of the third floor lintel was hurriedly removed, reportedly in apprehension of restrictions on the ongoing construction activity, following which the third floor lintel collapsed, triggering the collapse of the entire building," the official added.

The MCD suspended its Assistant Engineer, Mohd Naeem, and Junior Engineer Aman Dalal of the area's building department for "severe dereliction of duty", pending an inquiry.

The Delhi Police said it had alerted the MCD about the unauthorised construction in June and asked it to stop the work. "However, the work hadn't stopped. About 10-15 labourers were present at the building at the time of the collapse. The owners have been identified and will be arrested," DCP Rohit Rajbir Singh said.

A letter from the Hauz Qazi SHO to the MCD, dated June 15, stated that unauthorised construction was being carried out at the premises and sought action from the concerned agencies. It also named a contractor, Fuqran, who was allegedly undertaking the work.

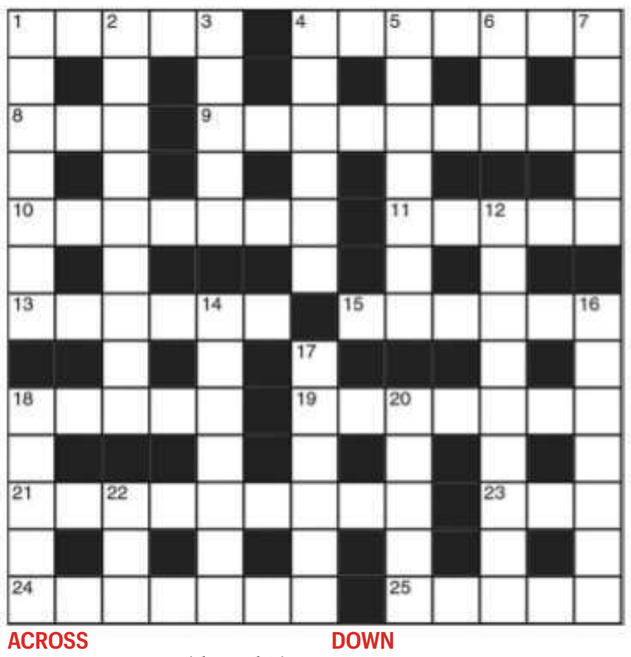

According to the MCD official, on June 15, the civic body had received the communication along with photographs indicating repair and maintenance work at the property. "...an inspection was conducted, during which the owner was found undertaking repair work at the premises. No subsequent complaint regarding fresh construction activity involving complete demolition of the existing structure, or any other information in this regard, was received thereafter," the official said.

Further, the official flagged discrepancies in the owner's property tax declaration. According to MCD records, Samiullah paid Rs 75,114 in property tax on April 22 under the Self-Assessment (SUNIYO) Scheme, covering six financial years from 2020-21 to 2025-26. In the returns, the property was declared as a ground-plus-four-floor building, with a covered area of around 80 sq m.

"While portions of the earlier structure existed at the premises, the owner appears to have undertaken fresh construction on the second and third floors under the garb of repair work, resulting in a G-3 (ground-plus-three floors) structure, beyond the scope of the advisory issued by MCD," the official said.

The official alleged that the additional floor declared in the tax returns was intended to mislead authorities and claim protection under special laws.

• ROYAL STARS

BY GEORGIA NICOLS

ARIES (MAR 21 - APR 20): Today you will have to go more than halfway when dealing with others; compromise is your best choice. Fortunately, this will be easy, because with Venus opposite your sign, relations are easy today. This is a good day to make peace. Tonight: Be patient.

TAURUS (APR 21 - MAY 21): Discussing agreements openly and exploring relationships with co-workers might be productive today. You also might be interested in doing something that can improve your health. Tonight: Work.

GEMINI (MAY 22 - JUNE 21): This is a lovely day to talk. You'll enjoy games and playful activities. Romance is also favoured today. Your focus is on creative expression and enjoying yourself. Tonight: Socialise.

CANCER (JUNE 22 - JULY 23): If you can, try to spend some quiet hours at home among familiar surroundings. Relations with a parent might be prominent today. You also might enjoy redecorating, because your focus is on home, family and your private life. Tonight: Relax at home.

LEO (JULY 24 - AUG 23): You're eager to talk to others today. The trick is to find someone who is willing to genuinely listen, and not just be waiting for their turn to share their stories. You also might discover how much affection there is in your daily world. Tonight: Discussions.

VIRGO (AUG 24 - SEP 23): Financial issues will flow easily today. It might be an easy day for you to borrow money or invest it. Double-check all contracts and agreements due to Mercury retrograde. Tonight: Check your assets.

LIBRA (SEP 24 - OCT 23): The Moon is in your sign today, which can make you a bit more emotional than usual. However, it can also slightly improve your good luck over that of all the other signs, which means today is the day to act. Tonight: You're in charge.

SCORPIO (OCT 24 - NOV 23): Solitude will please you today. You need some time to pull your act together before you take it on the road. You're willing to help others today. Tonight: Enjoy solitude.

SAGITTARIUS (NOV 24 - DEC 22): Today is an excellent day for talking with friends and being involved in group activities, because it's easy to feel loving and affection with others. Tonight: Be friendly.

CAPRICORN (DEC 23 - JAN 20): Today you're noticed. Some people will know personal details about your private life. Be aware of this in case you have to do some damage control. A new romance might begin. Tonight: Be modest.

AQUARIUS (JAN 21 - FEB 19): Some of you might be able to travel today and explore new ideas and see new places. If you can't, then check out art exhibits, galleries, museums, concerts or anything that will offer you delightful stimulation and an appreciation of the arts. New love with someone might begin. Tonight: Learn something new.

PISCES (FEB 20 - MAR 20): This is a passionate and affectionate day for romance. New connections that begin today will be intense and memorable. Something might occur that allows you to see the deeper elements of what's going on in a relationship. You might have that Eureka moment. Tonight: Check banking details.

ADVERTORIAL

ISIC : Making India Proud

Each man carries within himself his own mountain, which he must climb to attain a fuller knowledge of himself. The mind has its mountains and cliffs-fearful, sheer, unfathomed.

The ISIC Story: Three Decades of Courage, Care and Spine Leadership

Major HPS Ahluwalia, *Founder Chairman*, ISIC

A summit, and a second climb

In May 1965, Major H.P.S. Ahluwalia stood on the summit of Mount Everest. Only months later, in the Indo-Pak war, a bullet struck his neck and left him paralysed below the waist. At the time, the country had very little to offer a person with a spinal injury. Many would have settled for survival. He chose purpose.

"Life is all about conquering the other summit," he would say, "the summit of the mind." His memoir, Higher Than Everest, asks whether that internal summit might be higher than the mountain itself. What followed was the answer.

An idea takes root

The idea of a dedicated spinal injuries centre took shape in the early 1980s. The man who would build it had no administrative experience and no personal fortune. He had persistence. For years he persuaded friends, institutions and governments to share his vision. The Indian Spinal Injuries Centre (now ISIC Multispeciality Hospital) was finally set up in Vasant Kunj, New Delhi, in collaboration with the Government of Italy through San Raffaele Hospital in Milan, and with the support of the Government of India.

The doors open

By the mid-1990s, the idea had become a working hospital. It brought treatment, rehabilitation and reintegration under one roof, a landmark not just for India but for all of Asia. The founding principle was simple and unbending: no patient would be turned away for lack of funds, and the quality of care would never depend on the size of a person's wallet.

The campus reflected its founder. Over two thousand trees were personally nurtured by him. Each morning he would stop by one, speak to it softly, and often share its fruit with whoever was nearby. Peacocks and squirrels still live among them.

The legacy of spine

Spine became the soul of ISIC. Over the past two decades, the centre has recorded about sixteen lakh outpatient consultations, around one lakh inpatient admissions and more than 75,000 high-technology surgeries. Spinal surgeons, anaesthetists, physiotherapists, occupational therapists, psychologists, assistive technologists, orthotists and counsellors work as one team, because a spinal injury changes the whole of a person's life, not just a vertebra.

Technology has been part of the story for years. ISIC became the first centre outside the United States to install the Mazor X Stealth Edition robotic guidance system, supported by the O-arm surgical imaging system, bringing a precision once available only abroad. The hospital has also grown into a centre of teaching, training and research. Behind the numbers are patients who arrived believing life was over, and left to return to work, to family and to independence.

A culture of compassion

A person who has lived with disability tends to build a place that listens, and Major Ahluwalia built one. Patient feedback consistently points to the warmth of everyone from doctors and nurses to ward and security staff.

The care extends beyond the walls. ISIC runs free screening camps and health education programmes, and its CSR vertical has trained people in Basic Life Support and CPR across schools and colleges in Delhi NCR. It has built wheelchair ramps at bus stops in Vasant Kunj to improve accessibility and prevent falls, and plans to train police response staff to use defibrillators and to give first-responder training on safe transport after road accidents and falls.

Passing the baton

Major Ahluwalia passed away on 14 January 2022. He left behind a Padma Shri, a Padma Bhushan, an Arjuna Award, more than a dozen books, a chapter in India's school textbooks and, above all, a hospital that never stops moving forward. Since 2022, his wife, Mrs Bholi Ahluwalia, has led ISIC as Chairperson, sustaining and deepening his vision. His daughter, Ms Sugandh Ahluwalia, serves as Chief Strategy Officer.

The leap to multispeciality

In November 2025, as ISIC marked three decades of service, it announced its evolution into ISIC Multispeciality Hospital. The reasoning was natural. Patients with spinal conditions often live with heart, kidney, neurological and digestive needs too, and families were asking for one trusted address rather than several. The hospital now brings together cardiac, renal, neuro and gastro sciences, with critical care alongside, while orthopaedics and spine remain its core centres of excellence. Oncology is planned for the next phase.

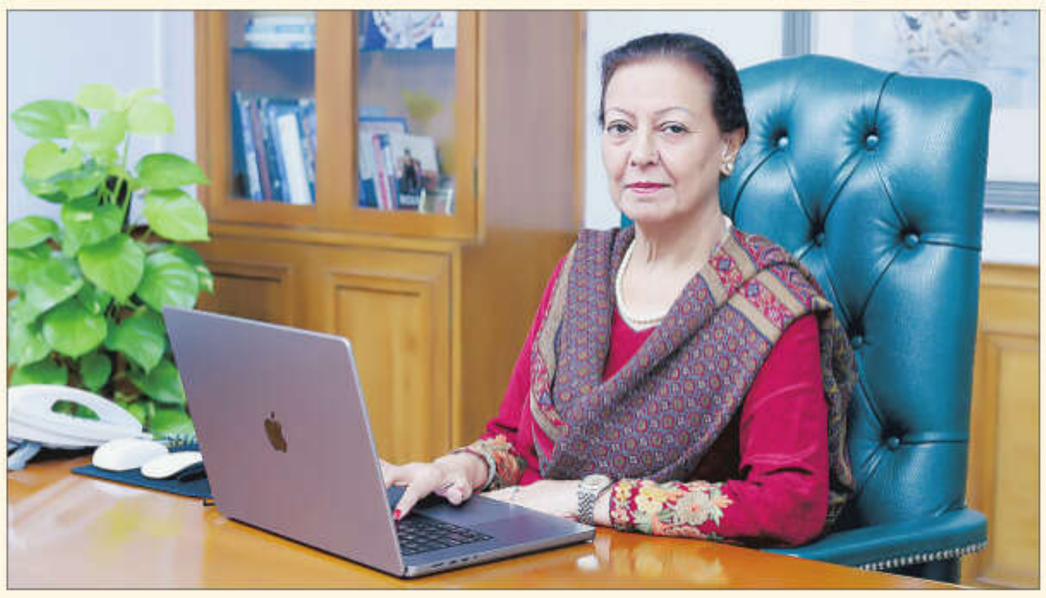

The growth plan is ambitious. Capacity is set to rise from about 200 to over 600 beds over five years, beginning with a phase that adds 100 beds, a new fifteen-bed dialysis unit and upgraded diagnostics and infrastructure. A digital backbone of patient portals, mobile apps and a connected hospital information system is meant to make care seamless, while robotics, artificial intelligence and telemedicine extend its reach. The refreshed logo, in blue for trust and green for growth, keeps the enduring figure of the founding spirit at its centre.

The mountain ahead

On his ninetieth birthday, ISIC Multispeciality Hospital salutes the founder who turned an injury into a movement. The summit he conquered in 1965 earned him a place in history. The one he built afterwards, on the quiet acres of Vasant Kunj, earned him a place in thousands of lives.

From the Chairperson's Desk: A Life That Taught Us How to Climb

Mrs Bholi Ahluwalia, *Chairperson*, ISIC Multispeciality Hospital

ON 6 November, my husband would have turned ninety. I cannot write that sentence without smiling. A man like him would have called a birthday another base camp: a place to rest briefly, check the ropes and look at the path ahead.

Many people know Major H.P.S. Ahluwalia as the man who stood on the summit of Mount Everest in May 1965. I knew him as the man who, was shot in the neck during the Indo-Pak war, left paralysed below the waist, and had to learn the smallest things all over again. In his memoir, he writes of those dark hospital days without bitterness, only with a stubborn curiosity about what a person does next.

What he did next changed thousands of lives. He decided that no Indian soldier, student, farmer or labourer with a spinal injury should ever again be told there was nowhere to go. He had no fortune and no training as an administrator. He had friends who believed in him, a wheelchair he refused to treat as a limit, and a conviction that grew stronger every year. "Life is all about conquering the other summit," he said, "the summit of the mind." I watched him climb it every single day. For more than a decade he gave himself to building the institution that became the Indian Spinal Injuries Centre, a place made not only of bricks and mortar, but of compassion, courage and conviction.

Living with such a man was never ordinary. He worked with the discipline of a soldier and the patience of a mountaineer. He was equally at ease with presidents and with a young patient taking a first nervous step in physiotherapy; both received his complete attention. He taught me that dignity is not something a person is given. It is something we make sure others are never denied.

For thirty years, ISIC has stood for pioneering spinal care, rehabilitation and an empathy that treats the person, not just the condition. When he left us in January 2022, the hospital he built was not finished, because he never believed any good institution is ever finished. The question before our family and our teams was simple: how do we honour him? The answer was to keep building. Today ISIC has grown into a multispeciality hospital, with cardiac, renal transplant, neuro and gastro sciences standing beside our spine and orthopaedic heart. Every new wing carries the promise he made on the first day: that care will be excellent, kind and within reach.

I am often asked what his greatest legacy is. It is not a medal, a book or even a building. It is the quiet moment in our corridors when a frightened family realises that their loved one is in safe hands. It is the therapist who stays an extra hour, the nurse who remembers a patient's name, the doctor who explains before operating.

As we celebrate his ninetieth birthday, I thank every patient who trusted us, every colleague who gave their best, and every friend who stood by our family. And to Major Ahluwalia, wherever he is, I say this: you did it. Now let us keep climbing together.

A Daughter's Tribute: The Man Who Taught Me to Look Up

Ms Sugandh Ahluwalia, *Chief Strategy Officer*, ISIC Multispeciality Hospital

WHEN people ask what it was like to grow up as Major Ahluwalia's daughter, I tell them it was like growing up beside a mountain. You could not always see all of it at once, but you always knew it was there, steady and unmoved by weather.

I was a little girl when my Saturdays were spent on a patch of land in Vasant Kunj, where my father came to watch his dream slowly take shape. In those days the area was little more than a cluster of villages, where buffaloes crossed the traffic signal and the air smelled of fields. After walking around the site, we would sit together and share omelette parantha rolls, simple meals that tasted of hope and beginnings. Even then I sensed this was no ordinary place. It was being built not just to treat, but to transform.

I knew my father only as a man in a wheelchair, and never once did I see that as a limitation. He was the tallest man in every room, the one who taught me that courage is not the absence of difficulty but the grace with which we rise above it. The original ISIC logo, a figure in a wheelchair formed by the letters ISIC, was his reflection of himself: resilient, upright and full of grace.

What I admire most is that he never built ISIC for himself. He built it for the stranger who would arrive on a stretcher on the worst day of their life and need a team that would not look away. That belief is why we speak of patients as people, why rehabilitation and counselling matter as much as surgery, and why dignity comes before everything else. It is also why integrity has always been our foundation. No Board member has ever taken a monetary benefit for their service, and my father paid his own medical bills.

When he passed in 2022, we asked what a legacy demands of those who inherit it. My answer is that it is not a monument to be admired but a mission to be extended. If my father gave ISIC its purpose, my mother gave it permanence. It is our shared duty to give it a future.

That future rests on three pillars: legacy, multispeciality excellence and outcomes. Capacity is set to grow from about 200 beds to over 600 in five years, and we are investing in robotics, artificial intelligence and digital health. Yet we are not chasing size; we are nurturing significance.

Our new logo keeps the caring hand and the rising figure, in blue for trust and green for growth. Every decision we take, from a new department to a new patient app, is held against the question I think he would have asked: does this make care more humane, more accessible and more trustworthy?

On his ninetieth birthday, I do not feel I am looking back. I feel I am looking up, as he taught me to do. Papa, thank you for the mountains you climbed so that others could walk.

Haze shrouded Delhi on Thursday as the Air Quality Index stood at 369. PTI

AQI 'Very Poor' for fourth consecutive day, set to be 'Severe' on Diwali weekend

Express News Service
New Delhi, November 5

SHORTLY AFTER registering the cleanest October average in eight years, the air quality in Delhi has deteriorated once again. The city's Air Quality Index (AQI) remained in the 'Very Poor' category for a fourth consecutive day on Thursday, with the index settling at 369. Neighbouring cities in the NCR registered comparable levels, with Gurugram standing at 339 and Noida at 283, according to the Central Pollution Control Board (CPCB) data.

The situation is likely to worsen in the coming days, with forecasts of 'Severe' AQI from Friday to Sunday. "The outlook for the subsequent 6 Days: The air quality is likely to be in the Severe to Very Poor category," read a bulletin by the Indian Institute of Tropical Meteorology (IITM).

The primary trigger includes low wind speed conditions. Till Saturday, the surface wind speed is expected to "remain calm, gradually becoming up to 5 kmph from the northwest direction during evening and night hours", as per the India Meteorological Department. People will celebrate the festival of Diwali on Sunday.

Pollution levels remained on the higher side despite fewer stubble-burning incidents recorded across Haryana, Punjab and Uttar Pradesh. According to data from the IITM's Decision Support System, high baseline emissions stemming from road and construction dust, alongside vehicular, residential and industrial pollution continue to drive the surge. Adverse weather conditions, such as lower temperatures and reduced wind speeds, is said to be aggravating the situation by trapping pollutants.

Punjab Pollution Control Board officials, meanwhile, said that unseasonal rains delayed the paddy harvest in the state, meaning stubble burning could still rise in the coming days. Forecasts from the IITM's Decision Support System reveal that the contribution of farm fires to PM2.5 emissions will climb from 16% to around 19% by Friday.

On Thursday, satellites detected 837 paddy residue burning events, as per the Indian Agricultural Research Institute. Of these, 440 were recorded in Punjab, 216 in Madhya Pradesh, 18 in Haryana, 64 in Uttar Pradesh, 90 in Rajasthan, and nine in Uttarakhand. So far, 5,637 burning events have been logged this season.

Experts attributed the recent surge in PM2.5 mainly to industrial emissions, pollutants originating outside city, and secondary particulate matter pollution, according to the Centre for Research on Energy and Clean Air's latest analysis on Thursday. "Industry was the largest domestic contributor to India's population-weighted PM2.5 concentrations at 18%, followed by residential sources at 15% and power generation at 13%. Emissions originating outside city boundaries accounted for 82 to 89% of urban PM2.5 concentrations across 143 Indian cities," said Manoj Kumar, lead researcher at Creating Resources for Empowerment in Action.

With cars off roads, commuters make a beeline for Metro: New rush hour reality of Delhi-NCR

Devansh Mittal
New Delhi, November 5

A CROWDED Metro, longer journeys and the occasional struggle to find space for a bag – for many commuters in Delhi-NCR, the journey to work and back home has become a little more complicated since restrictions on vehicles not complaint with BS-VI emission standards entering the Capital kicked in.

Twenty-three-year-old law associate Aditya Garg is among those making the switch. "The Metro is so crowded. I get tired even before I reach office," he says.

Like lakhs of people who live and work in the National Capital Region, Garg has had to turn to public transport after the restrictions came into effect on November 1. Under Delhi's Winter Action Plan, petrol and diesel vehicles registered outside Delhi that do not meet BS-VI emission standards have been barred from entering the city.

Earlier, Garg drove his Swift Dzire from his home in Faridabad to his office in Delhi's Defence Colony. Now, his father uses the BS-IV complaint car, while Garg takes the Metro. "Since the last few days, I have been getting on at Sarai Kale Khan-Nizamuddin station and getting off at Lajpat Nagar," he said.

The switch has not brought him significant savings. He spends around Rs 50 on an autorickshaw to the station, Rs 43 on the Metro and another Rs 60 on an autorickshaw to his office. His round-trip expenditure is around Rs 300, roughly what he would spend on his car's fuel during the journey.

The difference, however, is in the time and comfort. "I reach in just half an hour in my car compared to 50-55 minutes in the Metro and autorickshaw, and obviously, my car is more comfortable," he says.

His experience comes amid a sharp rise in Metro ridership. Passenger boardings touched 80.54 lakh on Monday, the first working day after the restrictions kicked in. This was an increase of 8.3 lakh from the previous Monday, when the figure was 72.24 lakh.

The Yellow and Blue lines together accounted for more than half the total passenger boardings on Monday. The Yellow Line, which connects Samaypur Badli in Delhi to Millennium City Centre in Gurugram, recorded 21.27 lakh boardings. The Blue Line, which connects Dwarka to Noida and Vaishali, recorded 21.23 lakh across its two branches.

But not everyone is convinced that the restrictions will make a meaningful difference to pollution levels.

Are these bans even improving anything? I don't think so. It seems like the farm fires are causing this pollution," says 27-year-old engineer Ansh Dutta.

(From top) Aditya Garg, Arjun Pratap Chauhan, and Shubham Gupta.

DEATH by breath

Working for a multinational company in Gurugram, Dutta has changed his office timings to avoid peak-hour travel. "I try to go to my office around 11 am and return after 8 pm," he says.

Earlier, he took around an hour to reach his workplace in his Haryana-registered car. Now, he walks to Malviya Nagar Metro station, takes the Yellow Line, changes at Sikanderpur and gets off at Sector 54 Chowk on the Rapid Metro network before taking an autorickshaw to his office. The door-to-door journey takes roughly the same time, if not longer.

For some, the restrictions have also meant higher commuting costs.

"I used to take a cab from my house in Green Park to my office in Noida, which used to cost around Rs 400-450. Now, cabs are charging around Rs 500," engineer Shubham Gupta (33) says. He has started walking for about 30 minutes to R K Puram Metro station before travelling to Okhla Bird Sanctuary, the station closest to his office.

Not everyone, however, is inconvenienced.

Social impact consultant Mridula Sharma (23), a Gurgaon resident, is happy to take the Metro. "This is the first time I am taking the Metro... I didn't know it was clean and comfortable... I hope the Gurgaon Metro also gets built quickly," she says.

Sharma earlier drove from her home in South City 1 in Gurugram to her office near South Extension in Delhi. She now boards the Metro at Millennium City Centre, changes at Dilli Haat-INA and gets off at South Extension station.

For musician Arjun Pratap Chauhan (24), however, the Metro is far from convenient.

He travels with his musical equipment like a guitar, a pedal and a speaker. "I used to carry all these in my car. But these are difficult to carry in the Metro, and the security personnel keep troubling me every time I get the equipment checked," says Chauhan, who travels from Delhi's Satya Niketan to a studio in Gurugram's Sushant Lok.

His Haryana-registered car, like many others, can no longer enter the Capital.

TOP COURT TELLS COMMITTEE SET UP AFTER NEET PROTESTS

Don't wait more, start probe into complaints of police excesses: SC

Express News Service
New Delhi, November 5

THE SUPREME Court on Thursday directed the High Powered Expert Committee (HPEC) it had set up to probe alleged police excesses during the July protests against the NEET paper leak to proceed with its fact-finding exercise on the basis of complaints and other material received so far and submit its first report without waiting indefinitely for more complainants to come forward.

A three-judge bench presided over by Chief Justice of India Surya Kant issued the direction after perusing HPEC's Action Taken Report, which flagged that it had received very few complaints from those affected despite setting up a dedicated portal and email address.

The bench, also comprising Justice Joymalya Bagchi and V Mohana, said that material submitted by petitioners on behalf of victims, including petitions and affidavits already placed before the court, must also be examined by the committee. "The committee need not wait indefinitely. On the basis of material already received, it should call for responses from whoever is required to respond and submit its first report," the bench said.

At the outset, senior advocate N Hariharan, appearing for some petitioners, said it had been more than two months since the HPEC was set up but "we really don't know what is the progress".

Saying that the principal issue was the alleged police brutality during the protests, he added, "...there is no departmental enquiry, there is no registration of any case... Now that's the issue which must be prima facie considered by this court... There are physical assault on women also."

During the protests in July against NEET paper leak. FILE

Solicitor General Tushar Mehta, appearing for the Centre and Delhi Police, said the grievances of police personnel should also be examined as several of them had been injured during the protests.

The CJI said: "Our first concern is that complainants should submit their complaints. A portal has been created. A dedicated email address has also been provided. The committee can then examine those complaints." He added that only one complainant had so far submitted an affidavit.

Justice Bagchi, too, said, "Committee has flagged that neither online, not physically, hardly any person has come alleging violation of their rights or physical assault or violence..."

Senior advocate Gopal Sankaranarayanan, however, disputed this, saying the petitioners had submitted representations both before and after the portal was opened.

To this, Justice Bagchi said, "We will set out the gist of the report (in the order) so that you can either controvert or take remedial action... If it's factually incorrect as Sankaranarayanan pointed out, please place on record documents..."

To a submission by some petitioners that materials already placed before the SC – which allegedly show instances of police violence – be forwarded to the committee instead of each victim approaching it individually, the SG said, "The committee must also take into account that these are all third person accounts who have no personal knowledge. These are all published spirited (petitioners)".

Sankaranarayanan said the committee appeared to be considering only victim accounts and not material submitted by petitioners. He also referred to the August 18 order, which clarified that the constitution of the HPEC would not prevent police authorities from taking administrative or disciplinary action against officers found to have violated rules. He sought an affidavit from the authorities on action taken.

Justice Bagchi, however, said, "We have only clarified that your (police) powers to discipline your employees are not cluttered by our direction on HPEC. If they decide independent of what the committee does, it's open to them."

Advocate Vrinda Grover pointed out that not even one FIR had been registered in relation to the alleged instances of violence.

The CJI urged petitioners to encourage those affected to approach the committee.

Centre takes over Air Force Sports Complex

Express News Service
New Delhi, November 5

JUST OVER a week after the Air Force Sports Complex on Lok Kalyan Marg was closed until further orders, the Union Ministry of Housing and Urban Affairs (MoHUA) took over the 39.5-acre property on Thursday, according to MoHUA sources.

The complex, which includes a golf course, was closed on October 28 after members received a message from the AFSC administration on October 26 informing them of the closure. "Greetings of the day! The Complex will remain closed on 28 Oct from 5.00 am till further orders," the message had read.

According to sources, a survey of the land had been conducted and the Indian Air Force had asked the government to reconsider its decision to take over the land. "A decision like this would affect the morale of personnel, particularly those who trained here regularly. The authorities have been requested to reconsider their decision," a source had said, as reported by *The Indian Express* on October 28.

However, the handover of the land to the Land and Development Office under MoHUA was completed on Thursday, sources in the MoHUA said.

The move comes after the L&DO has taken over or moved to take over several other properties in the area, which is adjacent to Prime Minister Narendra Modi's residence, 7, Lok Kalyan Marg. Among the affected properties are Delhi Gymkhana Club, Delhi Race Club and Jaipur Polo Ground.

The L&DO had first terminated the lease on May 22 and then issued an eviction notice to Gymkhana on June 29. It had said that it needs the land for critical defence infrastructure. "The land is essential to fulfil urgent institutional needs, governance infrastructure, and public-interest projects, integrated with the resumption of adjoining government lands," the L&DO had written to Gymkhana Club, in a reference to the recent takeover of Jaipur Polo Ground and eviction of slums in the area.

2020 riots larger conspiracy: Umar, Sharjeel move SC seeking bail

New Delhi: Activists Sharjeel Imam and Umar Khalid, accused in the February 2020 Northeast Delhi riots "larger conspiracy" case, have moved the Supreme Court against a Delhi High Court order that refused them bail.

The two stated that the prosecution failed to examine protected witnesses and that the one-year embargo imposed by the apex court is nearing its end.

On January 5, the Supreme Court, while granting bail to the other accused, had asked Imam and Khalid to seek bail either upon completion of protected witnesses' examination or expiry of one year, whichever is earlier. The Delhi High Court on September 30 refused to grant bail to them stating that it was bound by "judicial discipline" and could not modify the January 5 order.

Imam and Khalid had moved the HC challenging a trial court's July 4 decision rejecting their bail pleas for the third time since their arrest. ENS

From Delhi to Dubai: How police tracked down a rape accused, secured extradition

Sakshi Chand
New Delhi, November 5

A 38-YEAR-OLD former manager of a top jewellery brand, accused of raping a 20-year-old woman in Delhi, was extradited from the United Arab Emirates on November 4, following an investigation by the Delhi Police that took them from the national capital to Dubai.

Police said the accused, Sajeer Palli Mooppan alias Sajeer PM, was brought back to India following sustained investigation and coordination with the Central Bureau of Investigation (CBI), INTERPOL and other agencies.

Special Commissioner of Police, Devesh Srivastava, said this is the first time the Delhi Police has extradited someone in a rape case. "The case is notable not merely for the international pursuit, but also for the fact that the extradition was secured in connection with an alleged rape. While international cooperation is routinely sought in criminal investigations, bringing an accused back from abroad in a case of sexual assault is a particularly significant development."

Police said the case dates back to the night of October 1, 2025, when an employee birthday party was organised at a lounge in Punjabi Bagh in West Delhi.

According to the complaint, the accused allegedly made a 20-year-old woman consume alcohol and intoxicating substances before taking her to a hotel in Karol Bagh, where he allegedly sexually assaulted her against her will during the early hours of October 2.

Police said the complainant initially reported the incident to the company management. An internal inquiry was initiated under the Prevention of Sexual Harassment (POSH) framework, but the accused allegedly did not participate in that enquiry as well.

He subsequently left India on January 5, 2026, for the UAE.

The woman approached Delhi Police on February 18 this year, following which an FIR was registered under sections of rape, causing hurt by means of poison, etc., with intent to commit an offence, cheating by personation and common intention.

Police initially pursued the accused in Kerala, where he was originally from, before discovering that he had already left the country. Police said technical investigation subsequently established his location in Dubai, where he had reportedly started working at a plumbing accessories shop.

Police said an INTERPOL reference communication was initiated on April 30, 2026, and a Red Corner Notice was issued against the accused on July 7. A Red Corner Notice is an international request to law-enforcement agencies to locate and provisionally arrest a wanted person, pending extradition or similar legal action.

Use of BHARATPOL

Officers said a key part of the operation was the use of BHARATPOL, a digital platform developed by the CBI to connect Indian law-enforcement agencies with INTERPOL.

The platform facilitates international police cooperation, enabling agencies to exchange information securely and seek assistance from law-enforcement authorities in other countries.

Officers said the investigation team maintained continuous coordination with the CBI, INTERPOL, the Ministry of Home Affairs, the Ministry of External Affairs and the Bureau of Immigration.

The competent authority in Abu Dhabi approved the extradition request on October 9 this year.

On October 31, a three-member Delhi Police team comprising Inspector Kapil Khokhar, Sub-Inspector Kajal Tyagi and Sub-Inspector Sandeep was deputed to the UAE to complete the necessary formalities.

On November 4, UAE authorities formally handed over the accused to the Delhi Police team.

The operation was carried out by a Central District Police team under the supervision of the SHO and ACP of Karol Bagh and the overall guidance of the DCP, Central District, Rohit Rajbir Singh.

"The successful extradition highlights the growing importance of international cooperation in criminal investigations and the role of platforms such as BHARATPOL in helping Indian law-enforcement agencies pursue accused persons beyond national borders," the Special CP Srivastava said.

• TIMELINE

- The case dates back to October 2025, police said.
- The accused allegedly made a 20-year-old woman consume alcohol and intoxicating substances before taking her to a hotel in Karol Bagh, where he allegedly sexually assaulted her.
- The complainant reported the incident to the firm management, but the accused allegedly did not participate in an internal enquiry.
- He subsequently left India on January 5, 2026, police said.

Names deleted during SIR, Bombay HC orders inclusion of 6 Goa voters on rolls

Pavneet Singh Chadha
Panaji, November 5

The petitioner, Paresh Salgaoncar

THE HIGH Court of Bombay at Goa on Thursday directed the Election Commission of India (ECI) to restore the names of six members of a family in Goa, who had been deleted from the electoral rolls after their Form 8 applications for a change of address were rejected during the SIR, within 10 days.

Observing that the "system" did not permit the Electoral Registration Officer (ERO) to process Form 8 applications and pass orders since ERONET was "freezed [sic]" during the enumeration period, a division Bench of Justices Amit S Jamsandekar and Valmiki Menezes said this would amount to a "suspension" of provisions of the Representation of the People Act, 1950, and was "impermissible".

The petitioners— Paresh Salgaoncar and five members of his family — had moved to a new house in the same Santa Cruz Assembly constituency in North Goa at least eight years ago and were instructed by the BLO to submit Form 8 for a change of address. In the petition, the petitioners submitted that the Assistant Electoral Registration Officer informed them that their EPICs (Electors Photo Identity Cards) had been deleted from the rolls and, consequently, their Form 8 applications could not be processed. The only recourse available, the petitioners were told, was to submit Form 6 (which is for new voters), since there was no option in ERONET to review or restore the deleted EPICs.

The Indian Express had previously reported how the Salgaoncar family's case was one of the crucial ones among the many legal tangles involving the SIR exercise of the ECI.

The HC directed the ERO of the Santa Cruz constituency to include the petitioners' names in part 25 of the constituency after confirming their residence, within 10 days of passing the order.

The HC said that if a voter shifting residence had filed an application in Form 6, they would not only be making a false declaration in their application for inclusion in an electoral roll for the first time but would also be falsely declaring that their name had not been included in any constituency in the past.

"A voter shifting from one residence to another can only file an application in Form 8, since he is a voter whose name already exists either in one part of the constituency, and would be shifting either to a different part in the same constituency or to a different constituency...Had the Petitioners filled in Form 6, they would be making a false declaration that their name did not exist in any electoral roll and that they were applying for inclusion in an electoral roll for the first time," the HC said.

The HC said the real reason for rejecting the petitioners' Form 8 applications was the system's refusal to allow the ERO to pass orders, "where the system was designed to refuse processing of Form 8 by providing only one option to the ERO, which was to reject the application."

"This position is also reflected in the Appellate order of the Second Appellate order... that as per ECI's instructions, during the enumeration phase, Form processing and disposal was freezed [sic]. These findings clearly point that Form 8 filed by the Petitioners was rejected for only one reason, that the system did not permit the ERO to even process it and pass orders, since it was freezed [sic] during the enumeration period. This would amount to suspension of the provisions of Rule 13 read with Section 22 of the Act and is impermissible," the HC said.

Poll panel announces special summary revision in 4 more states, 2 UTs

Express News Service
New Delhi, November 5

THE ELECTION Commission (EC) on Thursday ordered the Special Summary Revision (SSR) of electoral rolls in four states and two Union Territories (UTs) starting this month, with the final rolls to be published on January 21, 2027.

The SSR will be carried out in Arunachal Pradesh, Mizoram, Odisha, Sikkim, Chandigarh, and Dadra and Nagar Haveli & Daman and Diu, where the Special Intensive Revision (SIR) of electoral rolls has been completed.

The SSR involves updating the existing electoral rolls through additions and deletions, whereas the SIR, launched in 2025 and still underway, involves preparing the rolls afresh.

Writing to the chief electoral officers of the six States/UTs, the EC said that it had, on September 29, issued instructions for a special drive to enrol left-out, young or first-time eligible voters. "Now, in order to facilitate the enrolment of eligible electors with reference to the qualifying date of 1st January, 2027 along with seeking advance applications for the three subsequent qualifying dates of 1st April, 1st July & 1st October, 2027, the Commission hereby directs that the existing electoral rolls shall be revised" by conducting an SSR, the EC said. The exercise will be conducted under Section 21 of the Representation of the People Act, 1950.

As per the schedule, the rationalisation or rearrangement of polling stations should be completed by November 20, and the draft electoral rolls will be published on November 30. After that, voters will have time from November 30 to December 30 to file claims and objections to the draft rolls. The final roll is scheduled to be published on January 21 next year.

Last month, the EC had ordered the SSR in states and UTs where the SIR had been completed (Andaman and Nicobar Islands, Bihar, Chhattisgarh, Goa, Gujarat, Kerala, Lakshadweep, Madhya Pradesh, Manipur, Puducherry, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh, Uttarakhand and West Bengal) and Assam, where it had decided not to conduct the SIR.

Hardeep Singh Puri elected unopposed to Rajya Sabha from Madhya Pradesh

Anand Mohan J
Bhopal, November 5

Petroleum and Natural Gas Minister Hardeep Singh Puri

UNION PETROLEUM and Natural Gas Minister Hardeep Singh Puri was formally declared elected unopposed to the Rajya Sabha from MP on Thursday.

Puri, the BJP candidate for the by-election to the vacant Rajya Sabha seat, was declared elected after the nomination papers of two other candidates were rejected during scrutiny, leaving him as the sole candidate in the contest.

Returning Officer Umesh Kumar Sharma issued the certificate. With Puri not being physically present on the occasion, BJP state president Hemant Khandelwal received the certificate from the Returning Officer. The by-election was necessitated by the resignation of Union Minister of State L Murugan on October 14. Murugan's term was scheduled to end in April 2030.

Puri filed his nomination papers on October 31 in the presence of CM Mohan Yadav, Deputy CMs Rajendra Shukla and Jagdish Devda, Khandelwal and other BJP leaders.

The Returning Officer rejected the nominations of independent candidates Rajkumar Lohani and Kante Sayanna during scrutiny on November 3.

MHA relaxes passport, visa rules for foreign nationals in India

Express News Service
New Delhi, November 5

THE CENTRE has relaxed passport and visa rules for several categories of foreign nationals residing in the country, including certain Pakistani citizens, minority refugees, Sri Lankan Tamils, and Tibetans, according to the The Immigration and Foreigners (Exemption) (Amendment) Order, 2026, published on Thursday.

Under the amended rules released by the Union Home Ministry, Pakistani nationals who entered India on or before December 31, 2009, with the intention to reside permanently, are exempt from standard passport renewal requirements if they cannot renew their travel documents due to the non-possession of a Computerised National Identity Card (CNIC) issued by Pakistan.

"To qualify, they must not have married while in Pakistan or acquired any immovable property there, must have left behind family members who are Indian citizens when going to Pakistan, and must undertake not to return to that country. They must also have no adverse reports from police or security agencies," the notification said.

The rules also exempt members of Hindu, Sikh, Buddhist, Jain, Parsi and Christian communities from Afghanistan, Bangladesh and Pakistan who entered India on or before December 31, 2024, after being compelled to seek shelter because of religious persecution or fear of religious persecution.

The latest amendment also streamlines travel and identification protocols for citizens of Nepal, Bhutan, and India travelling between these neighbouring nations.

EXPRESS special

Voting rights to judicial appointments: When Justice Bhuyan holds court, outside SC

Amaal Sheikh
New Delhi, November 5

VOTING RIGHTS and peaceful dissent, to judicial appointments and discrimination – Justice Ujjal Bhuyan has been speaking his mind, in candour notable for a sitting Supreme Court judge.

Three years after he joined the apex court, Justice Bhuyan has been holding forth on these and other contentious issues at legal and academic forums, especially weekend memorial lectures, for the past few months.

On Saturday October 31, addressing the 12th convocation ceremony of the University of Science and Technology Meghalaya (USTM), he said education should cultivate independent thinking, intellectual curiosity and the ability to question beliefs. "A society that fears questions becomes vulnerable to authoritarianism."

USTM and its Chancellor Mahbubul Hoque have been in the crosshairs of Assam Chief Minister Himanta Biswa Sarma, with the BJP leader accusing the university of "flood jihad", as in deliberately causing flooding of Guwahati, among other allegations.During the USTM speech, Justice Bhuyan also remarked upon the "male-dominated" Supreme Court, with only three of the 35 Supreme Court judges being women, and said women judges should be invited to be part of the Collegium. The strength of the women in the Court "does not reflect the real proportion of women lawyers or women in the country", he said.

Judges are guided by 'Restatement of Values of Judicial Life'. Its Clause 8 states that a judge should not "express views in public on political matters" or on matters that are pending or likely to come up in court. Clause 9 says a judge's judgments should speak for themselves and that a judge should not give media interviews.

Several of Justice Bhuyan's speeches were read in the context of cases being heard in courts, making his interventions particularly notable. Justice Bhuyan is expected to retire from the Supreme Court in August 2029, and is not in line to become the Chief Justice of India.

Voting rights

On October 4, speaking at the valedictory ceremony of the Justice Bodh Raj Sawhney Memorial moot court competition at NALSAR, Justice Bhuyan said the process of "disenfranchising millions and millions of Indian citizens, making them second-class citizens in their own country, in the sense of being citizens without voting rights, such a process is intrinsically arbitrary. No amount of whataboutery can justify it."

The SC is in the process of hearing several petitions over the Election Commission of India's contentious Special Intensive Revision exercise, which has seen allegations of deliberate exclusion of eligible voters.

Justice Bhuyan's remarks drew sharp reactions regarding the limits of public commentary by judges. Former CJI B R Gavai told PTI that a sitting judge of the Supreme Court should not make statements on an issue which is pending adjudication before the same court.

Judicial independence and the Collegium

Speaking at the Principal G V

Justice Ujjal Bhuyan

Pandit Memorial Lecture at ILS Law College in Pune on January 24, Justice Bhuyan commented on the government's role in judicial transfers. "When the Collegium itself records that a transfer is being made at the request of the Central government, it reveals a striking intrusion," he said. This was three months after the Supreme Court Collegium changed its recommendation to transfer Justice Atul Sreedharan from the Madhya Pradesh High Court to the Chhattisgarh High Court, instead shifting him to the Allahabad High Court. The Collegium mentioned that the change was made on "reconsideration sought by the government".

Justice Bhuyan returned to the issue of judicial appointments in August, at the launch of the Vidhi Centre for Legal Policy's Judicial Transparency Index Report, saying that the Collegium not giving reasons for its decisions was "a step back from the principle of transparency". In his address, Justice Bhuyan referred to remarks seen as anti-Muslim by Justice Shekhar Kumar Yadav, then a judge of the Allahabad High Court, at an event organised by the VHP legal cell in Prayagraj in December 2024.

Withholding reasons for an appointment not only denied the public an opportunity to scrutinise the choice but also allowed candidates whose views ran contrary to constitutional values to be appointed, the Supreme Court judge said.

"By not giving reasons, the institution actually does a disservice to many judges who are genuinely outstanding and have done tremendous work... We also create space for individuals to enter the judiciary who may later describe groups of people as 'ants' and make other remarks that are wholly unconstitutional," Justice Bhuyan said.

In the speech, he also criticised the practice of former judges taking up political roles after retirement. "When a former Chief Justice of India says, 'I am going to the Rajya Sabha to bridge the gap between the Judiciary and the Executive', it is fundamentally wrong... There is a fundamental fallacy in it," Justice Bhuyan said. In 2020, former CJI Rajan Gogoi was nominated to the Rajya Sabha by the Narendra Modi government; he has since retired.

Dissent, criminal law

The use of criminal law against people expressing unpopular views as well as restrictions imposed on peaceful protests have also featured in Justice Bhuyan's speeches.

During Ramzan in March this year, 14 Muslim youths were arrested in Varanasi after they organised an iftar gathering on a boat on the Ganga. They were accused of consuming chicken biryani and throwing leftovers in the river. They spent three months in jail before securing bail. During an address at National Law Institute University, Bhopal, the next month, Justice Bhuyan said: "I am sure consuming chicken biryani is not an offence... They were arrested for that very reason."

He added that restrictive bail conditions imposed by courts could discourage citizens from exercising their right to dissent.

In the same address, he criticised the Bombay High Court's refusal to permit a protest in solidarity with Palestine at Mumbai's Shivaji Park.

Justice Bhuyan said he found the court's observations "very amusing". The court had rejected the petitioners' plea against police denying permission to them asking why they wanted to protest over Gaza rather than on issues within India.

At the August convocation of National Law University Delhi, Justice Bhuyan remarked on the role of universities when it comes to protecting dissent. His remarks came amid the controversy at NALSAR after students opposed CJI Surya Kant being invited to their convocation. Bar Council of India Chairman Manan Kumar Mishra then directed state bar councils to not enrol NALSAR's 2026 graduates and sought details of those behind the protest. The directive was later withdrawn. NALSAR is still to hold its convocation.

On August 30, Justice Bhuyan said students should not face punitive action for expressing their views. "In a democracy, the right to question is not an act of defiance. It is an essential expression of citizenship, liberty and constitutional responsibility."

Foreign Secretary Vikram Misri with Nepal Prime Minister Balendra Shah in Kathmandu on Thursday. ANI

In first bilateral trip, Nepal PM Balen to visit India from Nov 22

Yubaraj Ghimire & Shubhajit Roy
Kathmandu, New Delhi, Nov 5

IN HIS first bilateral visit since assuming office in March, Nepal's PM Balendra Shah will embark on a three-day official visit to India from November 22, officials said.

This was the key takeaway from a meeting between Shah and visiting Indian Foreign Secretary Vikram Misri on Thursday in Kathmandu. The decision is a turnaround for the Nepalese PM, who had earlier decided to not travel overseas for the first year in office.

According to officials, Shah responded positively—that he is looking for a "result-oriented" visit—when Foreign Secretary Misri paid him a courtesy call, and conveyed PM Narendra Modi's invitation to him.

Shah thanked India and Prime Minister Modi for being the first respondent when Nepal was hit by destructive flash floods in August.

According to the Prime Minister's Office in Nepal, Misri apprised Shah of regular meetings between the two sides on water resources, energy, trade, transit and aviation.

"The Foreign Secretary of India highlighted the wide-ranging engagement and overall progress in diverse areas of bilateral cooperation, and discussed possible outcomes and initiatives in the context of the upcoming visit of the Prime Minister of Nepal to India," according to a joint statement issued at the end of Misri's two-day visit.

During his visit, Misri also called on Finance Minister Swarnim Wagle, Foreign Affairs Minister Shisir Khanal, Energy, Water Resources and Irrigation Minister Biraj Bhakta Shrestha and Infrastructure Development Minister Sunil Lamsal.

On Wednesday, Misri held delegation-level talks with his Nepalese counterpart Amrit Bahadur Rai during which they "reviewed on-going cooperation across diverse sectors and discussed ways to further strengthen the mutually-beneficial partnership between India and Nepal," the statement said.

Foreign Secretary Misri also interacted with a group of parliamentarians, including members of the India-Nepal Parliamentary Friendship Group, and Nepal's Parliamentary Committee on International Relations and Tourism.

FULL REPORT ON WWW.INDIANEXPRESS.COM

In latest 'vote chori' charge, Rahul targets BJP over Gokul mandate; Fadnavis hits back

Zeeshan Shaikh & Alok Deshpande
Mumbai, November 5

LAST MONTH, Congress leader Satej Patil took on two Cabinet ministers, two MPs, and 10 MLAs of Maharashtra's ruling Mahayuti alliance and defeated them in the election to the Kolhapur Gokul milk cooperative. However, the BJP-led alliance's attempts to gain control of the key institution have not stopped and have triggered a political row.

On Wednesday, the Maharashtra Cabinet approved a proposal that could alter the balance of power in the cooperative, giving the government the power to appoint five directors to its board.

Leader of Opposition (LoP) Rahul Gandhi, who is running a "vote chori (theft)" campaign against the BJP, wrote on X Thursday, "In Gokul, milk producers have defeated the BJP. So the BJP changed the rules after the election — stuff in 4 directors, turn 12 into 16, steal the majority. This is theft of the milk producers' votes — adulteration in the mandate."

Hitting back, Maharashtra Chief Minister Devendra Fadnavis said the decision to appoint directors at Gokul was taken as per law. Maharashtra Medical Education Minister Hasan Mushrif also defended the intervention, saying it was necessary to restore democratic functioning and hand administration over to elected representatives.

Meanwhile, Shiv Sena (UBT) MP Sanjay Raut urged the Opposition Maha Vikas Aghadi to come together on the issue, while NCP (SP) MLA Rohit Pawar called for a "gherao" of Gokul Dairy during the chairman's election.

The government's decision marks a significant escalation in the battle for control of one of Maharashtra's most influential cooperative institutions. Having failed to dislodge Patil's panel through the October 19 election, the ruling alliance could now gain a foothold through changes to the Maharashtra Cooperative Societies Act.

DHANANJAY KHEDKAR

Maharashtra CM Devendra Fadnavis and other BJP leaders at 'Loktantra Bachao, Arajakta Hatao' rally in Nagpur on Thursday.

Patil's Rajarshi Shahu Shetkari Samvichari Aghadi won 13 of the 25 seats in the cooperative, against 12 secured by the Mahayuti-backed panel. However, the 12 directors from the ruling alliance stayed away from the board meeting to elect the chairman, denying Patil's panel the 14 members required for a quorum.

The Cabinet decision potentially gives the Mahayuti a way to influence the board's composition. Patil has announced that he will challenge the government's decision in the Bombay High Court.

Established on March 16, 1963, the Kolhapur District Cooperative Milk Producers' Union, popularly known as Gokul, is among Maharashtra's largest dairy cooperatives. It is connected to nearly 4.41 lakh milk producers across 1,810 villages. Control over Gokul therefore offers political influence extending deep into the rural economy of Kolhapur.

The Cabinet's Wednesday decision follows a letter written by senior BJP minister Chandrakant Patil to Fadnavis on October 16, two days before the Gokul election. Patil had proposed increasing the number of government-appointed directors from two to four in cooperative institutions. He also proposed increasing number of nominated directors from two to four, requiring amendments to the Maharashtra Cooperative Societies Act.

The timing of the proposal had prompted the Opposition to allege that the government was attempting to change Gokul's board composition after failing to win the election.

Reacting to the decision, Patil said, "If the government's policy is to disregard the people's mandate... then there is no point in holding elections ...Cancel all elections, appoint government nominees and let them run sugar factories, spinning mills and municipal corporations."

The next chapter in the battle will unfold at the November 10 board meeting to elect Gokul's chairman.

Festival Bonanza

The changing face of India's festive economy

THE LIGHTS ARE up, diyas are stacked, and markets around the country have begun to hum. This signifies the onset of Diwali—the festival of vibrant lights. The joyous occasion not only lights up the homes but also fills the heart with warmth and happiness.

Celebrated over five days during the auspicious months of Ashwin and Karthik (October-November), Diwali is marked by festive gatherings, shopping sprees and exchange of gifts. But behind these lights and glitters lies a deeper meaning—the festival marks the triumph of good over evil, the welcome of prosperity and the promise of a fresh beginning. The day is closely associated with the worship of Lakshmi, the goddess of wealth and abundance. The time is considered inherently auspicious to purchase expensive items such as gold, jewellery, automobiles, electronic items and houses.

Brands and shops roll out special offers, shoppers step out to buy, and the spending spreads through the economy, from big retailers to the corner store.

Tradition and togetherness

Festivals hold a special place in India's social and cultural fabric. Each celebration has its own customs, beliefs, and regional traditions, yet the underlying emotions remain remarkably similar: togetherness, gratitude, prosperity, and hope. Whether it's about decorating homes, exchanging gifts, preparing festive meals, visiting places of worship or welcoming friends and relatives, these traditions bring people closer and strengthen community bonds. The festive season is also associated with new beginnings and important purchases.

Consumer spend in focus

To understand the shopping spree, one needs to understand the festive arch. With such a varied set of traditions and added rituals, what unites all the folks of the nation is the idea of renewal. This belief has made the festival a commercial event and helped it reach a massive scale. Retailers across categories prepare months in advance, introducing new collections, expanding product availability and announcing promotional campaigns.

Festive bank deals

Financial institutions play an important role in India's festive consumption cycle. Banks introduce special campaigns to make products and services more attractive to customers. These offers include instant discounts, cashback, reward points, reduced processing fees, loan concessions and flexible EMI options.

Mindful celebrations

While shopping and consumption remain an integral part of the festive season, there is also growing awareness around responsible spending and sustainable celebrations. People are increasingly exploring locally made products, reusable decorations, eco-friendly packaging and gifts that have practical or lasting value. Supporting small businesses and local artisans can help ensure that the benefits of festive spending reach a wider section of society.

A Diwali message filled with joy and cheer

Pankaj Jawa
Managing Director & Chief Executive Officer of ROCSTA India

DIWALI IS A celebration of prosperity, renewal, and the triumph of innovation over traditional constraints," said Pankaj Jawa, managing director & chief executive officer of ROCSTA India.

"As we light our homes and businesses this year, ROCSTA India is proud to illuminate the commercial landscape with a vision of sustainable growth. Our strategic alliance with TRIM represents more than just a business partnership; it is a coming together of shared values. We are combining ROCSTA's heavy-duty cooling capabilities with TRIM's cutting-edge wellness technology to provide Indian businesses with an unmatched suite of premium utility solutions. We extend our warmest wishes for a prosperous, healthy, and successful Diwali to all our channel partners, clients, and stakeholders across India."

Lighting up dreams, empowering aspirations with Union Bank of India

DIWALI IS A festival that symbolises hope, prosperity, new beginnings and the fulfilment of aspirations. It is also an occasion to reaffirm our commitment towards building a financially empowered and prosperous society. At Union Bank of India, we believe that banking goes beyond providing financial services; it is about supporting dreams, creating opportunities and contributing to the economic progress of individuals, families and the nation.

Retail lending plays a significant role in driving financial inclusion, wealth creation and socio-economic development. Through our diverse range of retail loan products, we endeavour to bridge the gap between individual aspirations and financial resources, enabling customers to achieve important milestones in life.

Our home loan offerings empower families to realise their dream of owning a house, providing them with a valuable long-term asset and a sense of security. Vehicle loans facilitate mobility and connectivity, helping individuals meet their professional, educational and personal requirements. Education loans open doors to quality higher education and skill development, enabling young minds to pursue their ambitions irrespective of their financial background. Similarly, personal loans provide timely financial support for important life events and unforeseen requirements, offering convenience and financial flexibility.

Beyond meeting immediate financial needs, retail credit also contributes to long-term financial well-being. Regular repayment through EMIs inculcates financial discipline, while timely servicing of loans helps customers build a healthy credit history and strengthens their future borrowing capacity. More importantly, access to formal institutional credit reduces dependence on unorganised sources of finance and protects borrowers from exploitative lending practices.

As a responsible banking institution, Union Bank of India remains committed to making credit accessible, affordable and customer-centric. We are continuously leveraging technology, simplifying processes and improving turnaround times to deliver a seamless borrowing experience. Our extensive branch network, digital platforms and dedicated workforce ensure that customers receive appropriate financial solutions tailored to their aspirations.

During this festive season, we invite customers to explore our attractive retail loan offerings including waiver on processing charges in home and vehicle loans and take confident steps towards fulfilling their dreams. Every home purchased, vehicle acquired, education pursued and aspiration realised contributes not only to individual prosperity but also to the larger growth of the economy.

This Diwali, let us celebrate not just the festival of lights, but also the light of opportunity, financial independence and prosperity. Union Bank of India is proud to be your trusted financial partner in every milestone of life.

Wishing everyone a very Happy, Prosperous and Joyful Diwali!

BLO suspended over deletion of 26 names from UP electoral rolls

Press Trust of India
Bareilly, November 5

A BOOTH-LEVEL Officer (BLO) was suspended after the names of 26 eligible voters were allegedly deleted from the electoral rolls in a village , with locals alleging the deletions were carried out in collusion with a former village head, officials said Thursday.

District Magistrate Avinash Singh has ordered a detailed inquiry into the matter and said strict legal action would be taken if established that the names were deliberately removed as part of a conspiracy.

A complaint was lodged in this regard by Rahul Gangwar, current village head of Mohammadpur gram panchayat in Shergarh block.

He alleged Nafis Mohammad Khan, an assistant teacher at composite school in Mohammadpur and assigned BLO duties, colluded with former village head Rehman Khan to get the names of 26 Hindu voters deleted from the electoral rolls in exchange for a hefty sum.

Following the complaint, an inquiry was conducted at the levels of the SDM and BDO. A three-member committee questioned the BLO and sought documents explaining the deletion of the names.

During the preliminary inquiry, the BLO failed to provide satisfactory evidence or valid reasons for the deletions.

Based on the inquiry report, Basic Shiksha Adhikari Dr Vinita suspended Khan with immediate effect. During the suspension period, he has been attached to the composite school in Sahsa village of Meerganj block.

The SDM and BDO forwarded their findings to the election office and BSA after the allegations were found to have prima facie substance, the DM said.

Singh said the administration is examining whether the names had been removed deliberately as part of a conspiracy or due to communal prejudice, or whether the incident resulted from a technical error. A separate committee has been constituted to investigate these allegations.

The DM said any deliberate interference with the electoral process would not be tolerated and those found responsible would face strict action.

Bodies of 2 more trekkers found in Uttarakhand, search on for remaining 2

Vidheesha Kuntamalla
Dehradun, November 5

THE BODIES of two more trekkers, who went missing after an avalanche struck the Kedartal trekking route in Uttarakhand's Uttarkashi district, were recovered on Thursday — taking the death toll to six. Two others, meanwhile, remain missing.

According to an Action Taken Report issued by the Uttarkashi District Emergency Operations Centre, the bodies of two men were recovered from separate locations during a search operation conducted by a joint team of SDRF and Nehru Institute of Mountaineering.

The bodies have been brought to the base camp, where the rescue teams are stationed, and will be airlifted to the Matli helipad on Friday.

Thursday's search operation began at around 9 am and concluded at 3.30 pm. A fresh search operation will be conducted on Friday to trace the two remaining missing trekkers. The two bodies recovered were identified as that of Rintu Mandal (40), son of Sunil Chandra Mandal, and Uday Ghosh (30), son of Dinesh Ghosh. Both were residents of Salbani in West Bengal's Bankura district.

The rescue operation is being conducted by the 10-member team in the Kedarkhadak area, amid difficult terrain and challenging weather conditions. The trekkers were expected to return on October 29. However, due to an avalanche they were trapped.

Suspecting an affair, UP man burns wife alive

Express News Service
Lucknow, November 5

AN ARGUMENT between a couple over an alleged extramarital affair ended in a tragedy in Uttar Pradesh's Kannauj, with a man allegedly tying his wife to a chair and burning her alive.

The woman's shrieks were heard but no one could rescue her as the couple's house went up in flames. Police arrested the accused, Sukhbir Singh, before he could leave the district. He had escaped with his two children after allegedly setting his wife on fire.

Mayank Mishra, Circle Officer of Chhibramau said primary probe revealed Singh, who had been working in Haryana's Hisar district suspected his wife, Sonam (30), of being in an extramarital affair with someone in his village in Kannauj. He returned home two days ago, and the couple reportedly had arguments over this since.

Early on Thursday, the neighbours heard Sonam's screams and saw the house on fire. Local residents called the police, and some tried to throw water on the fire. A fire engine arrived later and put out the fire. Police said circumstantial evidence indicates Sonam was tied to the chair, and set on fire. The room smelled of petrol, and a burnt bottle with petrol was found, police said.

The Circle Officer said that Singh had left the burning home with his son and daughter, aged under 10 years — and was trying to leave for Hisar when the police caught him on Thursday afternoon.

An interrogation of the accused and his children confirmed the altercation between the couple turned violent on Thursday morning.

India test-fires quasi-ballistic missile Pralay off Odisha coast

New Delhi: India on Thursday successfully test-fired quasi-ballistic missile Pralay which is capable of carrying conventional warheads. The missile was test-fired from Dr APJ Abdul Kalam Island off the coast of Odisha, the defence ministry said.

Developed by DRDO, Pralay is a short-range surface-to-surface missile with a payload capacity of 500-1,000 kg. "With this successful test, the induction of the system has become imminent," the ministry said.

Defence Minister Rajnath Singh said on X, "...The test was conducted as part of user evaluation trials and successfully met all the stipulated objectives, as validated by data captured through various range instruments." This successful trial marks "another significant milestone" in strengthening India's indigenous defence capabilities, he said. Research Centre Imarat, Hyderabad, along with other DRDO laboratories, has indigenously developed the missile, the ministry said. PTI

DELHI CONFIDENTIAL

Language Lesson

CONGRESS MP Shashi Tharoor rarely misses an opportunity to conduct an impromptu language class on social media. When British diplomat Andrew Fleming posted a photo from a Keralam beach, Tharoor invited him to visit the state more often, saying: "Keralam welcomes visitors". A follower questioned why Tharoor used "Keralam" when the state's official tourism handle still called itself "Kerala Tourism". Tharoor was ready with the grammatical explanation. "Keralam is the noun, now officially adopted as the name of the state. Kerala is the adjective," he wrote, offering the distinction between "Malayalam" and "Malayala" as another example. And the message wasn't directed at the follower alone, it said: "For everyone out there..."

Farmer Outreach

AGRICULTURE MINISTER Shivraj Singh Chouhan's parliamentary seat Vidisha in MP is set to get a new Krishi Vigyan Kendra (KVK) at Bhaukhedi village. On Thursday, officials from the Agriculture Ministry, including Mangi Lal Jat, Secretary, Department of Agricultural Research and Education, and Director General of the ICAR, visited the proposed site to review plans for strengthening agricultural extension services and expanding outreach to farmers.

Write to Modi: Shah dares LoP to seek special session on SIR

Sukhbir Siwach
Chandigarh, November 5

UNION HOME Minister Amit Shah on Thursday challenged Congress leader Rahul Gandhi to write to Prime Minister Narendra Modi seeking a special session of Parliament to discuss the Special Intensive Revision (SIR), asserting that the government was ready for a debate on the issue. At a BJP rally in Karnal, Shah also questioned Gandhi over his recent Vietnam visit.

"You have just returned from Vietnam... How many days did you stay in Vietnam? Whom did you meet? Why did you go, and what work did you have there? You also hold a constitutional position and are the Leader of the Opposition. The people have the right to know," Shah said at a '*Loktantra Bachao, Arajakta Hatao*' rally of the BJP.

On the issue of SIR, Shah challenged Gandhi to seek a special session of Parliament. "You challenge Narendra Modi to a discussion... If you want a discussion, just write a letter to Modi ji. We are ready to convene a special session of Parliament to discuss SIR..."

Union Home Minister Amit Shah and Haryana Chief Minister Nayab Singh Saini during the inauguration of 'Shaheed Samarak' (Martyrs' Memorial) in Ambala on Thursday. PTI

"Rahul Gandhi ji, you do not allow Parliament to function. You do not hold discussions on issues. Creating a ruckus and staging walkouts in Parliament — you have made these the culture of the Congress," he added.

"You do not allow Parliament to function and gather crowds on the streets to spread anarchy. What do you think? Will our 80-year-old democracy fall for your deception? Rahul ji, we are people of the streets ourselves....," Shah said.

Claiming that the BJP's 'Loktantra Bachao, Arajakta Hatao' rallies had been organised across 600 districts, Shah said they had served to give a strong response to Gandhi. Shah also accused Congress leaders of disrespecting Parliament while invoking the Constitution.

"They wave the Constitution in their hands, but instead of discharging their constitutional responsibilities, they insult Parliament and then talk about democracy," he said.

Referring to the electoral defeats of the Congress, Shah said, "After the 2024 elections, the people of the country continued to defeat Rahul Gandhi and the Congress in elections held across the country. Where was the SIR in 2014, 2019 and 2024? Yet, you lost even then."

Accusing the Congress of facilitating the registration of infiltrators as voters, Shah said, "Three crore people did not even appear before the Election Commission. Do you know why? Rahul Gandhi's party had got the names of infiltrators registered as voters. Rahul ji, you can beat your chest as much as you want for infiltrators, but I want to state unequivocally that the BJP is committed to identifying infiltrators, removing their names from voter lists and then sending them out of the country, one by one."

Later in the day, Shah inaugurated a memorial in Ambala Cantt built in honour of those who sacrificed their lives during the first war of independence in 1857. The memorial, named '*Azadi Ki Pehli Ladai Ka Shaheed Smarak*', is spread across 22 galleries over 22 acres.

If Home Ministry beyond your control, go back to being BJP chief: Cong hits back

Lucknow: Taking strong objection to Union Home Minister Amit Shah calling INDIA bloc's November 1 rally at Delhi's Ramlila Maidan a '*ghuspathiya bachao*' event, the Congress on Thursday said he was unable to handle his own ministry and should consider moving back to being the BJP chief.

Addressing a gathering after the BJP's '*Loktantra Bachao, Arajakta Hatao*' march in Karnal earlier in the day, Shah said the INDIA bloc's rally was not a 'vote bachao' campaign but a "ghuspathiya bachao" rally.

In response, Congress' media and publicity department head Pawan Khera said, "If the Home Ministry is beyond your control, why are you still clinging to that chair? In 7 years, the country's 3 crore infiltrators haven't been managed. Manipur hasn't been under control for 3 years. Now even Arunachal Pradesh isn't being managed. Pulwama happened; Pahalgam happened.. It's not in your league. Just let it go," Khera said in his post in Hindi on X, adding Shah should go back to heading the BJP. ENS

Have a plan for Singur, initial talks on: CM

Atri Mitra
Kolkata, November 5

ASSERTING THAT his government has a "plan for Singur", West Bengal Chief Minister Suvendu Adhikari on Thursday said "preliminary talks" have started with Ashok Leyland for setting up a heavy vehicle manufacturing unit at the site of the Tata Nano factory that was mired in land acquisition protests two decades ago.

Unveiling the new Investment Promotion Policy along with Finance Minister Swapan Dasgupta and Industries Minister Tapas Roy in New Town near Kolkata, the chief minister said his government would neither follow the Left Front government's "forcible" land acquisition nor the TMC's policy of staying away from making land available to the industries in the state.

"We will neither have a forcible land acquisition policy like the Left Front, nor will we have a flawed land policy like the TMC, asking industries to buy their own land without any support from the government," Adhikari said.

"Our government will not do what the previous government did. It did not acquire a single piece of land and told industrialists that they have to acquire land if they want to set up industry in the state," he added.

Instead, the chief minister said, "We are making arrangements to buy land for creating a land bank for industries."

CM Suvendu Adhikari unveiling the Investment Promotion Policy in Kolkata, Thursday. PTI

Asserting that his government was committed to industrialisation and creating an industry-friendly atmosphere in the state, he accused the CPI(M) of destroying West Bengal's industrial base through aggressive trade union politics, while alleging that the TMC's "flawed" land policy contributed to the failure of its industrialisation efforts over the last 15 years.

"We will certainly do something in Singur," said the chief minister. "We have held preliminary talks with a reputed commercial heavy vehicle manufacturer, Ashok Leyland. But I will not add a single word to it since it is yet to be concrete... I can only say that we have a plan for Singur."

SC asks Allahabad HC to hear Azam's plea on ED arrest

New Delhi: The Supreme Court (SC) on Thursday asked the Allahabad High Court (HC) to hear a plea filed by Samajwadi Party (SP) leader Mohd Azam Khan on November 16, challenging his arrest by the Enforcement Directorate (ED) soon after his release in a dual PAN card case.

A bench, comprising CJI Surya Kant and Justice Joymalya Bagchi, directed the SC registry to transfer the petition's original records to the Registrar General of the Allahabad HC within 2 days. It also requested the division bench to consider Khan's prayer for an interim relief the same day. ENS

NECC DAY

Late Dr. B. V. Rao
(1935-1996)

On his 91st Birth Anniversary,
we salute the Father of Indian Poultry Industry
Padmashree Dr. B. V. Rao, Who rose above and
beyond the call of duty and restructured
the Indian Poultry Industry as a modern,
Scientific Industry driven by technology.
On this occasion, we rededicate ourselves to
his dreams - making India
the No. 1 country
in the World of Poultry...

NECC

BOMBAY DYEING

ALERT !! SELLING OF BOMBAY DYEING COUNTERFEIT PRODUCTS

Bombay Dyeing has been informed that certain individuals/entities are illegally selling counterfeit Bombay Dyeing **"CORAL VINE"** in streets, shops, and societies, falsely claiming them to be genuine by using fake labels. These sellers falsely claim to be authorized by Bombay Dyeing, these products are being manufactured by fake entity under the name **"CORAL VINE"**, NOT authorized by Bombay Dyeing everywhere.

IMPORTANT POINTS TO NOTE:
- **"CORAL VINE"** is no more being manufactured by BDMC.
- These sellers are **NOT** authorized to use our name, logo, or claim any affiliation with Bombay Dyeing.
- These counterfeit products are inferior in quality to BDMC products and may have health issues.
- Please note Bombay Dyeing products are only being sold through authorized dealers and retailers.
- We DO NOT authorize selling our products on footpaths, roads and in open markets etc. Below are some images, which are unauthorized selling of our products in societies and roads etc.
- They carry Bombay Dyeing fake identity cards to enter the premises and fake permission letters to sell products.

Always verify the hologram on Bombay Dyeing products as given below.

WE ARE TAKING STRICT LEGAL ACTION AGAINST THESE ILLEGAL ACTIVITIES, INCLUDING FILING COMPLAINTS WITH LOCAL AUTHORITIES.

Contact us: You are our loyal customers, incase if you come across any such counterfeit products being sold, or have information about such activities.
Kindly email us on below

Revamped Agnipath casts a wider net

THE CHANGES to the Agnipath scheme for armed forces recruitment, cleared by the Union cabinet on Wednesday, expand its reach. Rolled out in 2022, the scheme envisaged a reduction in the age profile of the armed forces while making the permanent force levels leaner. This, in turn, was to help address an unstated concern: The forces' hefty wage and pension bill. However, the exercise was fraught, facing criticism on military grounds — that having such a high proportion of contractual personnel serving for just four years would compromise training, experiential learning and ultimately, effectiveness, as warfare and technology grow more complex. It also faced youth protests and political opposition over the narrowing of a career path seen as a lifeline by many. By opening up the possibility of further service to the 75 per cent of Agniveers who would have had to exit after four years under the original scheme, the changes address some of those concerns, and respond to challenges that have become evident in the interim.

The announcement, just before the tenure of the first batch of recruits was due to end, comes after the three services themselves pushed for a higher retention rate for Agniveers. As this paper reported in July, the Navy wanted to retain around 75 per cent in service, while the Army and the Air Force wanted 50 per cent. This was because a need was felt to retain more trained and experienced personnel. The forces also have a shortfall of troops to make up for, a problem exacerbated by a two-year, pandemic-era recruitment freeze before Agnipath's introduction. The Army, for instance, had a shortfall of 1.8 lakh personnel, this paper reported in November 2025.

This is not a return to permanent recruitment. As Chief of Defence Staff (CDS) General N S Raja Subramani said on Wednesday, the 75 per cent not initially selected will have the option of serving for two more years with enhanced salaries, after which they may enrol as regular soldiers if they meet certain criteria. These include adaptability, discipline and no vigilance cases. Thus, this preserves the flexibility afforded by Agnipath while allowing the services to retain the skilled personnel they need for the future. It also creates a more attractive, and somewhat more assured, career pathway — initiatives to ensure jobs for ex-Agniveers through reservation in, for instance, paramilitary forces, have been criticised as inadequate. Now, such quotas will not be needed, the CDS has said. The revamped Agnipath could help both effectiveness and recruitment, and speak to the aspirations of the young.

A new conversation is needed on farm fires

THE COMMISSION for Air Quality Management (CAQM) has cracked down on stubble burning in Punjab, a day after Delhi's Environment Minister Manjinder Singh Sirsa blamed farm fires in the state for the recent spike in the Capital's air pollution. After issuing show-cause notices to deputy commissioners and senior police officers in nine districts, the Commission has warned officials in 12 districts of personal accountability for enforcement lapses. Crop-residue burning is illegal, with fines ranging from Rs 5,000 to Rs 30,000. Though farm-fire incidents have declined over the past three years, the reduction, particularly in Punjab, has not evidently been sufficient to translate into an appreciable improvement in air quality. The CAQM's decision is timely, especially as it coincides with the peak stubble-burning season. However, it is time for authorities responsible for clean air in the NCR and adjoining areas to address a more fundamental question: Why do a large number of farmers continue to set paddy straw on fire despite several court orders, years of enforcement and a cohort of policies aimed at enabling a transition to cleaner alternatives?

Studies by ISRO, Council on Energy, Environment and Water (CEEW) and iFOREST indicate that peak stubble burning has shifted from early afternoon to late afternoon and evening. Since satellites pass over farms at fixed times, fires lit later may go undetected. The CAQM's new portal, linking satellite evidence with field-level action, could bridge this gap. Its success will depend on agriculture officers verifying alerts and reporting violations.

But lasting progress will depend on making paddy straw collection and utilisation viable. By all accounts, procurement of biomass for industrial uses has not expanded enough to offer farmers reliable markets. In-situ management remains costly for small cultivators. As a CEEW study noted last month, "Farmers are increasingly removing straw from their fields, but returns for most of them remain inadequate." This year, unusual weather, including October rainfall, delayed harvesting and compressed the window for wheat sowing. In a climate of ecological and economic uncertainty for farmers, punitive measures alone will not lead to tangible behavioural change. Governments must improve access to machinery, build local collection networks and secure dependable buyers for straw. Most importantly, the free supply of electricity for irrigation must end. Having to pay for water will force Punjab farmers to reduce paddy acreage, which should address the problem of farm emissions.

He went everywhere, wrote about everything

IT WOULDN'T be too much to describe Simon Winchester's first encounter with the world of journalism as constituting a Damascene conversion. In a 1997 interview to *The Independent*, the writer described feeling like Paul on the road to Damascus when he read *Coronation Everest* by Jan (then James) Morris, a reporter for *The Times* who was stationed 25,000 ft up the mountainside in order to break the news of Sir Edmund Hillary and Tenzing Norgay summiting the world's tallest peak.

Correspondence with Morris encouraged Winchester, who died this week at 82, to abandon a budding career as a geologist and take up the "world's best job" as a journalist. His early years reporting on the Troubles in Northern Ireland for *The Guardian* led to his first book, *In Holy Terror*, but he established his name as one of the most erudite and entertaining writers of non-fiction with *The Surgeon of Crowthorne*, about the making of the *Oxford English Dictionary*.

He went everywhere, from the Nixon White House to the violently splintering Balkans, from the Yangtze in China to Equatorial Guinea where he "lived on bananas and stewed rats". He wrote about everything, from histories of the Atlantic and Pacific oceans to the story of William Smith, the father of modern geology. If curiosity provoked his many expeditions, Winchester's enormous capacity for facts and anecdotes and the ability to synthesise them so that a larger idea may be illuminated is what made him one of the most compelling storytellers of his time.

India's time will come. For now, it is a middle power in a bi-multipolar world

SANJAYA BARU

FROM HIS debating days at Jawaharlal Nehru University, External Affairs Minister Subrahmanyam Jaishankar has had a knack for wit and repartee. Not surprisingly, therefore, when he found a European interlocutor wondering whether India, like all European powers, was a "middle power", not a Big Power like the United States and China, Jaishankar was quick to respond with a clever one-liner — we are a "power in the middle".

The rapid rise of China over the past two decades and the slowing down of the Indian growth process over the past decade have raised new questions about India's place in the world. Economic status alone does not define either power or influence in world affairs. But it matters. It was not a happenstance that the view of India within the international community began to change at the turn of the century when the economy began to perform better and India's skills in the then new field of information technology were globally sought after.

Recall the fact that the Goldman Sachs report on emerging economies, clubbing India with China, Brazil and Russia, the famous BRIC report, was published in 2001. In the same year, the influential American foreign affairs analyst, Stephen P Cohen, published his book *India: Emerging Power*. Through the first decade of this century, several such books were published overseas and in India. The Japanese diplomat Hiroshi Hirabayashi went to the extent of titling his book *India: The Last Super Power*. By 2007 an India sceptic like Singapore's founder-mentor Lee Kuan Yew referred to China and India as "two engines" that would power the rise of Asia.

What made the difference? Clearly, the increase in India's long-term growth from 3.5 per cent in 1950-80 to 6.0 per cent in 1980-2010, with a peak of over 8.0 per cent growth achieved during 2003-2010, made the world look at India with new eyes. India was beginning to show the potential to catch up with East Asian Tigers and the then rapidly rising China. The economy also demonstrated the capability to survive economic sanctions imposed by the US, Japan and other US allies in 1998 after the country conducted nuclear weapons tests and made public her nuclear power capability.

Conscious of the impact of economic performance on the country's power status, the strategic affairs guru, K Subrahmanyam, tasked me to write a paper for the National Security Advisory Board in 2000 that was eventually published as "Strategic Consequences of India's Economic Performance". The strategic affairs community recognised that strong economic performance is key to India's global status.

There was, to be sure, a time when the world did view a poorer India as a "great power" because of what it had come to represent as the first post-colonial, democratic nation in the developing world. India's support for anti-colonial movements and record as a plural, secular democracy imparted a global stature that was not yet warranted by economic performance. In the long run, however, economic performance and capability matter.

Developments over the past decade have contributed to the present scepticism about India's global status. First, the non-fulfilment of the exaggerated claims made by Prime Minister Narendra Modi about India's place in the world. Not only did Modi claim an ideological pre-eminence for India as a "*vishwaguru*", he also made premature claims on economic performance by stating that by 2020 national income would be $5 trillion. Last year, his officialdom rushed to claim that India was now the third largest economy, when in fact it is still the sixth largest.

> At one time, the world did view a poorer India as a 'great power' — as the first post-colonial, democratic nation in the developing world.

As a purely political slogan in a contentious democracy, one can understand such claims. However, these claims were then buttressed by books and conferences that may well have made the PM believe that he was prescient in his declamations. Senior officials, scholars and journalists joined the bandwagon. Many westerners worried about the rise of China went along with the narrative in the hope that India would join the West in standing up to China. India's decision to join the Quad and enhance military engagement with the US added to such expectations.

The problem is that, between 2010 and 2025, not only did China's economy take off, à la W W Rostow, but China emerged as a knowledge power with advanced capabilities in science and technology. On the other hand, the BJP's obsession with electoral dominance at home and the unleashing of bigotry, majoritarianism and antediluvianism have combined to damage the narrative of India's rise.

The fact that economic growth rate has not been able to significantly rise above the long-term average of around 6.0 per cent only affirmed the view that India's emergence as a Big Power will take more time. It is now evident that Modi's other slogan about a Viksit Bharat by 2047 is also tall talk since the economy would have to grow well above 8.0 per cent per annum over the next decade for that goal to be met.

There is in fact no harm in conceding that in the foreseeable future we will remain a "middle power". Our time will come but effort is required. Meanwhile, it is India's status as a middle power and a developing country that will in fact empower its voice in world affairs. Even to get elected to the UNSC, a diplomatic objective that Jaishankar has been tasked to meet, it is an India that speaks for the weak that will fetch the votes. Not an India that desperately courts the powerful.

In the foreseeable future, the global balance of power system is best seen as a "bi-multipolar" system, with the US and China as the two dominant powers with global reach and several other middle powers defining the many ends of a multipolar power structure. In this system, there is no point in India pretending to be a third big power. It is best to build alliances with other middle powers including Russia, the EU, the UK, Japan, Brazil, South Africa and other like-minded countries.

Both the US and China pose a challenge for India. Neither is an option in dealing with the other. Neither can be weaponised against the other. Ensuring stability in relations with both should remain a priority in the present phase of bi-multipolarity.

Zero FIR is progressive, but it is not enough

AUDREY DMELLO

ON AUGUST 4, the chairperson of the National Commission for Women, Vijaya K Rahatkar, described the Zero FIR as one of the new criminal laws' most progressive provisions. Under Section 173 of the Bharatiya Nagarik Suraksha Sanhita (BNSS), a woman can walk into the nearest police station to get her FIR registered, regardless of where the offence has taken place. In her words, it "places accessibility before technicalities".

It was the 2013 Justice Verma Committee, constituted in the aftermath of the December 2012 gangrape, that first recommended the recording of Zero FIRs in cases of sexual violence.

Since then, the Ministry of Home Affairs (MHA) has issued several advisories stating that an FIR must be registered irrespective of territorial jurisdiction and that refusal to do so will result in prosecution and disciplinary action against the police officer.

Yet, even today, police remain resistant to filing Zero FIRs. It takes painful persuasion and reiteration of the law to convince them to do so. But what happens immediately after a Zero FIR is filed? Accessibility ends and the ordeal of the victim begins. The FIR is transferred to the police station with jurisdiction, and every procedure thereafter is done in that jurisdiction.

Take the case of Mitra (name changed), a 15-year-old orphan, who lives in one of the poorest Mumbai slums. Mitra lives with her two brothers, one 18 and the other 13. Her elder brother does delivery work to support the family. None of the siblings has attended school since their father died four years ago.

Mitra was taken by her friend to Raigad district, where she was brutally raped and beaten. When she missed her periods, she shared her ordeal with a local NGO. With great difficulty, we filed a Zero FIR at a police station near her home. The next day, the case was transferred to Raigad, and the police insisted that Mitra travel to Raigad, a four-hour journey each way from her home, for the procedure. We explained to them Mitra's vulnerabilities — her pregnancy, her motion sickness, her younger brother being home alone, the loss of wages for her elder brother — but they refused to budge. They even threatened us with severe action if we did not cooperate.

Mitra and her elder brother were forced to travel several times to Raigad at their own cost. They were made to wait for hours for spot identification, panchnama, Mitra's medical examination — which took a few days — the recording of her statement before a magistrate, and production before the Child Welfare Committee.

We had spoken to the government hospital near her home for the medical termination of Mitra's pregnancy, but the police refused.

Eventually Mitra was admitted to a shelter in Raigad. To conduct her MTP, Mitra was admitted to a hospital where she spent almost 20 days with no clear information on when the procedure would begin. The child victim was not informed who her support person was.

Her elder brother was made to run from pillar to post simply to meet her. For the past one-and-a-half months, the police have repeatedly called him to the Raigad police station and court. Mitra has not yet been granted the Maharashtra victim compensation, even though interim compensation is meant to reach her within seven days.

A Zero FIR is a good provision, but it must be extended to every procedure where the victim is required to attend thereafter.

To make the Zero FIR truly accessible, the state must issue clear, enforceable directions that ensure survivors receive support at their doorstep. Two suggestions come to mind: In the case of a Zero FIR, as far as possible, the medical examination, magistrate statement recording, Production before the Child Welfare Committee and shelter placement should be arranged near the survivor's place of residence, and if a survivor must be called to another district, the state must provide transport, not only for her but for a family member or support person accompanying her.

The measure of a progressive law is how it treats a victim after she finds the courage to speak. If reporting rape costs a family its income, safety and stability, it's not surprising that families choose silence.

The writer is director, Majlis, a legal centre for women and children

> A Zero FIR is a good provision, but it must be extended to every procedure where the victim is required to attend thereafter. The state must issue clear directions that ensure survivors receive support at their doorstep

When the forest guard's wisdom meets the algorithm

RAJESH GOPAL

WHEN PROJECT Tiger started in 1973, its greatest asset was the forest guard who knew where the tigress had crossed the nullah, where poachers might enter and which village was becoming restless. That accumulated experience remains the most valuable database in tiger conservation. Today, AI allows us to preserve, organise and amplify that wisdom. Imagine a young range officer joining a reserve 10 years from now. Instead of spending years learning solely by trial and error, the officer could inherit decades of field intelligence: Patterns of tiger dispersal, seasonal conflict hotspots, effective patrol responses, successful restoration interventions, recurring crime tactics and lessons from previous officers. Forest departments often lose invaluable knowledge when experienced officers retire or are transferred. A well-designed AI-assisted system can help retain and build on that collective experience.

Much of the global discussion on AI in conservation centres on image recognition, drones and species identification. Important as these are, they raise a broader question: How can AI help a field director make a better decision tomorrow? Answering this requires combining a director's experience with AI to anticipate changes. Expanding infrastructure, increasing human presence, sophisticated crime networks, cyber-enabled illegal trade, emerging diseases and a rapidly changing climate have made conservation more complex than it was a few decades ago. The future lies in anticipatory governance.

AI offers an opportunity to support this transition. However, no algorithm can substitute for the instinct of a forest guard or the wisdom of a field director. AI should function as an intelligent assistant, analysing vast quantities of information and presenting timely insights to support better field decisions. In many ways, intelligent decision-support tools have entered wildlife management. Automated stripe-matching during India's All India Tiger Estimation, e-surveillance systems, satellite-based fire alerts, GPS-based patrolling and digital monitoring platforms are familiar examples. The next step is to integrate them through a dashboard that converts scattered information into meaningful intelligence for field officers.

Beyond monitoring tigers and detecting wildlife crime, AI's potentially greater contribution may lie in landscapes surrounding protected areas, where the future of tiger conservation is inseparable from the wellbeing of communities. Here, AI can help identify livelihood opportunities suited to local skills, natural resources and markets; improve access to government schemes; and identify villages where conservation-linked employment or community stewardship could yield greatest benefits. Agricultural fields and other suitable land around tiger landscapes could increasingly become part of decentralised renewable energy (RE) systems. Analysis of energy availability, irrigation demand, cropping patterns, and household requirements could help RE projects support livelihoods. In landscapes used by wildlife, such analysis could also help identify cropping patterns that inadvertently attract wildlife.

The forest guard remains the protected area's eyes and ears. AI can serve as the analytical engine that continuously learns, integrates information, and forecasts change. Together, they can form a partnership far more effective than either working alone.

Walk-out over PM's remarks on GNLF
Opposition seeks withdrawal
Allow suing foreign govts, says SC

Democrats seize Senate

THE DEMOCRATS regained control of the United States Senate in the midterm elections by a stunning 55 seats to 45 and picked up a few extra seats in the House of Representatives, where they are already in comfortable control. However, the Republicans wrested a few governorships from the Democrats, including in Texas.

Opposition walkout from House

ALMOST THE entire Opposition walked out of the Lok Sabha after clashes with the Speaker and Congress(I) members. The opposition members were demanding acceptance of their adjournment motion over the Prime Minister's statement on the Gorkhaland agitation.

SC on suing foreign states

THE SUPREME Court declared that the Union government must normally accord permission to a citizen who seeks to sue a foreign government in this country except when the claim is frivolous. This significant ruling was given in the case of a maintenance engineer who was denied permission to sue the Algerian embassy here for service charges.

US dismisses report

THE WHITE House dismissed as "speculative" a report in the US press quoting intelligence as stating that Pakistan had detonated a high-explosive device. These disclosures were made by Bob Woodward in *The Washington Post*. He stated that according to US intelligence, Pakistan could have a small nuclear weapon in the not-so-distant future.

WHAT THE OTHERS SAY

Voters have delivered a damning verdict on Donald Trump's presidency with this Congressional landslide.

US midterms deliver a severe setback to Trump, but they also send out larger messages

National belonging, contested & enlarged

C RAJA MOHAN

THE ELECTION of America's first Muslim senator, the victories of African-American candidates in several gubernatorial races, the prospect of the first Black Speaker of the House of Representatives, and the growing legislative presence of Indian-Americans offer an important corrective to the recent Indian perception that America has become deeply racist.

The surge in anti-Indian rhetoric from sections of the populist MAGA movement has understandably angered Indians at home and in America. But to see the US only through the lens of racism is to miss the other side of its extraordinary political history: Its capacity to absorb outsiders and elevate them to the highest positions of public life.

America has always been a land of immigrants and a country deeply troubled by immigration. Its history is marked by repeated waves of hostility towards newcomers, followed by their gradual acceptance into the national mainstream. The tension between exclusion and inclusion has been central to the American political experience.

The election of Abdul El-Sayed, the son of Egyptian immigrants, as the first Muslim senator, and the re-election of Ilhan Omar, a Somali-American Muslim, despite intense campaigns against them, underline America's capacity for integration. These victories do not mean that racial and religious prejudice has disappeared. They demonstrate that prejudice does not always determine how Americans vote.

Indian-Americans have good reasons to be upset by the recent hostility towards their community. Long celebrated as a successful "model minority", Indian-Americans are discovering that they are not immune to racial hatred. Yet, Indians should also recognise that hostility towards outsiders is hardly unique to America. India's own history is full of "sons of the soil" movements, while caste and religious prejudice continue to influence its politics and society.

Nor is racism a recent American invention. Recall the anti-East Asian racism in the first term of the Trump administration. Going further back, immigration legislation of 1924 reinforced racial barriers and sharply restricted immigration from Asia. The dismantling of these restrictions, culminating in the immigration reforms of 1965, opened the door to large-scale migration from India and other Asian countries.

The remarkable rise of the Indian-American community over the last few decades is inseparable from America's decision to welcome Asians. America did not simply offer economic opportunities to Indian immigrants. It also created political space for them and their children to participate in their adopted country's governance.

The changing composition of the US Congress reflects this wider transformation. The proportion of racial and ethnic minority members has more than doubled since the beginning of this century, from about 12 per cent in 2000 to 26 per cent in 2024.

Indian-Americans are part of this change. Five have secured election to the House of Representatives this week, with a sixth awaiting the final count. Beyond Washington, at least 30 Indian-Americans have reportedly won elections to state legislatures, including 15 women. Much of this is on the Democratic Party ticket.

The growing political influence of immigrants extends well beyond the Indian community. Last November, Zohran Mamdani, born in Uganda to parents of Indian origin, became New York's first Muslim and South Asian mayor. In Los Angeles, Indian-born Nithya Raman is leading in a tight mayoral contest. These developments underline a simple point: Candidates from immigrant backgrounds can compete for power without their origins becoming an insurmountable barrier.

Nor should Delhi assume that the political success of Indian-Americans automatically translates into their support for all policies of the Indian government. Their political loyalties are to the United States, and their views reflect the diversity of American politics. As the community grows, we should also expect greater differences among Indian-Americans in their vision of US policies towards India. Delhi must earn their support, as it would with other American citizens.

For India, the lesson is to avoid sweeping judgements about America. The country has never been free of racial and religious prejudice. But few societies have demonstrated a comparable capacity to welcome outsiders and allow them to rise to positions of political authority.

America's struggle between exclusion and inclusion is far from over. MAGA's hostility towards immigrants is real, but it is also being challenged by Americans themselves. The United States remains a society in which the ideas of national belonging are constantly contested and repeatedly enlarged. That is a sensible way of thinking about the great American melting pot.

Trumpism comes up against institutions

AMITABH MATTOO

EVERY US president learns an unfortunate truth at some point. You get elected on anger and you will eventually be judged on frustration. Tuesday was the day Donald Trump learnt this. Democrats flipped seven Republican Senate seats and swept both houses of Congress. Susan Collins lost her seat in Maine after almost 30 years. In Texas, James Talarico won a Senate seat that had not been held by a Democrat in 32 years. A seemingly impregnable fortress has been breached.

Consider the irony. Trump survived two impeachments and four indictments. Each one reinforced his supporters' belief that the system was stacked against them. What finally checked Trump was one of the simplest ideas the founding fathers created. A fixed calendar and a routine election. An election every two years to renew Congress. Trumpism despises institutions. And it was defeated by one. No manner of gerrymandering could help.

There is a sense of déjà vu about midterm elections. In the 1994 midterms, Newt Gingrich humbled Clinton. In 2006, three years after invading Iraq, Bush lost the House and the Senate. Obama called the 2010 midterms a "shellacking". But this year is dramatically different from the routine swing of the pendulum. This is an indictment of the promise of Trumpism: That if you trust a strong man, he will lower prices at home and keep you safe abroad. Two years later, he has done neither.

Begin where most American voters began: The grocery bill. Inflation unites everyone, regardless of where you live or what you believe. Tariffs were supposed to help working people. They did nothing but raise the cost of goods. A tariff is just a tax. One that is not paid by China or Canada but by shoppers at their local supermarket in Ohio. A president elected by people angry about rising costs has raised the cost of living further.

Then there is the Iran war. Ending wars was one of Trump's most seductive promises. America is now at war with Iran, and Americans are paying for it at the petrol pump. Even Vice President J D Vance is blaming the war for these losses. When a country goes to war, its people expect it to be short. Not forever.

Immigration brought Trump to power and has now cost him his majority. Immigration is a real problem, and liberals need to understand that. But raids by aggressive ICE teams are not the solution. In 2024, we saw Latino voters move towards the Republicans, and many suggested it was a permanent realignment, but they were never a bloc. Most Hispanics want immigration laws enforced, just not in the way they have been under Trump, and few will accept the public humiliation of their communities. Trump's genius was to turn cultural insecurity into political solidarity and use it to build a movement. The deep flaw was not recognising that resentment, once institutionalised, will look for and find new targets of its own.

Has Trumpism been defeated? Probably not. McCarthyism survived McCarthy's death. Thatcherism survived Margaret Thatcher. Movements embedded in deindustrialisation, demographic anxiety, and a deep-rooted — and not entirely unjustified — distrust of liberal elites do not dissolve overnight. To trivialise these grievances would be to repeat the error that produced Trump in 2016.

The nearer danger is about an angry president. Amongst the winners of Tuesday was Jim Himes, re-elected in his district in Connecticut. Nearly four decades ago, at Oxford in 1988, we shared a house on Crick Road. He is now the senior Democrat on the House Intelligence Committee and is likely to chair it. If Trump is going to wage war on Iran, he will have to explain himself to men of unimpeachable integrity like Himes and others on the committee. The incoming Congress can investigate, subpoena and block. Trump's response came within hours, a picture of a red 'veto" hat on Truth Social. Democrats do not have the two-thirds majority needed to override him. Expect a gridlock. Beyond the veto, trade policy, war and executive action still give the President a great deal of power. If Trump can't win at home, he may look to the rest of the world for success.

This shouldn't be ignored by India. In little over a year, we have been hit with tariffs of up to 50 per cent, reduced to 18 per cent in exchange for stopping our purchases of Russian oil. We have been threatened with a $1,00,000 fee on certain H-1B visas. Our investment in Chabahar has been threatened by US pressure. All of this came down to one person in the White House. If we want to maintain our strategic autonomy, we need to build relationships with members of Congress. India needs more friends on Capitol Hill, not just in the Oval Office.

Trumpism didn't die on Tuesday. It ended the myth that it cannot lose. Trump showed that anger can win you an election. America has now reminded him that it takes more than anger to govern.

In clean-up of voter lists, why not use Aadhaar as disinfectant?

PRAVEEN CHAKRAVARTY

THERE ARE 16.3 crore adults (18+ years) in Uttar Pradesh. This is not just an estimate on paper. These are real people whose biometrics, photographs and addresses are registered in the Aadhaar database. (UIDAI, 'Aadhaar saturation report', 2026)

Some of these 16.3 crore may have died, may be living abroad or are foreign citizens. But these are a tiny fraction of the total, according to UIDAI. So, roughly 16 crore adults in UP are entitled to vote.

Yet only 13.4 crore people in UP are on the electoral rolls published by the Election Commission of India (ECI) after its Special Intensive Revision (SIR). That is, nearly 3 crore adults (18 per cent) are missing from the electoral rolls.

Aadhaar is a live database of real people, most of whom use their Aadhaar to collect MGNREGA wages, operate bank accounts, buy rations and so on. It is also biometrically de-duplicated, so no one person can be registered twice under different names, photographs or addresses. Contrast that with the electoral rolls, where one Brazilian model's photo appeared against 22 voters in Haryana.

Sure, many of these adults may have migrated to other states for work but are still registered in UP. But the EC allows such migrants to stay on the voter rolls of their home state. And where one's Aadhaar is registered in one state and one's vote in another, the two should even out in a national count.

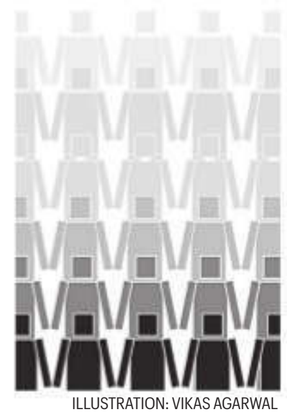

ILLUSTRATION: VIKAS AGARWAL

Even after allowing for every exception, UP is missing 2.5-3 crore voters (15-18 per cent of its adults). The question then becomes — is this deliberate, targeted exclusion by the SIR, or simply adults who don't bother to register because voting is not compulsory in India?

Yogendra Yadav and Jean Drèze argue it is the former, while economist Surjit Bhalla says it is the latter. This is the crux of four long articles between them in this paper.

If this were just voter apathy, as Bhalla argues, then such apathy should be roughly similar across states, allowing for some variation in political awareness. It is not. In the 14 large states that have completed the SIR, which together account for 70 per cent of all of India's adults, the "apathy" factor ranges from 7 per cent to 21 per cent. Can apathy towards voting really vary threefold within one nation? Bhalla's "apathy" explanation is unconvincing.

I analysed the count of Aadhaar adults (18+ years) with post-SIR count of enrolled voters in 14 states — Uttar Pradesh, Bengal, Bihar, Tamil Nadu, Madhya Pradesh, Karnataka, Gujarat, Rajasthan, Odisha, Keralam, Chhattisgarh, Punjab, Uttarakhand and Goa — using official data from UIDAI and EC.

This is the first such article to compare "Aadhaarised" adults with enrolled voters because until now, all arguments have been based on population counted by Census 2011 (too dated) or projected population estimates from the report of the Technical Group of the government (an estimate). Aadhaar is a register of real people, each enrolled with fingerprints and iris scans and biometrically de-duplicated, far more credible and authentic.

The analysis threw up four curious findings.

One: Across these 14 states, 9 crore adults are on Aadhaar's servers but missing from the ECI's rolls. For numerical context, this is akin to the entire nation of Germany being excluded from the electoral rolls of all of Europe.

Two: The share of missing voters ranges from 21 per cent in Goa and 19 per cent in Punjab and Uttarakhand to 7 per cent in Odisha and Tamil Nadu. Are Goans and Punjabis three times more apathetic about elections than Odias and Tamils? Obviously, a facetious question.

Three: Why are missing voters highest in exactly the states that vote next? Goa, Punjab, Uttarakhand and UP top this table of missing voters, and all four go to the polls in early 2027. If anything, an upcoming election should inspire more people to register, not fewer. Can this really be dismissed as mere coincidence or is it indicative of something more devious?

Four: If inter-state migration can explain this gap between Aadhaar adults and enrolled voters, then "receiving" states such as Tamil Nadu, Karnataka and Gujarat should have more voters than "Aadhaarised" adults. None does. If a worker from Gorakhpur has moved to Chennai semi-permanently for work, the combined Aadhaar and voter data of UP and Tamil Nadu should account for her. They do not. And Bihar, India's great exporter of labour, should top the table of missing voters. It is near the bottom. Clearly, inter-state migration cannot explain the missing voters.

All this raises another simple question — if the stated intent of the SIR is to clean up voter lists, why not use Aadhaar as the disinfectant? The Narendra Modi government claims Aadhaar-enabled direct benefit transfers have saved a whopping Rs 5 lakh crore (over $50bn) by weeding out ghost, duplicate and fake beneficiaries. If Aadhaar is good enough to save $50bn for the nation by removing ghosts, then surely it is good enough to purify the nation's electoral rolls? The argument that foreign citizens can get Aadhaar and so it cannot be used to clean voter rolls is fallacious. Every Aadhaar holder need not be a voter but every voter is an Aadhaar holder.

In fact, in March 2025, the ECI itself announced that it would link voter IDs with Aadhaar to weed out duplicates and ghosts. The opposition parties supported the move. Three months later, much to everyone's surprise, the ECI suddenly announced the SIR instead, abandoning the Aadhaar linkage proposal.

Suffice it to say, all is not well with the SIR, in idea or in implementation. It raises more questions than it answers. No amount of data obfuscation or statistical jugglery can justify 9 crore adults missing from the rolls of just 14 states. The ECI under Gyanesh Kumar is, at best, incompetent and, at worst, malevolent. Either way, he has to go.

The adult is liable for underage driving

SHUBHAM KUMAR

CAR KEYS are often within everyone's reach in a household. But when an underage child takes the family car and kills someone, parents may escape criminal liability by proving they were unaware of the offence, even if reasonable precautions could have prevented it. Section 199A of the Motor Vehicles Act allows ignorance to serve as a defence independent of due diligence.

A fatal crash in Kochi brings this into focus. A 17-year-old allegedly driving his father's car killed an eatery owner. His father maintains he was asleep when his son took the car. Whether he bears criminal responsibility is for the courts to decide. But it raises a question of whether ignorance alone should excuse an adult who failed to take reasonable precautions against underage driving.

Parliament introduced Section 199A to hold guardians and vehicle owners accountable when juveniles commit offences under the Motor Vehicles Act. It deems them guilty of the contravention, presumes consent to the vehicle's use and provides for up to three years' imprisonment and a fine alongside liability for the underlying offence. But the law neither specifies what precautions adults must take nor requires them to demonstrate such precautions when claiming ignorance.

Parliament should make reasonable precautions an express duty. Liability should rest on an adult's failure to take them, rather than the child's offence alone. Prosecutors should establish the juvenile's offence, the adult's responsibility for the child or vehicle, and circumstances indicating a failure to take reasonable precautions. Adults could then be required to explain the precautions they took, while the prosecution retains the burden of proving criminal liability. Courts could consider earlier incidents, access to keys, ignored warnings and what an adult could realistically have done.

Even when there is enough evidence to prosecute an adult, delays in the child's case may prevent that prosecution from continuing. In 2024, the Kerala HC described Section 199A as a *sui generis* offence, creating criminal liability for adults separate from the proceedings against the child. The juvenile's contravention remains an essential ingredient, but adult prosecution could begin without waiting for the Juvenile Justice Board to determine whether the child committed it.

The court also held that adult prosecution cannot continue if the Board's inquiry into a petty offence ends because its deadline expires. Under the Juvenile Justice Act, such inquiries must ordinarily finish within four months, extendable by two. An adult's prosecution may end simply because the Board missed the deadline. These deadlines protect children from prolonged proceedings and must remain. But a case ending because of delay does not mean the offence never occurred. Parliament should allow the court hearing the adult's case to independently determine whether the offence occurred.

In March 2025, the government informed the Rajya Sabha that 11,890 crashes involving minor drivers were reported in 2023 and 2024. But the data did not show how many were prosecuted or convicted under Section 199A. Without that, it is difficult to assess whether the law deters underage driving.

Parliament should revisit Section 199A to make reasonable precautions an enforceable duty, remove ignorance as an independent defence, ensure proportionate punishment and prevent procedural delays from automatically defeating adult prosecutions.

LETTERS TO THE EDITOR

President trumped

WITH THE Democratic Party securing a majority in both chambers of Congress, Donald Trump faces the prospect of spending the remaining two years of his presidency as a "lame duck" (The taming of Donald Trump — by, of, for the people', *IE*, November 5). Voters rejected his $5,000 handout, thwarted attempts to disenfranchise sections of the electorate, refused to endorse the demonisation of Islam and saw through his cynical invocation of patriotism. Their verdict was a forceful rebuke to a president who mistook power for personal licence.

Tushar A Rahatgaonkar, Dombivali East

THE MIDTERM results mark a turning point in American politics (The taming of Donald Trump — by, of, for the people', *IE*, November 5). For India, this carries significant implications. A Democratic-controlled Congress will introduce stricter legislative oversight over the executive, potentially curtailing tariffs, offering relief to Indian exporters, and stabilising high-skilled immigration pathways like H-1B visas. A congressional check on aggressive trade measures gives New Delhi welcome breathing room in economic negotiations.

Sanjay Chopra, Mohali

Beyond blame game

CLIMATE DIPLOMACY cannot succeed if countries treat renewable energy targets as a contest in political virtue ('Look beyond old climate fault lines', *IE*, November 5). Developing economies need affordable power, reliable grids and room to improve living standards, while wealthier nations must recognise their historical responsibility. Yet these realities cannot justify delaying domestic action or weakening safeguards. India should combine renewable expansion with investment in storage, transmission and cleaner industry. International cooperation must focus less on blame and more on financing transitions that protect livelihoods and the climate fairly.

S P Suganya Devi, Coimbatore

‘Whatever policy we formulate, we must trust business, industry and the taxpayer. That will remain our charter’

Groww

“I recognise the Tata brand’s global standing and the Parsi community’s contribution to building it. The Tatas are critical to the Indian economy. Given the maturity expected of their leadership, such issues should not enter the public domain.”
NIRMALA SITHARAMAN,
FINANCE MINISTER

SANKHADEEP BANERJEE

FINANCE MINISTER NIRMALA SITHARAMAN, in a fireside chat with SHYAMAL MAJUMDAR at the FE Leadership Awards on Monday, discussed the challenges facing the economy, the need to attract foreign capital, job creation, skill gap, and the consumption outlook. She also responded to concerns over corporate concentration, regulatory arbitrage and the pace of private investment. Excerpts from the conversation:

You’ve presented nine consecutive Budgets and are about to present your 10th. When you look back at the person who presented her first Budget, how different is the person who is going to present her 10th?

It’s always an overwhelming feeling of responsibility to deliver a proper Budget, which means a lot to the people, supports growth and addresses challenges. Since July 2019, when I presented my first Budget, every year has brought new challenges.

I’m grateful for the policies we have come up with every year. The people of India have responded beautifully. They’ve understood the policy direction and embraced it. Despite the odds, the stability provided by the Prime Minister’s leadership has been recognised. Consistency has been his virtue. He listens to people and acts on suggestions. The Budget is prepared with considerable input; it is not just the pre-Budget consultation. A lot of work happens at different levels.

The responsibility to deliver something that makes a difference to people’s lives is always foremost in my mind. The experiences from 2019 to today have enriched me. The messages I receive during and after the Budget, and the way the year unfolds, have been immense lessons. Each Budget benefits from the experience I’ve gained.

The Opposition has made several allegations and we have seen a series of protests, including over the right to vote, the Tata issue and IDBI Bank privatisation. Would these developments put the government on the defensive?

Unfortunately for the Opposition, it picks up issues that it does not want to pursue beyond a point. When you take issues through the judicial process, right up to the Supreme Court, and simultaneously take them to the streets, the resonance of your position among the public has to be constantly measured.

I find that the Congress, in particular, goes all out both in the courts and on the streets. Even when the Supreme Court says it is unfortunate that matters have reached this point and that an apology may be warranted, they don’t learn lessons.

It is absolutely right for the Opposition to put the government on the mat and demand answers. I’m not against that. I would, however, want more of it to happen in Parliament rather than in mock parliaments outside. Here is an Opposition party with about 100 MPs. They don’t sit through debates. They make allegations, but when people stand up to answer, they walk away. When the government responds, they shout it down.

People have voted for you to come to Parliament and perform that function. What’s the point of doing it through a mock parliament outside?

Your (Congress party’s) statements periodically place greater emphasis on street protests than parliamentary debate. This gives the impression that you want regime change. Regime change happens every five years through the electoral process. Don’t you believe in that process? How, then, did governments in Karnataka, Telangana and Himachal Pradesh get elected?

The illogicality and inconsistency with which the Opposition is being led are questionable in the eyes of the people. There is no conviction. Above all, projecting an image of chaos in India undermines the people who are struggling and contributing to the economy’s growth. You are undermining them by sending messages of instability.

On the friction within the Tata Group, Rahul Gandhi has made some serious allegations. Does the government need to intervene in the matter?

These are very delicate matters, requiring considerable commercial and business acumen, as well as cordiality. I would not readily say there is a need for intervention, however serious the issue may be.

I know the brand value of Tata and the contribution of the Parsi community in making it a huge global brand. I also know the range of activities in which the Tatas are invested. This is a very critical component of the Indian economy, and therefore, the matter must be settled amicably among the parties. They should talk it out and ensure a return to normalcy quickly. It cannot spill out into the public domain like this. Given the maturity expected of that leadership, we would like to see the issue settled soon.

“The PLIs are a positive way of extending support. They have shown success, although some sectors haven’t performed as well. We will have to examine what went wrong there”

Could you bring the two sides to the table to work out a compromise?

That’s why I said it is a sensitive issue. It is not something I would want to comment on hastily.

The frustration among the youth boils down to one word: jobs. There are concerns not just about the availability of jobs but also their quality. Corporate profits have risen, but wage growth has not kept pace. Could India’s consumption story take a hit?

I still think India’s consumption story will remain intact. You saw the GST figures for October, (when the mop-up grew 23% year-on-year). The government will also do a great deal to promote skilling and bridge the gap between the expectations of entrepreneurs, businesses and industry, and the capabilities of young people entering the job market.

I’ve repeatedly heard industry leaders say that the skill sets with which people graduate from colleges are insufficient. As a result, companies may have to spend six to eight months providing additional training before deploying them in jobs.

We want to train young people and equip them with the skills that make them job-ready. We have already started doing this over the last two Budgets. More needs to be done, and we will continue with these efforts.

It is also important to realise that, while we need AI in industry to improve productivity across large companies and MSMEs, we also need people who can work with AI. Our schools, colleges and professional curricula need that additional input to ensure that young people enter the workforce job-ready.

India needs capital and foreign investment. Will the Budget roll out the red carpet for the dollar and FPIs? Taxation is only one part of the issue. Is there a concerted effort to address their concerns?

Thank you for saying that taxation is only one part of it. I appreciate and recognise the sensitivity and anxiety among retail investors and equity market participants.

But the taxation structure was the same in 2023-24, when we saw good investment inflows into the country. That year recorded the highest inflows. Nothing different was done to attract investments, but the situation is very different now. Circumstances have changed, challenges have grown and net FII outflows have increased. They have, however, started coming back now.

I appreciate that voices of concern are louder. I will consider all these issues because growth is very important. We need to sustain growth of over 7%. To maintain that momentum, we need capital and equity, particularly at this stage.

The last few years have seen considerable emphasis on the bond market, deepening and widening it. Now we also have voices saying that equity needs similar support. I wouldn’t want to say more at this stage, but I recognise the concern.

Can we say that the Budget is going to roll out a red carpet for the dollar?

If you say the finance minister has promised a red carpet for the dollar, Indian investors might feel there is already a bias towards foreign investors. You didn’t want a red carpet for the Indian rupee...

With US Treasuries offering risk-free returns of over 5%, how do you bring FPIs back to India? The way the rupee is behaving is also creating a serious problem.

Listening to all stakeholders is what the government can do, and we will do that. First, we will hear them and then see what action we can take.

We celebrate our national champions, but there are concerns in some sectors that India is developing an economy dominated by a relatively small number of very large business groups. How do you respond?

That may have been the case a decade or two ago. Even today, there are a small number of large companies, no doubt. I’m happy for them; they should be there and grow.

But that is not the complete picture. MSMEs are flourishing today. We wanted micro enterprises not to remain dwarfs, but to grow into small enterprises, small into medium, and medium into large. That is why the change in the definition of MSMEs has been appreciated: it allows them to grow while continuing to enjoy the benefits.

Growth is happening across companies of all sizes. India is not an economy with just a few large companies; there are many small and medium-sized enterprises as well. Forty per cent of the country’s exports come from the MSME sector. Industries are emerging at different levels. Startups have demonstrated that small, innovative companies can enter the market, make a splash and establish themselves. The pace at which billionaire companies and unicorns have emerged from startups is spectacular in India’s economic history.

“India is not an economy with just a few large companies. Industries are emerging at different levels. Startups have shown that small, innovative companies can make a splash and establish themselves”

“Industry may be selective, choosing particular sectors rather than investing in areas where it is already present. But I am seeing private investment picking up”

The Economic Survey 2025-26 talks about regulatory arbitrage, firm-specific accommodations and a corporate sector operating in an environment where rents are available, enforcement is uneven and political mediation substitutes for market discipline. How do we tackle this?

Efforts are being made. I must speak for both the Centre and the states on these issues.

I’m happy to say that the Economic Survey’s observations are being taken very seriously by policymakers, both at the Centre and in the states. As a result, action is being taken during the year to address the issues raised by the Survey. Several states have openly engaged with the Centre on how best to tackle them.

The Department of Expenditure, which frames procurement rules and the terms and conditions of tenders, periodically reviews them to ensure greater transparency, make them more industry-friendly and prevent them from tying industry in knots. Many issues that were once pain points for industry have been addressed. Tenders have been simplified and made more user-friendly, and the discretion enjoyed by the issuing authority has been considerably reduced.

Several rules governing project execution, bank guarantees and individual guarantees have also changed. These were introduced during COVID, but many of the business-friendly provisions have been retained.

Allowing annual general meetings through video conference was particularly relevant during COVID, but we have not withdrawn the facility since. We have said that a physical meeting must be held once in three years. Until then, companies can choose between a video conference and a hybrid meeting. Many such changes have improved the ease of doing business.

The Indian private corporate sector may have strong balance sheets, but broad-based investment is still not happening, except in select sectors. Don’t you feel frustrated that industry keeps asking for reforms but does not open its purse strings?

I would have said yes a couple of years ago. But I’m not going to say that now because I’m seeing industry come forward and invest. It may be selective, choosing particular sectors rather than investing in areas where it is already present. But I am seeing private investment picking up.

I think the GST 2.0 reforms, unveiled in September 2025, have made consumption and demand more visible. Industry now has the confidence that it can see demand in the market, invest, produce and expand to the level it wants to reach. That, I believe, has been triggered by the next-generation GST reforms.

Some people have argued that the increase in consumption is entirely on the back of imports. But they must examine the nature of those imports. A major part comprises imports meant for export production. Raw materials are being brought in because we need them and do not produce them domestically.

The recovery in consumption has provided clear visibility on demand, and that is why I’m seeing private-sector investment happening.

The finance ministry has projected GDP growth of 7.3% for this financial year. Macroeconomic management has been creditable. For the next leap, what should the government and India Inc. do differently?

I think we have started doing things differently, and we should continue. What is that difference? We explicitly trust the people, businesses, farmers and the people of India. Everything we do is based on that premise: that we trust people.

Our policies on GST, income tax and other matters have all been framed on the principle that we trust the taxpayer. That is how the Prime Minister wants all of us to work. Whatever policy we formulate, we must trust business, industry and the taxpayer. That will remain our charter.

Several East Asian economies have provided support and protection to industry, but have also demanded performance and international competitiveness in return. Do you think the government in India has been somewhat lacking in demanding accountability from industry?

No. Our approach has been through the production-linked incentive (PLI) scheme. Companies need to demonstrate additional marginal production to qualify for incentives.

That is a positive way of extending support. The incentives are intended not just to help companies meet domestic demand but also to promote exports. PLI has shown success, although some sectors have not performed as well. We will have to examine what went wrong there.

What is the one thing you would like industry to do without asking the government for something?

They are welcome to ask the government for anything they want. I don’t think I should be wary of any demand they make. But I would also want them to remain engaged with us and tell us whether they are moving forward.

After the corporate tax rate was cut in 2019, I had very few interactions with industry. I did not know whether the reduction had helped them. The corporate tax rate came down, but industry is welcome to make demands. This government, particularly under Prime Minister Narendra Modi’s leadership, has always welcomed suggestions from industry.

Industry is welcome to ask and demand something from the government, but it should also remain engaged and tell us whether it is making progress. That interaction should be active and continuous.

The government and businesses are in this together, and we have to take India towards Viksit Bharat. We have reached an inflection point. We should not fail ourselves at this juncture.

'Preparing for all 403 seats in UP': Chirag reply to NDA ally warning

Santosh Singh
Patna, November 5

UNION MINISTER and Lok Janshakti Party (Ram Vilas) chief Chirag Paswan on Thursday said his party was preparing to contest all 403 Assembly seats in Uttar Pradesh if alliance talks with the BJP failed.

"As a political party, we are preparing to contest all seats (in UP). We have been speaking to the BJP on an alliance. But if all alliance talks fail, we would contest all seats," he told reporters in Varanasi.

However, speaking to *The Indian Express* later, Chirag clarified his remarks saying they were made only in the context of how a party prepares for elections. "I am very happy that UP CM Yogi Adityanath came to our function in Lucknow last month to pay tributes to my late father (former Union Minister Ram Vilas Paswan). Yogiji's kind words for my father and his presence at the function are a validation of our party's growing strength beyond Bihar," he said, adding that the party had already organised several programmes in UP. "We are getting an encouraging response."

Lok Janshakti Party (Ram Vilas) president Chirag Paswan

Chirag's remarks come a day after NDA ally, the Suheldev Bharatiya Samaj Party (SBSP), led by Om Prakash Rajbhar, indicated that it will oppose Bihar-based parties' attempts to expand in UP. "When we were not allowed to be part of the NDA in Bihar, we will not allow Bihar's entry into Uttar Pradesh. No matter which party it is. If that happens, the SBSP will consider other options," said SBSP national general secretary Arvind Rajbhar.

The SBSP had sought to contest the 2025 Bihar Assembly polls as part of the NDA but was denied. It subsequently contested select seats in Bihar independently and extended support to BSP, but failed to make a significant electoral impact.

Meanwhile, a LJP (RV) leader in Patna said the party, which won 19 of the 29 seats it contested in last year's Bihar Assembly polls, was looking to expand its footprint beyond the state. The party has two MLAs in Nagaland. With five Lok Sabha MPs, the LJP (RV) is the fourth-largest ally of the BJP-led NDA in Parliament, after the Telugu Desam Party (16 MPs), Janata Dal (United) (12) and Shiv Sena led by Eknath Shinde (13).

While remaining an important NDA ally at the Centre, Chirag has sought to maintain an independent political identity, often taking positions that differ from those of the BJP on key policy issues. He was among the first NDA allies to ask the ECI to explain its position after a recent investigation by *The Indian Express*. He also publicly opposed the UPSC's lateral entry recruitment initiative, describing the appointment of bureaucrats through direct recruitment without provisions for affirmative action and reservations as "completely wrong". He has maintained that being part of an alliance does not mean compromising on one's principles or becoming "spineless".

SC stays contempt action against Punjab chief secretary in DA case

Express News Service
New Delhi, November 5

THE SUPREME Court Thursday stayed criminal contempt of court proceedings initiated by the Punjab and Haryana High Court against Punjab Chief Secretary K A P Sinha over non-compliance with an August 3 order directing the state to clear Rs 14,191 crore in pending dearness allowance (DA) and dearness relief (DR) arrears within a fortnight.

A bench of Justices B V Nagarathna and R Mahadevan perused the High Court's orders dated October 12 and October 30, the latter of which required the Chief Secretary to appear in person on Thursday, and granted a stay on further criminal contempt proceedings while ordering that no coercive steps be taken in civil contempt matters either. The top court asked the state government to apprise it about how much pending amount could be disbursed on or before March 31, 2027. "You got a breather. Come up with a positive response," the court told the state counsel.

During the hearing, the Supreme Court bench voiced concerns regarding the efficiency and accountability of government servants in the country.

"Government servants should come in contract basis. Then only they will be accountable. They take recruitment in High Court, district court. Then go to secretariat. Then type three pages in a day. If government employees were sincere, the litigation would come down in this country. Pensions are being received by families after death of government servant. Where is the accountability of government servants?"

Chief Secretary K A P Sinha

Challenging the High Court's August 3 order, which scrapped the state's February 2025 five-year staggered liquidation plan, mandated 6 per cent simple interest on default, and restrained "unproductive" state expenditure, the Punjab government argued through its Additional Chief Secretary that releasing Rs 14,191 crore within 15 days was "not lawfully possible".

The state highlighted constitutional requirements under Articles 174, 203, 204, and 205(1)(a), noting that withdrawing funds from the Consolidated Fund of the State requires a Governor-recommended grant demand, Legislative Assembly assent, and an Appropriation Act.

In its appeal seeking leave to challenge the High Court decision, the Punjab government pointed out that the directions created a "disproportionate outcome" due to existing pay structures. The Sixth Punjab Pay Commission adopted a multiplication factor of 2.59 to 2.72, compared to the 2.57 factor used by the Seventh Central Pay Commission, resulting in a higher basic pay matrix in Punjab than at the Centre.

Because DA is a percentage applied to basic pay, applying equal percentages to a higher base yields higher total emoluments. In five out of seven categories, clerk, driver, stenographer, ETT teacher, and constable, Punjab employees already draw higher take-home pay (by Rs 1,832 to Rs 17,852 monthly at the existing 42% DA rate) than central counterparts, falling short only in the superintendent and police inspector cadres. The state noted it had submitted a sworn undertaking on July 28, promising to raise DA to match central carry-home salary parity where required, which the High Court did not refer to in its August 3 judgment.

Rallies to family dinner with allies: Nabin's poll outreach in Gorakhpur

Lalmani Verma
Lucknow, November 5

DURING HIS two-day tour to Gorakhpur, BJP national president Nitin Nabin reached out to allies and dined with various Dalit and Backward Class leaders, urging the party workers to join organisational activities ahead of the 2027 Uttar Pradesh Assembly elections.

Nabin's visit to Gorakhpur — the home turf as well as the Assembly seat of Chief Minister Yogi Adityanath — concluded Thursday. Gorakhpur is also considered as a power centre from where the BJP after 2017 has elevated several leaders from the region to the Union Cabinet and the Parliament to balance the power in eastern UP.

On the first day of his visit to Adityanath's bastion Wednesday, Nabin led the BJP's 'Loktantra bachao, arajakta hatao padyatra' (Save democracy, remove anarchy rally) — part of the party's larger campaign against the Opposition INDIA bloc's protests against the CEC over alleged irregularities in the electoral roll revision. Nabin's Gorakhpur rally was attended by party allies — including Rashtriya Lok Dal president and Union Minister Jayant Chaudhary, Nishad Party chief Sanjay Nishad, and leaders of Suheldev Bharatiya Samaj Party and Apna Dal (S) — all of whom held the padyatra banner alongside senior BJP leaders in the front row.

BJP president Nitin Nabin, Uttar Pradesh CM Yogi Adityanath and other party leaders at a temple in Gorakhpur on Thursday. ANI

After a series of meetings with BJP leaders including elected public representatives on Wednesday, Nabin and Adityanath had dinner at the Gorakhpur residence of BJP state president and Union Minister of State for Finance, Pankaj Chaudhary, who is an OBC leader.

On Thursday, Nabin visited the residence of Union Minister of State Kamlesh Paswan for tea, and met his family members. Paswan, an MP from the SC-reserved Bansgaon seat of Gorakhpur district, belongs to the Pasi community. Nabin's next stop was Sanjay Nishad's residence for breakfast and interaction with his family members.

Nabin also held separate meetings with BJP's former and current office-bearers as well as former public representatives from Gorakhpur region.

Keralam hit-and-run case: Court upholds bail granted to 17-yr-old

Says apprehending the minor boy contrary to JJ rules

Shaju Philip
Thiruvananthapuram, November 5

PUBLIC SENTIMENT cannot authorise the investigating agency to adopt a procedure contrary to law, a court in Ernakulam has said as it upheld the bail granted to the minor accused in the October Mercedes-Benz hit-and-run case.

Meanwhile, the Kerala High Court on Thursday granted pre-arrest bail to the minor's father, an additional district court judge, noting that the prosecution had not attributed "any direct criminal act on him".

On the same day, the additional district court criticised the police action in proceeding against the child in conflict with law (CCL) through an FIR, stating that apprehending him was contrary to Rule 8 of the Juvenile Justice (JJ) Model Rules. The court said a CCL is entitled to bail under Section 12 of the JJ Act, irrespective of whether the alleged offence is bailable or non-bailable, or classified as petty, serious or heinous.

"Public sentiment, agitation, media attention or any demand for a particular outcome cannot authorise the probing agency to adopt a procedure contrary to law. There is no material to show that the child was exposed to an immediate danger from which apprehension was required to protect him, or that his welfare necessitated taking him into police custody," Judge Kavitha Gangadharan said on Thursday.

The family of the deceased as well as the state had moved the district court seeking cancellation of the bail granted to the CCL by the JJ Board. The court said the victim's family is entitled to raise grievances and pursue appropriate remedies. However, their grievance can't be a ground to curtail the child's statutory entitlement to bail.

A 57-year-old two-wheeler rider was killed on October 25 after the luxury car, allegedly being driven by the minor, rammed into his vehicle.

'Won't send her back to that school': Kin of minor assaulted in Panchkula

Hina Rohtaki
Chandigarh, November 5

THE SIX-YEAR-OLD girl who was brutally assaulted inside her school in Panchkula will not return to the same school, it is learnt. The family of the child said that they have decided to explore other schooling options after she recovers from the trauma of the incident.

The child, who was discharged from PGIMER, Chandigarh, Wednesday after days of treatment, is traumatised and has told her family that she does not want to go to school anymore. "She is in trauma. We will not send her back to this school now. She is also saying that she does not want to go to school anymore. We will give her time to recover and feel safe. We may explore other schooling options for her later, but sending her back to the same school is out of the question," her uncle said.

The girl was admitted to the PGIMER, Chandigarh, on October 28 after she was allegedly attacked by an 8-year-old boy inside a government school in Panchkula. She suffered severe injuries after being hit with a brick and a flower pot, having her head banged against a desk and being stomped on. She was discharged on November 4.

2023 REMARKS ON SIKHS' SECURITY

HC refuses to order FIR against Rahul, says MP's 'right to raise concerns'

Jagriti Rai & Aamir Khan
Lucknow, November 5

Congress leader Rahul Gandhi

THE ALLAHABAD High Court on Thursday refused to order an FIR against Congress leader and Lok Sabha Leader of Opposition Rahul Gandhi over his remarks on the security of Sikhs in India during a US visit in 2023, holding that being an elected representative, he had the right to voice the concerns of a community.

The order passed by Justice Vikram D Chauhan said, "In the present case, the alleged offending speech of respondent no. 2 is that there is an atmosphere of insecurity among Sikhs in India, and asked whether a Sikh would be allowed to wear a turban or not, and whether he would be able to go to a Gurudwara (Place of worship)."

The court observed that Gandhi's purported speech "on the face of it " raised concerns about a community or section of society. "The respondent no. 2, being an elected representative, has a right to raise concerns in respect of a section of society. Further, questioning the rights of minorities by an elected representative by itself cannot be an offence, and the said speech of respondent no. 2 will have protection of freedom of speech and expression under Article 19 of the Constitution," it said.

The ruling went on to note that certain sections of society or individuals may not agree with his statement, but this "would not be a cause for considering the said speech as an offence. Disagreeing with one's view is part of vibrant democracy."

"Even if statements made by an elected representative concerning an individual were to be found inaccurate or unsubstantiated, the appropriate recourse lies in subjecting such statements to scrutiny through parliamentary debate or open public discourse, so that the truth may be ascertained through the free contest of ideas or thoughts," it observed.

The plea before the High Court challenged the orders of a Varanasi magistrate court and the sessions court, which had refused to direct the registration of an FIR against Gandhi.

MUTHOOT FINCORP LTD. | GOLD AUCTION NOTICE

Regd. Office: Muthoot Centre, TC No 27/3022, Punnen Road, Thiruvananthapuram, Kerala, India - 695001. CIN : U65929KL1997PLC011518, Ph: +91 471 4911400, 2331427.

The protest rally in Ukhrul on Thursday. EXPRESS

Naga groups protest, demand withdrawal of Assam Rifles

A DAY after suspected militants opened fire on passenger vehicles along the Imphal-Ukhrul Highway, Naga groups held coordinated rallies at Ukhrul and Kamjong district headquarters on Thursday, demanding urgent intervention by the Central government to resolve the ongoing "political crisis" in Manipur. The protest rallies in the strife-torn state were held by Tangkhul Naga Long, the apex body of Tangkhul Nagas, and other Tangkhul frontal organisations under the aegis of the United Naga Council. In a memorandum to Prime Minister Narendra Modi, they demanded stopping the "militarisation" of Naga areas and withdrawing the Assam Rifles from all the Naga-dominated localities. They also demanded "waging of proxy warfare using Kuki militants against the people of Manipur". ENS

Toll rises to 7 in landslide-hit Odisha village, 6 still missing

FIVE MORE bodies were recovered from a landslide-affected hilltop village in Odisha's Ganjam district on Thursday, taking the toll to 7, while 6 more people are still missing, an official said. The bodies were identified as Bijaya Pradhan (25), his wife Bhumika (27), their son Aruna (7) and daughters Bijayalaxmi (6) and Bagri (1). These people were victims of Cyclone Arnab that hit the state on October 28. Kandhamal District Collector Vedbhushan said two bodies were recovered earlier in the day, while 3 were found by the close of the day's operation. With this, the death toll in Cyclone Arnab and the subsequent flood and landslide on October 28 has mounted to 11. The rescue and search operation will continue; it was suspended on Wednesday due to inclement weather, the collector said. PTI

NORTHERN RAILWAY

E-Auction Notice

The Sr. Divisional Commercial Manager/G, Northern Railway, Delhi Division, New Delhi invites e-Auction through IREPS (**https://ireps.gov.in/**) for allotment of Misc contracts of NFR at following railway stations:

E-Catalogue No.	Type of Asset	Station	Date & Time for e-auction
Advt-Nov-2026-4	Vinyl Stickers/Wrapping Exterior	Train No. 14041/42	Start: 25.11.2026 at 11:00 hrs
Advt-Nov-2026-4	Waiting Room	Sonipat	Start: 25.11.2026 at 11:00 hrs
Advt-Nov-2026-4	Emergency Medical Room (EMR)	Meerut City, Ghaziabad, Sarai Rohilla, Panipat, Rohtak, Railway Station	Start: 25.11.2026 at 11:00 hrs
Advt-Nov-2026-4	Procurement and Supply of Linen Bag	Reserved Coaches of Mail/Express Trains of Delhi Division	Start: 25.11.2026 at 11:00 hrs
Website particulars where complete details of E-Auction can be seen		https://ireps.gov.in/(E-Auction-Leasing)	

No. 7PUB/e-Auction/NIT-2026 Date: 11.2026 3880/2026

Serving Customers With A Smile

US MIDTERM RESULTS CHEER D-STREET, STRENGTHEN RUPEE, BRING DOWN CRUDE PRICES BUT RAISE FRESH QUESTIONS AROUND INDIA'S OIL IMPORTS FROM RUSSIA

Sensex surges 2.6% to hit 6-month high

Akash Mandal
Mumbai, November 5

THE SENSEX surged 2.6% on Thursday to its highest level in over six months, joining global stock markets reacting positively to the Democrat win in the US midterm elections.

The Indian market extended its winning run for the sixth straight day — the longest in a year — as crude prices fell below the $100 per barrel mark in hopes of the election outcome providing a check to US President Donald Trump's market-antagonising geopolitical moves over the months.

The Sensex ended at 79,310.01, up 2,008.61 points or 2.6% — the highest level since April 21. The Nifty 50 also climbed to a three-month high of 24,536.60, gaining 576 points or 2.4%. "The US midterm verdict gave Indian equities fresh momentum, with the rally gathering pace on hopes that a more restrained Washington could pave the way for de-escalation in the Iran conflict and tariff policies," said Vinod Nair, head of research at Geojit Investments.

"As the threat of geopolitical escalation and energy supply shocks faded, crude prices slumped, and a retreat in US Treasury yields and the dollar took further pressure off India's inflation outlook and external accounts," he added.

Almost all sectoral indices comfortably ended in the green, with the likes of automobiles, banking, financial services, and IT being the top gainers. Broader markets were a bit reserved, gaining 1-2%.

Mirroring the stock market's exuberance, the rupee gained to a two-week high of 94.47 to the dollar.

US election results spark positivity

Markets globally cheered the election outcome. The US market gained 1-3% overnight after the results. Major European markets like Germany, France, and the UK gained 1-2% on Wednesday evening. Crude prices have now fallen nearly 10% over the past couple of sessions to around $94 per barrel, easing pressure on emerging markets and high net importers like India.

The strong gains on Thursday came after Indian markets had already been on the up over the week due to positive earnings for the July-September quarter, as well as a "relief rally" following a torrid time for the market.

Analysts cited the Indian markets being in an "oversold" zone — meaning that sentiment has led to a sharper fall than its fair value — since the start of the year.

Will the run last?

While the market has remained exuberant over the past few sessions, some experts attribute the gains to be "sentiment-driven".

"For India, a Democratic Congress changes little in the near term. Markets prefer clarity, and a Congress able to check the White House on spending and trade measures lowers the odds of abrupt policy shocks," said Rajesh Singla, CEO of Alpha AMC. "For Indian equities, the immediate impact is likely to be more sentiment-driven than structural. FII flows, crude oil prices, currency movements, and corporate earnings will remain the key determinants." FULL REPORT ON WWW.INDIANEXPRESS.COM

SENSEX JUMPS OVER 2,000 POINTS

Source: BSE

Chip selloff drags global stocks lower

New York: Global stocks fell on Thursday, weighed down by a sharp selloff in semiconductor shares after weak earnings from Qualcomm and concerns that a Democrat-controlled US Congress could slow investment in artificial intelligence infrastructure.

Wall Street's main indexes tumbled, with the Nasdaq on track to confirm a correction from its record closing high. Technology stocks led declines among S&P 500 sectors, while the Philadelphia Semiconductor Index slumped 11%.

The Dow Jones Industrial Average fell 2.2%, the S&P 500 slid 3.4%, and the Nasdaq Composite dropped 5.2%.

Candidates in Tuesday's midterm elections who opposed data centre expansion and campaigned in part on moratoriums on new developments also secured victories in Texas and Georgia. REUTERS

Hope of cheaper crude but Russian oil under cloud

Sukalp Sharma
New Delhi, November 5

THE DEMOCRATIC Party's sweeping victory in the US midterm polls has raised expectations of a potential diplomatic breakthrough in the Iran conflict, restoration of energy flows through the Strait of Hormuz, and a sustained decline in oil prices.

For India — the world's third-largest oil importer — lower prices would offer substantial relief by reducing the country's ballooning oil import bill and ease external inflationary pressure.

But the poll results may also carry an uncomfortable implication for New Delhi as a Congress controlled by the Democrats could make it politically harder for the Donald Trump administration to ease sanctions on Russia.

Any such development could complicate India's oil imports from Russia, its largest source of crude.

These are still early days, and despite the optimism, an end to the conflict is far from guaranteed. Trump retains considerable authority over foreign policy, and there is also a fear that the electoral setback could encourage him to adopt a more aggressive posture in the West Asia conflict.

Iran war and oil prices

Market participants and experts expect the Republican Party's dismal performance to lead to pressure on Washington to negotiate an end to the conflict. There are growing fissures within the Republican camp over the Iran war. US Vice President JD Vance publicly broke with the Trump administration's stance by blaming the war for the election debacle.

"No war powers resolution has ever overcome a presidential veto, and the Democrats' margins in both chambers will not be large enough to override one. What a unified Democratic Congress can do is make escalation considerably more costly: both chambers can pass resolutions, attach conditions to war spending and hold back confirmations of key officials... the administration faces greater institutional pressure to pursue a Hormuz deal rather than a further round of strikes," Rystad Energy said.

Abu Dhabi-based energy analyst Natalia Katona cautioned that while there is growing optimism for an end to hostilities in West Asia, there is a risk in being too optimistic.

"Trump acknowledged the political cost of the war, but he still defended the decision to go ahead with it. Democrats can begin to ask tougher questions and make it harder to secure fresh military funding once they take office on January 3. But until then, Trump still has room to turn up the pressure," she said.

If oil prices & freight fall, India gains

Although Indian refiners have diversified their suppliers in recent years, with Russia becoming the biggest supplier, Gulf crude remains central to the country's energy mix. And while availability of West Asian crude has improved considerably in recent months, those barrels are still quite expensive due to war risk premiums on shipping. Until tanker movements return to normal and the threat of further disruption recedes, India will continue to face uncertainty and high landed prices of oil and gas, even if the underlying prices of the commodities fall.

In the first six months of the current financial year, India's oil import bill jumped 46.4% year-on year to $90.6 billion, as per provisional petroleum ministry data. The country imports 1.8-2 billion barrels of oil a year, and every $1-per-barrel increase in price bumps up its oil import bill by up to $2 billion on an annualised basis. According to a March report by Nomura, every 10% increase in oil price typically widens the country's current account deficit by 0.4% on the GDP. Crude oil alone is India's biggest merchandise import.

The Russia question

The possibility of tougher US sanctions against Russia could complicate things for New Delhi. In September, India imported 1.9 million barrels per day (bpd) of Russian crude and it accounted for over 35% of the country's total oil imports, even as West Asian oil imports saw notable recovery, according to data from Kpler.

While the Trump administration had targeted India regularly over hefty purchases of Russian crude, Washington's stance on Moscow's energy exports has softened in recent months. Just weeks ago, Trump eased sanctions on Russian diesel exports, saying that the US will also be buying from Moscow. He also waived the implementation on some key clauses of the Lindsey O. Graham Sanctioning Russia and Iran Act which stipulated up to 100% tariffs on top buyers of Russian energy, like India and China. But a Congress controlled by the Democrats could push for a tougher approach towards Moscow to limit Russian oil revenues. Experts expect the Democrats to pressure the Trump administration to impose additional restrictions on Russian energy companies, banks, and shipping networks. Harsher sanctions could make it more difficult and expensive for Indian refiners to import Russian oil.

QUESTIONS VALIDITY OF VENU'S VOTE

Mehli Mistry contests removal as trustee from Sir Dorabji Tata Trust

George Mathew
Mumbai, November 5

THE BATTLE over the control and governance of Tata Trusts continues with former trustee Mehli Mistry filing detailed rejoinders before the Deputy Charity Commissioner, challenging his removal from the Sir Dorabji Tata Trust (SDTT) and questioning the validity of a vote cast by industrialist Venu Srinivasan on his reappointment.

In his latest submissions, Mistry has argued that Srinivasan participated in the decision to reject his reappointment despite his own tenure as a trustee having allegedly expired.

He has contended that a vote cast by a person who was no longer legally entitled to function as a trustee cannot be treated as valid, raising questions over the legality of the resolution that blocked his continuation.

The latest challenge opens another front in the increasingly bitter confrontation within the Tata Trusts, which collectively hold a 66% stake in Tata Sons, the holding company of the Tata group. Mistry has also sought an inquiry into alleged governance lapses, commissions and potential conflicts of interest involving trustees and their business associations. His submissions question whether the fiduciary responsibilities of trustees overseeing charitable institutions are being adequately protected when individuals simultaneously hold positions in Tata group companies or have commercial associations with them.

The controversy over Mistry's trusteeship dates back to October 2025, when his reappointment to the boards of SDTT and Sir Ratan Tata Trust (SRTT) was rejected.

Tata Trusts Chairman Noel Tata, Srinivasan and former Defence Secretary Vijay Singh voted against his renomination, effectively ending his continuation on the boards of the two principal charitable institutions.

The development marked a significant departure from the consensus-driven approach that had characterised the functioning of Tata Trusts during the tenure of late Ratan Tata. FULL REPORT ON WWW.INDIANEXPRESS.COM

Govt plans guidelines for solar module waste recycling

Pratyush Deep
Mumbai, November 5

THE GOVERNMENT is preparing guidelines to recycle solar module waste, said Pralhad Joshi, Minister for New and Renewable Energy (MNRE), on Thursday, with an eye on promoting a domestic circular economy.

"Waste generation, especially from solar, will start in the coming two-three years. Before that, we will completely plan it and see that whatever can be reused as a circular economy, we will do that," he said while speaking at a press briefing concluding the Bharat Renewable Energy (BRE) Summit and Expo 2026.

Solar module recycling involves three broad steps: disassembly of the module, delamination, and metal recovery. Current solar photovoltaic recycling technologies primarily employ mechanical processes or a combination of mechanical and thermal or chemical processes. The process can recover ferrous and non-ferrous metals, polymers, glass, solar cell materials, and plastics. FULL REPORT ON WWW.INDIANEXPRESS.COM

NPCI defends UPI MDR in SC

New Delhi: The National Payments Corporation of India (NPCI) on Thursday defended the decision to impose Merchant Discount Rate of 0.04% on specified UPI person-to-merchant transactions above Rs 2,000 and said that merchants cannot pass it on to customers.

In a counter affidavit filed in the Supreme Court in response to a petition challenging the move, NPCI said the MDR framework is necessary to ensure the long-term sustainability of the UPI ecosystem, facilitate investments in payment infrastructure and strengthen cybersecurity and fraud prevention.

Rejecting concerns that MDR changes will lead to price rise, the counter affidavit pointed out that the charge is attracted only to a small fraction of transactions. The affidavit stressed the "the 0.4% ceiling for MDR is far lower than the charges imposed by other system providers for credit cards and debit cards". ENS

Bharti Airtel Q2 profit rises 24% to Rs 10,710 crore

New Delhi: Telecom operator Bharti Airtel on Thursday reported a 24% increase in consolidated profit to Rs 10,710 crore in the second quarter ended September 2026. The company had a profit of Rs 8,651 crore in the same period a year ago, according to a regulatory filing. PTI

Fairfax acquires 11.22% more of IIFL Capital

New Delhi: Fairfax India Holdings Corporation, through its affiliate FIH Mauritius Investments Ltd (FIHM), has acquired additional 11.22% stake in IIFL Capital for Rs 2,000 crore. IIFL allotted 57,142,857 equity shares to FIHM on November 4, 2026 for Rs 350 per share aggregating to Rs 2,000 crore, IIFL Capital said in a regulatory filing. PTI

LIC Q2 profit surges 20% to Rs 12,076 cr

New Delhi: State-owned insurer LIC on Thursday reported a 20% jump in net profit to Rs 12,076 crore for the second quarter ended September 2026, with the improvement in renewal and net premium collections. The insurer had reported a net profit of Rs 10,053 crore in the year-ago period. Total income improved to Rs 2,62,739 crore in the latest September quarter compared to Rs 2,39,614 crore in year-ago period, LIC said in a filing. PTI

Adani Ports to buy European liquid storage operator Evos for euro 2.56 bn

George Mathew
New Delhi, November 5

ADANI PORTS and Special Economic Zone Limited (APSEZ) on Thursday announced to acquire 100% stake in Europe's second-largest independent liquid storage operator, Evos BV for euro 2.56 billion (around Rs 27,200 crore).

The all-cash transaction deal will give the Indian ports giant the ownership of eight port-based liquid storage terminals spread across the Netherlands, Germany, Spain, Belgium and Malta.

It will be one of the most significant overseas acquisitions by the Indian port operator, which will establish its foothold in key European energy and industrial markets.

APSEZ will take over the liquid storage operator from Igneo Infrastructure Partners.

The transaction values Evos at an equity value of €1.18 billion, translating into an acquisition multiple of 11.7 times its calendar year 2025 enterprise value-to-EBITDA.

The financial profile of Evos makes the acquisition particularly significant. The company reported revenue of euro 392 million and EBITDA of euro 219 million in CY25, delivering an impressive EBITDA margin of 56%.

With storage capacity of 6.3 million cubic metres and annual throughput of 37 million metric tonnes, Evos brings considerable scale and operational strength to APSEZ's international portfolio, Adani Ports said.

More importantly, the acquisition adds a high-margin, cash-generative business with substantial revenue visibility. Evos operates at an average commercial occupancy of 99%, supported by long-term customer relationships, take-or-pay contracts and consumer price index-linked agreements.

Its investment-grade credit rating and diversified portfolio of Tier-I customers, including global energy majors, industrial companies, chemical manufacturers and commodity traders, further strengthen its business fundamentals, the company said. FULL REPORT ON WWW.INDIANEXPRESS.COM

Panel moots Rs 1,100-cr CPSE asset monetisation

ENS Economic Bureau
New Delhi, November 5

AN INTER-MINISTERIAL government panel has recommended asset monetisation of surplus land and building assets of Central Public Sector Enterprises (CPSEs) worth over Rs 1,100 crore.

The panel, chaired by the Secretary, Department of Public Enterprises (DPE), and co-chaired by the Secretary, Department of Telecommunications (DoT), has selected the list of assets for consideration and approval by the 'Alternative Mechanism', a release by the Ministry of Finance said on Thursday.

The Alternative Mechanism for asset monetisation of CPSEs consists of the Union Finance Minister, the Minister of Road Transport and Highways, and the Minister of the concerned administrative ministry.

"The proposals primarily relate to surplus land and building assets of Central Public Sector Enterprises (CPSEs) identified for monetisation. The recommendations mark an important milestone in the Government of India's efforts to unlock value from surplus and underutilised public assets and facilitate their productive utilisation," the release stated.

The Ministry said the recommendations "reflect the growing momentum of the Government's asset monetisation programme", which aims to help CPSEs and other government entities realise the economic potential of surplus assets through "systematic assessment, professional transaction preparation and competitive price discovery". AT THE SAME TIME, THE BOND PLATFORMS COMMUNITY IS AT PAINS TO POINT OUT THAT EVEN BONDS OFFERING HIGH RETURNS OF 9-12% ARE NOT SUBSTITUTES FOR STOCKS

Bond platforms see chance to attract retail investors amid shaky stock market

Akash Mandal & Siddharth Upasani
Mumbai/New Delhi, Nov 5

THE INDIAN stock market's weak performance in recent years has been enough for the government to consider ways to entice foreign investors, who have dumped $49 billion of Indian shares since April 2024 after buying $25 billion in 2023-24. But an entirely different type class of financial asset has spent much of 2026 looking to attract India's small investors: corporate bonds.

Bonds are known to attract a more sedate type of investor. But platforms that offer corporate bonds are hoping to capitalise on a shaky stock market and low bank deposit rates. What is up for grabs is a fixed rate of interest that can go up to 12% — sometimes even higher, but that comes with an associated risk.

"If you had invested in a 10% bond two-and-a-half years ago, you would be up 23%," said Vishal Goenka, Co-founder of IndiaBonds, one of the 43 online bond platforms registered with the Securities and Exchange Board of India (SEBI). Think of these platforms as an online marketplace for bonds issued by companies. In comparison, over the last 28 months, the Nifty is up 1% - and that is after taking into account the 7% jump in the last one week.

Inspiration from MFs

To be sure, the online bond platforms industry is rather nascent, with the Online Bond Platform Providers (OBPP) Association of India established only in May 2024. It is no surprise, then, that growth is rapid. Another platform, Stable Money, is currently doing transactions north of Rs 750 crore every month, Co-founder Harish Reddy said, with month-on-month growth at 10%.

These numbers, of course, pale in comparison to how much money is being poured into mutual funds. In September, the total value of monthly Systematic Investment Plans, or SIPs, was Rs 32,490 crore. No wonder, then, that bond platforms as well as SEBI are inspired by the mutual fund industry.

According to the RBI, bank deposits made up 55% of households' financial assets of Rs 160 lakh crore at the end of 2018-19. REUTERS

In a consultation paper released in August, the capital markets regulator noted that the mutual fund distributor model had been important in "increasing investor awareness and penetration of access to mutual fund products", especially in Tier 2 and Tier 3 cities. Something similar is in the works under the name of Fixed Income Channel Partners.

FDs the target

The bond platforms community is at pains to point out that even bonds offering high returns of 9-12% are not substitutes for stocks. The real target is bank fixed deposits.

According to data from the Reserve Bank of India (RBI), bank deposits made up 55% of households' financial assets of Rs 160 lakh crore at the end of 2018-19. Since then, it has become a smaller and smaller portion and stood at just 34% at the end of 2025-26.

At the same time, assets in the form of equity and mutual funds are on the rise. In 2018-19, Indian households added Rs 22.6 lakh crore worth of financial assets to their kitty on a gross basis, with only 7% of that being in the form of shares or mutual fund units. In 2024-25, this had doubled to 15.4%, before declining to 10.9% in 2025-26, reflecting the weak stock market performance.

"Increasingly, FD as an alternative is becoming less attractive because its (interest rate) is coming below inflation rate or at that rate," said Nikhil Agarwal, Founder & Group CEO of Grip Invest. "Those are the people who are driving the majority of the demand in the bond market."

Experience and risk

Experts agree the underperformance of the equity market is aiding the adoption of bonds, with products such as bond SIPs making the process more intuitive for new investors.

"It is an experience-driven product," said Suresh Darak of Bond Bazaar. "The product is not new, but more people want to experience it, and the experience in itself has become more intuitive." But these instruments are not without a certain amount of risk. And Reddy admits the public's understanding of risk is low, making the platforms "gatekeepers" for the kind of bonds they show to prospective investors. FULL REPORT ON WWW.INDIANEXPRESS.COM

Agniveer scheme revamped, but doesn't mark return to regular troop recruitment

Amrita Nayak Dutta
New Delhi, November 5

IN A major overhaul of the Agnipath scheme, the Centre on Wednesday greenlit a path for all Agniveers undergoing training in the three services — the Indian Army, the Indian Navy, and the Indian Air Force (IAF) — to join the armed forces as regular soldiers.

This comes just around the time the first batches of Agniveers were to complete their four-year tenure starting this month.

What is the overhauled scheme?

Agniveers refer to individuals selected under the Agnipath scheme, wherein candidates between the age of 17 years 6 months and 21 years meeting certain eligibility criteria can apply to seek recruitment in the Indian armed forces for a four-year period.

In the first step of the scheme that the Union Cabinet cleared on Wednesday, 25% of Agniveers will be selected on merit for absorption into the services after completing their four-year tenure. This was also part of the original scheme that was launched in 2022.

The remaining 75%, who would otherwise exit the services with a contributory scheme package (called Seva Nidhi), will now be offered an additional two-year engagement, after which they can join the armed forces as regular soldiers, provided they are willing and meet the military's objective selection criteria. This means 100% of the Agniveers joining the armed forces will get an opportunity to get absorbed into the services as permanent soldiers.

Those serving the extended two-year period will get enhanced pay and an enhanced contributory Seva Nidhi package if they choose not to join the armed forces after two years. They will, however, no longer have opportunities to join paramilitary forces, public sector undertakings, or other state government jobs on reservation.

CDS General N S Raja Subramani. PTI

How many will it immediately affect?

Over three lakh Agniveers are undergoing training at various stages in the three services. This includes around 2.8 lakh Agniveers in the Army, of whom around 19,000 will complete their initial tenure in four years. Around 2,500 Agniveers will complete their four-year tenure in the Navy this month, and another 2,900 will complete their training as part of the first IAF batch next month.

Is this a return to regular recruitment?

No. Chief of Defence Staff General N S Raja Subramani, while briefing the media, emphasised that the Agnipath scheme will continue, albeit with the new changes introduced.So, even if 100% Agniveers are eventually absorbed into the services as regular soldiers, only 25% will first be selected to join the forces as regular soldiers after the initial four-year tenure on a merit basis, as part of the original Agnipath scheme.

Thereafter, the rest will be given the opportunity to join the forces as regular soldiers after serving a total tenure of six years under the revamped Agnipath scheme. In terms of seniority, those who join after serving the two-year extension will be placed immediately after their own batchmates who joined the regular cadre after four years.

How does it differ from regular recruitment?

Under the regular recruitment scheme, which remained in place until the Covid-19 pandemic, personnel joined the armed forces as permanent soldiers from their first day of service, making them eligible for the associated benefits and pension.

A soldier could leave the forces only through voluntary retirement or after being court-martialled for an offence.

Under the Agnipath scheme, Agniveers can choose to leave the forces and pursue a new career, or continue serving if they aspire to a permanent career in the armed forces. Those who accept the two-year extension will have another opportunity to choose whether to leave or continue serving when that period ends.

The Agniveers will thus have the option to choose their career path at two different levels, while always having the option to join the forces as regular soldiers, provided they meet the selection criteria.

How does 100% absorption of Agniveers benefit the military?

If 100% of Agniveers opt to join the services as regular soldiers, it may not save the government any money on pensions. It might, however, reduce the shortage of personnel in the forces on a much faster timeline, which resulted from no recruitment and regular retirements during the Covid-19 years. This is particularly crucial in post-Galwan and post-Operation Sindoor security situations. Military officials maintained that the scheme will foster a competitive spirit among Agniveers and reduce complacency as they strive to be among the top 25% selected. They said the multiple layers of selection will also bring quality people into the forces. Gen Subramani said the scheme will give the military a pool of experienced soldiers while maintaining a youthful profile in the armed forces.

Gyanesh Kumar bribery charge: The claims in a fresh complaint

Shaju Philip
Thiruvananthapuram, November 5

KERALAM'S CONGRESS government on Tuesday directed its Vigilance and Anti-Corruption Bureau to conduct a preliminary investigation into bribery claims against Chief Election Commissioner (CEC) Gyanesh Kumar after a fresh complaint emerged in the matter.

This comes after the state, in October, ordered the reopening of a 2006 probe against Kumar, a 1988-batch IAS officer of the Keralam cadre, who, at the time, served as secretary of the state's Public Works Department (PWD).

The allegation

The allegation against CEC Kumar is that he had demanded a bribe from Malaysian engineer Lee See Been to clear bills for work under the World Bank-funded Kerala State Transport Project (KSTP). Lee was the chief project manager of PATI-BEL, an Indo-Malaysian joint venture awarded the road works under the project in 2002.

The allegation surfaced after Lee died by suicide in November 2006 in Malaysia, and left behind a note.

At that time, Kumar was the project director of the KSTP as well as the state public works secretary. Though the note was never made public, the then CPI(M) government removed Kumar as PWD secretary a month after the suicide, in December 2006.

How the issue came back into focus

Last month, when the Congress demanded the resignation of Kumar as CEC over alleged irregularities in the Special Intensive Revision of electoral rolls, the 2006 bribery allegation came to the limelight again.

THE ROAD PROJECT

- The Kerala State Transport Project (KSTP) was a flagship project of the PWD.
- It was envisaged to modernise select major roads with a World Bank loan, but saw many delays and cost overshoots.

Congress leader M Venugopal petitioned Keralam Home Minister Ramesh Chennithala that that the 2006 probe against Kumar was compromised under pressure, claiming references to Kumar in the engineer's suicide note. Chennithala forwarded the complaint to the Vigilance and Anti-Corruption Bureau, which has sought a legal opinion on reopening the issue. Venugopal has not furnished any document to substantiate his allegation.

The new complaint

The second complainant seeking a probe against Kumar is a contractor named Sajan V O, who reportedly supplied construction material to PATI-BEL.

Sajan claimed in his complaint to the state Home Minister on October 23: "As the bills were not cleared on time, Lee could not make payments to local contractors and suppliers. Lee had told me that Kumar had sought Rs 2 crore to clear the bills. But PATI-BEL was not ready to pay bribes to get the bills cleared. Lee's family had then told PATI-BEL employees that his suicide note had referrence to Kumar."

Sajan, however, had never seen the suicide note which Lee had left in Malaysia. He said the Vigilance and Anti-Corruption Bureau had not contacted him in connection with the 2006 bribery probe.

Sajan claimed Lee had been under pressure over the bribery demand and pending dues to local suppliers. He also claimed Lee had diverted funds from a different project of Malaysia-based PATI to meet the payments in Keralam. He alleged that Lee was then summoned over this by his PATI superiors to Malaysia, where he died by suicide.

The 2006 probe

In 2006, the Vigilance and Anti-Corruption Bureau had looked into various allegations related to the KSTP, including claims that PWD officials had sought Rs 2 crore in bribes from contractors to clear bills for work, Keralam minister Chennithala told the Assembly on October 14. As the allegations could not be ascertained, the department had recommended that further action was not required.

Kumar had also featured in a separate vigilance probe into projects allegedly awarded without a tender between 2003 and 2006. As the charges could not be substantiated, the bureau stopped all proceedings. In 2012, when the Congress was in power in Keralam, the department reported eight cases to the court as "mistake of fact".

Why India's rejection of a TB drug patent matters

India has the world's highest TB burden. The decision could open the door to competition and lower costs for BPaL, a shorter treatment regime

ANURADHA MASCARENHAS

THE INDIAN Patent Office's rejection of a patent application for a combination of three tuberculosis (TB) medicines — bedaquiline, pretomanid and linezolid, collectively known as BPaL — has been welcomed by experts as a major step towards making treatment for drug-resistant TB more affordable and accessible.

The application was filed by the US-based Global Alliance for TB Drug Development (TB Alliance). Its rejection means that the company cannot use this particular patent application to claim exclusive rights over the combination in India. This could allow more manufacturers to produce the medicines, encouraging competition and potentially bringing down prices.

The decision follows two formal objections, known as pre-grant oppositions, filed in 2020. Such oppositions allow individuals or organisations to challenge a patent application before it is granted. The first was filed by Eldred Tellis of Sankalp Rehabilitation Trust and Ganesh Acharya, with support from the Lawyers' Collective and Médécins Sans Frontières Access Campaign. The second was filed by the Delhi Network of Positive People (DNP+), with support from Third World Network.

Experts say rejecting the patent application is only one part of the larger effort. The key task is to ensure that every patient who is medically eligible can access the shorter treatment regimen through the national TB programme. India has the world's largest TB burden, accounting for nearly a quarter of all cases globally. India's TB incidence rate was 187 cases per 100,000 people in 2024.

What is BPaL?

It is a six-month, all-oral treatment regimen recommended by the World Health Organization (WHO) for eligible patients with drug-resistant TB. It combines three medicines: bedaquiline (B), pretomanid (Pa) and linezolid (L). A related regimen, BPaLM, adds a fourth medicine, moxifloxacin (M). The BPaLM regimen recorded a treatment success rate of 89%, compared with 52-75% for standard regimens. More than 15,000 patients have already started BPaLM treatment under India's national TB programme.

How does the ruling help patients?

It removes one potential legal barrier to competition among manufacturers of the BPaL combination. However, the ruling does not automatically make treatment cheaper or guarantee that medicines will become available everywhere. That will depend on the number of quality-assured suppliers, government procurement arrangements and uninterrupted supplies.

"The ruling is an opportunity to improve access to affordable treatment for drug-resistant TB. It does not approve a new medicine or change treatment guidelines," says Dr Vikas Oswal, pulmonologist and former National Technical expert member of the National Tuberculosis Elimination Programme. "With this rejection, every bedaquiline-related patent application that was challenged in India has been refused. These include the bedaquiline salt form (2023), the paediatric formulation (2024), the long-acting injectable and now the BPaL combination. No single company can claim exclusive rights over this regimen in India and any TB drug manufacturer can produce it for the Indian programme and export," said Leena Menghaney, a public health policy expert.

Pratibha Sivasubramanian, senior researcher with Third World Network, feels the ruling acknowledges patients' fight against frivolous and secondary patents on known medicines. "In short, the evergreening of patents on important TB medicines," she said. Evergreening refers to attempts to extend a company's period of patent protection by seeking additional patents for minor changes or new formulations of an existing medicine. Patient groups have argued that such practices can delay competition from generic manufacturers.

Will TB treatment become cheaper?

For patients, the importance of shorter treatment goes beyond the number of medicines they take. "Only those who have been treated for TB know what it feels like to go through more than a year of antibiotics with painful injections. Access to a shorter, oral and effective treatment can mean returning to work and rebuilding their lives," Loon Gangte from the Delhi Network of Positive People (DNP+) said.

The potential savings, however, need to be understood in context. Patients receiving drug-resistant TB treatment through the public health system already get their medicines free of cost. Therefore, the main financial benefit of lower drug prices would initially accrue to the government, which purchases medicines for the national programme. Menghaney said generic competition had already helped reduce the cost of treatment following the rejection of the patent on bedaquiline fumarate salt in India. "A six -month BPaLM course now costs $284 down from $588 in 2022," Menghaney said. In simple terms, if the government can purchase each treatment course at a lower price, the same budget could potentially cover treatment for more patients. Greater competition could also make supplies more dependable by reducing reliance on a few manufacturers.

Will cheaper generic drugs become available soon? What steps remain?

The Central Drugs Standard Control Organisation, India's drug regulator, has approved bedaquiline and pretomanid for use under the National TB Elimination Programme (NTEP). Linezolid and moxifloxacin are older antibiotics that are now being used as part of treatment for drug-resistant TB. The most important step, according to Menghaney, is for the government to scale up BPaL/BPaLM to every eligible patient diagnosed with rifampicin-resistant TB.

However, the rejection of the patent application should not be mistaken for automatic permission to sell the combination without restrictions. Patent approval and drug regulatory approval are two different processes. A patent determines whether a company can claim exclusive rights over an invention, while drug regulators assess whether a medicine can be marketed and used under specified conditions. In India, access to these regimens is linked to the national TB programme and its treatment standards. Similarly, WHO prequalification — a measure of whether a medicine meets international standards of quality, safety and efficacy — doesn't replace the marketing permissions from Indian regulators.

Could cheaper generic medicines compromise quality or safety?

Generic medicines contain the same active pharmaceutical ingredients as the corresponding reference medicines and are expected to meet regulatory standards. Quality checks should continue even as more manufacturers enter the market.

• A SHORTER, ECONOMICAL COURSE

WHAT IS BPaL?

It is a six-month, all-oral treatment regimen recommended by the WHO for eligible patients with drug-resistant TB.

WHO STANDS TO BENEFIT MOST FROM THE PATENT RULING?

The biggest potential beneficiaries are patients with multidrug-resistant or rifampicin-resistant TB, particularly those who face financial difficulties, delays in starting treatment or problems reaching treatment centres.

WHY BPaL WORKS

Unlike older regimens, which could involve taking antibiotics for many months and sometimes receiving painful injections, BPaL-based treatment offers a shorter course using oral medicines. This can reduce the physical, financial and emotional toll on patients.

Potential savings

Patients getting drug-resistant TB treatment through the public health system already get medicines free of cost.

•

If govt can buy each treatment course at a lower price, the same budget could potentially cover treatment for more patients.

• GLOBAL

AI, trade, immigration, oil: What a Democrat-held House means

Anil Sasi
New Delhi, November 5

"LAWYER UP". That was the succinct advice Robert Garcia, the US Democratic Congressman set to chair of the oversight committee of the House of Representatives, had for Republicans after the midterm "blue wave" left Democrats in firm control of both Houses of the US Congress.

As the House Democrats gear up to take on Donald Trump's administration, with subpoenas, inquiries and investigations, the change in Congressional control could potentially derail some of Trump's legislative agenda. This could, in turn, make it harder for the US President to hike tariffs, keep the war machine going and cut spending on things such as affordable medical care.

Democrats are generally less receptive than Republicans to overshooting of the federal debt ceiling, which could potentially mean a more range-bound dollar. All of these could have second-order impacts outside of the US, including in India.

AI buildout impact

Going forward, the big losers could be companies involved in the buildout of AI data centres across America. That could have potential stock valuation impact, which, in turn could help India's long-suffering stock markets. According to a Mumbai-based emerging equity fund manager, India is generally viewed as an AI loser and the wait for the AI hypercycle to turn for India to start attracting foreign capital again could potentially be on the cards.

Affordability issue

There is yet another silver lining for India. The fact that the midterms delivered a vote that is interpreted as a pushback against the affordability crisis for the regular American, could mean a more calibrated approach by the administration against the factors that sparked the affordability crisis, which include the widely unpopular Iran war and the tariffs.

Sectors such as Indian pharma, which have so far escaped additional US tariffs, could see some upside. Trump had announced earlier that he plans to keep generic drugs tariff-free for only two years from August 2026, and intends to slap a 100% tariff on them from August 2028 for a year, hiking it then to 200% duty. If implemented, the plan could squeeze margins in Indian drugmakers' largest export market. The sharp pushback against the cost of living crisis could mean these plans could be reconsidered. One of the first things on the agenda for Democrats would be to try to restore the funding that the Republicans cut for Medicaid, the health programme aimed at American lower income groups.

Trade talk upside?

But does all of this accommodation offer an immediate respite on trade talks with India? Unlikely, say experts. "Since Democratic lawmakers also support protective tariffs for local union workers, America's overall trade posture will remain intact. To act without Congress, the president will continue to rely on existing powers — such as Section 232 and Section 301 — using executive orders, Treasury sanctions, and USTR (United States Trade Representative) rules to apply unilateral trade pressure," Ajay Srivastava, founder of New Delhi-based think tank Global Trade Research Initiative said.

"The US midterm verdict does not hand Congress immediate authority over tariffs. The Section 301 and Section 232 duties rest on executive authority, and any rollback faces a presidential veto. What changes is the cost of unpredictability. With hearings and oversight likely to sharpen, the administration has less room for abrupt tariff escalation, giving India space to negotiate on substance rather than under deadline pressure," Rituparna Kaushik, assistant professor of economics at Pune-based FLAME University told *The Indian Express*.

"Labour-intensive sectors such as textiles, apparel, leather, and gems and jewellery stand to gain most from greater tariff stability. Steel, aluminium and auto components are unlikely to see quick relief, as Section 232 protection enjoys bipartisan support. Generic pharmaceuticals could find a more receptive Congress focused on drug prices. Hence, India should use this window to lock in a more predictable and balanced tariff schedule, while holding firm on agriculture and dairy, where pressure from the US farm lobby cuts across party lines," Kaushik added.

But there could be other pitfalls. With foreign policy leverage failing against Russia, China, and Iran, Trump needs a quick win and Srivastava expects heightened pressure on India for a trade deal for the US administration to prove American clout.

Also, immigration remains a problem and the concerns about immigration are now more or less bipartisan outside of states such as New York or California. So, the H-1B visa and that route of immigration is now on its way out. The good thing, though, is that Indian IT companies are slowly weaning away from their dependence on that route.

Oil markets

On the Russia front, there could be some fresh uncertainty. Trump was broadly much more amenable to accommodating Russia and its President Vladimir Putin, while the Democrats are unlikely to take that line. So, there could be a pushback against the diesel deal that Trump signed with Russia and, in all of this, there lies the possibility that India will remain a very visible scapegoat.

Brokerage Emkay expects the shift in power dynamics in Washington, DC to eventually reduce geopolitical risk premiums in crude oil, although near-term policy uncertainty may keep prices volatile.

According to Gita Gopinath, the Gregory and Ania Coffey Professor of Economics at Harvard University, there is a possibility that Jay Powell (former US Fed chair) will step out of the Fed as central bank independence will be more secure, the tariff policy will be "less insane" and that fiscal deficits will remain a problem.

All of this could have implications both for global capital and bond markets alike in the months to come, which could transcend US shores.

Russian crude imports

- Russian crude makes up the biggest share of India's oil import basket.
- A Democrat-controlled Congress could make it politically harder for the Trump administration to ease sanctions on Russia, and lead to calls for imposing a higher cost on Moscow over the war in Ukraine.
- Any such development could complicate India's oil imports from Russia.

SAFF Cup: Bhat scores brace as India beat Pak 3-2

Express News Service
New Delhi, November 5

THE INDIA football team opened their SAFF Championship 2026 campaign with a 3-2 win over arch-rivals Pakistan. Suhail Ahmad Bhat scored a brace in the 14th and 20th minute while Manglenthang Kipgen added the third in the 32nd minute.

While India could not add to their tally in the second half, Pakistan rallied after the 90th minute to score twice, with Najeeb Ullah striking in the 91st minute and Alamgir Ghazi adding another in the 94th minute. If Shayak Dost had converted a penalty in the first half, Pakistan would have tied the game up but the Blue Tigers escaped by the skin of their teeth.

This is a second string Indian team, with just 18 players available with the main team not taking part in the tournament in view of the away international friendly matches against New Zealand, on November 12 and 15 in Auckland and Christchurch, respectively.

There is also the issue of the reluctance of the Indian Super League (ISL) clubs to release players in the midst of the ongoing season, as Thursday's match against Pakistan falls on a date outside the FIFA international window (Nov 9-17).

While announcing the squad for the tournament, the All India Football Federation (AIFF) had said that 18 players will travel to Dhaka on November 3 from Kolkata, while the remaining 10 will join the group over the subsequent days. Once the FIFA international window starts on November 9, the ISL clubs will release their players and the squad will have full strength of 28. India next play against Maldives on November 11 in their second Group B match in the six-team tournament to be played at the National Stadium in Dhaka. Hosts Bangladesh, Sri Lanka and Bhutan are placed in Group A.

The top two teams from each group will advance to the semifinals, scheduled for November 14. The final will be played on November 17. The Indian team is under the charge of U-23 national team head coach Naushad Moosa. Bibiano Fernandes, who recently coached the India U-15 men's team at the FIFA U-15 World Cup and Festival in Azerbaijan, is the assistant coach.

India have won the regional tournament nine times out of the 14 earlier editions since 1993, while finishing runner-up four times and in the third place once. Pakistan's best performance in the tournament has been a third place finish in 1997. Pakistan have come into the tournament after losing twice and drawing once in the ASEAN Cup Group B matches. They lost to Thailand (0-4) and Vietnam (2-4), and drew against Philippines (2-2). But under former Peruvian international Nolberto Solano, Pakistan have improved with two wins and a draw in their last five matches.

INDIA TOUR OF NEW ZEALAND

Back of length, ahead of pack

Anshul Kamboj is trusting his strengths in movement and consistency to make his 2027 World Cup case

Venkata Krishna B
Chennai, November 5

Anshul Kamboj was the Player of the Match in the first ODI following a spell of 10-2-22-2. CREIMAS

IN THE short break that Anshul Kamboj had before flying to New Zealand, first for the A series and then for the ODI tour, the seamer did a routine in Karnal that he wanted to be part of his muscle memory. Bowling with the white ball in an open ground, the 25-year-old would run in and keep hitting the back-of-a-length area around the off-stump channel.

It is nothing special. It is the basics. But it is what Kamboj wants to become muscle memory. With a year to go for the ODI World Cup, India are still figuring out which puzzle piece fits where and which of the pacers will offer them more flexibility. While Jasprit Bumrah's place appears locked, the same can't be said for the others. There is Arshdeep Singh, Harshit Rana, Prasidh Krishna, Gurnoor Brar and, of course, Mohammed Siraj, a pacer they have sparingly used in the format of late.

While India have had the luxury of batting and bowling depth in T20Is, in ODIs the story is different. It is why they are still figuring out who offers what in the middle overs, and the beneficiary of Prasidh's injury, which has ruled him out of the series, has been Kamboj. At Auckland in the first ODI, Arshdeep and Auqib Nabi took the new ball, with Kamboj coming in at first change.

As he had been doing in Karnal, on a pitch with plenty of help for the seamers, Kamboj did nothing extraordinary. His spell read 10-2-22-2, with 46 of the 60 balls dots, and it earned him the player-of-the-match award in India's five-wicket win. He kept pitching it in areas where batsmen would be caught in a fix over going forward or back, and used the movement to his advantage. "Right through the training in Karnal, all he focussed on was line and length. If you keep hitting the off-stump channel and make the ball move from back of a length, on most days you will have a good outing. It is up to the batsmen to take you on," his coach Satish Rana, who has been with him since his U-14 days, tells *The Indian Express*.

> **"He is a very level-headed fellow. He may not be expressive, but he is a thinking cricketer. He usually bowls in the nets, but this time he wanted to bowl in the open ground just to get a hang of it."**
> **SATISH RANA**
> KAMBOJ'S CHILDHOOD COACH

Like his Test debut, Kamboj's ODI debut was one to forget. Against West Indies at New Chandigarh, he conceded 82 in nine overs. But if there is one aspect that Rana says comes to Kamboj more naturally than hitting the right lengths, it is his ability not to get carried away by one good performance or feel bogged down by a bad one. "He is a very level-headed fellow. He may not be expressive, but he is a thinking cricketer. He usually bowls in the nets, but this time he wanted to bowl in the open ground just to get a hang of it. Despite playing Ranji, he was practising with the white ball whenever he had the opportunity," Rana says.

While Kamboj's strength remains the movement, India also want to see how he performs in unfamiliar territory. Coming in at first change was one such ploy. In recent times middle overs have become the phase where batting sides show more urgency to score before they face just one old ball from the 34th over. A wicket-taking bowler with an X-factor is what India are ideally searching for, with Brar's pace being seen as one. The plan seems to be to see what each option gives.

This is where it gets interesting with Kamboj. In the last IPL, he showed he can be counted on to bowl at the death too, executing wide yorkers from round the stumps to right-handers. But bowling in the middle overs remains a work in progress, without changing his strengths. For example, on South African decks, the natural line that Kamboj bowls could come in very handy even in the middle overs. The pitches in the Rainbow Nation, once baked under the sun, tend to quicken up and aid seam movement. On such surfaces, not just bounce, even control offers more to bowling sides.

Having started to hit the high 130s kmph consistently, Kamboj is also working on his fitness, which would allow him to add a couple of yards of pace. "Whenever he isn't bowling, he is indulging in a lot of strength training because he wants to improve his fitness as well as get quicker. It is a process he has been working on consistently, so if he continues to get miles under his legs, then you will definitely see an increase soon," Rana says.

With musical chairs expected to continue in the lead-up to the World Cup, it will all eventually come down to who can perform the different roles. Kamboj, being a handy batsman, offers the depth they desperately seek as well. But his case still begins where it began in Karnal: a white ball, an open ground, and the same length, again and again.

• KAMBOJ'S STRENGTHS

WITH THE NEW ball, he is known as a seamer who can make it move both ways. Since Bhuvneshwar Kumar faded from the scene, India are yet to have a reliable option for early breakthroughs.

WHILE IT IS Bumrah who largely shares the load of bowling at the death, the emergence of Arshdeep offers another option in the format. But India would ideally prefer another seamer who can excel at the death, and in the PL Kamboj has provided encouraging signs.

WHAT IS YET to be seen is what Kamboj can offer when the pitch is on the flatter side. Without movement, he has very little to work around. So if he can find a way to be successful in the middle overs, India would be relieved.

India A vs New Zealand A: Bumrah set for red-ball return after a year

Express News Service
Mumbai, November 5

Bumrah last played red-ball cricket in November 2025. FILE

JASPRIT BUMRAH'S return to red-ball cricket will be in focus when India A face New Zealand A in the third and final four-day match at the Bert Sutcliffe Oval in Lincoln on Saturday. The game gives Bumrah a chance to test himself before India begin their two-Test series against the Kiwis, starting in Wellington on November 19.

Bumrah, 32, has not played a Test match or first-class game since India's home series against South Africa in November 2025. He missed the tour of Sri Lanka in August after failing to recover in time from a knee injury. Part of India's Test squad to face New Zealand, Bumrah has been kept out of the white-ball series to keep him fresh for the longer format as India look to improve their position in the World Test Championship standings and keep their hopes of reaching the final alive.

The match gives him a chance to get overs under his belt before linking up with the senior side. The match will give him an opportunity to test his fitness and see how his body responds to bowling at different phases of the day.

India will continue to be careful with his workload. The management will want him ready for the series rather than push him too hard in a preparatory match. How many overs he bowls and how he comes through the game could be aspects to keep an eye on.

The match also offers Bumrah a chance to play alongside some of India's other red-ball bowlers such as Akash Deep, Mukesh Kumar and Prasidh Krishna, who was reportedly declared fit to join the India A squad.

India-SL ODI moved from Delhi to Vizag

Express New Service
New Delhi, November 5

'POTENTIAL WEATHER disruption' in the national capital and proposed renovation work at the Arun Jaitley Stadium were given as reasons by the Board of Control for Cricket in India (BCCI) for shifting the first One-Day International between India and Sri Lanka on December 13 from Delhi to Visakhapatnam.

"The venue change has been made following a request from the Delhi and District Cricket Association (DDCA), in view of the potential weather disruption and the proposed renovation work at the stadium," said a statement from BCCI secretary Devajit Saikia. However, it could not be clarified whether the 'potential weather disruption' related to visibility issues in winter or rising pollution levels. DDCA secretary Ashok Sharma could not be reached for comment.

The Arun Jaitley Stadium has not hosted Ranji Trophy matches this season because of renovation work. Delhi played its home Ranji Trophy matches at the Palam ground.

The last match held in Delhi in December was a Test against Sri Lanka. During that game, Sri Lanka's players wore masks. The second day's play was stopped twice as Sri Lanka fast bowlers Suranga Lakmal and Lahiru Gamage walked off the field. Sri Lanka coach Nic Pothas later confirmed that said two of them vomited in the dressing-room.

Art of pause: Tanvi's game of timing and temperament

Tanvi Patri beat Yuzuno Watanabe, the second seed from Japan, in a thrilling three-game semifinal at the Youth Olympics in Dakar. BAI

Shivani Naik
Mumbai, November 5

THE MAGIC of musical melody is in the pause. Prakash Padukone and Vimal Kumar had seen that pause in the notes, the fermata, in Tanvi Patri's game when her father brought her to the Centre of Badminton Excellence, earlier the Prakash Padukone Badminton Academy (PPBA). At Bengaluru, where her father had returned from his IT job in China, they realised that Tanvi taking a lot of time between points, and not hurrying or rushing like impetuous juniors do, was the X-factor that set her apart from others her age or even older. As also, how she timed her jumps.

The 16-year-old became the first Indian woman to reach the Youth Olympics badminton final, a medal assured. The high notes she hits in a rally are as pristinely struck as the poised pause when she resets between points. "Some strokes she plays, we don't see them in players her age," coach Sagar Chopda says. "Especially the jump on her forehand back corner." It's not just the footwork, but striking the shuttle when semi-airborne.

From the overhead, it was pure timing and technique that helped her crosscourt drops and half smashes travel as far as they did. It shone when she navigated tricky finishes. In the semi-final against Japan's Yuzuno Watanabe, she went from 14-9 up to 14-all and 18-18 in the decider, before closing it out 21-19 without falling to nerves.

Taking on the Chinese Yi Xin Zhang, the reigning World Junior champion, a leftie who endlessly retrieves, not unlike Tanvi, was always going to be tough. But while awaiting the final, her coaches knew they could trust the Indian to deliver in the crunch, for she has an unflappable temperament on points after 17.

Travelling coach Umendra Singh Rana, who also trains her day to day at the academy, was happy with another aspect that is rare in juniors: knowing how to handle drift. "Court conditions were tough, one side very slow, the other much faster. It needed good strategy, mindset and managing pressure. Her temperament is her strongest point. She doesn't take pressure," Rana says. "In close score situations, she is always strong and I will always back her. It's an inborn quality."

> **"She's street-smart and a quick learner, and understands and executes plans well. She doesn't talk much to coaches, but chats a lot with her friends, and is known to pull pranks on boys. On the court, some people just have the knack to finish out matches."**
> **SAGAR CHOPDA**
> TANVI PATRI'S COACH

Her game is that of a very good runner. She retrieves with elan. Though her smash lacks power, the downward strokes have deadly accuracy. "She is also good at executing gameplans and making adjustments," Rana says.

Simulating drift

At Bengaluru, simulating drift also means tampering with shuttles in training to make them travel fast. At Dakar, Tanvi gradually acclimatised to the drift and pulled through the semi-final by adapting better to shuttle lengths. While the overhead attacking strokes always draw more attention, it's her underarm, below-the-net shots like the lifts, and the holding game, controlling the clears, where Tanvi is far ahead of the game-sense curve.

Though she lost in the pre-quarters at the World Juniors, she has learnt from experience how to prepare better. "She's street-smart and a quick learner, and understands and executes plans well. She doesn't talk much to coaches, but chats a lot with her friends, and is known to pull pranks on boys. On the court, some people just have the knack to finish out matches. Her accuracy on line smashes is impressive," Chopda says. This before the power and strength even kick in.

• Ranji round up: Day 4

GROUP A

At Kanpur: Baroda 355 & 169/6 (Atit Sheth 40*) drew with Uttar Pradesh 492 (Adarsh Singh 162, Madhav Kaushik 137)

At Srinagar: Puducherry 385 and 269/6 (Ankit Sharma 62, Aman Khan 52*) drew with J&K 555/6 decl (Shubham Khajuria 190, Qamran Iqbal 160)

GROUP C

At Ahmedabad: Gujarat 534/9 decl bt Kerala 279 & 191 (Sachin Baby 52; Arzan Nagwaswalla 4/24) by an innings and 64 runs

At Delhi: Services 266 & 397/9 decl (Rajat Paliwal 116, Mohit Ahlawat 142) drew with Delhi 344 & 168/4 (Yash Dhull 104*)

GROUP D

At Chandigarh: Tamil Nadu 571/7 decl bt Chandigarh 94 & 218 (Arjun Azad 60, Manan Vohra 59; Ajith Ram 7/48) by an innings and 259 runs

In Dharamsala: Rajasthan 78 & 521/8 drew with Himachal Pradesh 153 & 313/7 (Pukhraj Mann 153*, Mukul Negi 82; Aniket Choudhary 3/63)

MINNOWS TRIPURA STUN SAURASHTRA BY 133 RUNS

Unfancied Tripura pulled off a stunning 133-run victory over former champions Saurashtra with off-spinner Sandip Sarkar and pacer Abhijit Sarkar sharing seven wickets between them in their Ranji Trophy Elite Group B match here on Thursday.

Chasing an improbable 342-run target, Saurashtra were bundled out for 208 in their second innings as Tripura celebrated a historic moment in their cricketing history, which also happened to be their first win of the season.

Off-spinner Sandip and pacer Abhijit led Tripura's charge to the triumph, adding to their Elite group wins over Himachal Pradesh and Goa in previous years.

BRIEF SCORES: Tripura 268 & 191 beat Saurashtra 118 & 208 all out in 77.3 overs (Arpit Vasavada 89, Sandip Sarkar 4/81, Abhijit Sarkar 3/26) by 133 runs **PTI**

• RANJI TROPHY

Musheer ends Railways' escape act as Mumbai win by 106 runs

Shankar Narayan
Mumbai, November 5

Musheer Khan took three wickets to help Mumbai beat Railways. PTI

AT 250/5 at the final drinks break on the final day at the Brabourne Stadium, it seemed Railways were going to pull off a draw and gain something from the match. Eshaan Goyal and Zubair Ali had put on an outstanding stand to rescue their side from a precarious 83/5 in the 31st over.

Mumbai captain Siddhesh Lad later said he and his side felt that, at that stage, it was a matter of one wicket, something that had proved elusive for long periods of the afternoon. Musheer Khan toiled away in the afternoon heat and was also taken on by Ali. But off the first ball after the drinks break, Musheer turned the course of the match.

Goyal went for the paddle sweep over leg slip, but Musheer's brother Sarfaraz Khan, stationed at first slip, anticipated the shot and moved quickly towards leg slip to pouch the catch. Sarfaraz then sprinted away in celebration as the 167-run stand for the sixth wicket was finally broken.

A couple of overs later, Musheer dismissed Ali, caught at long off by Suryansh Shedge, and suddenly, a different result looked likely. Raj Choudhary and Himanshu Sangwan defended resolutely, but Tanush Kotian dismissed the former before Musheer returned to remove the last man, Adarsh Sangwan, and help Mumbai pull off a 106-run win.

Five wickets had fallen for 15 runs as the 42-time champions clinched a fourth straight win of the season.

The turnaround was remarkable given the position Railways had reached after being in the doldrums. Shams Mulani had struck twice in successive deliveries, and Mumbai looked like closing in on another victory. Goyal, who had watched partners come and go at the other end, had other ideas.

In their previous game against Tamil Nadu, Railways' batsmen had struggled against the left-arm spin of R Sai Kishore and Ajith Ram. On Thursday, they had to contend with Mulani and Musheer. Goyal, who had made 0 and 4 against Tamil Nadu, recognised that the pitch was not offering much assistance and brought out the sweep regularly, mixing the full-blooded shot with the paddle. Lad kept attacking fields for much of the 372-run chase, leaving spaces for the batsmen to exploit. Goyal was content to bide his time, while Ali took the more aggressive route. Having scored 75 in the first innings against Tamil Nadu, Ali went after the left-arm spinners and Kotian.

Kotian had said on Wednesday that the rough outside a left-hander's off stump seemed better suited to the left-arm spinners. Ali largely negated that threat, flicking Mulani past mid-on and often going down the ground.

He was just as comfortable against Tushar Deshpande, driving him straight and pulling him for boundaries. Lad tried different ways to break the stand, including placing two fielders at deep fine leg and one at square leg, while Deshpande resorted to the short ball. Ali took on the bowler and found ways to score.

Ali's scoring rate meant Goyal was at times reduced to a spectator in the third session. Ali went past his partner with a cut for four off Mulani and kept the pressure on the fielders.

Ali brought up his hundred with a single off Kotian, reaching the milestone from 102 balls. Goyal followed, completing his century from 186 deliveries. From 83/5, Railways had reached 250/5, and a draw looked within reach before the tide turned spectacularly.

Mumbai had earlier declared at 234/4 in the morning session, with Divyaansh Saxena completing his maiden first-class hundred. The left-hander added 60 runs with Sarfaraz as Mumbai looked to score quickly and set Railways a challenging target. Saxena brought up his century with a single to third man, following which came the declaration.

BRIEF SCORES: Mumbai 396 and 234/4 decl in 42.5 overs (Divyaansh Saxena 100*, Angkrish Raghuvanshi 79) beat **Railways** 259 and 265 all out in 77.2 overs (Zubair Ali 115, Eshaan Goyal 103; Shams Mulani 4/69, Musheer Khan 3/42, Tanush Kotian 2/93) by 106 runs

Alcaraz enters Paris Masters quarterfinals; Novak loses

Carlos Alcaraz. REUTERS

Reuters,
Paris, November 5

SECOND SEED Carlos Alcaraz, who beat Alex Michelsen in his opening match, advances directly to the last eight, where he will face either France's Arthur Fils or American Taylor Fritz.

The Spaniard is chasing a fifth title of the season in Paris after winning the Australian Open, Qatar Open, Japan Open and last week's Vienna Open.

Alcaraz, who missed more than four months with a wrist injury, has already secured his place at the ATP Finals in Turin and carries a 39-5 record this season into the ATP Masters 1000 event. Lorenzo Musetti spoiled Alexander Zverev's first match as world number one by toppling him in the second round of the Paris Masters on Wednesday, while Rinky Hijikata ended Novak Djokovic's hopes of qualifying for the ATP Finals. The 29-year-old Zverev, who climbed to number one on Monday, suffered a surprise 7-6(5) 6-2 defeat just days after losing to Australia's Alex de Minaur in the Vienna Open semi-finals.

Musetti, a former world number five, seized the initiative by winning six of the final seven points of the opening-set tiebreak before taking command of the second set.

The 24-year-old Italian broke Zverev for a 2-1 lead and struck again to move 5-2 ahead on his way to victory.

World number 24 Musetti, a former French Open and Wimbledon semi-finalist, fired 29 winners and eight aces during the contest to improve his head-to-head record against Zverev to 4-2.

The win continued a resurgence for Musetti, who has been hampered by injuries throughout the 2026 season. His toughest setback came at the Australian Open, where he retired while leading Djokovic by two sets in their quarter-final. Musetti ended a four-year wait for a title in Lyon last month. Zverev has already secured his place at this month's ATP Finals in Turin, but Djokovic's hopes of joining him were ended by world number 83 Hijikata. The 25-year-old Australian beat the 24-times Grand Slam champion 2-6 6-3 6-3.

Djovkovic falls

The 39-year-old Serb, who missed the last two editions of the season-ending tournament, arrived in Paris needing a deep run after early exits in Shanghai and Basel.

Elsewhere, unseeded Peruvian Ignacio Buse claimed the biggest win of his career by upsetting Russian fourth seed Daniil Medvedev 6-4 6-4. Medvedev, who has already qualified for Turin, received an unsportsmanlike conduct penalty after striking the court in frustration at 4-4 in the second set.

SHOOTING WORLD CHAMPIONSHIPS

Farmer, late starter Malviya wins 10m air pistol silver, books LA Oly quota

Shashank Nair
New Delhi, November 5

Jaypal Malviya finished second behind Kai Hu of China. NRAI

YOU CAN make a list of non-starters for a shooting World Championship medal or even a top-level career in the sport and Jaypal Malviya checks most of them. He is 31 years old, and started pistol shooting only at the age of 26. He is a farmer and has never held any other formal job. He still uses a second-hand pistol because 'it works well'. He is only participating in his second-ever international competition. According to him, his family still doesn't know that he is a pistol shooter for the national team and that the best way for them to find out would be to possibly read/watch it on the news someday.

That day is today.

The confluence of all of these factors should not lead to a silver medal at the World Championship, or an Olympic quota for the 2028 LA Olympics. But Malviya bucked the odds in Doha on Thursday, completing an unlikely story that he wouldn't have been able to predict or envisage even a year back.

A qualification score of 585 with 24 inner tens showed just how locked in the MP shooter was at the start of the day. And then in the final, Malviya struck when it mattered. He was not consistent – barely anyone on the range was. The first indication that a medal was coming came in the four shots from shot numbers 13-16 of the final. Malviya aced the moment, hitting four 10s in a row (10.6, 10.2, 10.7 and 10.8). He added another two shots in the ten-ring to ensure that the quota was going to be his.

Malviya had the chance to go for gold at one point as well with eventual champion Kai Hu hitting an uncharacteristic 8.4. But his first event of the World Championships ended with a memorable silver medal draped over his neck.

> **"I was 26 at the time. If you start trying to do something at that age, no one will support you. They would have told me to not get stuck in all of this and get a job instead."**
> **JAYPAL MALVIYA,** ON HIS LATE START

Before taking only his second-ever international flight to Qatar's capital for the World Championships, Malviya took part in five national trials and vanquished established acts like Paris Olympics bronze medalist Sarabjot Singh and 2025 World Championship gold medallist Samrat Rana. On Thursday, he showed little consideration to his lack of elite level experience — a factor that has felled younger Indians at these Worlds — and shot a score of 242.9 to finish second at the men's 10m Air Rifle event.

Hailing from Chandan village of the Chhindwara district of Madhya Pradesh, Malviya initially started using a rifle through the NCC programme. But it was a seasonal hobby at the time and when the Covid 19 pandemic hit, Malviya transitioned to a pistol.

"The rifle I would use for competitions was open sighted. It's the same case for a pistol. The only difference is that the barrel of the rifle is long. Once I realised my stability using a pistol was good, I made the switch," said Malviya before flying out for the World Championships. "At that time, there was no coach but I qualified for the state level. Then I qualified for pre-national level," he added.

Self-coached in pistol until he reached the state level, Malviya's lonely journey finally got some company in 2023 when Dharmendra Dudi, a coach at the Bhopal Shooting Academy took him in and started giving him some basic tips.

From that point on Malviya, who still was shooting seasonally, did a six-week course at the Dr Karni Singh range.

"Till now I'd only heard coaches give me advice. Doing the course, I felt like good coaches could finally look at my technique and tell me how to improve," Malviya said.

Then came the national trials. The rankings continued to increase, and he found himself a spot in India's B team. Soon the bit-part B player made it to the A team. One problem though – he was still using the first-ever pistol he had purchased.

"I bought my first pistol in 2021. It was a second-hand Walther for Rs 1,05,000. I still use it because it works well. When it needs fixing, I get it repaired through Walther."

Some of the money that he made came from farming – soybean, corn and then wheat for a few months. The rest came from a lie to his family – he told them he needed money for PSU coaching. He instead purchased a pistol. "I was 26 at the time. If you start trying to do something at that age, no one will support you. They would have told me to not get stuck in all of this and get a job instead, or that this was the age to get married."

Even the people at the MP shooting range weren't supportive. "'Tum deewar pe sarr patak rahe ho. (You're banging your head against a wall)' they would say," said Malviya.

On Thursday, Malviya showed the same bravery that he has for the past few years. He ignored the naysayers and simply focused on his target.

FLAWED GENIUS

Ronaldo calls it a night for Portugal after 23 years

'Crazy child' of 2004, who became the greatest Portuguese footballer, retires from national team duties

Shuvaditya Bose
New Delhi, November 5

Cristiano Ronaldo's last game for Portugal was in Nations League. AP

"*MIÚDO RESPIRA, respira miúdo*," Fernando Couto called out. Just breathe, kid, just breathe.

Couto, then captain of Portugal, stood at the dusk of a storied career that had left him little to learn. Yet nothing had prepared him for the teenager at the Euro 2004 camp. Lanky, speedy, taped ears, chestnut-brown curls with copper highlights tumbling over his forehead in a carefree, almost rebellious fashion.

Many traits set the boy apart, and one above all: hunger. He ran through training with such abandon that Couto feared he would run himself into the ground.

He would soon learn that Cristiano Ronaldo could not be stopped. In the opener, Portugal trailed Greece 2-0 in the 93rd minute. Every shoulder had dropped, save for one. Ronaldo sprinted to meet a corner, jumped the highest and scored his first international goal at 19 years and 128 days.

That hunger would feed him 145 more.

The spotlight was not yet his. The squad was glittered with Luis Figo, a national icon decorated by both Barcelona and Real Madrid, and Rui Costa, a Champions League winner with AC Milan. "He was somewhat unnoticed amidst the likes of Couto, Figo, Rui Costa and Deco," recalled Carlos Godinho, then the team's director.

But by the end of the tournament, the stage was his. But the tournament ended in tears. Portugal lost the final 1-0 to Greece, and Ronaldo knew what had slipped away. "I am an ambitious person. I wanted to become a European champion at 19," he said. Then came a promise: "This doesn't end here."

Twelve years later, he would cry again, for a very different reason.

• • •

On the eve of the 2014 World Cup, José Carlos Noronha, Ronaldo's doctor, delivered a warning: "Let your knee rest, or your future is in danger."

Ronaldo then was among the finest the game has known. He had scored 51 goals for Real Madrid that season, 17 of them in the Champions League, a record that still stands. The Ballon d'Or was his. Through it all, his knee had been quietly taking its toll.

Medical advice did not detain him. "I'm at 100 percent. I want to have a great World Cup," he announced before the opener against Germany.

Disaster followed. Portugal lost 4-0, drew with the United States and were eliminated at the group stage for the first time in the Ronaldo era. He directed the blame at the collective rather than the individual.

• • •

When Fernando Santos named his squad for Euro 2016, he did what any manager worth his salt would and spoke of winning the trophy, though with a bullish disclaimer.

"Portugal does not enter as the favourite, we have never claimed to be, but we have the ambition to fight for that goal."

Yet, this was the first, and to date, the only Portugal team to win the continental crown. With five goal contributions, Ronaldo was seen at his near-best. While he could only feature for 25 minutes in the final before getting injured, his presence on the touchline had a big effect on the team.

The very team he had once called average now punched above its weight for him. "It was tough to lose our main man. We said we would win it for him," said Pepe.

Éder, who scored the winner, added: "Cristiano told me I would score the winning goal. He gave us all his courage and his strength."

• • •

"I gave it my all, I did my best, and I'm leaving with a clear conscience," Ronaldo said after Portugal's 1-0 exit to Spain in the 2026 World Cup's Round of 16, a match in which he touched the ball just 19 times, fewer than the goalkeeper.

In came Jorge Jesus, under whom Ronaldo had won his first Saudi Pro League title. The appointment was meant to rejuvenate a veteran. "Cris will never be a problem," the coach said.

In only his second game in charge, Jesus found it fitting to leave Ronaldo on the bench. A public fallout ensued. And, as it turned out, Ronaldo's last action for the national team was running down the tunnel without applauding travelling supporters. The ledger reads: 146 goals, the most in international football. The first Portuguese footballer to lead his nation to a trophy. The first man to play in six World Cups. Three trophies, none of them the World Cup. And controversies aplenty.

• Ronaldo's many feats

- **146** **Most goals** in international football
- **14** **Most goals** in European Championship
- **234** **Most appearances** for Portugal
- **First captain** to win a trophy for Portugal
- **First player** to score in six different World Cups

ALL STATISTICS ARE PERTAINING TO MEN'S FOOTBALL

ASIAN CHAMPIONS TROPHY

India defeat Japan 4-1 to clinch yet another ACT title

Nitin Sharma
Chandigarh, November 5

Indian men's hockey team with the trophy. JASBIR MALHI

THE SCORELINE read 4-1 in India's favour. But it did not convey the drama, and emotions the final between India and Japan produced in the Asian Champions Trophy final at Mohali's Balbir SIngh Senior International Stadium.

The mood before the game was one of merriment. Bhangra beats echoed in the stands. The crowd was upbeat of the hosts' triumph, as India had beaten Japan with an identical scoreline in the group stage. But it took only three minutes into the match for agony to descend. Kazumasa Matsumoto's gorgeous reverse hit found the back of the net and silenced the crowd. For 41 minutes, India laboured, suffered several nearly moments, and saw frustration creep in. But Shilaland Lakra's 42nd minute strike not only put the game on the balance but opened the floodgates of a goal deluge. Six minutes on, Dilpreet Singh scored, followed by strikes from Jugraj Singh and Vivek Sagar Prasad. In 12 minutes of frenzy, India effectively wrapped up a memorable comeback to lift their sixth ACT crown.

> ***The mood before the game was one of merriment. Bhangra beats echoed in the stands. The crowd was upbeat of the hosts' triumph, as India had beaten Japan with an identical scoreline in the group stage.***

Patience was the key, as the Japanese rearguard kept firm. Abhishek Nain, Dilpreet, Sukhjeet Singh and Hardik Singh all missed chances in the first quarter. Japan's goalkeeper Kisho Kuroda stood like a boulder repelling the forays. The second quarter saw much of the same. India enjoyed the bulk of the possession. But the sturdy Japanese defence frustrated them. When the half-time whistle blew, India dominated every facet of the game, except the one that mattered. They enjoyed 11 circle penetration as compared to Japan's six, they had two shots on target whereas Japan had one. India hoarded 52 per cent ball possession. But the only number that mattered belonged to Japan. Goals scored. Another stat too reflected that Japan was not merely content parking the bus. They were awarded two penalty corners, India had none.

Japan employed tight man to man marking. India needed to weave a needle through its eye. It required vision and wisdom. In the third quarter, Hardik and Nilakanta Sharma strung a few fine moves to signal that India had the penetration to break their wall down. Their vigour was rewarded as India got two penalty corners in quick succession. One of them resulted in the equaliser. Kuroda stopped Harmanpreet's drag-flick, but Aditya Lalage latched onto the rebound and passed to Shilanand, who converted from close range.

Japan contested the decision but the video umpire deemed that Aditya's aerial pass was not dangerous. Weirdly, Japan changed their goalkeeper from Kuroda to Takumi Kitagawa. The move did not change their fortunes. India scored in a torrent. Dilpreet obliged a pass from Hardik before Jugraj Singh converted a penalty corner. Vivek wrapped off the memorable night with India's fourth goal, striking home a rebounded shot from Shilaland.

Relief flashed across their faces. Captain Harmanpreet admitted that Japan dominated them in the first two quarters. "Their opening goal showed that they had come with a plan. We missed some opportunities in the first two quarters but we knew we could make a comeback. Japan were marking man-to-man. We had to depend on zonal (marking). The midfield needed stepping up," he told The Indian Express.

"The message to the team was to believe in ourselves. We knew that if we stick to our plans and structure, goals will come," he said.

India coach Craig Fulton wasn't overly worried either. "Japan had a very good half. But we came back against Japan and Korea. So we had the belief that we could make a comeback. We were not down by three goals," he told this paper. "Then we got four goals. We went for full press and full effort in the last two quarters and we knew we could do better," he added.

The win, Indian coach Craig Fulton said, was timely. "These matches were very important, as the focus now shifts to how we enter the next 18 months prior to the LA Olympics with some new faces. The experienced guys and the youngsters will learn like they learned from this tournament," he said. Beneath the scorelines, there were lessons India learned.

• RECORD-BREAKING NIGHT

Fabregas's Como went from changing in a bar to thrashing Lens in UCL

Sriram Veera
Mumbai, November 5

WHEN CESC Fabregas arrived at Como as a player four years ago, in Serie B, the team changed in a bar. "We had massages in the back room of a bar," he said in May, after Como had clinched a place in the Champions League. "Everyone used to leave at 12 or 12:30, there was nobody around."

On Wednesday night the same club scored nine goals in a Champions League match at Lens. No away side has done that before. The 9-1 win at the Stade Bollaert-Delelis equalled the biggest margin of victory the competition has seen. Tasos Douvikas, the Greek striker, scored three, in the seventh, 32nd and 57th minutes, and leads this season's scorers with six. Six others scored once each, Nico Paz among them. Matteo Papaccioli got the ninth in the first minute of stoppage time, after Mattia Liberali turned and threaded a pass through the Lens defence. Ruben Aguilar's volley in the 65th minute was all that Lens had. They are 33rd.

"It's a crazy night and a crazy result, but we can't get ahead of ourselves," said Da Cunha, the captain. "We came for the three points and that's what we were able to secure."

Top half of table

Como now have nine points from four games and are fourth in the table. They beat RB Leipzig 4-1 on 10 September, lost 3-2 at Feyenoord on 14 October, and a week later had Manchester United at the Stadio Giuseppe Sinigaglia, which holds about 12,000.

Paz scored after 118 seconds, and United lost 4-1. Michael Carrick walked to the away end and apologised to the supporters. Before the game Fabregas was asked if he would take over at Old Trafford. He declined, saying it would not show "enough respect to a great footballer and manager like Carrick". With his side 4-0 up, he was bothered by the goal United scored in stoppage time. "That goal hurt me," he said.

Paz, reported as a Real Madrid target in the summer, had said after the Leipzig game: "It was for nights like this that I wanted to stay." Qualification came on the last day of the season, and not on Como's terms alone. They won 4-1 at Cremonese on 24 May, but fourth place also needed Milan to lose to Cagliari at San Siro.

Como players celebrate after scoring against RC Lens. AP

Fabregas, on the touchline, never once asked what was happening there, Football-Italia reported. In the huddle afterwards he told his players: "You will be remembered forever." It was Como's first major European competition since the 1980-81 Mitropa Cup. Their previous best Serie A finish, sixth in 1949-50, had stood for 76 years. The bar is an old habit here. Como were founded in 1907 by a committee that gathered at the Taroni bar on Via Cinque Giornate.

> **"It's a crazy night and a crazy result, but we can't get ahead of ourselves. We came for the three points and that's what we were able to secure."**
> **LUCAS DA CUNHA,** COMO'S CAPTAIN

They have been declared bankrupt twice this century, and they were in Italy's amateur fourth tier as recently as 2018-19. When Indonesia's Djarum Group bought the club in 2019, the crowds were around 800. The owners had not come for football. Mirwan Suwarso, now the president, told ESPN he was working for a television station that had just lost the rights to Italian league matches. The plan was to fill the side with young Indonesian players and show them back home. Three months after the purchase, the club was promoted into the third division, and "you're no longer allowed to have foreign players".

Then offers to buy the club arrived, which suggested there was a business to build. Michael Bambang Hartono, one of the two brothers who own Djarum, died in March, aged 86.

What they had was a lake. Suwarso told ESPN that the region had "maybe 1.9 million tourists" in 2019, and 5.6 million last year. The club calls itself a "sports tourism destination".

Fabregas took a minority stake in 2022 and became head coach in November 2023, at first as caretaker. Como went up to Serie A in 2024 after 21 years. "There was practically nothing when we started," he said in May. ESPN quotes him describing the starting point as "not just zero, but minus-10".

For the Leipzig game, Suwarso and the other directors gave up their seats in the stand. Suwarso wrote on Instagram that the tickets should go to fans "who have waited for the longest time", those born in 1950 or earlier who had followed Como "in every category and in every era". More than 40 of them went.

INTERNAL POLLING 6 weeks ago made clear Republicans would lose: Official

WHITE HOUSE strikes a defiant tone, posts: 'PSA Trump is still your President'

TRUMP ALLY Harmeet Dhillon, leading Justice Dept civil rights unit, set to resign

Republicans call for Trump to change course fast after midterm drubbing

Losses fuel calls for President to shake up White House as administration braces for Democratic investigations

Reuters
Washington, November 5

PRESIDENT DONALD Trump faced pressure from Republicans on Wednesday to change course after a midterm rout handed Democrats control of Congress and voters rejected his handpicked candidates.

Republican allies urged Trump to overhaul his White House team, restore discipline and abandon policies blamed for the losses, including the Iran war and tariffs. Veteran Republican strategist John Feehery called the results a "huge disaster". "He needs to clean house," he said. "Every day from this point forward, he's becoming more and more lame."

Trump showed little sign of changing direction. "I don't view it as a hit on me," he told *Fox News*.

Democrats will be able to block Trump's legislation, investigate his administration and challenge his nominees, pushing him towards greater reliance on unilateral action.

Vice President JD Vance on Wednesday appeared to distance himself from Trump, blaming the Iran war for the losses. Strategists said such breaks could grow if Republicans conclude the president's grip on the party is weakening.

Inside the White House, aides were bracing for staff departures, possible Cabinet changes and Democratic investigations, a senior official said on condition of anonymity. "It absolutely sucks to be here right now," the official said. "Morale is as low as it can get."

The official said internal polling had warned six weeks before the election that Republicans were headed for losses in both chambers, but Trump ignored warnings about the political cost of continuing the war. "Ultimately, he just didn't care," the official said. "He refused to listen to anyone."

Republicans were concerned about Trump's focus on the White House ballroom and Washington renovations. Focus groups for competitive Senate races in Michigan and Iowa showed growing opposition to the projects among Republican and independent voters, a Republican political adviser said.

"If Trump spends the next two years talking about this same shit, we will get shellacked again in the next election," the adviser said. Trump took reporters to the ballroom construction site Wednesday and defended time he had devoted to it. "For me it's relaxing," he said.

Reuters previously reported that the White House had spent months preparing executive actions on immigration, tariffs, housing and federal spending to advance his agenda despite Democratic opposition. "Nobody wants to deal with the investigations," the official said.

President Donald Trump at the White House Ballroom construction site on Thursday. AP

Day after, Trump brags about his ballroom, deflects blame

Associated Press
Washington, November 5

PRESIDENT DONALD Trump reacted Wednesday to Republicans' midterm election losses by showing off White House ballroom he's building as he demonstrated the kind of detached behavior that voters around the country said was a key reason they opted to punish his party.

In an extraordinary scene, Trump summoned reporters to hulking construction site that he demolished the East Wing to make room for and the Republican president spoke for nearly 20 minutes about building details. He did not mention his party losing control of Congress.

"This has been a structure the likes of which has never been seen anywhere," Trump said.

He talked at length about how the ballroom would be the "safest place in Washington" upon completion, stretching five stories underground and featuring a cut of marble that he called "a vein that people have been after for 50 years."

"We have large staircases coming from the kitchen. If I put the kitchen on top, you would lose three walls, because a kitchen takes about 30% of the space," Trump said of his choice to make the ballroom's kitchen subterranean. "It's going to be top of the line," he added.

Presidents usually speak with reporters the day after the midterms. It's normal for those whose party endured big losses to shoulder publicly at least part of the responsibility.

But not Trump. He began the day with a schedule that showed private meetings, then suggested he had decided at the last minute to invite the press to watch as the final steel beam was hoisted into place on the ballroom roof. Trump signed the beam with a marker during the ceremony, writing "Love!" followed by his name in supersize letters.

The beam-raising was not his first baffling political moment this week. On Monday, Trump gave his closing message of the midterm cycle in a long speech at the Lincoln Memorial Reflecting Pool, shining a spotlight at a pivotal time on a project marred by algae, leaks and delays. "I heard it was a very good speech, got great reviews," he said.

Trump supports Hegseth for now as rivals gun for 'champion of war'

Associated Press
Washington, November 5

US PRESIDENT Donald Trump backed Secretary of War Pete Hegseth Wednesday, a day after Democrats won control of both chambers of Congress in midterm elections that reflected voter anger over the Iran war.

Asked whether he was considering replacing Hegseth, whom he has described as a "champion of the war", Trump told reporters: "No, I think he's doing a very good job."

The response contrasted with then-President George Bush, who fired Defence Secretary Donald Rumsfeld the morning after the 2006 midterm elections, when voter discontent over the Iraq war helped Democrats win control of Congress.

But sources said Trump could still replace Hegseth as Republicans assess their losses.

One Trump adviser said Hegseth "could be on the chopping block" because of the war. "Someone is going to get blamed for this and you know it's not going to be him (Trump)," the adviser said. Trump has described Hegseth as a key proponent of the unpopular conflict, saying on March 23: "Pete, I think you were the first one to speak up, and you said, 'Let's do it, because you can't let them have a nuclear weapon.'"

The Defence Department said Hegseth was "100 percent committed" to leading the Pentagon until end of Trump's term, which ends on January 20, 2029.

Vessels in the Strait of Hormuz, as seen from Musandam, Oman. FILE

3 more tankers hit in Hormuz as Iran keeps up pressure

Reuters
Dubai, November 5

IRAN REPORTED three more tankers had been damaged in the Strait of Hormuz Thursday, making clear shipping would remain in peril as long as the war in Gulf is unresolved, now that US voters have punished President Donald Trump for waging it.

Vice President JD Vance said in a long social media post on Wednesday that the war was to blame for his party's defeat.

In a mocking reply on Thursday, Iran's Parliament Speaker Mohammad Bagher Ghalibaf accused Vance of letting Trump double down like a "losing gambler" by planning more US strikes. If Vance believed the war was a mistake he should persuade Trump to call it off, Ghalibaf said: "Skip the TED talk. Why not say this to your boss?"

Iranian officials have been meeting with Qatari mediators since last week to discuss proposals to end the hostilities. But neither side has announced any breakthroughs.

Meanwhile, tanker attacks in the Gulf remain close to a record pace, with at least five vessels reporting incidents since Sunday, according to UK maritime security agency UKMTO. It said a ship was struck by two unidentified projectiles Wednesday.

Iran's Revolutionary Guards said two tankers had struck naval mines and another had caught fire on Thursday.

When asked about Vance's comments on the war, Trump defended the decision to launch it, saying it was important to prevent Iran from getting a nuclear weapon.

A White House adviser told *Reuters* that some officials and staff inside the White House viewed Vance's post as a foreign policy break from the president and a public recognition of the war's economic consequences.

But two sources told *Reuters* they believed Trump was still likely to order resumed hostilities. "He is planning to bomb Iran. Don't listen to what he's saying. He held off because of the midterms. We asked him to hold off until the midterms," said one of the sources. The other said Trump did not have anything to lose politically now.

A fresh wave of bomb hoaxes hits 27 passenger flights across Europe

Reuters
Rome, Warsaw, Evreux, November 5

HOAX BOMB threats hit at least 27 affected flights around Europe on Thursday from Ireland to Bulgaria, the second wave this week, forcing some to make unplanned landings and prompting fighter jets to escort or intercept others.

While no country has attributed blame for the threats, they come as many European officials are accusing Russia of masterminding sabotage and "hybrid attacks" — often cheap, easily deniable and not expected to trigger an armed response.

Denmark, Poland and Romania, all affected by Thursday's disruptions, have previously accused Moscow , while Germany blamed Russia for an attack on Leipzig airport in August. Britain has blamed Russia in the past but linked Iran to a suspected plot to attack a US air base.

Eric Schouten, head of the aviation security group Dyami, said most of the countries affected supported Ukraine in its war against Russia's invasion.

"From a geopolitical view... you always have to think about the scenario of hybrid warfare... today we are looking at Russia, right? — is attacking us on multiple fronts, from railways to supermarkets to blood banks, most recently..." he said.

Midterms over, Democrats plunge into 2028 presidential race

Vance and Rubio lead a smaller Republican field

Reuters
Washington, November 5

WITH THE US midterms over, Democrats are turning to what could become one of their most crowded and unpredictable presidential primaries in decades, a 2028 contest likely to expose the party's divide over how to win back the White House.

No Democrat has emerged as a clear favorite in a field that could attract dozens of contenders, while Republicans have a smaller group of widely discussed candidates, led by Vice President JD Vance and Secretary of State Marco Rubio, to succeed President Donald Trump.

Despite their victories on Tuesday, Democrats enter the 2028 campaign still divided over whether to tack to the center or move further left on issues ranging from healthcare and taxes to policing and foreign policy.

Race for White House heats up

Republican candidates will face a different challenge - how to distance themselves from Trump after Tuesday's repudiation of his policies. They need to broaden their appeal beyond the president's base while avoiding a break with Make America Great Again movement that has come to define the party.

Several potential candidates have either acknowledged considering a White House run or declined to rule one out. They include former V-P Kamala Harris, who lost to Trump in 2024, Governors Gavin Newsom of California and Andy Beshear of Kentucky, former Transportation Secretary Pete Buttigieg, and US Representative Alexandria Ocasio-Cortez of New York.

Nine days after the November 3 elections, several prospective Democratic candidates, including Buttigieg and another progressive, US Representative Ro Khanna of California, are scheduled to attend a gathering in Denver hosted by Majority Democrats. The group, backed largely by moderate Democrats and billionaire donor Steve Mandel, advocates for younger party leaders and a party platform that is more centrist.

By contrast, Republican 2028 hopefuls have remained guarded, staying in Trump's shadow and avoiding confrontation. That could change after Tuesday's rout. Vice-President JD Vance is in a particularly difficult position because, unlike other Cabinet members, he cannot resign, Republican strategist Matt Dole said.

Vance has said there is "a chance" he will not run, citing family considerations, while Rubio has said he has "no plans at this time" to seek presidency.

Netanyahu's position weakens as Orthodox party withholds support

Reuters
Jerusalem, November 5

BENJAMIN NETANYAHU'S position in the post-election battle to stay on as Israel's prime minister weakened on Thursday after an ultra-Orthodox Jewish party withheld support for any nominee and an Arab-led party endorsed his main opponent.

Israel's president was due to meet Netanyahu and his chief political rival Gadi Eisenkot to decide which of the two men to pick to form a government, after holding consultations with smaller parties.

That has set up a tough task for President Isaac Herzog, whose mostly ceremonial role comes with the post-election responsibility of picking a candidate he believes has the best chance to break the deadlock in a deeply divided country.

Herzog has until November 11 to decide. Netanyahu remains prime minister in a caretaker government until a new coalition is formed, or through another election which must be held if no candidate succeeds.

In a setback for the PM on Thursday, United Torah Judaism, one of two major parties representing ultra-Orthodox Jewish voters and a longstanding Netanyahu coalition ally, declined to recommend any candidate to form a government.

And while Eisenkot, like Netanyahu, has so far ruled out forming a government with Israel's two Arab-led parties, one of them endorsed Eisenkot on Thursday and the other was expected to do so later in the day.

Herzog has called on parties to do their utmost to avert another round of elections.

"Any reasonable person need only look at the security and diplomatic challenges before us..., to understand that an immense responsibility rests upon us," Herzog said.

Paraguay President Peña resigns amid bank collapse

Asuncion: Paraguayan President Santiago Peña resigned on Thursday as calls for his removal swelled following the collapse of digital lender Ueno that left millions of customers unable to access their accounts.

"I do so with the stability of our country, social peace, and the need to preserve our democratic institutions in mind," he said in a video address Thursday.

Peña, an ally of US President Donald Trump, is stepping down after the opposition called an session to begin the process of filing an impeachment motion in Congress, and protesters demanded his resignation.

Paraguayan President Santiago Peña

Earlier Thursday, Peña lost backing from members of his own conservative party. Vice President Pedro Alliana is set to take office as his replacement.

Lawmakers accused Peña of conflicts of interest, pension fund misuse and cover-ups linked to Ueno's collapse. The bank grew from a fintech player into a mid-tier bank managing $850 million in public funds.

Putin will not attend G20, says PM Burnham

BRITISH PRIME Minister Andy Burnham said Russian President Vladimir Putin would not attend the G20 summit in Britain because of UK sanctions, The *Economist* reported Thursday. Asked whether Putin would be invited, Burnham said "No", adding that while Russia could not be disinvited as a G20 member, Putin would not attend because of an "outstanding sanction". REUTERS

• POPE LEO WORE HIS USUAL WHITE VESTMENTS, BOB DYLAN VISITED THE VATICAN IN A DARK HOODED SWEATSHIRT AND A POLKA-DOT TIE

A memoir, a papal rosary but no songs: The American bard's meeting with Pope Leo

Pope Leo XIV with Bob Dylan on Wednesday. NYT

Eric Nagourney
November 5

EVERYONE LIKES to quote Bob Dylan, even Popes.

When the singer-songwriter met with Pope John Paul II in 1997, the pontiff name-checked a lyric from the Dylan classic *Blowin' in the Wind*.

Pope Leo XIV, it seems, may be more into the deep cut.

Not long before he was elected to lead the Roman Catholic Church, he wrote a preface to a book on disarmament that quoted from a little-known 1963 Dylan protest song titled *Go Away You Bomb*.

On Wednesday, Dylan, 85, visited Leo, 71, at the Vatican and gave him a different book. Those familiar with the singer's not-insubstantial self-esteem will be little surprised to learn that it was a copy of his autobiography, *Chronicles Volume One*.

In choosing his own gift for the singer, the Vatican said, Leo — like Dylan, an American — went for one perhaps equally unsurprising: a rosary.

Leo's garb was also unsurprising: white papal vestments. Dylan wore a dark hooded sweatshirt, evoking a monk-like look. Or a *Star Wars* character, according to the internet. He also wore a vaguely knotted polka-dot tie.

According to the Vatican, Leo met with Dylan at the Apostolic Palace. The meeting, the Vatican said, "was brief, consisting of greetings and a few lighthearted exchanges."

There was no music, unlike the time Dylan met John Paul II in Bologna, Italy, in 1997. Then, at a Eucharistic Congress, he performed three songs, among them — suitably enough — *Knockin' on Heaven's Door*.

Then he shook the pope's hand. Addressing the gathering, the Vatican recalled Wednesday, John Paul riffed off a Dylan lyric: "You ask me: how many roads must a man walk down before you can call him a man? Only one. There is only one road for man, and that is the road of Jesus Christ."

The lyric Leo cited in his preface to the book *Disarmed and Disarming*, warning about nuclear disaster, was more somber: "I hate you cause yer man-made and man-owned, an' man-handled."

No exact explanation was given for how the meeting with the pope — who was only a boy when Dylan's first album was released — came about. The singer was in Italy on tour. A Vatican official with ties to popular culture, the Rev. Antonio Spadaro, was said to have played a role in the Dylan meeting.

Dylan has had an unusual spiritual journey over the course of his life. Born Jewish, he later became deeply Christian.

"I'm a religious person," he said in a Wall Street Journal interview posted on his website.

"I read the scriptures a lot, meditate and pray, light candles in church. I believe in damnation and salvation, as well as predestination. The Five Books of Moses, Pauline Epistles, Invocation of the Saints, all of it."

Leo has had his share of celebrity encounters. This year, he met with musician Bad Bunny in Spain. And Spadaro, *Reuters* reported, also helped to set up a meeting between Pope Leo and singer, poet and author Patti Smith this year. NYT

Symptom Changes Through PH Progression

Dr. Bimit Kumar Jain
Cardiologist, Delhi

Pulmonary hypertension (PH) is a condition in which the blood vessels of the lungs become abnormally affected, making it harder for the right side of the heart to pump blood through the lungs. The symptoms of PH can change gradually, and recognizing these changes is important because they may indicate that the disease is becoming more significant or that treatment needs to be reassessed.

In the **early stages**, patients may have few symptoms or notice only mild breathlessness during activities such as climbing stairs, walking quickly or exercising. Fatigue and reduced exercise capacity are also common. A person may simply feel that routine activities require more effort than before. Because these symptoms can occur with many other conditions, PH may initially go unnoticed.

As PH becomes more established, **breathlessness may occur with increasingly lower levels of activity**. Patients may need to take more frequent breaks while walking or performing household tasks. Dizziness, chest discomfort, palpitations and unusual tiredness may also develop. Monitoring changes in exercise capacity can provide valuable information about how a patient is doing.

In more advanced disease, the increased workload on the right ventricle can eventually affect its ability to pump effectively. Patients may develop **swelling of the ankles, feet or abdomen, worsening fatigue, breathlessness with minimal activity and episodes of fainting**. These symptoms can reflect right-heart strain or failure and require prompt medical assessment. Right-heart dysfunction is an important determinant of symptoms and clinical outcomes in PH.

Doctors do not assess progression based on symptoms alone. Regular follow-up may include **six-minute walk testing or other exercise assessment, blood biomarkers such as BNP or NT-proBNP, echocardiography and, when appropriate, right-heart catheterization**. These measurements help assess functional capacity, right-heart performance and overall risk. Current ESC/ERS guidance emphasizes regular risk assessment as part of ongoing PH management.

Patients should also report **new or worsening breathlessness, fainting, chest pain, rapidly increasing swelling or a noticeable decline in daily activity** rather than waiting for a scheduled appointment.

The key message is simple: changes in symptoms can provide important clues about PH progression. Regular monitoring, timely reporting of new symptoms and appropriate medical assessment can help doctors identify changes early and adjust care when necessary.

PH in Older Adults

Pulmonary hypertension (PH) can affect people of any age, but its causes and clinical presentation may be different in older adults. With increasing age, conditions such as **high blood pressure, diabetes, obesity, coronary artery disease, heart failure and chronic lung disease** become more common. These conditions can contribute to PH or make its diagnosis more challenging. The 2022 ESC/ERS guidelines note that cardiopulmonary comorbidities are particularly common in older patients with PH.

Dr. Parveen Kumar Pandey
Pulmonologist, Delhi

In older adults, PH frequently develops in association with **left-sided heart disease (Group 2 PH)**. When the left side of the heart becomes stiff or does not pump effectively, pressure can build up in the left atrium and pulmonary veins and eventually affect the pulmonary circulation. Chronic lung diseases such as COPD and interstitial lung disease can also cause PH, particularly when associated with reduced oxygen levels.

The symptoms may be subtle. **Breathlessness during routine activities, tiredness, reduced walking capacity, dizziness, chest discomfort or swelling of the ankles and legs** may be mistaken for normal ageing or attributed entirely to heart or lung disease. Persistent or worsening symptoms therefore deserve medical evaluation.

Diagnosis usually involves a detailed medical history, physical examination, ECG, blood tests such as **BNP or NT-proBNP**, pulmonary function tests and echocardiography. Echocardiography is an important first-line, non-invasive test for assessing the likelihood of PH and identifying associated heart disease. In selected patients, **right heart catheterisation** may be necessary to confirm PH and understand its underlying haemodynamics.

Treatment in older adults must be individualised. Doctors need to consider the **cause of PH, heart and lung function, kidney function, other medical conditions and existing medications**. Treating the underlying heart or lung disease, controlling blood pressure and diabetes, maintaining appropriate physical activity and follo-wing prescribed therapy are important components of care.

PH should not simply be considered a consequence of ageing. Persistent breathlessness or declining exercise capacity warrants evaluation, because identifying the cause early can help guide appropriate treatment and support better quality of life in older adults

Recognizing Common PH Symptoms

Dr. Hemant Kalra
Pulmonologist, Delhi

Pulmonary hypertension (PH) is a condition in which the blood pressure in the arteries of the lungs becomes abnormally high. This increases the workload on the right side of the heart, which has to pump harder to move blood through the lungs. PH can develop because of several conditions, including pulmonary arterial hypertension (PAH), heart or lung diseases, and chronic blood clots. Recognizing its symptoms early is important because they can initially appear mild or may be mistaken for other common problems.

One of the **most common symptoms is breathlessness**, particularly during activities such as walking, climbing stairs or exercising. As the condition progresses, breathlessness may occur with less activity. Persistent or unexplained fatigue is another frequent symptom. Some people may notice that they cannot perform activities that were previously easy for them.

Other warning signs include **dizziness, fainting, chest discomfort, a racing heartbeat and swelling of the ankles, feet or legs**. Swelling can occur when the right side of the heart struggles to pump blood effectively. In some patients, bluish discoloration of the lips or fingers may occur, particularly when oxygen levels are low.

It is important to understand that these symptoms are **not specific to PH**. Breathlessness, for example, can also occur with asthma, chronic obstructive pulmonary disease, anaemia, heart disease or reduced fitness. Therefore, symptoms alone cannot establish a diagnosis.

When PH is suspected, doctors may use **electrocardiography, blood tests, pulmonary function tests, oxygen measurements and echocardiography** to assess the heart and lungs. Echocardiography is an important non-invasive test for estimating the likelihood of PH. In selected patients, **right-heart catheterization** is required to confirm the diagnosis and measure pressures within the pulmonary circulation.

People should seek medical attention if breathlessness is persistent, worsening or disproportionate to their known lung or heart condition. **Unexplained fainting, chest pain or rapidly worsening breathlessness warrants prompt medical evaluation.**

The key message is simple: **do not ignore persistent breathing difficulties or unexplained limitations in daily activities. Early recognition and appropriate evaluation can help identify PH and allow timely management of its underlying cause.**

Role of Lung Function Testing in PAH

Dr. Nitin Agarwal
Cardiologist, Delhi

Pulmonary hypertension (PH) is a condition in which pressure in the blood vessels of the lungs becomes abnormally high. Because PH can develop due to different heart, lung or blood-vessel conditions, identifying its underlying cause is an important part of diagnosis. **Lung function testing, or pulmonary function testing (PFT), is an important component of this evaluation.**

PFTs are a group of simple, non-invasive tests that measure how well the lungs work. **Spirometry** measures how much air a person can breathe out and how quickly they can do so. **Lung-volume measurements** provide information about the size and capacity of the lungs. Another important test is the **diffusing capacity for carbon monoxide (DLCO)**, which assesses how effectively gases move from the lungs into the bloodstream.

PFTs can help doctors distinguish between different types of PH. In people with pulmonary arterial hypertension (PAH), lung function may be normal or show only mild abnormalities. In contrast, more significant abnormalities may suggest associated lung disease such as **chronic obstructive pulmonary disease (COPD), interstitial lung disease or emphysema**.

DLCO is particularly useful. A reduced DLCO can indicate impaired gas transfer and may be seen in several forms of PH. A **markedly reduced DLCO**, especially when other lung-function measurements are relatively preserved, may provide an important clue to conditions such as systemic-sclerosis-associated PAH, interstitial lung disease or pulmonary veno-occlusive disease.

PFTs also help doctors assess **disease severity, associated lung problems and the possible need for supplemental oxygen**. Arterial blood-gas testing may provide additional information about oxygen and carbon dioxide levels when clinically indicated.

For patients with systemic sclerosis, lung-function measurements, particularly DLCO, are also incorporated into screening strategies for PAH. Regular assessment can help identify changes that may warrant further investigation.

However, PFTs **cannot diagnose PH on their own**. Doctors interpret the results alongside symptoms, oxygen measurements, echocardiography, CT imaging and other investigations. When PH requires definitive haemodynamic confirmation, **right-heart catheterization** remains the key diagnostic test.

The key message is simple: lung function testing provides valuable information about how the lungs are working and can help doctors understand the possible cause and severity of PH. When combined with appropriate cardiac and imaging tests, it contributes to a more accurate diagnosis and individualized care.

Approach to PAH Diagnosis

Dr. Pramod Kumar Jain
Cardiologist, Delhi

Pulmonary arterial hypert-ension (PAH) is a condition in which the blood vessels carrying blood from the heart to the lungs become narrowed or stiff. As a result, the heart has to work harder to pump blood through the lungs. Recognising PAH can be challenging because its early symptoms may look similar to those of many common conditions.

Common symptoms that may raise suspicion include:

1. Breathlessness, especially during physical activity
2. Unusual tiredness or weakness
3. Dizziness or light-headedness
4. Chest discomfort
5. Reduced ability to exercise
6. Fainting, particularly during exertion

The first step is usually a discussion with a doctor about the symptoms and medical history. The doctor may also ask about existing heart or lung problems, family history and other conditions that may be linked to PAH.

How is PAH checked?

Doctors may use several tests to understand what is causing the symptoms:

Echocardiogram (Echo): A simple, non-invasive test that uses sound waves to create pictures of the heart and look for signs of increased pressure.

Blood tests: These can help identify other health conditions that may be causing or contributing to the symptoms.

Chest imaging: A chest X-ray or other scan can provide information about the heart and lungs.

Breathing tests: Lung function tests help doctors understand how well the lungs are working.

Right heart catheterisation: If PAH is strongly suspected, this specialised test measures pressure inside the heart and pulmonary blood vessels and can confirm the diagnosis.

No single test is enough in every case. Doctors generally consider the symptoms, medical history and results of different tests together to understand the condition and its possible cause.

Early recognition is important.

Persistent or unexplained breathlessness

Why PH Is Often Diagnosed Late

Dr. Animesh Arya
Pulmonologist, Delhi

Pulmonary hypertension (PH) can be difficult to recognize in its early stages because its symptoms are often **non-specific**. Breathl-essness during activity, tiredness, reduced exercise capacity, dizziness or chest discomfort may initially be attributed to ageing, lack of fitness, asthma, anaemia or heart disease. As a result, the possibility of PH may not be considered early.

Another challenge is that PH has **many different causes**, including heart disease, lung disease, chronic blood clots and pulmonary arterial hypertension. Identifying the underlying cause requires a structured evaluation rather than relying on symptoms alone.

Early suspicion is important. Doctors may begin with a clinical examination, oxygen measurement, ECG and blood tests such as BNP or NT-proBNP. **Echocardiography** is an important first-line, non-invasive test that can estimate the likelihood of PH and assess the right side of the heart. However, an echocardiogram alone cannot confirm PH. **Right-heart catheterisation (RHC)** is used to confirm the diagnosis and measure pulmonary haemodynamics when appropriate.

Persistent or unexplained breathlessness should therefore not be ignored. Recognising symptoms early and referring appropriate patients for specialist evaluation can help reduce diagnostic delays and enable timely, cause-specific management.

Understanding PH Crises and Emergency Care

Dr. Puneet Khanna
Pulmonologist, Delhi

Pulmonary hypertension (PH) is a condition in which blood pressure in the arteries of the lungs becomes abnormally high, placing extra strain on the right side of the heart. Although many people with PH can remain stable with appropriate treatment, a sudden worsening can become a medical emergency.

A **PH crisis** may occur when the right ventricle struggles to pump blood effectively against the high pressure in the pulmonary arteries. Warning signs include rapidly worsening breathlessness, fainting or near-fainting, chest discomfort, severe weakness, bluish lips or fingers, a fast or irregular heartbeat, low blood pressure, or swelling associated with worsening right-heart failure.

Common triggers include infections, abnormal heart rhythms, anaemia, fluid imbalance, or interruption of prescribed PH therapy. Therefore, patients should not stop or change their medicines without medical advice.

During an emergency, immediate hospital assessment is essential. Doctors may monitor oxygen levels, blood pressure, heart rhythm, cardiac biomarkers and heart function using echocardiography. Treatment focuses on correcting the trigger, maintaining adequate oxygenation and circulation, carefully managing fluids, and supporting the right ventricle. In severe cases, specialized medicines and intensive-care support may be required.

Recognizing warning signs early and reaching a hospital or specialized PH centre promptly can be critical. Patients and families should keep an updated medication list and an emergency-care plan readily available.

PH Understanding a Rare and Serious Disease

Dr. Mithlesh Kumar
Cardiologist, Delhi

Pulmonary hypertension (PH) is a serious condition in which the blood pressure within the arteries of the lungs becomes abnormally high. This increases the workload on the right side of the heart, which must pump blood through the lungs. Over time, persistent pressure can cause the right ventricle to enlarge or weaken. Importantly, PH is not one single disease; it includes several groups with different underlying causes and treatment approaches.

The early symptoms can be subtle. **Progressive breathlessness, particularly during physical activity, is the most common symptom.** Fatigue, dizziness, chest discomfort, palpitations and fainting may also occur. Swelling of the ankles or abdomen can develop when right-heart function becomes impaired. Because these symptoms overlap with many common conditions, diagnosis may sometimes be delayed.

PH can be associated with left-heart disease, chronic lung conditions, congenital heart disease, connective tissue disorders or chronic blood clots. In some patients, particularly those with pulmonary arterial hypertension (PAH), no clear underlying cause may be identified. Therefore, determining the **type and cause of PH** is essential before treatment is selected.

Diagnosis usually begins with clinical assessment and non-invasive investigations such as an **echocardiogram**, which helps estimate the likelihood of PH. When appropriate, **right-heart catheterisation (RHC)** is performed to confirm the diagnosis and measure pulmonary haemodynamics.

Although PH can be a serious disease, advances in diagnosis and treatment have improved its management. Early recognition, referral to experienced PH centres, appropriate treatment and regular follow-up can help patients maintain their functional capacity and quality of life.

Persistent or unexplained breathlessness should never be ignored. Early evaluation can make an important difference.

"This is a patient awareness initiative by MSN labs. The views and opinions expressed here are based on the expertise of the doctors and is not endorsed by MSN labs. Reader's are advised to seek to necessary medical advice from a qualified medical practitioner."

Challenges in Management of PH

Dr. Gaurav Garg
Paediatric Cardiologist, Delhi

Pulmonary hypertension (PH) is a condition in which blood pressure in the arteries of the lungs becomes abnormally high. It can place increasing strain on the right side of the heart and, if left untreated, may lead to heart failure. Managing PH can be challenging because its symptoms — such as breathlessness, fatigue, chest discomfort and reduced exercise capacity — can resemble those of common heart or lung conditions.

Delayed diagnosis remains an important challenge. Recognising PH early requires clinical suspicion and appro-priate investigations. Echocardiography is often an important first test, while **right-heart catheterisation is the gold standard for confirming pulmonary hypertension** and measuring pressures within the pulmonary circulation.

Another challenge is that PH has **multiple causes and different clinical groups**, including pulmonary arterial hypertension (PAH), left-heart disease, lung diseases, chronic thrombo-embolic disease and other conditions. Therefore, treatment must be tailored to the under-lying cause rather than using the same approach for every patient.

Treatment can also involve several medicines, regular monitoring and management of associated conditions. Some patients may require combination therapy or specialised interventions. Adherence, treatment costs and access to specialised PH centres can further affect long-term care.

Effective PH management therefore requires **early recognition, accurate classification, risk assessment, personalised treatment and regular follow-up**. Greater awareness among the public and healthcare professionals can help patients receive timely specialist care and improve their quality of life.

Emerging Frontiers in Idiopathic PH Research

Dr. Chandramani Panjabi
Chest Physician, Delhi

Pulmonary hypertension (PH) is a condition in which the blood pressure in the arteries carrying blood from the heart to the lungs becomes abnormally high. When no clear underlying cause is identified, it may be described as idiopathic pulmonary arterial hypertension (IPAH). Although it is a relatively uncommon condition, advances in research are improving our understanding of how it develops and how it can be treated.

One important area of research is **genetics**. Scientists are studying genetic changes that may increase a person's susceptibility to pulmonary arterial hypertension. Better understanding of these changes could eventually help identify people at higher risk and support earlier diagnosis.

Researchers are also exploring **biomarkers** — measurable substances in blood or other samples that may provide information about disease activity. In the future, biomarkers may help doctors detect disease earlier, assess its progression and understand how an individual patient is responding to treatment.

Another promising area is **personalised treatment**. Today, treatment decisions are based on factors such as symptoms, exercise capacity, heart and lung function, and overall risk. Emerging research aims to make treatment even more individualised by combining clinical findings with imaging, genetic information and biological markers.

New therapies are also being investigated. Recent research includes treatments targeting different biological pathways involved in the development and progression of pulmonary vascular disease. These approaches may complement existing therapies and potentially improve long-term outcomes.

Technology is another emerging frontier. Advanced imaging, digital health tools and artificial intelligence are being studied to support earlier recognition, monitoring and risk assessment.

Despite these advances, challenges remain. Idiopathic PH can initially resemble more common causes of breathlessness, which may delay diagnosis. Continued awareness among the public and healthcare professionals remains important.

The future of idiopathic PH research is therefore moving toward **earlier detection, better risk assessment and more personalised care**. While research is still evolving, these developments offer hope for improving the lives of people living with this challenging condition.

Impact of PH on Lung Health

Dr. Avi Kumar
Pulmonologist, Delhi

Our lungs play a vital role in supplying oxygen to the body and removing carbon dioxide. For this to happen efficiently, blood must flow smoothly through the blood vessels of the lungs. **Pulmonary hypertension (PH)** occurs when the pressure in these blood vessels becomes abnormally high. Over time, this increased pressure can affect the functioning of the lungs and place additional strain on the heart.

PH can develop due to several conditions, including chronic lung diseases such as chronic obstructive pulmonary disease (COPD) and interstitial lung disease, heart conditions, blood clots and certain other medical disorders. In some people, pulmonary arterial hypertension (PAH), a specific form of PH, develops primarily because of changes in the pulmonary arteries.

One of the most common symptoms is **breathlessness**, particularly during physical activity. People may also experience persistent tiredness, reduced exercise capacity, chest discomfort, dizziness or fainting. As the condition progresses, even routine activities such as walking, climbing stairs or performing household tasks may become difficult.

When pulmonary blood vessels become narrowed, thickened or obstructed, blood has greater difficulty passing through them. This can reduce the efficiency of blood circulation through the lungs and may contribute to lower oxygen levels, particularly in people who also have underlying lung disease.

It is important to remember that breathlessness does not always mean PH. However, **persistent or unexplained breathlessness should be evaluated by a doctor**, especially when it is accompanied by other symptoms or is progressively worsening.

Doctors may use tests such as oxygen assessment, pulmonary function tests, chest imaging and echocardiography to investigate possible causes. In selected patients, right heart catheterisation may be required to confirm pulmonary hypertension and understand its severity.

Early diagnosis allows doctors to identify the underlying cause and choose appropriate treatment. Depending on the type of PH, management may include treatment of the underlying lung or heart condition, oxygen therapy when appropriate, and specific medicines for selected patients.

Protecting lung health, recognising persistent symptoms and seeking timely medical evaluation are important steps toward managing pulmonary hypertension and maintaining a better quality of life.

Research for Better Medicines
— Public Awareness Initiative —

Key Risk Factors for PAH

Dr. Manisha Mendiratta
Pulmonologist, Faridabad

Pulmonary arterial hypertension (PAH) is a condition in which the blood vessels carrying blood from the heart to the lungs become narrowed or damaged. This makes it harder for the heart to pump blood through the lungs and, over time, can place significant strain on the right side of the heart. Recognising people who may be at higher risk can help doctors investigate symptoms earlier.

One important risk factor is **family history**. Some forms of PAH can be linked to inherited genetic changes. People with a close family member diagnosed with PAH may benefit from discussing their risk with a specialist and, where appropriate, considering genetic counselling and screening.

Certain **connective tissue diseases**, particularly systemic sclerosis (scleroderma), are strongly associated with PAH. Patients with these conditions should be monitored for symptoms such as unexplained breathlessness or reduced exercise capacity.

Congenital heart disease, which refers to heart problems present from birth, can also increase the risk of pulmonary hypertension. Regular follow-up is important, particularly for adults who have lived with congenital heart defects.

PAH can also occur in association with **portal hypertension and some liver diseases**, **HIV infection**, and certain medicines or toxins. Exposure to some appetite-suppressant drugs and other substances has been associated with an increased risk. However, not every person with these conditions develops PAH.

It is also important to remember that PAH can sometimes occur **without an identifiable cause**, known as idiopathic PAH.

Symptoms such as persistent breathlessness, unusual tiredness, dizziness, fainting, chest discomfort or reduced ability to perform routine activities should not be ignored, especially in people with known risk factors. These symptoms can have many causes, but appropriate evaluation can help identify pulmonary hypertension when it is present.

Early recognition and referral to a healthcare professional experienced in pulmonary hypertension can support timely diagnosis and appropriate management. Knowing the risk factors is therefore an important step toward protecting heart and lung health.

Living with PAH: Key Considerations

Dr. S. Vidya Nair
Pulmonologist, Faridabad

Pulmonary arterial hypertension (PAH) is a long-term condition in which the blood vessels that carry blood from the heart to the lungs become narrowed or damaged. This increases the workload on the right side of the heart. Although PAH requires ongoing medical care, understanding the condition and following a personalised treatment plan can help patients manage daily life.

One of the most important considerations is **taking prescribed medicines regularly**. PAH treatment may involve one or more medicines, depending on the individual's condition and risk assessment. Patients should take their medicines as advised and should not stop or change treatment without consulting their doctor.

Regular medical follow-up is equally important. Doctors may monitor symptoms, exercise capacity, heart function and other measures to understand whether the disease is stable or whether treatment needs adjustment. Patients should report any new or worsening breathlessness, dizziness, fainting, chest discomfort or swelling promptly.

Staying physically active can be beneficial for some patients, but **exercise should be appropriate to the individual's condition**. A doctor or pulmonary rehabilitation professional can advise on safe levels of activity. Patients should avoid pushing themselves beyond their recommended limits.

Lifestyle choices also matter. Avoiding smoking and tobacco exposure, maintaining a balanced diet and getting adequate rest can support overall health. Depending on the severity of PAH, travel, high-altitude exposure and other activities may require advance planning.

Emotional well-being is another important part of living with PAH. A chronic illness can lead to stress, anxiety or concerns about work, finances and the future. Talking openly with family members and healthcare professionals can provide valuable support.

Pregnancy requires particular attention because it can carry significant risks for some women with PAH. Anyone with PAH who is considering pregnancy should discuss this with a specialist beforehand.

Living with PAH is a long-term journey. With **regular specialist care, treatment adherence, sensible activity, lifestyle awareness and a strong support system**, patients can take an active role in managing their condition and maintaining their quality of life.

Living Challenges for Patients with Idiopathic PAH

Dr. Manish Jain
Cardiologist, Faridabad

Idiopathic pulmonary arterial hypertension (IPAH) is a form of pulmonary arterial hypertension in which no specific underlying cause can be identified. It affects the blood vessels between the heart and lungs, causing them to become narrowed and making it harder for the heart to pump blood through the lungs. Living with IPAH can present several physical and emotional challenges, but appropriate medical care can help patients manage their condition.

One of the most common difficulties is **breathlessness**, particularly during physical activity. Simple tasks such as climbing stairs, walking long distances or doing household activities may become tiring. Some patients may also experience fatigue, dizziness, chest discomfort or episodes of fainting. These symptoms can affect work, education, travel and social activities.

Another challenge is the **need for regular treatment and monitoring**. PAH treatment may involve one or more medicines, depending on the patient's condition and risk profile. Taking medicines consistently and attending scheduled medical appointments are important parts of long-term care. Patients may also need regular assessments to understand how their disease is responding to treatment.

Living with a chronic condition can also affect **emotional well-being**. Concerns about symptoms, treatment, finances and the future may cause stress or anxiety. Family members and caregivers can provide valuable emotional and practical support. Patients should feel comfortable discussing these concerns with their healthcare team.

Lifestyle planning is also important. Patients may need to balance physical activity with their individual tolerance and avoid activities that worsen symptoms. Travel, work and pregnancy may require advance discussion with a specialist.

Most importantly, patients should not feel that they have to manage IPAH alone. Regular follow-up with a healthcare professional experienced in pulmonary hypertension, adherence to prescribed treatment, and attention to new or worsening symptoms can make a meaningful difference.

With **ongoing specialist care, support from family and informed self-management**, people living with IPAH can work toward maintaining their daily activities and quality of life while managing this long-term condition.

PH in Women: Symptoms and Considerations

Dr. Priyanka Agrawal
Pulmonologist, Delhi

Pulmonary hypertension (PH) is a condition in which the blood vessels supplying the lungs become abnormally narrowed or stiff, increasing pressure within the pulmonary circulation. Over time, this can make it harder for the right side of the heart to pump blood effectively. While PH can affect both men and women, women have particular considerations, especially during pregnancy and in association with certain autoimmune diseases.

Recognising the symptoms is important. Breathlessness, particularly during physical activity, is often one of the earliest complaints. Other symptoms may include unusual fatigue, dizziness, fainting, chest discomfort, palpitations and swelling of the ankles or legs. Because these symptoms can resemble asthma, anaemia, thyroid disorders or simply being unfit, PH may sometimes go unrecognised for a long period.

Women with **connective tissue diseases**, particularly systemic sclerosis, are an important group in whom pulmonary arterial hypertension (PAH) may develop. Regular clinical assessment and appropriate screening can help detect pulmonary vascular disease earlier in people at increased risk.

Pregnancy requires special attention. Pregnancy naturally increases blood volume and cardiac workload. In women with established PAH, these physiological changes can place considerable stress on the right ventricle. Therefore, pregnancy planning should involve specialised counselling and coordinated care involving PH specialists, cardiologists and obstetricians. Current European guidance emphasises individualised, multidisciplinary counselling for women with high-risk cardiovascular conditions, including PAH.

Diagnosis of PH may involve **echocardiography, electrocardiography, lung-function testing, imaging and blood tests**. When confirmation is required, right-heart catheterisation is the definitive test for measuring pulmonary pressures and haemodynamics.

For women, recognising persistent or unexplained breathlessness should not be delayed. **Early evaluation, accurate identification of the underlying cause and specialised follow-up can help guide appropriate treatment and long-term care.**

The connection between heart disease and PH

Dr. Jogendra Singh
Cardiologist, Delhi

The heart and lungs work closely together to maintain the body's oxygen supply. When the heart is affected by certain diseases, pressure can build up in the blood vessels of the lungs, leading to **pulmonary hypertension (PH)**. In fact, pulmonary hypertension associated with left heart disease is classified as **Group 2 PH** and is one of the most common forms of PH.

The connection is particularly important in conditions such as **heart failure, diseases of the heart valves, and problems affecting the left side of the heart**. When the left side of the heart cannot pump or relax properly, pressure may increase in the left atrium. This pressure can be transmitted backward into the pulmonary veins and eventually the pulmonary arteries. Persistent elevation in these pressures can cause changes in the pulmonary blood vessels and increase the workload on the right side of the heart.

Patients may experience **breathlessness, tiredness, reduced exercise capacity, swelling of the legs or ankles, and sometimes chest discomfort**. However, these symptoms can overlap with those of the underlying heart disease, making the cause difficult to identify without appropriate evaluation.

Echocardiography is an important initial investigation because it can assess heart function, valve abnormalities, and signs suggesting elevated pulmonary pressures. Blood tests such as BNP or NT-proBNP, ECG, chest imaging, and other investigations may also contribute to the assessment. In selected patients, **right heart catheterization (RHC)** may be required to accurately measure pulmonary pressures and distinguish different types of PH.

Management primarily focuses on **optimising the underlying heart disease**, including appropriate treatment of heart failure or valve disease. Importantly, medicines specifically approved for pulmonary arterial hypertension should not automatically be used for PH caused by left heart disease; treatment must be based on the underlying mechanism and specialist assessment.

Recognising the heart–lung connection early can help ensure the right diagnosis and appropriate treatment. For people with heart disease who develop persistent or unexplained breathlessness, evaluation for PH may be an important part of comprehensive cardiovascular care.

How Lung Diseases Can Lead to PH

Dr. Stuti Gupta
Pulmonologist, Delhi

Our lungs do more than help us breathe; they also play an important role in maintaining healthy blood circulation. When chronic lung disease affects the lungs for a prolonged period, it can sometimes increase pressure in the blood vessels that carry blood from the heart to the lungs. This condition is known as **pulmonary hypertension (PH)**.

Several lung conditions can be associated with PH, particularly **chronic obstructive pulmonary disease (COPD), emphysema, interstitial lung diseases (ILD), pulmonary fibrosis and combined pulmonary fibrosis and emphysema**. These conditions can damage lung tissue or the small airways and blood vessels, making it more difficult for blood to pass through the lungs. PH related to lung disease is classified as **Group 3 PH**.

One important mechanism is **chronic low oxygen levels (hypoxaemia)**. When parts of the lung receive less oxygen, the small pulmonary arteries can constrict. Over time, persistent changes in the pulmonary blood vessels—including vascular remodeling—can increase pulmonary vascular resistance. The right side of the heart then has to work harder to pump blood through the lungs.

Patients may notice increasing **breathlessness, fatigue, reduced exercise capacity, dizziness or swelling of the legs**. However, these symptoms can overlap with those of the underlying lung disease, which can make PH difficult to recognize. A disproportionate decline in exercise capacity or worsening breathlessness despite apparently stable lung disease may prompt doctors to investigate further.

Diagnosis requires a careful, comprehensive assessment. **Echocardiography** can help assess the likelihood of PH and right-heart function. Doctors may interpret it alongside pulmonary function tests, including **diffusing capacity for carbon monoxide (DLCO)**, arterial blood-gas measurements and chest CT findings. When definitive haemodynamic assessment is required, right heart catheterization may be performed.

Importantly, treating the underlying lung disease is central to management. This may include appropriate inhaled treatment for COPD, management of ILD, smoking cessation, rehabilitation and **long-term oxygen therapy for selected patients with chronic hypoxaemia**.

Not every person with chronic lung disease develops significant PH, and the severity of PH does not always correspond directly to the severity of the lung disease. Recognizing the possibility of PH when symptoms worsen can therefore help patients receive appropriate evaluation and specialist care.

Role of Echocardiography in PH

Dr. Sudhansu Sekhar Parida
Cardiologist, Delhi

Pulmonary hypertension (PH) is a condition in which the blood vessels of the lungs become abnormally pressurized, making the right side of the heart work harder to pump blood. Because its symptoms, particularly breathlessness and fatigue, can resemble many other heart and lung conditions, accurate assessment is important. **Echocardiography, commonly called an echo, is one of the most important non-invasive tests used when PH is suspected.**

An echocardiogram uses ultrasound waves to create moving images of the heart. It does not involve radiation and can provide information about the **size and function of the right and left sides of the heart, heart valves and blood flow**. In suspected PH, doctors particularly assess the right ventricle because it has to work against increased pressure in the pulmonary circulation.

One important measurement is **tricuspid regurgitation velocity (TRV)**, which can help estimate the likelihood of elevated pressure in the pulmonary arteries. Current ESC/ERS guidance recommends using TRV together with other echocardiographic findings rather than relying on a single measurement. Signs such as enlargement of the right ventricle or right atrium, flattening of the wall between the ventricles, changes in pulmonary artery size and abnormalities of the inferior vena cava can provide additional clues.

Echocardiography can also help doctors understand **why PH may be present**. It can identify left-heart disease, valve abnormalities and certain congenital heart defects that may contribute to elevated pulmonary pressures. It can also provide information about right-heart performance, including measurements such as **TAPSE (tricuspid annular plane systolic excursion)**, which helps assess right ventricular function.

However, an important point is that **an echocardiogram alone cannot definitively diagnose PH**. It estimates the probability of PH and helps determine whether further investigations are required. When confirmation is necessary, **right-heart catheterization (RHC)** directly measures pressures within the pulmonary circulation and remains the gold-standard diagnostic test.

Echocardiography is also valuable during follow-up, allowing doctors to monitor changes in heart structure and function over time.

The key message is simple: an echocardiogram is a safe, widely used and valuable tool for detecting and assessing possible PH. When interpreted alongside symptoms and other investigations, it can help guide timely diagnosis and appropriate specialist care.

Recognising PH Emergencies

Dr. Amit Goel
Cardiologist, Delhi

Pulmonary hypertension (PH) is a condition in which the blood vessels carrying blood from the heart to the lungs become abnormally constricted or damaged, increasing pressure in the pulmonary circulation. In advanced disease, a sudden worsening of symptoms can become a **medical emergency** and requires prompt attention.

People living with PH and their families should recognise warning signs such as **sudden or rapidly worsening breathlessness, fainting or near-fainting, severe chest pain, bluish lips or fingers, marked weakness, confusion, or a rapid deterioration in exercise capacity**. New or worsening swelling of the legs or abdomen may also indicate worsening right-heart function.

An important emergency is **acute right-heart failure**, which can occur when the right ventricle struggles to pump blood against high pressure in the lungs. Low blood pressure, reduced oxygen levels and reduced blood flow to vital organs may develop. In patients with chronic thromboembolic disease, a new blood clot in the lungs can also cause sudden deterioration.

During an emergency, patients should **seek immediate medical care rather than waiting for symptoms to settle**. They should carry their current medication list and inform healthcare professionals that they have PH. Prescribed PH medicines should not be stopped suddenly unless specifically advised by a doctor.

Early recognition and rapid specialist assessment can be critical in preventing further deterioration & improving outcomes. Regular follow-up and a clear emergency plan can help patients and families respond confidently when warning signs appear-.

MSN Research for Better Medicines — Public Awareness Initiative —

Recognising the Early Warning Signs of PH

Dr. Amrendra Kumar Pandey
Cardiologist, Delhi

Pulmonary hypertension (PH) is a condition in which pressure in the blood vessels of the lungs becomes abnormally high. It can gradually place additional strain on the right side of the heart. One of the challenges with PH is that its early symptoms can be subtle and may resemble those of common heart, lung or other medical conditions. Recognising the warning signs can therefore help encourage timely medical evaluation.

The **most common early symptom is breathlessness during physical activity**. A person may notice that activities such as climbing stairs, walking quickly or performing routine household tasks make them unusually short of breath. According to the ESC/ERS guidelines, breathlessness that progressively occurs with less exertion is a characteristic presentation of PH.

Other symptoms may include **unusual fatigue, reduced exercise capacity, dizziness, chest discomfort and a racing heartbeat**. In more advanced disease, patients may experience fainting, particularly during exertion. Swelling of the ankles, legs or abdomen can also occur when the right side of the heart begins to struggle with the increased workload. Rapidly worsening symptoms, fainting or signs of right-heart failure require prompt medical attention.

Because these symptoms are not specific to PH, doctors use a structured diagnostic approach. Initial assessment may include medical history, physical examination, oxygen saturation, ECG and blood tests such as **BNP or NT-proBNP**, which can provide information about cardiac strain. Echocardiography is an important first-line, non-invasive investigation and can estimate the likelihood of PH and assess right-heart structure and function.

However, **an echocardiogram alone cannot confirm PH**. When appropriate, further investigations such as pulmonary function tests, CT imaging or a ventilation/perfusion scan may be required to identify the underlying cause. **Right heart catheterization (RHC)** remains the gold-standard test for confirming PH because it directly measures pressures and other haemodynamic parameters within the pulmonary circulation.

The key message is simple: **persistent or unexplained breathlessness should not be ignored**. Early recognition, appropriate testing and referral to a PH specialist can help identify the condition and its cause, allowing appropriate management to begin without unnecessary delay.

Because these symptoms are not specific to PH, doctors use a structured diagnostic approach. Initial assessment may include medical history, physical examination, oxygen saturation, ECG and blood tests such as **BNP or NT-proBNP**, which can provide information about cardiac strain. Echocardiography is an important first-line, non-invasive investigation and can estimate the likelihood of PH and assess right-heart structure and function.

However, **an echocardiogram alone cannot confirm PH**. When appropriate, further investigations such as pulmonary function tests, CT imaging or a ventilation/perfusion scan may be required to identify the underlying cause. **Right heart catheterization (RHC)** remains the gold-standard test for confirming PH because it directly measures pressures and other haemodynamic parameters within the pulmonary circulation.

The key message is simple: **persistent or unexplained breathlessness should not be ignored**. Early recognition, appropriate testing and referral to a PH specialist can help identify the condition and its cause, allowing appropriate management to begin without unnecessary delay.

Recognising Early PH Warning Signs

Dr. Heemanshu Lodhi
Cardiologist, Delhi

Pulmonary hypertension (PH) is a condition in which pressure in the blood vessels of the lungs becomes abnormally high. The increased pressure can make the right side of the heart work harder to pump blood through the lungs. Because PH can develop gradually, its early warning signs may be subtle and are sometimes mistaken for ageing, lack of fitness or other heart and lung problems. Recognizing these changes early can help patients receive appropriate evaluation sooner.

One of the most important early symptoms is **unexplained breathlessness**, particularly while walking, climbing stairs or performing activities that were previously comfortable. Persistent fatigue and a noticeable reduction in exercise capacity may also be early clues. A person may find themselves stopping more frequently during routine activities or taking longer to recover after exertion.

Other warning signs include **dizziness, light-headedness, chest discomfort, a rapid or irregular heartbeat and episodes of fainting**. Swelling of the feet, ankles or legs can occur when the right side of the heart begins to struggle with the increased workload. Fainting during physical activity or rapidly worsening breathlessness should receive prompt medical attention.

It is important to remember that these symptoms are **not specific to PH**. Similar complaints can occur with asthma, chronic lung disease, anaemia, coronary artery disease and other conditions. Therefore, symptoms alone cannot establish a diagnosis.

When PH is suspected, doctors may perform a clinical examination along with tests such as **electrocardiography, blood tests, oxygen assessment, pulmonary function tests and echocardiography**. Echocardiography can identify changes that raise suspicion of PH and assess right-heart function. In appropriate patients, **right-heart catheterization** is used to confirm the diagnosis and directly measure pressures within the pulmonary circulation.

People with conditions that increase the risk of PH—such as connective tissue diseases, congenital heart disease, chronic lung disease or previous blood clots—may require particular attention to new or worsening symptoms.

The key message is simple: persistent or unexplained breathlessness should not be ignored. Recognizing early warning signs and seeking timely medical evaluation can help identify PH and its underlying cause, allowing appropriate management and regular follow-up.

Recognizing Symptoms of Idiopathic PAH

Dr. Rahul Jain
Consultant Physician, Delhi

Idiopathic pulmonary arterial hypertension (IPAH) is a form of pulmonary arterial hypertension in which increased pressure develops in the arteries of the lungs without an identifiable underlying cause. The small pulmonary arteries become narrowed and their walls may become thickened, increasing **pulmonary vascular resistance (PVR)**. As a result, the right side of the heart has to work harder to pump blood through the lungs.

The symptoms of IPAH often develop gradually and may initially be mistaken for tiredness, ageing or lack of fitness. **Breathlessness during physical activity** is one of the most common early symptoms. A person may notice difficulty climbing stairs, walking quickly or performing activities that were previously comfortable. Persistent fatigue and reduced exercise capacity are other important warning signs.

As the disease progresses, patients may experience **dizziness, chest discomfort, palpitations or fainting**, particularly during exertion. Swelling of the feet and ankles can occur when the right side of the heart becomes strained and begins to pump less effectively. Severe or rapidly worsening breathlessness, fainting or signs of right-heart failure require prompt medical assessment.

Because these symptoms can occur in many other heart and lung conditions, diagnosis requires a systematic evaluation. Doctors may perform an electrocardiogram, blood tests including **BNP or NT-proBNP**, pulmonary function tests, oxygen assessment and echocardiography. Echocardiography can identify features that raise suspicion of PH and assess right-heart function, but it does not by itself confirm PAH.

Right-heart catheterization (RHC) is the definitive investigation for confirming pulmonary hypertension and measuring pulmonary haemodynamics. It also helps doctors distinguish PAH from other forms of PH, such as that caused by left-heart or lung disease.

Early recognition is particularly important because treatment decisions depend on accurate diagnosis and assessment of disease severity and risk.

The key message is simple: persistent, unexplained breathlessness or a progressive reduction in exercise capacity should not be ignored. Timely medical evaluation can help identify IPAH earlier and enable appropriate

How Lifestyle Changes May Support PH Management

Dr. N.R Shastry
Cardiologist, Delhi

Living with pulmonary hypertension (PH) involves more than taking prescribed medicines. Appropriate lifestyle habits can compl-ement medical treatment, improve physical well-being and help patients maintain a better quality of life. However, lifestyle changes should be individualized because the severity and underlying cause of PH differ from person to person.

Staying physically active—safely—is important. Earlier, patients with PH were often advised to avoid exercise altogether. Evidence now shows that carefully supervised exercise training can improve exercise capacity and quality of life in appropriately selected, clinically stable patients receiving medical therapy. Pulmonary rehabilitation may improve measures such as the **six-minute walking distance (6MWD)**. Exercise should therefore be planned with a PH specialist rather than started with strenuous workouts independently.

Nutrition also matters. A balanced diet containing vegetables, fruits, whole grains, pulses, lean protein and appropriate dairy products can support overall cardiovascular health. Limiting excess salt may be particularly important for patients who develop fluid retention or right-sided heart failure. Fluid intake should not be restricted routinely; any fluid limitation should be recommended individually by the treating doctor.

Avoiding tobacco smoke is another important step. Smoking and second-hand smoke can adversely affect cardiovascular and lung health. Maintaining a healthy weight, getting adequate rest and managing other conditions such as diabetes, high blood pressure and sleep-related breathing disorders can also support overall health.

Preventing infections is particularly relevant for vulnerable patients. Current ESC/ERS guidance recommends appropriate **influenza, pneumococcal and COVID-19 vaccination** for patients with pulmonary arterial hypertension.

Patients should also take medicines exactly as prescribed and attend regular follow-up visits. Monitoring symptoms, exercise capacity, oxygen levels and other clinical parameters helps doctors assess disease control and adjust treatment when necessary.

Finally, emotional well-being should not be overlooked. PH can affect daily activities and mental health, making family support, counseling and patient-support networks valuable components of comprehensive care.

Lifestyle changes **do not replace PH-specific treatment**, but when combined with appropriate medical care, they can help patients remain active, reduce avoidable health risks and work towards a better quality of life.

Genetic Counseling in Families Affected by PAH

Dr. Prakash S
Pulmonologist, Delhi

Pulmonary arterial hypertension (PAH) is a serious condition in which the blood vessels carrying blood from the heart to the lungs become narrowed or damaged, making it harder for the heart to pump blood. While many cases of PAH occur without a known family history, some are linked to inherited genetic changes. In these families, genetic counseling can play an important role in early recognition, informed decision-making, and long-term care.

Genetic counseling helps individuals and families understand whether PAH may have an inherited component. A genetic counselor or specialist takes a detailed family history, discusses the pattern of disease within the family, and explains whether genetic testing may be appropriate.

When a disease-causing genetic variant is identified in a person with PAH, testing may be offered to selected adult family members after appropriate counseling. A positive result does not necessarily mean that a person will definitely develop PAH. Rather, it may indicate an increased risk. Regular evaluation and appropriate follow-up can help identify early changes before significant symptoms develop.

It is also important to understand that genetic testing has limitations. Not every person with familial PAH will have an identifiable genetic variant, and not every genetic finding clearly predicts the severity or timing of disease. Therefore, test results should be interpreted by specialists rather than in isolation.

Families should also receive guidance about the emotional, social, and practical implications of genetic testing. Discussions around family planning may be particularly important for adults carrying a disease-associated variant.

For families affected by PAH, genetic counseling is therefore not simply about testing genes. It is about understanding risk, supporting informed choices, and ensuring appropriate monitoring. With greater awareness and advances in genetic medicine, families can work closely with pulmonary hypertension specialists to develop an individu-

Impact of PH on Cardiac Health

Dr. Sanjay Kumar Pandey
Cardiologist, Delhi

Pulmonary hypertension (PH) is a condition in which the blood pressure in the blood vessels supplying the lungs becomes abnormally high. Although PH primarily affects the lungs and pulmonary blood vessels, it can have a significant impact on the heart, particularly the **right side of the heart**, which pumps blood to the lungs.

When pressure in the pulmonary arteries remains elevated, the right side of the heart has to work harder to push blood through the lungs. Initially, the heart may adapt by becoming stronger and thicker. However, if the pressure remains high for a prolonged period, the right ventricle can become enlarged or weakened. This may eventually lead to **right-sided heart failure**.

People with PH may experience breathlessness, tiredness, reduced exercise capacity, chest discomfort, dizziness or fainting. Swelling of the ankles, legs or abdomen can occur when the heart is no longer able to pump blood effectively. These symptoms should not be ignored, particularly when they are persistent or gradually worsening.

The impact of PH on the heart can vary depending on its cause, severity and how early it is detected. PH may occur in association with heart diseases, lung diseases, blood clots or other medical conditions. Pulmonary arterial hypertension (PAH), a specific type of PH, directly affects the pulmonary arteries and can place considerable strain on the right heart.

Early evaluation is important. Doctors may use echocardiography (ECHO), electrocardiography, blood tests and imaging studies to assess the heart and lungs. In selected patients, right heart catheterisation may be needed to accurately measure pressures and confirm the diagnosis.

Managing the underlying cause and treating PH appropriately can help reduce the workload on the heart. Regular follow-up is also important to monitor symptoms, heart function and response to treatment.

Understanding the connection between PH and heart health can encourage people to seek medical attention earlier. **Recognising symptoms and receiving timely specialist care can help protect the heart and improve day-to-day functioning and quality of life.**

Identifying Acute Vasoreactivity Responders

Pulmonary arterial hypertension (PAH) is a condition in which the blood vessels carrying blood from the heart to the lungs become narrow and stiff. This makes it harder for the heart to pump blood through the lungs and can cause symptoms such as breathlessness, tiredness, dizziness and reduced ability to perform everyday activities.

Dr. Ankit Garg
Paediatric Cardiologist, Delhi

While PAH affects patients differently, a small group may have a particularly important response to medicines that relax the blood vessels. Identifying these patients can help doctors choose the most appropriate treatment.

One way of identifying such patients is through a test called **acute vasoreactivity testing**. The test is usually performed during **right heart catheterization**, a procedure that allows doctors to accurately measure pressures inside the heart and pulmonary blood vessels.

During the test, a short-acting medicine that relaxes the pulmonary blood vessels is given under careful medical supervision. Doctors then observe how the blood pressure in the lung arteries changes. A significant fall in pressure, without a reduction in the heart's ability to pump blood, may indicate that the patient is a "vasoreactivity responder."

These patients are relatively uncommon. Importantly, an immediate response during testing does not necessarily mean that the patient will have a lasting response to treatment. Therefore, patients who are started on specific medicines require regular clinical assessment and follow-up by a pulmonary hypertension specialist.

Early recognition and accurate diagnosis of PAH are important because symptoms can sometimes resemble those of more common conditions. Persistent or unexplained breathlessness, dizziness, chest discomfort or reduced exercise capacity should not be ignored.

Understanding who may respond to specific treatments is an important part of personalized PAH care. Appropriate testing, timely diagnosis and regular medical follow-up can help doctors provide treatment suited to each patient's needs.

Early Testing for Better Outcomes

Dr. Saurabh Tomar
Pulmonologist, Delhi

Many serious health conditions do not cause obvious symptoms in their early stages. **Pulmonary hypertension (PH)** is one such condition. It occurs when the blood vessels in the lungs become narrowed, blocked or otherwise affected, making it harder for the heart to pump blood through the lungs. Because early symptoms can be mild or easily attributed to other causes, diagnosis may sometimes be delayed.

One of the most important warning signs is **unexplained breathlessness**, particularly during activities that were previously comfortable. Persistent tiredness, reduced exercise capacity, dizziness, chest discomfort or fainting may also require medical evaluation. Swelling of the feet or ankles can occur in more advanced disease.

Early testing does not mean that everyone with breathlessness has PH. Instead, it helps doctors determine whether symptoms are related to the heart, lungs or another underlying condition. A detailed medical history and physical examination are usually the first steps.

Recommended tests such as an **electrocardiogram (ECG), chest imaging, lung-function tests and echocardiography**. An echocardiogram is a non-invasive ultrasound examination of the heart that can provide important clues about pressure in the pulmonary circulation and how well the heart is functioning. Depending on the findings, additional investigations may be needed to identify the cause.

When pulmonary hypertension is strongly suspected, **right-heart catheterization** may be performed. This specialized test directly measures pressures within the heart and pulmonary arteries and is used to confirm the diagnosis and characterize the condition.

Early diagnosis can be particularly important because PH has several possible causes, and treatment depends on the underlying type. Identifying associated heart or lung disease, blood-clot-related conditions or other causes allows doctors to choose appropriate management.

The message for the public is simple: **persistent or unexplained breathlessness should not be ignored.** Seeking medical advice early can help identify the cause, avoid unnecessary delays and provide an opportunity for appropriate treatment and follow-up.

MSN Research for Better Medicines — Public Awareness Initiative —

Role of CT imaging in PH assessment

Dr. Pawan Gupta
Pulmonologist, Delhi

Many serious health conditions do not cause obvious symptoms in their early stages. **Pulmonary hypertension (PH)** is one such condition. It occurs when the blood vessels in the lungs become narrowed, blocked or otherwise affected, making it harder for the heart to pump blood through the lungs. Because early symptoms can be mild or easily attributed to other causes, diagnosis may sometimes be delayed.

One of the most important warning signs is **unexplained breathlessness**, particularly during activities that were previously comfortable. Persistent tiredness, reduced exercise capacity, dizziness, chest discomfort or fainting may also require medical evaluation. Swelling of the feet or ankles can occur in more advanced disease.

Early testing does not mean that everyone with breathlessness has PH. Instead, it helps doctors determine whether symptoms are related to the heart, lungs or another underlying condition. A detailed medical history and physical examination are usually the first steps.

Recommended tests such as an **electrocardiogram (ECG), chest imaging, lung-function tests and echocardiography**. Depending on the findings, additional investigations may be needed to identify the cause.

When pulmonary hypertension is strongly suspected, **right-heart catheterization** may be performed. This specialized test directly measures pressures within the heart and pulmonary arteries and is used to confirm the diagnosis and characterize the condition.

Early diagnosis can be particularly important because PH has several possible causes, and treatment depends on the underlying type. Identifying associated heart or lung disease, blood-clot-related conditions or other causes allows doctors to choose appropriate management.

The message for the public is simple: **persistent or unexplained breathlessness should not be ignored.** Seeking medical advice early can help identify the cause, avoid unnecessary delays and provide an opportunity for appropriate treatment and follow-up.

Understanding PH in India

Dr. Khusboo Puri
Pulmonologist, Ghaziabad

Pulmonary hypertension (PH) is a condition in which pressure in the blood vessels of the lungs becomes abnormally high. It is not a single disease; rather, it includes several conditions with different causes and treatment approaches. Current guidelines classify PH into five groups based on its underlying mechanism.

In India, the causes of PH can differ from those commonly reported in Western countries. **Rheumatic heart disease, congenital heart disease, coronary artery disease, chronic lung diseases and chronic thromboembolic disease** are important contributors. Data from the PRO-KERALA registry of more than 2,000 patients found that PH related to left-heart disease accounted for the largest proportion of cases, while congenital heart disease was also an important cause.

Recognising symptoms early is essential. **Progressive breathlessness, unusual fatigue, dizziness, chest discomfort, fainting or swelling of the legs** should prompt medical evaluation, particularly when symptoms are unexplained or worsening. Echocardiography is an important initial investigation, but it cannot by itself confirm PH. When appropriate, **right-heart catheterisation provides definitive haemodynamic assessment** and helps establish the diagnosis.

India also faces challenges including delayed diagnosis, limited access to specialised PH services, treatment costs and differences in expertise and infrastructure between healthcare settings. Recent Indian expert consensus has highlighted the need for greater awareness, specialised centres and more consistent approaches to diagnosis and management.

As doctors, our message is clear: **persistent or unexplained breathlessness should not be ignored.** Greater awareness, timely referral and appropriate specialist care can help patients receive the right treatment for the specific type and cause of PH.

The Social Impact of Living with PH

Dr. C Deva Rahul
Pulmonologist, Ghaziabad

Living with pulmonary hypertension (PH) involves more than managing breathlessness or fatigue. The condition can affect a person's **work, family life, relationships, social activities and emotional well-being**. Because PH is often an invisible illness, others may not understand why a person becomes tired easily or cannot participate in activities they previously enjoyed.

Breathlessness and reduced exercise capacity may lead some people to avoid travel, social gatherings or physical activities. In more advanced disease, difficulties with daily tasks can increase dependence on family members. Financial concerns may also arise when illness affects employment or requires frequent medical visits. Research shows that PH can negatively affect physical, emotional and social aspects of health-related quality of life, while caregivers may also experience considerable emotional and practical burdens.

Emotional health deserves equal attention. Anxiety, low mood, frustration and feelings of isolation can occur, particularly when symptoms limit independence. Therefore, doctors should routinely ask patients about their emotional and social well-being, not just their physical symptoms.

What can help? Appropriate PH treatment, regular medical follow-up, individually tailored physical rehabilitation, psychological support and patient-support groups can help patients remain active within their abilities.

Most importantly, patients should not feel they have to face PH alone. Open communication with family and healthcare professionals can help patients maintain meaningful relationships and a better quality of life.

Understanding Chest Pain in PH

Dr. Gyan B Goswami
Pulmonologist, Ghaziabad

Chest pain is a symptom that should never be ignored, particularly in people living with pulmonary hypertension (PH). Although chest discomfort can occur for many reasons, including acidity, muscle problems or heart disease, it may also be related to increased pressure in the blood vessels of the lungs.

Pulmonary hypertension occurs when the pressure in the pulmonary circulation becomes abnormally high. This places extra strain on the right side of the heart, which has to work harder to pump blood through the lungs. Over time, this increased workload can affect the heart's ability to function efficiently.

In PH, chest pain may sometimes resemble angina — a feeling of pressure, tightness or discomfort in the chest. One possible reason is that the right ventricle is working against increased resistance in the pulmonary arteries and therefore requires more oxygen. When the oxygen supply to the heart muscle does not adequately meet its increased demand, discomfort may occur, particularly during physical activity.

However, chest pain in a person with PH should not automatically be attributed to PH. Coronary artery disease, heart rhythm problems, pulmonary embolism, lung disease and other conditions can also cause chest discomfort. Therefore, understanding the nature of the pain—when it occurs, how long it lasts and whether it is associated with breathlessness, dizziness or palpitations—is important.

Evaluation may include an electrocardiogram, blood tests, echocardiography and assessment of oxygen levels. Depending on the clinical situation, further testing may be required. Right heart catheterisation remains the definitive test for confirming PH and measuring pressures within the pulmonary circulation. Current guidelines define PH haemodynamically as a mean pulmonary artery pressure above 20 mmHg at rest.

People with PH should report new, worsening or unexplained chest pain to their doctor. **Sudden or severe chest pain, especially when accompanied by significant breathlessness, fainting or palpitations, requires urgent medical attention.**

Recognising chest pain early and identifying its underlying cause can help ensure timely treatment and appropriate management of PH.

Understanding PH in Children

Dr. Gaurav Kumar
Pediatric Cardiologist, Ghaziabad

Pulmonary hypertension (PH) can affect children of all ages, although its causes and presentation may differ from those seen in adults. In children, PH may be associated with **congenital heart disease, developmental or chronic lung disease, genetic conditions, or pulmonary arterial hypertension (PAH)**. In some infants, particularly those born prematurely, abnormalities in developing lung blood vessels can contribute to PH.

Children may not always describe breathlessness clearly. **Poor weight gain, excessive tiredness, rapid breathing, bluish lips or fingers, fainting, chest discomfort, or reduced ability to play and exercise** can be warning signs. Persistent or unexplained symptoms deserve medical evaluation.

Diagnosis usually begins with clinical assessment and tests such as **echocardiography**, which can estimate the likelihood of PH and identify associated heart abnormalities. When PH is suspected or needs confirmation, **right-heart catheterisation (RHC)** can directly measure pressures in the pulmonary circulation. Guidelines recommend that complex paediatric PH cases be evaluated and treated at centres with specific expertise in paediatric PH.

Treatment depends on the underlying cause and disease severity. Management may include treating heart or lung disease, oxygen when appropriate, and specialised medicines for selected children with PAH. Treatment response is monitored through symptoms, echocardiography, blood markers and exercise capacity.

Early recognition, accurate diagnosis and specialised follow-up are essential to support a child's growth, activity and long-term health.

Jharkhand Social Audit Society (JSAS)
(Rural Development Department, GoJ)
2nd Floor, Town Administration Building, Dhurwa, Ranchi-834004.
website:www.jharkhandsau.org

(Recruitment Notification)

File No. 01/JSAS/ESTB/FTE Recruitment/2026-27/Advt. No 01/2026 dtd.....

JSAS is an autonomous body, a society registered under the Societies Registration Act, 1860, under the aegis nodal ship of Rural Development Department, Government of Jharkhand. It is mandated for providing support to the local Gram Sabhas to promote transparency and accountability in implementation of, VB GRAM-G through Social Audit Process. In addition, it also facilitates Social Audit Process for other schemes on request of proposal from the concerned department. JSAS invites applications from eligible candidates for below mentioned state level contractual positions:

A. Fixed Tenure Employees(FTEs):

Sl.	Name of Position	Location	No. of Position	Nature of Appointment	Remunerations per Month (Rs.)
1	Social Development Specialist	State Office	1 (UR)	**Fixed Tenure Employment** under JSAS governed as per **JSAS HR Policy Manual Guidelines**.	65,000/-- 85,000/-
2	Social Audit Specialist (HR & Admin)	State Office	1 (UR)		
3	Social Audit Specialist (Process)	State Office	1 (UR)		
4	Social Audit Specialist (Cap. Building)	State Office	1 (UR)		
5	Social Audit Specialist (Doc. & Evaluation)	State Office	1 (UR)		
		Total	**05 nos.**		

General Rules & Conditions:

1. The advertised positions are purely on contract basis initially for 03 Yrs. & extendable based on yearly Performance Appraisal and does not envisage any form of regular appointment at JSAS in future.
2. The candidates need to send the duly filled application in the prescribed Application format with all the relevant credentials/certificates **ONLY** through **Registered/ Speed Post** to "**The Director, Jharkhand Social Audit Society (Social Audit Unit), 2nd Floor, Town Administration Building, Golchakkar, Dhurwa, Ranchi-834004.**" clearly mentioning the "**Post Applied for.....**" on the front side of the envelope.
3. The detailed advertisement and position related ToR can be downloaded from the website of JSAS - https://www.jharkhandsau.org
4. Candidates are advised to satisfy themselves before applying that they possess minimum essential qualifications laid down in the Advertisement and ONE CANDIDATE can apply against ONLY ONE VACANCY.
5. Age, experience and qualification will be reckoned as on **31.08.2026**. Clear quality self-attested Xerox/photocopies of all important relevant certificates and documents must be submitted/enclosed with the application.
6. **Last date for submission of Application: 15 Days (including the date of publication of Recruitment Notification). Beyond this date, no application shall be accepted/entertained.**
7. JSAS may hold the right to cancel the recruitment process due to lack of eligible applicants/administrative reasons. In case of any dispute/ambiguity that may occur in the process of selection, the decision of JSAS shall be final.
8. The number of vacancies is indicative; it may increase or decrease as per the requirement at JSAS.
9. Only Shortlisted Candidates will be invited for Written Test and Interview. The detailed of shortlisted and Not shortlisted Candidates will be uploaded in the website of JSAS.
10. Candidates who have not been shortlisted have the option of representing within 2 days of display of shortlisted candidates list on the website, failing which, no further claim in this regard will be entertained.
11. The shortlisted candidates will be called for Written Test/ Interview through E-mail only.
12. Applicants are advised to check and verify their E-mails regularly and also in Junk Box and Spam as well.
13. JSAS reserves the right to relax any of the requirements as per JSAS HR Policy Manual.
14. Selection of eligible candidates will be done through a fair competitive process. Canvassing in any form will be treated as a disqualification.
15. No correspondence or telephonic enquiry will be entertained as regards shortlisting, calling for written test/interview, selection, engagement or posting.
16. Only the qualified candidates in the Written Test will be called for Interview as applicable and no TA / DA will be given for attending the Written Test & Interview.
17. The prescribed qualifications and experience are minimum and the mere fact that a candidate possesses the same will not entitle him/her for being called for Interview.
18. In case of any inadvertence in the process of selection which may be detected at any stage even after the issue of engagement letter, JSAS reserves the right to modify/ withdraw/cancel any communication made with the candidates. Candidates may regularly visit the website of JSAS for further updates, if any.
19. The final result will be displayed on the official website of JSAS at https://www.jharkhandsau. org only.

Secretary

Uttar Pradesh Shasan
Parivahan Anubhag-4

In pursuance of the provisions of clause (3) of Article 348 of Constitution of India, the Governor is pleased to order the publication of the following English translation of Notification no. 1033/30-4-2026-30-4099/10/2025,dated 30October, 2026:

NOTIFICATION
No. 1033 /30-4-2026 -30-4099/10/2025
Lucknow: Dated: 30October, 2026

To ensure safe, efficient, reliable, and environmentally friendly inland water transport and water tourism, the Government of Uttar Pradesh is working towards creating an institutional framework in the State by enacting necessary laws and establishing institutions such as the Uttar Pradesh Inland Waterways Authority.

For facilitating navigation and water transport through inland waterways for passenger and cargo movement, and for promoting inland water transport connectivity, it is necessary to have prescribed rules covering mechanically and non-mechanically propelled inland vessels. These rules are expected to address matters relating to design and construction, registration, survey, manning, safe navigation, communication, signaling, and other related aspects of such vessels.

Whereas, the Government of India enacted The Inland Vessels Act, 2021(Act No. 24 of 2021) and the Central Rules have been framed thereunder.

Earlier, inland vessels were regulated under the Inland Vessels Act, 1917, and accordingly the State Government had framed the Uttar Pradesh Inland Vessels Rules, 2002.

And whereas, in view of the Inland Vessels Act, 2021 and the Central Rules framed thereunder, it has become necessary for the State Government to supercede the existing Uttar Pradesh Inland Vessels Rules, 2002 and replace them with new rules.

The proposed rules have been framed as per the Inland Vessels Act-2021 and Inland Vessels Rules-2022 of the Central Government by superceding the present Uttar Pradesh Inland Vessel Rules, 2002.

DRAFT RULES
The Uttar Pradesh Inland Vessels Rules, 2026

The draft rules which the Governor proposes to make in exercise of the powers under sections 107 of the Inland Vessels Act, 2021 (Act No. 24 of 2021)read with section 21 of the General Clauses Act, 1897 (Act No. 10 of 1897), superceding the present Uttar Pradesh Inland Vessel Rules, 2002of State Government are hereby published as required under the Inland Vessels Act, 2021 (Act No. 24 of 2021)for the information of all persons likely to be affected thereby and with view to invite objections or suggestions in respect thereof;

Objections or suggestions, if any, with respect to the proposed rules should be sent in writing addressed to the Vishesh Sachiv, Parivahan Anubhag-4, Uttar Pradesh Shasan, Bapu Bhawan, Uttar Pradesh Sachivalaya, Lucknow or on Email-specialsecretarytransport@gmail.com. Only such objections or suggestions as are received within fifteen days from the date of publication of this notification in the Official Gazette shall be taken into consideration;

The persons who file their objections or suggestions in writing may appear before Vishesh Sachiv, Parivahan Anubhag-4, Uttar Pradesh Shasan, Bapu Bhawan, Uttar Pradesh Sachivalaya, Lucknow in his office room no. 434 for hearing in any working day at 09:30 a.m to 06:00 p.m.

Preliminary

1. Short Title and Commencement

1. (1) These rules shall be called the "Uttar Pradesh Inland Vessels Rules, 2026".

(2) These rules shall come into force on the date of their final publication in the Official Gazette.

(3) The existing vessels shall be converted to the standards specified in these rules within 90 days from the date of coming into force of these rules.

(4) These Rules contain sixteen chapters, of which Chapters One to Fourteen provide for mechanically propelled Inland vessels, and Chapter Fifteen provides for non-mechanically propelled inland vessels. The rules of Chapter Sixteen shall apply to both mechanically and non-mechanically propelled vessels.

(5) In case of any inconsistency between these rules, the provisions of the Central Act and the rules shall prevail.

Chapter-I
Provisions relating to Mechanically Propelled Inland Vessel

Definitions

2 (1) In these rules, unless the context otherwise requires:

(a) "Act" means the Inland Vessels Act, 2021 (Act No. 24 of 2021);

(b) "Assessor" means such persons having experience in navigation of commercial service or mechanically propelled inland vessels and appointed by the State Government under Section 76(1) of the Act for the purposes of Chapter XIII;

(c) "Central Rules" means the rules framed by the Government of India under the Act(as amended);

(d) "Central Government" means the Government of India;

(e) "Designated Authority" means the authorities appointed by the State Government under Section 5(3) of the Act;

(f) "District Magistrate" means an officer appointed by the State Government and includes an Additional District Magistrate or any Executive Magistrate authorized by the District Magistrate to perform duties under the Act, Central Rules, and these rules;

(g) "Examiner or Chief Examiner" means the officers or persons appointed by the State Government under Section 36(1) of the Act for examining the qualifications of persons seeking certificates under Chapter VI of the Act;

(h) "Form" means forms appended to the Central Rules and these rules and "SR Form" means forms appended to State rules only;

(i) "Gross Tonnage (GT)" means the gross tonnage calculated in accordance with the International Convention onTonnage Measurement of Ships, 1969;

(j) "Ports or Places of Registry" means offices or places notified by the State Government under Section 20 of the Act where mechanically propelled inland vessels are registered under Chapter V of the Act;

(k) "Receiver of Wreck" means officers appointed or authorized by the State Government under Section 58(1) of the Act for carrying out functions specified under Chapter X of the Act, Central Rules, and these rules (as amended);

(l) "Registrar of Inland Vessels" means officers or persons appointed by the State Government under Section 20 of the Act for carrying out functions specified under the Act, Central Rules, and these rules;

(m) "Registering Authority" means the Registrar of Inland Vessels appointed by the State Government;

(n) "State Authority" means the Uttar Pradesh Inland Waterways Authority constituted under the Uttar Pradesh Inland Waterways Authority Act, 2023 (Act No. 22 of 2023)(as amended), authorized to exercise powers and perform duties throughout the State of Uttar Pradesh under the State Authority Act;

(o) "State Authority Act" means the Uttar Pradesh Inland Waterways Authority Act, 2023 (Act No. 22 of 2023) (as amended);

(p) "State Authority Fund" means the Uttar Pradesh Inland Waterways Authority Fund constituted under Section 23(1) of the State Authority Act, 2023;

(q) "State Government" means the Government of Uttar Pradesh;

(r) "Surveyor" means officers or persons appointed by the State Government under Section 10 of the Act as surveyors of inland vessels for carrying out duties specified under the Act, Central Rules, and these rules (as amended);

(s) "Vessel Builder" means a person or company primarily engaged in the design and construction of vessels, boats, or other floating crafts, including design inspection, construction testing, inspection, and delivery to owners;

(t) "Vessel Repairers" means persons or companies specializing in the repair and maintenance of vessels and boats, including damage repair, regular maintenance, upgradation, or conversion work relating to hull structure, machinery, electrical, and electronic systems.

(2) Words and expressions used but not defined in these rules and defined in the Act or Central Rules shall have the meanings respectively assigned to them in the Act or Central Rules.

Chapter II
Declaration of Inland Water Areas into Zones

3. Determination of Water Areas

The State Government or the State Authority may, on the basis of consultation with the Technical Expert Department (such as the Irrigation Department) or related technical institutions, by separate orders, declare any inland water area as a "Zone" under Section 4(1) of the Act for the purposes of these rules, in accordance with the maximum significant wave height standards specified under Section 4(2) of the Act.

Chapter III
Administrative Provisions

4. Appointment of Designated Authority

Under Section 5(3) of the Act, all Regional Transport Officers (Administration) shall be the Designated Authorities for their respective divisions, whose list is annexed as Appendix-1. They shall exercise powers, authorities, and duties conferred under the Act and rules framed thereunder.

5. The Designated Authority shall ensure that registration and survey of all vessels are conducted through the Vessel and Navigator Portal in accordance with Section 41 of the Act and the Inland Vessels (Central Database and Allied Subjects) Rules, 2024 (as amended).

Chapter IV
Survey and Certification of Inland Vessels

6. Classification of Mechanically Propelled Inland Vessels- Classification of mechanically propelled inland vessels under Section 7(2) of the Act shall be in accordance with the Inland Vessels (Design and Construction) Rules, 2024 (as amended); framed by the Central Government.

7. Survey and Certification of Mechanically Propelled Inland Vessels- Survey and certification of mechanically propelled inland vessels shall be governed by Chapter IV of the Act, the Inland Vessels (Survey and Certification) Rules, 2022 (as amended) framed by the Central Government, and these rules;

provided that Any mechanically propelled inland vessel issued a provisional certificate of survey or approval may temporarily undertake voyages or be used in service until issuance of the survey certificate, subject to conditions prescribed by the Designated Authority from time to time.

8. Appointment of Surveyors

(a) Under Section 10(1) of the Act, the National Inland Navigation Institute, a government institution under the Inland Waterways Authority of India, shall function as Surveyor for mechanically propelled inland vessels and ensure compliance with the Inland Vessels (Survey and Certification) Rules, 2022 (as amended) . Such surveyors shall be deemed public servants under the Bharatiya Nyaya Sanhita. This institution/Surveyor will also act as Assessor.The State Authority may also authorize other institutions/surveyors under Section 12(4) of the Act.

(b) The procedure for survey of mechanically propelled inland vessels, qualifications of surveyors, and procedure for submission of reports shall be in accordance with the Inland Vessels (Survey and Certification) Rules, 2022 (as amended) framed by the Central Government.

(c) The surveyor appointed asper10(a) above shall ensure compliance of mechanically propelled inland vessels with Central Government rules and these rules and determine the class of vessel and the operational zone suitable under Rule 3.

(d) Applications for survey of inland vessels shall be made online through the portal: **htpp://navic.iwai.gov.in**.

(e) Fees payable to the surveyor for survey shall be as prescribed in Schedule-1 annexed to these rules.

9. Fees for Survey and Certification

(a) For the purposes of survey and certification of mechanically propelled inlandvessels, fees specified in Schedule-1 annexed to these rules shall be payable.

(b) If re-survey becomes necessary due to fault, act, or omission of the owner, master, or crew member, the owner shall be liable to pay the fee specified in Schedule-1

(c) If the application is submitted after the prescribed period, an additional fee at the rate of five percent per month or part thereof shall be payable, subject to a maximum of double the prescribed fee.

(d) Such fee or additional fee shall be paid through electronic or other prescribed modes specified by the State Authority and deposited in the State Authority Fund.

(e) Any fee paid under the Act or these rules shall not be refundable.

10. Temporary Operation of Vessels Holding Temporary Survey Certificate- Any mechanically propelled inland vessel issued a temporary survey certificate or endorsement under Section 13(1) of the Act may temporarily undertake voyages or services in accordance with the procedure and conditions specified by the Designated Authority until issuance of the survey certificate.

11. Suspension or Cancellation of Certificate of Survey

(1) Procedure for Issuance of Notice

(a) If the State Government, State Authority, authorized surveyor, or registering authority believes that any condition specified under Section 15(1) of the Act has been violated by the owner, operator, or master, notice for suspension or cancellation of the certificate of survey may be issued under Section 15(2) or 15(3) of the Act.

Such Notice regarding suspension or cancellation of a certificate of survey shall be sent by the State Government by registered post with acknowledgment due to the address mentioned in the survey certificate to the owner, operator, master, or construction yard. Compliance with the conditions shall be ensured within three months from the date of notice.

(b) The notice shall clearly specify the reasons for suspension or cancellation, including deficiencies or violations identified during inspection or survey.

(c) If additional time is required for compliance, the owner, operator, master, or construction yard may apply in writing with reasons and supporting documents.

(d) If satisfied, the issuing authority may extend the compliance period by one additional month.

(2) Period of Suspension- The suspension shall remain effective until defects are rectified and compliance ensured, or for a maximum period of six months from the date of suspension order, whichever is earlier.

(3) Cancellation of Certificate

(a) If suspension continues for six months or more, the State Government, State Authority, authorized surveyor, or registering authority may cancel the certificate. If the certificate was not issued by such Authority, the matter shall be forwarded to the original issuing Authority for cancellation.

(4) Surrender of Expired, Suspended, or Cancelled Certificate

(a) The owner or master shall surrender the expired, suspended, or cancelled certificate to the **Registrar of Inland Vessels.**

(b) The Registrar shall record details of cancellation in the registry book.

(c) The issuing authority shall comply with Section 15 of the Act and all provisions of Central Rules and these rules regarding suspension or cancellation.

Chapter V
Registration of Inland Vessels

12. Functions of Registrar of Inland Vessels

1. Under Section 20(2) of the Act, Assistant Regional Transport Officers (Administration) shall act as Registrars for their respective districts as listed in Appendix-2.

2. The Registrar of Inland Vessels shall perform the following functions, namely :-

(a) function as head of the port or registration place;

(b) act as Nominated Authority for implementation of provisions relating to mechanically propelled inland vessels;

(c) ensure compliance with all duties specified under the Act, rules, regulations, and notifications;

(d) ensure compliance of all inland vessels operating within jurisdiction;

(e) coordinate with stakeholders for regulation and control of water transport;

(f) coordinate for preparation and regulation of tourist circuit routes for river cruise operations;

(g) ensure compliance with safety and environmental laws relating to vessels, ports, terminals, navigation, inland water transport, and tourism activities;

(h) examine adequacy of facilities for the public at cargo and passenger terminals and infrastructure;

(i) ensure coordination between inland water transport and other transport systems;

(j) submit reports required under the Act and rules;

(k) ensure confidentiality and protection of vessel records under applicable data protection laws;

(l) provide guidance and clarification to stakeholders regarding registration procedures, regulatory requirements, and inland vessel operations;

(m) perform other prescribed responsibilities relating to inland vessels;

(n) maintain a register under Section 41(1) of the Act for recording certificate details and data;

(o) perform additional duties assigned by the State Government or State Authority

13. Reporting of Details in Registry Book- Under Section 21(2) of the Act, the Registrar shall electronically submit details and entries made in the Book of Registry at the end of each month of every calendar year to the Central Government, State Government, and State Authority in Form-10 prescribed under the Inland Waterways (Registration and Other Technical Matters) Rules, 2022 (as amended) of Government of India.

14. Details Contained in Registration Certificate- The particulars contained in the certificate of registration of mechanically propelled inland vessels under Section 24(2) of the Act shall be in accordance with Form-17 prescribed under the Inland Vessels (Registration and Other Technical Matters) Rules, 2022 (as amended) .

15. Display of Official Registration Number on Inland Vessel-

(1) A unique registration number shall be issued by the registering authority to every mechanically propelled inland vessel. The registration number shall be alphanumeric and consist of 10 characters. The first two characters shall be in English denoting "MP" (Mechanically Propelled), followed by two characters representing the State Code "UP", followed by two digits representing the district vehicle registration code (for example, 32 for Lucknow as per Appendix-3), and the last four digits shall be a serial number from 0001 to 9999.

Accordingly, the first registration number for Lucknow district shall be MPUP320001. After exhaustion of serial numbers from 0001 to 9999, alphabetic series shall be used after the district code starting from A to Z (excluding I and O). After completion of A to Z series, double alphabet series such as AA, AB, AC up to ZZ (excluding I and O) shall be used.

(2) Every registered vessel under Section 24(3) of the Act shall clearly display its official registration number and name at the bow (front), stern (rear), and both sides of the hull, or as specified by the registering authority, so that it remains clearly visible and legible from a distance and is not obstructed by any fittings, equipment, or structures.

(3) Size and Font: The size of the official registration number shall be sufficiently large and in contrasting colour so that it is clearly readable against the background of the vessel. The font shall be in accordance with the Inland Vessels (Registration and Other Technical Matters) Rules, 2022.

(4) Material and Durability: The registration number shall be marked using durable, weather-resistant materials capable of withstanding environmental conditions and remaining clearly visible for a long period.

(5) Maintenance: The operator of the vessel shall be responsible for ensuring regular inspection and maintenance of the registration markings so that their visibility and legibility are not obstructed, faded, or damaged at any time.

16. Application for Duplicate Registration Certificate

If the registration certificate is lost, destroyed, or damaged, the owner shall apply to the registering authority in SR Form-1 electronically or physically with prescribed fee under Section 26(1) of the Act.

17. Procedure for Alteration or Modification in Registration Certificate

The owner or operator or master of a mechanically propelled inland vessel shall apply within 30 days from the date of alteration or modification in Form-15 prescribed under the Inland Vessels (Registration and Other Technical Matters) Rules, 2022 (as amended) along with required documents and prescribed fees under Section 28(1)(2) of the Act.

18. Suspension and Cancellation of Registration Certificate

Under Sections 31 and 32 of the Act, the registering authority shall be authorized to take action in relation to mechanically propelled inland vessels. Inspection shall be conducted by persons or authorities authorized by the State Government through general or special order.

19. Fees for registration

1. Fees payable for registration of inland vessels under Chapter V, Sections 24(1), 26(2), and 28(2) of the Act and relevant Central Rules shall be payable as per Schedule-2 annexed to these rules.

2. Fees and penalties payable under the Act, Central Rules, and these rules shall be deposited through UPI, QR code, net banking, or other online modes into the bank account of the Uttar Pradesh Inland Waterways Authority;

3. Any fee paid under the Act or these rules shall not be refundable.

4. Delayed applications shall attract additional fee at five percent per month or part thereof, subject to a maximum of double the prescribed fee.

5. Fees mentioned in Schedule-1 shall be paid through electronic or other prescribed methods and deposited into the State Authority Fund.

Chapter VI
Crew Management, Qualification, Training, Examination and Certification

20. The rules under this Chapter shall be in accordance with the provisions specified for inland mechanically propelled vessels in the Inland Vessels (Crew) Rules, 2022(as amended) framed by the Central Government.

21. The State Authority or any officer or authority authorized by the State Government through notification or special order shall discharge the functions and duties specified under Sections 37 and 38 of the Act.

22. Record of Certificate Holders and Central Record:

(1) The details and data relating to certificates issued, approved, cancelled or suspended under Chapter VI of the Act, or relating to any other kind of execution, shall be maintained in registers by the State Authority in such format and manner as specified, subject to the approval of the State Government.

(2) The State Government shall, in accordance with sub-section (2) of Section 41 of the Act, provide and update the Central Government at prescribed intervals with details and data of certificates issued, approved, cancelled or suspended, along with information regarding other remarks made by the concerned authority.

Chapter VII
Special Category Vessels

24. Appointment of Pollution Surveyor and Inspection Authority: For Purposes of Sections 53(2), 55(1) and 56(1) of the Act, the Surveyor appointed under section 10 of this rule, shall also act as pollution surveyor. A separate fees as per Schedule- 1, shall be payable for this purpose.

25. Reception Facilities Charges: The owner or operator of a passenger or cargo terminal providing reception facilities for disposal/unloading of oil, oily mixtures, sewage, garbage, hazardous chemicals or other foul-smelling substances shall collect charges at prescribed rates, subject to approval of the State Government, in accordance with orders issued from time to time by the State Government/State Authority.

26. Reception Facilities and Pollution Control:

(1) The owner or operator or master of a passenger or cargo terminal shall submit compliance reports to the officer appointed by the Central Government or State Government, in the format and manner specified by the State Authority, subject to approval of the State Government.

(2) The State Authority may, through written order, require supplementary compliance reports from the owner or operator of the passenger or cargo terminal in the specified format, and such reports must be submitted within the prescribed period.

27. Method for Disposal of Pollutants at Port Reception Facilities:

(1) The owner or operator or master of any inland mechanically propelled vessel shall dispose pollutants at port reception facilities in the following manner, namely —

(a) Designated Reception Facilities: An inland mechanically propelled vessel shall dispose pollutants only at port reception facilities approved by the State Authority.

(b) Segregation and Storage: The inland mechanically propelled vessel shall separate different categories of pollutants and store them in designated onboard tanks or containers.

(c) Use of Waste Containers: Pollutants shall be disposed into waste containers provided by the port pollution reception facility in such a manner that there is no spillage or leakage.

(d) Compliance with Facility Requirements: The vessel shall comply with all specific procedures or requirements prescribed by the port pollution reception facility, including but not limited to limits relating to time, place or quantity.

(e) Method of Disposal: State Authority may prescribe procedures for disposal of pollutants to ensure compliance with the Inland Vessels (Prevention and Control of Pollution) Rules, 2022.Inland mechanically propelled vessels may also be required to submit reports or documents regarding the nature and quantity of pollutants.

(2) The State Authority may, through written order, prescribe any other suitable methods for disposal of pollutants for the owner or operator of the passenger or cargo terminal as it deems appropriate.

Chapter IX
Wreck and Salvage

28. Under Section 58(1) of the Act, the Registring Authority shall be the receiver of wrecks within its jurisdiction.

Chapter X
Liability and Limitation of Liability

29. Authorized Officer under this Chapter:The Registrar of mechanically propelled inland vessels shall have the authority under Chapter XI, Section 63 of the Act and the rules framed thereunder to detain any mechanically propelled inland vessel in connection with any claim or offence.

30. Procedure for Detention and Release of Mechanically propelled inland vessel:

(1) If the authorized officer in section 29 above has reason to believe that any inland mechanically propelled vessel has been or is being used in contravention of the provisions of Chapter XI of the Act, he may detain such vessel by issuing.

an order to the the owner or operator or master person in charge or member of crew of the inland mechanically propelled vessel specifying clearly the reasons for detention, and he shall take or cause to be taken necessary measures for temporary custody of the vessel.

(2) Where any inland mechanically propelled vessel has been detained, the owner or operator or master in-charge or member of crew may apply for release of the vessel before the concerned authority in electronic or other format specified by the State Authority along with required documents. After verification of documents, the concerned authority may release the inland mechanically propelled vessel by order, subject to appropriate conditions and payment of penalty or fine specified by the State Authority.

31. Fees and Charges:

(1) Charges, penalties and other dues for safe custody and maintenance of detained or seized inland mechanically propelled vessels shall be payable as per Schedule-1 attached to these rules.

(2) Such charges, penalties and other dues shall be deposited in the bank account of the State Authority through UPI, QR Code, Net Banking or any other online mode.

Chapter XI
Inquiry into Casualty, Accident or Wreck of Inland Mechanically Propelled Vessels

32. Authorized Officer under this Chapter: The Registrar of inland mechanically propelled vessels or any other officer authorized by the State Government shall be the designated authority for carrying out the functions specified under Chapter XIII of the Act and the rules framed thereunder.

33. Form and Manner of Information:

(1) Whenever the owner or operator or master of an inland mechanically propelled vessel faces wreck, abandonment, damage, casualty, accident, explosion or loss to or on board any inland vessel while in inland waters, he shall provide information in SR-Form-2 to the officer inchargeofthe nearest police station and the designated authority.

(2) Submission of information shall be made through the specified portal, e-mail, any other electronic mode, physical mode, or both, as determined by the State Authority.

continue next page.....

34. Powers and Procedure of District Magistrate for Inquiry into Accidents in Inland Waters:

(1) On the directions of the State Government, the District Magistrate may initiate inquiry into incidents occurring within his jurisdiction and shall submit additional reports under sub-section (2) of Section 75 of the Act.

(2) The District Magistrate or inquiry committee constituted by him shall have authority to summon witnesses, examine evidence and require production of relevant documents for purposes of inquiry under Chapter XIII.

(3) The District Magistrate or inquiry committee shall issue notices informing all concerned parties including vessel owners, operators, crew members and concerned authorities about the inquiry.

(4) The District Magistrate or inquiry committee shall conduct hearings, examine witnesses and collect evidence relating to the marine incident.

(5) Inquiry proceedings shall be conducted fairly and without discrimination.

(6) The District Magistrate or inquiry committee shall maintain complete records of proceedings including records, exhibits and other relevant documents.

(7) Upon completion of inquiry, the District Magistrate or inquiry committee shall prepare a report containing findings, conclusions and recommendations relating to the accident.

(8) If the inquiry has been conducted by the committee, the District Magistrate may require the committee to review the report or submit a supplementary report.

(9) The inquiry report shall be submitted by the District Magistrate to the State Government and one copy thereof shall be sent to the Judicial Magistrate First Class of the concerned district.

35. Qualifications, Standards, Remuneration, Fees or Charges for Assessors: The assessor shall discharge responsibilities under Section 76 of Chapter XIII of the Act of the Government of India. The institution/surveyor nominated under Rule 10(a) of these rules for surveys shall also discharge responsibilities of assessors. Remuneration, fees or charges payable to assessors shall be as per Schedule-1 attached to these rules.

Chapter XII
Pilot Service, Vessel Detention and Development Fund

36. Requirement of Pilot Service: For specified inland waterways situated within the jurisdiction of the State Government, wholly or partly, or waterways in respect of which no direction has been issued by the Central Government under sub-section (1) of Section 83 of the Act, pilot service requirements may be specified by the State Authority subject to approval of the State Government.

37. Authorized Officer under this Chapter: The Registrar of inland mechanically propelled vessels shall have authority under sub-section (1) of Section 85 of the Act to detain any mechanically propelled inland vessel.

38. Procedure for Detention and Release:

(1) If the Registering Authority has reason to believe that any inland mechanically propelled vessel has been used or is being used in violation of Section 85(1) of the Act, it may issue an order to the owner, operator or person in charge for detention of the inland mechanically propelled vessel.

The order shall specify reasons for detention, and for this purpose the authority may take or require any necessary measures for temporary custody of the vessel.

(2) Where any inland mechanically propelled vessel has been detained, its owner, operator or person in charge may apply for release before the concerned authority in electronic or other format specified by the State Authority along with required documents.

After verification of documents, the Registering Authority may release the inland mechanically propelled vessel by order, subject to such conditions as deemed appropriate and subject to payment of fine or penalty as mentioned in Schedule-1 of these rules.

39. Fees and Charges:

(1) Fees and charges for safe custody and maintenance of detained or seized inland mechanically propelled vessels shall be payable at the rates specified in Schedule-1 of these rules.

(2) Such fees and charges shall be deposited electronically or through any other method in the bank account of the State Authority through UPI, QR Code, Net Banking and other online modes.

40. State Development Fund: A State Development Fund shall be constituted under Section 86 of the Act.

(1) The State Development Fund shall be utilized for the following purposes:

(a) For fulfillment of emergency preparedness;

(b) For controlling pollution caused by leakage of oil, mixtures, waste substances, chemicals, unhealthy or other hazardous materials so as to ensure protection and conservation of inland waters;

(c) For providing partial or full financial assistance to persons or economically weaker sections engaged in trade or livelihood dependent upon inland waters;

(d) For removal of wrecks or obstructions of unidentified inland mechanically propelled vessels affecting or obstructing navigation; and

(e) For promoting development works relating to inland water navigation from the perspective of safety and transportation convenience.

(2) Efforts shall be made to establish the Development Fund with assistance from the following sources—

(a) State Government;

(b) Stakeholders;

(c) Amount received from sale of wrecks, cargo or remnants of inland mechanically propelled vessels after deduction of expenses;

(d) Surplus amount remaining after adjustment of expenses of courts or administrative machinery from sale proceeds of any property, inland mechanically propelled vessel or goods pursuant to court orders;

(e) Minimum 50 percent of the amount received from fees, penalties etc. from inland mechanically propelled vessels/cargo vehicles, or such amount as determined from time to time by the Uttar Pradesh Inland Waterways Authority, shall be deposited in the account of the State Authority.

(3) Constitution of Committee for Operation of State Development Fund:

The Development Fund constituted under Section 86 of the Act shall be operated by a State Level Committee comprising the following

S.No.	Designation	Status
1	2	3
1	Chairman, U.P. Inland Waterways Authority	Chairman
2	Additional Chief Secretary/Principal Secretary, Transport, U.P.	Member
3	Transport Commissioner, U.P.	Member
4	Chief Executive Officer, U.P. Inland Waterways Authority	Member
5	Special Secretary nominated by Principal Secretary Finance, U.P.	Member
6	Special Secretary Tourism nominated by Principal Secretary Tourism, U.P.	Member
7	Special Secretary nominated by Principal Secretary Irrigation, U.P.	Member
8	Additional Transport Commissioner (Administration), U.P.	Member Secretary
9	Representative nominated by Chairman	Member
10	Secretary Revenue/Relief Commissioner, Revenue Department	Special Invitee Member

Functions of the Committee: The committee shall maintain accounts of the amount received in the Development Fund constituted under Section 86 of the Act, ensure its proper utilization, provide financial assistance at regional level according to requirements of Water Transport Management, Safety and Advisory Committees constituted at divisional and district levels, and maintain and audit expenditure records.

Chapter XIII
Offences and Penalties

41. Procedure relating to Receipt Forms, Accounts Maintenance, Rates and Intervals of Fees, Additional Charges and Penalties: Fees and additional fees payable under the Act, and other charges or payments against any penalty, along with their rates and intervals, and procedures relating to receipt, collection, accounting and accountability of such amounts, formats of receipts, maintenance of accounts and other necessary matters shall be specified by the State Authority under Section 89 of the Act, subject to approval of the State Government,unless specified in the Appendix .

42. Place of Trial: The State Government shall notify places for trial of persons violating any provision of the Act or rules framed thereunder.

Chapter XIV
Emergency Preparedness, Appeal, Advisory Committee and Ports or Offices for Registration/Survey

43. Emergency Preparedness:

The State Authority may, from time to time, specify such measures by which any emergency situation or crisis situation adversely affecting navigation safety, protection of human life or protection of inland waters may be minimized or dealt with.

44. Appeal:

(1) For compliance of Section 105 of the Inland Vessels Act, 2021(as amended), the Additional Chief Secretary/Principal Secretary/Secretary of Transport Department of the State Government shall be the Appellate Authority.

(2) The Appellate Authority shall, after providing an opportunity of hearing to the appellant and recording reasons, pass an appropriate order, which shall be final.

45. Port or Office for Registration and Survey: For the purpose of registration and survey of mechanically propelled inland vessels, the administrative jurisdiction of all ports or registration and survey offices situated in the State of Uttar Pradesh shall be in accordance with Appendix-1 of these rules.

Chapter XV
Provisions Relating to Non-Mechanically Propelled Inland Vessels

46. Definitions

Unless the context otherwise requires for purpose of this chapter of these rules,

1. **"Appellate Authority"** means the Regional Transport Officer (Administration) of the concerned division, by whom appeals against any decision/order of the Enrolment Authority or Competent Authority shall be disposed of.
2. **"Boat Ghat/Boat Terminal"** means a platform/deck made of wood, brick, stone, iron, concrete, high density polyethylene (HDPE)/fiber glass reinforced plastic (FRP) floaters etc., used for access into water bodies and for boarding/deboarding of crew and passengers as well as loading and unloading of goods, animals, livestock, articles and materials etc.
3. **"Competent Authority"** means the Assistant Regional Transport Officer (Administration) of the concerned district, by whom complaints against any decision/ order of the Enrolment Authority shall be disposed of.
4. **"Commercial operation"** means operation of a non-mechanically propelled inland vessel for hire, fee or profit.
5. **"Cargo vessel"** means any non-mechanically propelled inland vessel used generally for transportation of all kinds of movable or personal property including animals.
6. **"Department"** means the Transport Department of the State of Uttar Pradesh or any department specified by the State Government, authorized to issue/suspend/cancel Enrolment/inspection and registration of boats and personnel working on such boats
7. **"Enrolment"** means the registration of a non-mechanically propelled inland vessel in the records of the competent authority.
8. **"Inspector of non-mechanically propelled inland vessels"** means a person appointed by the State Government or by any department/authority/institution authorized by the State Government for inspection of boats under these rules.
9. **"Non-mechanically propelled inland vessel"** means a vessel which is not operated by engine, motor or mechanical power, but is operated by human force, oar, pole, sail or any other natural means.
10. **"Owner of non-mechanically propelled inland vessel"** means the person/institution in whose name the non-mechanically propelled inland vessel is registered.
11. **"Operator of non-mechanically propelled inland vessel"** means the person who operates the non-mechanically propelled inland vessel.
12. **"Passenger vessel"** means such non-mechanically propelled inland vessel which is used for transportation of persons.
13. **"Restricted area"** means such water areas where operation of non-mechanically propelled inland vessels has been prohibited by the State Government.
14. **"Traditional non-mechanically propelled inland vessel navigator"** means a person who traditionally operates a non-mechanically propelled inland vessel but may not possess formal qualification or training.
15. **"Enrolment Authority"** means the Motor Vehicle Inspector posted at district headquarters and Assistant Motor Vehicle Inspector posted at tehsil level in the Transport Department, who shall function as Enrolment Authorities for their respective jurisdictions and shall maintain and compile the database of non-mechanically propelled vessels under Section 91(1) of the Act.
16. **"Salvage"** means the process of recovering a boat and its cargo after an accident or other river mishap. Salvage may include towing, lifting or repairing the boat.
17. **"Sports vessel"** means a non-mechanically propelled sports vessel used for sports, personal use or any other such purpose.
18. **"State Authority"** means the Uttar Pradesh Inland Waterways Authority. Provided that words and expel used but not defined herein shall have same meaning as respectively assigned in the Central Actor rules.

47. Administration and Implementation: Under Section 91(1) of the Inland Vessels Act, 2021, the Transport Department shall be authorized for operation, administration and regulation of non-mechanically propelled inland vessels. Under this, the Assistant Regional Transport Officer (Administration) at district level or any authority authorized by the State Government shall be responsible for implementation, whose duties shall be as follows—

1. To ensure Enrolment of non-mechanically propelled inland vessels through the Enrolment Authority under Chapter-17 of the Inland Vessels Act, 2021, of GOI (as amended)
2. To collect data relating to enrolled non-mechanically propelled inland vessels through the Enrolment Authority and report the same to the relevant Government of India portal and the Uttar Pradesh Inland Waterways Authority.
3. To inspect fitness/safe operation of vessels from time to time through the Enrolment Authority.
4. To discharge responsibilities as Member Secretary of the district-level Water Transport Management and Safety Committee.
5. To provide guidance and conduct awareness programs for owners, operators and users of enrolled non-mechanically propelled inland vessels.
6. To perform such other duties as may be assigned by the State Government from time to time.

48. Categories of Non-Mechanically Propelled Inland Vessels

For the purposes of these rules, non-mechanically propelled inland vessels shall be classified as follows—

S. No.	Basis of Classification	Category A	Category B	Category C
1	2	3	4	5
1.	Passenger carrying capacity	More than 10 passengers	More than 5 but less than 10 passengers	5 or less passengers
2.	Cargo carrying capacity	More than 5 tons	More than 3 tons but less than 5 tons	3 tons or less

49. Basic Minimum Standards for Construction and Safety of Non-Mechanically Propelled Vessels: The basic minimum standards for construction and safety of non-mechanically propelled vessels shall be such as specified in these rules or as may be prescribed from time to time by the Government of Uttar Pradesh and the Uttar Pradesh Inland Waterways Authority through Gazette notification under Section 94 of the Inland Vessels Act, 2021.

50. Enrolment and Registration:

1. The Motor Vehicle Inspector at district level and Assistant Motor Vehicle Inspector at tehsil level shall discharge duties as Enrolment Authorities. Until Assistant Motor Vehicle Inspectors are posted at tehsil level, the Motor Vehicle Inspector posted at district level shall function as Enrolment Authority for all tehsils of the district. In districts where more than one Motor Vehicle Inspector is posted, the Transport Commissioner, Uttar Pradesh may authorize one Motor Vehicle Inspector to function as Enrolment Authority. Where no Motor Vehicle Inspector is posted in a district, the Transport Commissioner, Uttar Pradesh may authorize a Motor Vehicle Inspector posted in another district or headquarters to act as Enrolment Authority for such district.
2. Enrolment of every non-mechanically propelled vessel operating within the State shall be mandatory.
3. Application for Enrolment shall be made in prescribed Form SR-NM-1 along with the prescribed fee.
4. The following documents shall be submitted for enrolment of a non-mechanically propelled inland vessel:—

(a) identity proof of vessel owner (Voter ID Card or Aadhaar Card or any other document prescribed by the Uttar Pradesh Inland Waterways Authority).

(b) proof of current address/current residence (Voter ID Card or Aadhaar Card or any other document specified by the Uttar Pradesh Inland Waterways Authority).

(c) latest passport size photograph of the applicant.

(d) details and photograph of the non-mechanically propelled inland vessel.

(e) capacity details.

(f) ownership certificate of the non-mechanically propelled inland vessel (in case of new vessel, certificate/declaration of vessel manufacturer; in case of purchase from another person/institution, purchase certificate; in case of old vessel, declaration of ownership).

51. Enrolment of Vessel by Enrolment Authority:

(a) On receipt of application, for enrolment of a non-mechanically propelled inland vessel, the Enrolment Authority shall scrutinize the application and, if necessary, inspect the non-mechanically propelled inland vessel and issue Enrolment Certificate in Form SR-NM-2.

(b) A unique Enrolment number shall be issued to the non-mechanically propelled inland vessel. The Enrolment number shall consist of twelve characters/digits, wherein the first two letters in English shall be NM (Non-Mechanized), next two letters shall be State Code UP, next two digits shall be district vehicle registration code (for Lucknow, 32) as per Appendix NM-1, next two letters shall be tehsil code (such as SR for Sadar tehsil, MG for Mohanlalganj, BT for Bakshi KaTalab) as per Appendix NM-2, and the last four digits shall be serial number from 0001 to 9999. Thus, for Lucknow district, the first Enrolment number shall be NMUP32SR0001. After serial numbers 0001 to 9999 are exhausted, alphabets A, B, C to Z shall be added after district registration code. After completion from A to Z (excluding I and O), double alphabets such as AA, AB, AC to ZZ shall be used.

(c) The number issued to the non-mechanically propelled inland vessel shall be displayed prominently in clear letters and numerals on a steel/aluminum plate as per prescribed standards so that it remains clearly visible and legible from a distance.

(d) The non-mechanically propelled inland vessel presented for Enrolment shall ensure compliance with standards and safety norms prescribed from time to time by the State Government or Uttar Pradesh Inland Waterways Authority.

(e) The Competent Authority shall maintain details of Enrolment of non-mechanically propelled inland vessels in prescribed Form SR-9.

(f) Non-mechanically propelled inland vessels shall not be operated in such water areas where operation of vessels has been prohibited by the State Government or Uttar Pradesh Inland Waterways Authority.

52. Issue of Duplicate Enrolment Certificate: In case the Enrolment Certificate issued by the Competent Authority is lost, destroyed or mutilated, the owner of the non-mechanically propelled inland vessel shall apply in prescribed Form SR-NM-3 along with prescribed fee under Schedule-1 and submit the torn/mutilated certificate copy or, in case of loss, a copy of the First Information Report. On receipt of such application, the Enrolment Authority, after verification, shall issue a duplicate Enrolment Certificate and record the same in the records/database.

53. Transfer of Vessel Having Enrolment Certificate: Where the owner of a non-mechanically propelled inland vessel having an Enrolment Certificate sells the vessel to another person, the owner shall apply before the Enrolment Authority in prescribed Form SR-NM-4 along with prescribed fee under Schedule-1 and sale deed Form SR-NM-5. Passport size photographs and proof of residence/ identity of both purchaser and seller shall also be attached. On receipt of such application, the Competent Authority after verification shall endorse the transfer in the Enrolment Certificate and record it in the records/database.

54. Cancellation of Enrolment Certificate: If the owner of a non-mechanically propelled inland vessel having Enrolment Certificate declares that the vessel is no longer fit for operation or has been discontinued / scrapped, the owner shall apply before the Enrolment Authority in prescribed Form SR-NM-6 along with self-certified declaration Form SR-NM-7. A copy of scrapping certificate shall also be attached. On receipt of such application, the Enrolment Authority after verification shall cancel the Enrolment Certificate and record the same in the records/database.

55. Ghat Management:

1. Operation from designated Ghats: Transparent arrangements for management of Ghats shall be ensured through the concerned local body/District Water Transport Management, Safety and Advisory Committee/Development Authority. Responsibility for lease, management, maintenance and safety of ghats shall also rest with the local body/District Water Transport Management, Safety and Advisory Committee and Development Authority. In case ghats are leased out by local bodies, responsibility for management, maintenance and safety shall lie with the lessee. Owners/operators of non-mechanically propelled inland vessels shall operate only from ghats designated by the concerned local body. In water areas where ghats are not available or designated, the District Water Transport Management and Safety Committee constituted under the chairmanship of District Magistrate shall ensure arrangements for lease/ contract. Where funds are available in the district-level Vessel Welfare Fund, such ghats may be managed through the said fund.

2. Responsibilities of Ghat Operator/Lessee: The ghat operator/lessee shall ensure that—

(a) the ghat is safe;

(b) the ghat is clean;

(c) proper arrangements exist for boarding /deboarding;

(d) permanent lighting arrangements exist at night;

(e) crowd control arrangements are available;

(f) permanent signboards in Hindi and English are installed on platforms and ghats displaying mandatory safety rules prominently;

(g) rescue rope, lifebuoy, diver and first-aid facilities are available at every ghat.

3. Instructions for Passengers:

(a) Wearing of life jacket shall be mandatory.

(b) Standing travel in non-mechanically propelled inland vessels shall be prohibited.

(c) Travelling under intoxication shall be prohibited.

(d) Carrying inflammable or hazardous materials shall be prohibited.

56. Responsibilities of Owners/Operators of Non-Mechanically Propelled Inland Vessels

1. Brief passenger safety information:

(a) Before every journey, operators shall provide safety information in Hindi along with local/regional language.

(b) Such briefing shall include major safety procedures, use and location of safety equipment, especially life jackets, passenger capacity, speed limits, navigation rules, smoking prohibition and emergency actions.

2. Enforcement of life jackets:

(a) All persons onboard shall wear life jackets conforming to prescribed safety standards.

(b) In emergencies, life jackets shall be of proper size and securely fastened.

(c) Children shall use life jackets designed according to their age and weight.

(d) Lifebuoys with strong rope shall be available according to seating capacity.

3. Compliance with operational restrictions:

(a) Only experienced persons shall operate the vessel.

(b) Operation by minors shall be prohibited.

(c) Night operation shall be permitted only with adequate lighting arrangements.

(d) Operators shall not operate under influence of alcohol or intoxicating drugs.

(e) Operation during adverse weather such as strong winds, storms, heavy rain and low visibility shall remain prohibited. Operation shall be conducted only during safe operational periods.

(f) Operation in restricted water areas shall be prohibited.

(g) Operators shall maintain safe distance from other water users to avoid collision.

4. Safety equipment— Every non-mechanically propelled inland vessel shall mandatorily carry—

(a) life jackets exceeding passenger capacity by 10%;

(b) minimum10 meter rope;

(c) first-aid box;

(d) battery-operated lighting arrangement;

(e) whistle.

5. Maximum load and passenger limit:

(a) Vessel owners/operators shall not carry passengers or load beyond specified limit.

(b) Maximum load/passenger capacity shall be marked on the vessel.

6. Operational readiness: Operators shall conduct daily inspection to ensure that the vessel is fully fit and safe for operation, has no leakage or holes, and that materials used in construction are strong and not broken, damaged or rotten.

Continue page 3

57. Emergency Response Vessel:

(a) At every location related to tourism activities, fishing, passenger and cargo transportation activities, properly equipped emergency response boats shall be readily available for immediate search and rescue operations.

(b) The required ratio of emergency response vessels to operational vessels shall be 1:10.

(c) At places where less than 10 operational vessels are functioning, at least one non-mechanically propelled inland vessel shall be designated and equipped as emergency response vessel.

(d) District Water Transport Management, Safety and Advisory Committee shall organize regular training exercises to ensure rescue skill efficiency of emergency response vessel operators.

(e) Suitability and operational efficiency of all emergency response vessels shall be inspected annually to ensure operational readiness and compliance with safety standards.

58. Fire Safety and Crew Training by operator of non-mechanically propelled inland vessel:

Depending upon nature and type of boating equipment, the following measures shall be adopted to prevent fire:

(a) No inflammable material shall be transported and no fire source such as stove etc. shall be used in the vessel.

(b) Emergency plans shall be prepared and practiced regularly.

(c) Fire extinguishing attempts shall be made using bucket or fire extinguisher.

(d) Any burning object shall be safely thrown into water.

59. Insurance of Non-Mechanically Propelled Inland Vessels: The State Government or State Authority may, as required, issue separate instructions in future regarding insurance of non-mechanically propelled inland vessels, their personnel and passengers.

60. Environmental Protection:

1. Operators of non-mechanically propelled inland vessel shall collect all solid waste generated on the vessel and dispose it at designated places on shore.
2. All waste water shall be collected, safely stored and responsibly disposed of.
3. Use of paper or cloth bags shall be encouraged instead of polythene bags.
4. Arrangements shall be made for separating recyclable waste from non-recyclable waste.
5. Appropriate measures shall be taken for proper disposal of biodegradable waste so as not to damage the local environment.
6. Signboards displaying **"Do Not Litter"** shall be installed at visible places for passengers.

61. Accident and Inquiry:

1. **Information regarding accident:** In case of accident involving any non-mechanically propelled inland vessel, the owner/operator shall inform the nearest police station and Enrolment Authority.
2. **Inquiry into accident:** In case of serious accident, the District Water Transport Management, Safety and Advisory Committee constituted under Chapter-16 shall conduct inquiry within 07 days.

62. Offences and Penalties: For the following violations, penalties mentioned in Schedule-03 shall be imposed on owners of non-mechanically propelled inland vessels

1. Operating vessel without Enrolment.
2. Carrying passengers/cargo beyond capacity.
3. Absence of safety equipment.
4. Operating under intoxication.
5. Operating during prohibited weather/area conditions.

63. Suspension of Enrolment: In case of serious negligence, after issuing 07 days' notice and providing opportunity of hearing, the Enrolment or permission for operation of the non-mechanically propelled inland vessel may be suspended. Suspension period shall not exceed 03 months.

64. Appeal: Any owner aggrieved by the order of the Enrolment Authority or Competent Authority may file appeal before the Appellate Authority within 30 days from date of order in prescribed Form SR-NM-8 along with appeal fee prescribed in Schedule-1. The Appellate Authority shall dispose of the appeal within 15 working days from receipt.

65. Maintenance of Register and Database of Non-Mechanically Propelled Inland Vessels: The Enrolment Authority shall maintain database of all non-mechanically propelled inland vessels operating in rivers/canals/lakes/water reservoirs or any other water body within its jurisdiction on Government of India portal or State Government portal/register and provide monthly information to Uttar Pradesh Inland Waterways Authority, which shall preserve database of all such vessels operating within the State. Such database may be produced before higher authorities whenever required for inspection or any other purpose. Register of Enrolment shall be maintained in Form SR-NM-9.

66. Constitution of Advisory Committee for Safe Operation and Maintenance of Non-Mechanically Propelled Inland Vessels: The committee constituted under Chapter-16 of these rules shall also perform functions relating to safe operation and handling of emergency situations concerning non-mechanically propelled inland vessels.

67. Constitution of Welfare Fund:

There shall be a District Welfare Fund for non-mechanically propelled inland vessels in every district. Accordingly separate bank account may be opened in each district in a nationalized scheduled commercial bank in the name of District Magistrate or Assistant Regional Transport Officer (Administration). This Welfare Fund can receive money through departmental budget, funds of local bodies, Corporate Social Responsibility (CSR), public contributions and other sources. In addition The Development Fund constituted under chapter-12 of these rules shall also be utilized for Welfare Fund Management of Welfare fund shall be done by District Water Transport Management, Safety and Advisory Committee, which is chaired by District Magistrate and has Assistant Regional Transport Officer (Administration) of the concerned district as member secretary. Meeting of this Welfare Fund shall be held at least once every six months.

68. Miscellaneous:

1. **Fees/Penalties:** Fees/penalties prescribed under various rules of these regulations shall be payable at rates specified in Schedule-1 and Schedule-2 or as amended by the State Government from time to time.
2. Payment of fees and penalties payable under the Act, Central Rules and these rules shall be made in the bank account of Uttar Pradesh Inland Waterways Authority through UPI, QR Code, Net Banking and other online modes.

Chapter XVI
Miscellaneous

69. Any amendment or modification in these rules in future shall be made by the Uttar Pradesh Inland Waterways Authority with the approval of the State Government.

70. Constitution of Water Transport Management, Safety and Advisory Committee: Under Section 99(1) of the Inland Vessels Act, 2021, for safe operation and regulation of mechanically and non-mechanically operated inland vessels and for consideration of various related matters, a District Water Transport Management and Safety Committee under the chairmanship of the District Magistrate in every district and a Divisional Water Transport Management, Safety and Advisory Committee under the chairmanship of the Divisional Commissioner in every division shall be constituted, which shall be as follows:

(1) District Water Transport Management, Safety and Advisory Committee

S.No.	Designation of Officer	Position
1.	2	3
1.	District Magistrate	
2.	Police Commissioner / Senior Superintendent of Police / Superintendent of Police	Chairperson
3.	Chief Executive Officer/Additional Chief Officer, Zila Panchayat	Member
4.	Municipal Commissioner	Member
5.	Additional District Magistrate looking after District Disaster Management Committee work	Member
6.	Chief Medical Officer	Member
7.	Executive Engineer, Irrigation Department	Member
8.	Assistant Regional Transport Officer (Administration)	Member Secretary
9.	District Tourism Officer	Member
10.	District Fire Officer	Member
11.	Representatives of any department/expert/association considered appropriate by the Chairperson (may be more than one)	Nominated Member

(a) Primary objectives of the District Water Transport Management, Safety and Advisory Committee shall be as follows:

(i) To discharge the responsibilities prescribed under Section 99 of the Inland Vessels Act, 2021.

(ii) In emergency situations, in accordance with the directions of the Central Government or State Government, or on its own initiative, it may declare the situation as an emergency and adopt the measures prescribed under sub-section 7 and such other practical measures as may be necessary to minimize or deal with such emergency according to the best possible decision.

(iii) In special circumstances, it may seek assistance from the Navy, Coast Guard, any other emergency force or any inland vessel, as may be necessary.

(iv) To provide all necessary and essential basic facilities to persons or vessels affected by emergency situations.

(v) To promote safe operation of inland vessels.

(vi) To monitor the safe operation of inland vessels and prevent possible accidents caused by such vessels.

(vii) To enforce established rules regulating tourism activities, fishing, passenger transport and cargo transport within the district/city.

(viii) To create awareness and organize knowledge dissemination sessions for educating owners, operators and service users regarding necessary improvements for safe navigation.

(ix) To provide assistance or relief during casualties, accidents or such emergency situations.

(x) To discharge the responsibility of daily water transport management.

(xi) Management, and operation of district welfare fund constituted for non-mechanically propelled water vessels, execution and monitoring of expenditure /various works through this fund.

(xii) To perform such other functions as the Committee may consider appropriate.

(xiii) To perform other objectives indicated in these rules.

(b) Meetings and Quorum:

(i) The District Water Transport Management, Safety and Advisory Committee shallmeet every month.

(ii) The meeting of the District Water Transport Management, Safety and Advisory Committee shall be chaired by the District Magistrate.

(iii) Presence of the Chairperson and Member Secretary along with a minimum of 05 members shall be mandatory in the meeting.

(c) Reporting:

(i) The District Water Transport Management, Safety and Advisory Committee shall maintain a secure database for recording all inspection activities, collected data, enforcement actions taken and reported incidents related to tourism activities, fishing, passenger transport and cargo transport activities.

(ii) The District Water Transport Management, Safety and Advisory Committee shall submit a report of every meeting to the Uttar Pradesh Inland Waterways Authority containing summaries of inspection findings, trends and recommendations, and based on review findings shall recommend improvements in water transport safety plans, regulations and training programs.

(iii) To submit reports to the Central Government or State Government or State Authority regarding incidents, outcomes and measures adopted under sub-section 3, and the effectiveness of such measures in dealing with emergencies.

(d) Roles and Responsibilities:

(i) The District Water Transport Management, Safety and Advisory Committee shall appoint officers for inspection and fortnightly supervision to verify implementation of these rules.

(ii) As required, cameras shall be installed by the Committee at boat ghats to monitor whether passengers are wearing life jackets and complying with seating limits, especially during festivals and holidays.

(iii) The Committee shall conduct surprise inspections every month to ensure that passengers are wearing life jackets. Awareness regarding life safety shall be promoted through local and government organizations. Emergency procedure drills shall be conducted in coordination with local fire and emergency services and such activities shall be publicized through media and social media.

(iv) The officer designated for inspection and fortnightly supervision shall conduct inspection while respecting the rights of vessel owners/operators and exercising due caution. Before inspection, such officer shall disclose his identity and produce identity card if required, and may take photographs or video recordings as evidence during inspection.

(v) To ensure compliance with navigation rules.

(vi) On various special occasions, the Committee shall organize meetings with inter-departmental bodies such as Tourism Department, Police Department, Fire Department, Coast Guard, Medical Services Department and other related institutions for implementation of safety measures in inland water areas.

(vii) With the cooperation of concerned stakeholders, the Committee shall develop training programmers regarding safety rules, emergency procedures and first aid for tourism activities/passenger transport.

(viii) The District Water Transport Management, Safety and Advisory Committee shall prepare emergency response plans whenever required for emergency situations.

(2) Divisional Water Transport Management, Safety and Advisory Committee

S.No.	Designation of Officer	Position
1.	2	3
1.	Divisional Commissioner	**Chairperson**
2.	District Magistrate, as required	Member
3.	Inspector General of Police / Deputy Inspector General of Police	Member
4.	Additional Director, Health	Member
5.	Divisional Chief Engineer, Irrigation Department	Member
6.	Regional Transport Officer (Administration)	Member Secretary
7.	Divisional Fire Officer	Member
8.	Regional Tourism Officer	Member
9.	Representatives of any department/expert/association considered appropriate by the Chairperson (may be more than one)	Nominated Member

(a) Primary objectives of the Divisional Water Transport Management, Safety and Advisory Committee shall be as follows:

(i) To review the functions of the District Water Transport Management, Safety and Advisory Committee.

(ii) To provide guidance to the District Water Transport Management, Safety and Advisory Committee from time to time.

(iii) To assess emergency situations and provide assistance to the District Water Transport Management, Safety and Advisory Committee as far as possible.

(b) Meetings and Quorum:

(i) The Divisional Water Transport Management, Safety and Advisory Committee shall meet once every three months.

(ii) The meeting of the Divisional Water Transport Management, Safety and Advisory Committee shall be chaired by the Divisional Commissioner.

(iii) Presence of the Chairperson and Member Secretary along with minimum 04 members shall be mandatory in the meeting.

71. Saving / Safeguard Clause:

(a) Notwithstanding anything contained in these rules, the provisions of any Act, Rule, Regulation, Notification, Order or Direction issued by the Central Government or State Government from time to time shall prevail, and in case of inconsistency, the provisions of such Act, Rule or Order shall prevail.

(b) Any action taken, permission granted, enrolment, inspection, order or direction issued under these rules shall not be deemed invalid merely on the ground of technical defect or procedural deficiency, if such action has been taken in good faith by the Enrolment/ Competent Authority.

(c) Nothing contained in these rules shall be construed to limit or render ineffective the enforcement of any other prevailing law, environmental provisions, public safety, disaster management, police administration or revenue laws.

(d) The State Government or authorized officer shall have the authority to impose additional directions, restrictions or safety measures in public interest, passenger safety, environmental protection, waterway safety or disaster situations as required.

(e) No person shall acquire any ownership or permanent right over waterways, ghats, banks or public property merely by virtue of any permission or registration issued under these rules.

(f) If any provision of these rules is declared invalid or ineffective by a competent court, the remaining provisions shall continue to remain effective.

(g) The State Government shall retain the authority to issue amendments, relaxations or clarifications in these rules from time to time keeping in view administrative requirements, technical advancement, safety standards or public interest.

72. Dispute Resolution Clause:

(a) Any dispute or complaint arising out of enrolment, operation permit, fees, inspection, penalty, suspension, cancellation or any administrative order under these rules shall be decided by the Competent Authority, namely the Assistant Regional Transport Officer (Administration) of the district. Any affected person may file an appeal before the designated Appellate Authority, namely the Regional Transport Officer of the division, within 30 days from the date of receipt of the order.

(b) The Appellate Authority shall pass appropriate orders after examining records and providing an opportunity of hearing to the parties concerned, and such order shall be binding upon the concerned parties.

(c) If the dispute relates to technical, operational or safety standards, the State Government shall take a decision as required on the basis of recommendations of the Expert Committee or District Water Transport Management, Safety and Advisory Committee.

(d) During the dispute resolution process, the Competent Authority may issue interim orders or restrictive directions for maintaining public safety, passenger safety, environmental protection or waterway management.

(e) Jurisdiction over all disputes and legal proceedings under these rules shall lie with the competent courts of the concerned district or State.

(f) Proceedings for dispute resolution under these rules shall be in accordance with the principles of Indian jurisprudence, natural justice and prevailing legal provisions.

73. Difficulties Removal Clause:

(a) If any difficulty arises in effectively implementing the provisions of these rules, the State Government or the Uttar Pradesh Inland Waterways Authority may, by publishing notification in the Gazette or issuing orders, issue such provisions, directions or clarifications as may be necessary for removing such difficulty, provided that such order is not inconsistent with the basic objectives of these rules or the prevailing Act.

(b) Every order, clarification or direction issued by the State Government or the Uttar Pradesh Inland Waterways Authority shall be deemed to form an integral part of these rules and shall be binding upon the concerned authorities and stakeholders.

(c) Powers conferred under this clause shall be limited only to matters for which no clear provision exists in these rules or where practical or administrative difficulties arise in implementation.

(d) The State Government or the Uttar Pradesh Inland Waterways Authority may obtain consultation from technical experts, district administration, inland water transport authorities or other related departments as required.

By order,
(Amrit Abhijat)
Additional Chief Secretary.

S.R. Form–1

Application for Duplicate Copy of Registration Certificate of an Inland

Mechanically Propelled Vessel

To,

The Registering Authority,

Port or Registration Office (Name) _____

I/We _____resident of_____, owner(s) of the inland mechanically propelled vessel whose official registration number is _____, state that the Registration Certificate has been lost/destroyed/torn-damaged.

(Delete whichever is not applicable.)

If lost, the details of the First Information Report are as follows:

I/We declare that, to the best of my/our knowledge, the Registration Certificate of the

inland mechanically propelled vessel has not been suspended or cancelled under the Act

or the rules made thereunder.

The details of the inland mechanically propelled vessel are as follows:

1. Name and full address of the owner _____

2. Name and serial number of the Registration Office (if previously registered) _____

3. Type of inland mechanically propelled vessel, such as name and address of engine manufacturer, horse power, speed and year of manufacture_____

4. Details of Pollution Certificate (certificate number, issuing authority and validity of certificate) _____

5. Details of Insurance Certificate (certificate number, issuing authority and validity of certificate) _____

6. Details of Survey Certificate (certificate number, issuing authority and validity of certificate) _____

7. Mobile number of the owner or master _____

8. E-mail address of the owner or master _____

9. Enclosures _____

(a) Receipt/challan showing payment of fee for the said purpose.

(b) Copy of Pollution Certificate.

(c) Copy of Insurance Certificate of the inland mechanically propelled vessel.

(d) Copy of Survey Certificate.

(e) Details relating to hypothecation; if the inland mechanically propelled vessel is under any hire-purchase/lease agreement, a No Objection Certificate issued by the financier shall be attached.

(f) In case of loss, copy of the First Information Report.

(g) In case of damage, copy of the original torn/damaged Registration Certificate.

(h) In case of destruction, a notarized affidavit on non-judicial stamp paper of Rs.100/- mentioning the place or reason of destruction.

In case the Registration Certificate is lost, I/we declare that if the original Registration Certificate is found, it shall be surrendered to the issuing authority for cancellation. I/We hereby declare with full knowledge and belief that I/we have not concealed any fact and that the information given above is true. I/We undertake that I/we shall be personally responsible for any incorrect or false information.

Information Regarding Accident or Other Related Information of an Inland

Mechanically Propelled Vessel

[Under Section 74(2) of the Act]

To,

The Designated Authority ……

I/We hereby submit the following information under Section 74(2) of the Act:

(i) Name of the inland mechanically propelled vessel _____

(ii) Type of inland mechanically propelled vessel

(a) Registered under the Act _____

(b) Registered in a foreign country (name of country) _____

(c) Registered under the Merchant Shipping Act, 1958 _____

(iii) Registration or official number _____

(iv) Registering Authority _____

(v) Name of Registration Office _____

(vi) Details of the occurrence/incident

(a) Date and time of occurrence _____

(b) Place of occurrence _____

(c) Nature and extent of destruction, damage, casualty, accident, explosion or loss _____

(d) Cause and circumstances of the occurrence _____

(e) Details of injured persons _____

(f) Details of deceased persons _____

(g) Details of environmental damage _____

(vii) Steps taken or proposed to be taken to minimize the effects of the occurrence_____

(viii) Details of obstruction

(a) Nature of objects _____

(b) Size of objects _____

(c) Nature of danger to navigation _____

(ix) Date of informing the insurer or its representative _____

(x) Name and address of the insurer _____

(xi) Details of the person giving information

(a) Name _____

(b) Designation _____

(c) Address _____

(d) Name of company/firm/other legal entity _____

(e) Address _____

I/We hereby declare with full knowledge and belief that I/we have not concealed any fact

and that the information given above is true.

I/We undertake that I/we shall be personally responsible for any incorrect or false information.

Schedule–1

Fees for Survey of Inland Mechanically Propelled Vessels

S. No.	Objective	Amount (₹)
1	2	3
1	Fee for initial survey, annual survey, renewal survey, intermediate survey and additional survey of inland mechanically propelled vessels (as per GT)	
1(a)	Up to and including 10 GT	1500
1(b)	Above 10 GT up to 25 GT	2100
1(c)	Above 25 GT up to 50 GT	2500
1(d)	Above 50 GT up to 75 GT	3000
1(e)	Above 75 GT up to 100 GT	3500
1(f)	Above 100 GT up to 200 GT	4500
1(g)	Above 200 GT up to 400 GT	5000
1(h)	Above 400 GT up to 600 GT	6000
1(i)	Every additional 100 GT or part thereof	500
2	Issue of survey certificate (Form 5 or 6)	50% of fee in S. No. 1
3	Provisional survey certificate (Form 4 or 6)	25% of fee in S. No. 1
4	Survey on Sundays and holidays (additional fee)	10% of fee in S. No. 1
5	Survey between 5:30 PM and 9:00 AM (additional fee)	10% of fee in S. No. 1
6	Extension of survey certificate validity up to 60 days	10% of fee in S. No. 1
7	Extension of validity up to 3 months	25% of fee in S. No. 1
8	Extension of validity up to 6 months (dry-dock not available)	50% of fee in S. No. 1
9	Change of vessel name in certificate	25% of fee in S. No. 1
10	Duplicate / certified copy of survey certificate	25% of fee in S. No. 1
11	Appeal against surveyor order	25% of fee in S. No. 1
12	Examination of design plans / drawings / layouts	25% of fee in S. No. 1
13	Inspection of fire-fighting/life-saving equipment etc.	25% per inspection
14	Survey for alteration/modification in certificate	Equal to S. No. 1 fee
15	Recording alteration/modification in certificate	50% of fee in S. No. 1
16	Registration/listing of manufacturer or repairer	5000
17	Surveyor fee	₹5000 per day + TA/DA (owner borne); ₹1000 extra on holidays
18	Seized vessel custody & maintenance charges	Survey visit ₹3000; storage ₹500/day; security ₹500/shift; terminal safety ₹1000/day
19	Assessor fee	₹1000 + actual TA/DA (Level-12 officers)
20	Pollution Survey Fee	20 % ofsurvey fee for various categories of vessels at serial no 1 of this schedule-1

Schedule–2

Fees for Registration Certificate (Inland Mechanically Propelled Vessels)

S. No.	Objective	Amount (₹)
1	Fee for approval or renewal of registration certificate of inland mechanically propelled vessels (GT based)	—
1(a)	Up to and including 50 GT	1000
1(b)	Above 50 GT up to 100 GT	2000
1(c)	Above 100 GT up to 200 GT	4000
1(d)	For every additional 100 GT or part thereof	1000
2	Issue of duplicate registration certificate	50% of fee under S. No. 1
3	Issue of temporary registration certificate	25% of fee under S. No. 1
4	Application for amendment / modification in registration certificate	Equal to fee under S. No. 1
5	Transfer of registry	Equal to fee under S. No. 1
6	Transfer of vessel	Equal to fee under S. No. 1
7	Appeal against order of Registrar	25% of fee under S. No. 1
8	Registration of vessel already registered under Merchant Shipping Act, 1958	25% of fee under S. No. 1

SCHEDULE NM-1

Fees for Enrolment, Transfer and Duplicate Copy of Non-Mechanical Inland Vessel

S.No.	Description	Fee (₹)
1	Issuance of Enrolment certificate	50/-
2	Issuance of duplicate Enrolment certificate	50/-
3	Transfer of Enrolment certificate	50/-
4	Appeal against order of Enrolment/competent authority	50/-

Note: The above rates may be revised from time to time by the Uttar Pradesh Inland Waterways Authority with approval of the Board.

SCHEDULE NM-2

Offences and Penalties for Non-Mechanical Inland Vessel

S.No.	Description	Penalty (₹)
1	Operation of non-mechanical inland vessel without Enrolment	1000/-
2	Carrying passengers beyond capacity	50/- per passenger (Max 500/-)
3	Carrying goods beyond capacity	200/-
4	Absence of safety equipment	200/-
5	Operation of vessel under intoxication	500/-
6	Operation during prohibited weather	500/-
7	Tampering with name plate of vessel	200/-
8	Operation in restricted area	200/-
9	Failure to wear life jacket by passengers	50/- per passenger (Max 500/-)

Note: The above prescribed rates may be revised from time to time by the Uttar Pradesh Inland Waterways Authority, subject to approval of the Authority Board.

FORM SR-NM-1

(See Rule 8(b))

Application for Enrolment of Non-Mechanical Inland Vessel

To,

The Enrolment Authority

……..

Under Rule 8(b) of the Uttar Pradesh Non-Mechanical Inland Vessel Rules, 2026, Enrolment of non-mechanical inland vessels is mandatory for their operation. Therefore, I request that the Enrolment of the applicant's non-mechanical inland vessel be carried out after depositing the prescribed fee.

The details of the non-mechanical inland vessel are as follows:

1. Name of owner/operator

2. Full address of owner/operator

3. Mobile number

4. Email ID

5. Occupation/Business

6. Year of construction / keel laying year of the vessel

7. Design details of the vessel (if classified)

8. Overall length of the vessel

9. Maximum width of the vessel

10. Depth of the vessel at mid deck

11. Name and address of the builder, including place and year of construction (in case of new vessel)

12. Builder certificate/declaration (for new vessel)

13. Sale deed (for second-hand vessel)

14. Mortgage details

15. Ownership declaration certificate (for old vessel)

16. Fee payment proof (challan receipt)

Place:_____ **Signature of Vessel Owner**_____
