Manipur musician killed in Delhi; 7 men arrested

NEW DELHI
Chongtham Vikram Singh, a musician from Manipur living in Delhi, died on Monday of injuries suffered in an alleged assault by a group on Sunday night. Delhi Police has arrested seven men in connection with the case. » **Page 12**

CM apologises after row over Bengal govt. ad

KOLKATA
West Bengal Chief Minister Suwendu Adhikari tendered an apology after an advertisement published by the government in Monday's newspapers depicting Goddess Durga with 11 hands instead of 10 sparked a row in the State. » **Page 5**

Delhi HC calls for audit of hostels; collapse toll hits 7

Building owner arrested, along with spouse and son; five MCD officials suspended; Delhi govt. mulling policy to govern buildings used for different purposes, including PG accommodations

Shrimansi Kaushik Soibam Rocky Singh
NEW DELHI

The death toll in the collapse of a building housing students in the Satya Niketan area rose to seven on Monday, even as the Delhi High Court expressed deep concern over the safety of students living in similar paying guest (PG) accommodations across the national capital.

It directed the Municipal Corporation of Delhi (MCD) to inspect all PG hostels under its jurisdiction within a week.

The police arrested Hariram Gupta, 82, a retired Indian Air Force sergeant; his wife Urmila Gupta, 75; and their son Mahesh Gupta, 52. While the property was registered in Ms. Gupta's name, the men's PG accommodation was allegedly being run by her husband and son, the police said. A search is on for those operating it and the labour contractors that were carrying out repairs in the building's basement.

"Their role will also be examined in the case and accordingly action will be

Search on: Rescue operations under way at the site of the building collapse in New Delhi on Monday. SHASHI SHEKHAR KASHYAP

taken," said Amit Goel, Deputy Commissioner of Police, South West.

Five officials of the MCD – the civic body responsible for issuing PG licences and enforcing building norms – were suspended. Chief Minister Rekha Gupta said the government is exploring a policy to govern buildings used for sev-

eral purposes, including PG accommodations.

Over the course of the 28-hour rescue operation, at least 12 people were brought to the AIIMS Trauma Centre while three were taken to the Safdarjung hospital for treatment. At AIIMS, six persons were brought dead while one person later died of injuries. At least three are said to be in critical condition. One person is stable while another was discharged on Sunday. The patients at Safdarjung are also stable.

HC directs Assam govt. to pay ₹2L to kin of woman pushed into Bangladesh

The Hindu Bureau
GUWAHATI

The Gauhati High Court has directed the Assam government to pay ₹2 lakh as interim compensation to the husband of a Bengali-origin Muslim woman for pushing her into Bangladesh without an opportunity to challenge the order of a Foreigners Tribunal (FT).

The September 3 order was the first instance of any court imposing a cost on the State for pushing a person across the border by violating deportation rules.

A Division Bench of Justices Kalyan Rai Surana and Susmita Phukan Khaund passed the order after hearing a *habeas corpus* plea filed by Mujammel Hoque, the husband of Mumtaz Begum. It took serious exception to the way the FT in Nagaon handled Ms. Begum's case, observing that "malice in law" on the part of the tribunal appeared evident from the record.

The FT declared Ms. Begum a foreigner on May 30, when she appeared before it after an earlier HC direction to reconsider her case.

'Violation of procedure'
The court held that the procedure followed amounted to a "direct violation" of the standard operating procedure governing the expulsion of declared foreign nationals. Observing that the State prevented Ms. Begum from exercising her right to approach the HC against the FT's order, the Bench ordered the State to pay the petitioner (her husband).

"This palliative payment shall be in addition to and not in derogation of the petitioner's right to seek compensation before the civil court," the order read.

The court also impleaded the Ministry of External Affairs in the case and advised it to "make an endeavour to have the woman located in Bangladesh and expatriate her to India".

LPG booking interval for rural users cut to 25 days

Saptaparno Ghosh
NEW DELHI

The Union Petroleum Ministry on Monday reduced the interval between bookings of domestic liquefied petroleum gas (LPG) cylinders for rural consumers to 25 days, months after it had been increased to 45 days during the peak of the West Asia conflict.

This brings the interval between bookings for rural consumers on a par with urban consumers, for whom the period remains unchanged at 25 days.

In a letter to oil marketing companies, it cited "considerable reduction" in refill backlogs in the current supply situation among the reasons that prompted the move. LPG distributors' associations welcomed the move and said it will benefit them.

Expedite work on new hostels: V-C to principals

The Hindu Bureau
NEW DELHI

Delhi University Vice-Chancellor Yogesh Singh on Monday asked college principals to review residential facilities for students, a day after a five-storey building housing college students collapsed in Satya Niketan.

Mr. Singh asked principals to expedite work on under-construction hostels and check the feasibility of constructing new ones so that such incidents do not recur, as per a university statement.

Meanwhile, several student groups held candle-light marches and protests at Satya Niketan demanding accountability from the government and from DU for not providing enough accommodation. On Sunday, the Opposition parties had also raised the issue, saying the lack of accommodation has forced students to live in overcrowded PG accommodations.

Students at a sit-in on Monday against the building collapse. SHASHI SHEKHAR KASHYAP

The All India Students' Association and the National Students' Union of India staged demonstrations and called attention to the student housing crisis in the Capital.

The Krantikari Yuva Sangathan also voiced concern over the issue. The Akhil Bharatiya Vidyarthi Parishad has demanded the resignation of Municipal Corporation of Delhi Commissioner Sanjeev Khirwar over the tragedy.

Rising rents, ageing buildings and little room to breathe

Lavpreet Kaur
NEW DELHI

The collapse of a five-storey building housing students in Satya Niketan on Sunday has brought renewed scrutiny to the cramped living spaces and the compromises students make in the absence of affordable hostel accommodation.

In Delhi's student hubs, narrow lanes, ageing buildings pressed against each other, dangling electricity and cable wires, and rooms carved out wherever space permits have become a familiar reality.

For thousands of outstation students arriving in the Capital each year, these converted houses and tightly packed buildings are often the only affordable options, with a bed in a shared room costing anywhere from ₹12,000 to over ₹24,000 a month.

Near Delhi University's (DU) South Campus, Satya Niketan is a maze of small shops, property dealers,

Cramped setting: (Left) A multi-storey PG in a densely-packed neighbourhood of Malka Ganj near North Campus; many PGs in Jawahar Nagar are located in narrow, dimly-lit alleys. SUSHIL KUMAR VERMA

old buildings and newer constructions connected by uneven roads.

Unnayan, who moved to Delhi last month, lives about 100 metres from the collapsed building. He paid ₹14,000 this month for a bed on the fifth floor, where he no longer wants to live. "I chose the fifth floor and have to go up and down the stairs because the lower floors were more expensive. A bed on the second floor cost ₹17,000, and the first floor was even

more expensive," he said.

'Too afraid to stay'

With suitcases rolling behind them and bags slung over their shoulders, students streamed out of the congested lanes of Satya Niketan late into Sunday night. The collapse left many too frightened to spend another night in the neighbourhood they had called home.

For Anushriti, a native of Kanpur who had lived in Satya Niketan for nearly a

year, the fear was still raw. She left for a friend's home in Moti Bagh with little more than her phone.

"I have been in my nightdress for the past 24 hours with just a phone in my hand. I am stranded now... I can't go to my hometown, neither can I return to the PG," she said.

Her belongings remain on the fourth floor of her PG, but she has been too traumatised to return.

"I just need to go back there to get my things. I am

preparing myself mentally for the task," she added.

Common theme

At the other end of the city, in Jawahar Nagar near DU's North Campus, a narrow lane is choked with parked vehicles on both sides, leaving little room for pedestrians. Small shops are wedged between residential buildings while a web of electricity and cable wires hangs overhead.

Rakhi, a native of Haryana and a first-year BCom student at Daulat Ram College, pointed towards the ground-plus-five-storey building where she has been living for a month.

"I pay ₹17,000 for a bed and food, which is pathetic. Electricity is an additional cost," she said.

With no hostel available, Ms. Rakhi began looking for a paying guest (PG) accommodation when the academic session started.

"The rooms are very cramped. There is barely any ventilation. The rent is too high, but at least this is a room I can somehow sur-

vive in," she said.

A 10-minute scooter ride away, Nehru Nagar appears to narrow further with every turn. Buildings rise to five floors, their tiny entrances leading to uneven staircases and corridors punctuated by air conditioners. Riddhima (name changed), a final-year DU student, has spent four years in one such PG. "The place is not ideal to live in, with no ventilation or space even to walk, but this was the best I could find," she said.

Less than a kilometre away, Kamla Nagar is another student hub where almost every other building houses a PG. Tanya, a second-year DU student, pays ₹12,000 for a bed in a twin-sharing room, which has no window or ventilator, forcing her to keep the air conditioner running.

Space has become a premium commodity that students are paying for, even when it amounts to little more than a bed squeezed into an ageing building.

Protest against ongoing classes in building that PWD declared unsafe in 2016

Press Trust of India
FARIDABAD

Hundreds of students of Pandit Jawaharlal Nehru College in Faridabad protested outside the institution on Monday against its dilapidated structure and lack of facilities.

According to students, the college building is nearly 50 years old and was flagged as unsafe by the Public Works Department (PWD) in 2016, but classes continue to be held in it.

The college, the city's largest government institution, has around 7,000 students, yet its building is in a deplorable state, students claimed.

"Plaster frequently falls from the walls, exposing the iron reinforcement bars; students are compelled to study under the constant shadow of fear," said a protester.

Acting principal and district higher education officer Ritika Gupta said the PWD has been asked to resume construction of a six-storey building that was stalled because of COVID-19 restrictions.

CM orders sealing of buildings with unauthorised fifth floor

Gupta directs inspection of Satya Niketan's PG facilities; Sood to head a panel to explore alternative housing for students; residents moved away from collapse site as authorities fear similar incidents

The Hindu Bureau
NEW DELHI

Chief Minister Rekha Gupta on Monday directed the immediate sealing of all buildings across the city with an unauthorised fifth floor.

She also directed the inspection of all paying guest (PG) accommodations in Satya Niketan after visiting the site in the south-west Delhi locality, where a five-storey structure housing a PG facility collapsed on Sunday.

The CM, along with Urban Development Minister Ashish Sood, later attended a meeting chaired by Lieutenant-Governor Taranjit Singh Sandhu to explore alternative accommodation for students.

The L-G directed Mr. Sood to lead a committee to assess the feasibility of using unutilised and vacant buildings of the Delhi Development Authority and the Municipal Corporation of Delhi for students, as per a statement

On ground: Chief Minister Rekha Gupta with Cabinet Minister Manjinder Singh Sirsa in Satya Niketan on Monday. PTI

from Lok Niwas.

Mayor Parvesh Wahi said that the North West zone has issued directions to inspect all buildings and seal those found violating norms. He said the MCD had fixed accountability by suspending five officials of the South Zone – Deputy Commissioner Rakesh Kumar, Senior Engineer Ranvir Singh, Executive Engineer (Building) Lalit Kumar Goel, Assistant Engineer (Building) Sunil Chauhan and Junior Engineer (Build-

ing) Ashish Kumar.

Three major incidents have occurred in the MCD's South Zone since May, all involving structures found to be violating building by-laws or licensing norms – an under-construction building collapse in Saidulajab that killed six people in May, a fire at a bed-and-breakfast facility in Malviya Nagar in June that killed 23 people, and Sunday's collapse.

"This is the first time that officials ranging from

the Deputy Commissioner to the Junior Engineer have been suspended with immediate effect in connection with an incident of this nature. This demonstrates that negligence at any level will not be tolerated," said Mr. Wahi.

'Seek info on buildings'

Meanwhile, the CM urged all MPs, MLAs and councilors in the national capital to collect information on illegal constructions in their respective areas and report those to the departments concerned. She said such illegal constructions would be promptly demolished.

While the agencies continued to remove rubble from the area, people were moved away from the site as the authorities feared the collapse of nearby buildings. As per documents accessed by *The Hindu*, show-cause notices have been issued to the owners of at least three buildings in the area since April over violations of the Unified Building Bye-Laws.

Oppn. mounts attack on govt. over proliferating PG facilities

The Hindu Bureau
NEW DELHI

The Aam Aadmi Party (AAP) and the Congress held protests on Monday and hit out at the Bharatiya Janata Party (BJP) government in Delhi over the Satya Niketan collapse.

AAP staged a protest near the site of the building collapse in Satya Niketan, demanding that the BJP government release a list of people who own paying guest (PG) accommodation in the area.

The party's Delhi unit president Saurabh Bhargava asked why action was not being taken against illegal PGs and whether "influential BJP leaders had financial interests" in such facilities.

Mr. Bhargava alleged that citizens have been claiming that several senior BJP leaders own properties in the area.

"The exploitation of students through expensive PG accommodations, and the MCD's failure to act against it, is linked to the fact that influential leaders have invested heavily in properties there," he said.

Mr. Bhargava added, "The names of influential

AAP members protesting near the collapse site on Monday. ANI

BJP leaders whose money is invested here must be made public."

Mr. Bhargava also said the Centre must build hostels for students.

"Until hostels are constructed and allotted to students, the government should pay their PG fees," he said.

'Justice for victims'

Delhi Congress president Devender Yadav staged a sit-in at the collapse site, demanding justice for those injured and the families of those killed.

Mr. Yadav questioned who had permitted repairs in the basement of the 50-year-old, five-storey building without adequate safety measures after it was

flooded and alleged administrative negligence and corruption.

"The MCD Commissioner should resign, taking responsibility for the collapse. Such mishaps keep happening due to corruption in the civic body," Mr. Yadav said.

Govt. responds

Responding to the Opposition's allegations, Urban Development Minister Ashish Sood said, "We are concerned about the safety of the children and about fixing the rotten system that the 'A-team' and 'B-team' have built up within this administration over the last 27 years. The focus must be on what action needs to be taken."

A mole on chest, a scar on knee: how families identified bodies of their sons

Lavpreet Kaur
NEW DELHI

A mole on the chest helped Puspaha Jhajj identify the body of her 19-year-old son, Arpit, at the AIIMS Trauma Centre on Monday, a day after the paying guest (PG) accommodation where he stayed collapsed in south-west Delhi's Satya Niketan.

Arpit had returned to Delhi from his native Devas in Madhya Pradesh on Sunday morning after spending Raksha Bandhan with family.

"We put him on the train to Delhi on Saturday night. He called me after reaching his room around 8 a.m. He then video-called around 11-11.30 a.m. Who would have known that was the last time we would speak?" Ms. Jhajj said.

She, her husband Bhupendra, and two other family members reached AIIMS around midnight but

spent hours without clarity about Arpit's whereabouts.

"They kept telling us Arpit was not here [AIIMS] and made us wait through the night," Ms. Jhajj said. It was only around noon on Monday that they were allowed to see an unidentified body.

"His face was completely distorted; his left cheek was heavily injured. The only way I could identify him was the big mole on his chest," she said, ad-

ding, "What will I do with the body now? My son is gone. The future we imagined is gone."

PUSHPA JHAJJ
Mother of deceased Arpit

'Difficult to recognise'

For 18-year-old Akshat Singh Yadav's family, an old knee injury became the unlikely clue that helped identify him.

His uncle, Biren Kumar Yadav, said Akshat's face was so badly injured that it was very difficult to recognise him.

A childhood injury and the stitches left behind after an operation eventually confirmed his identity.

"When he was a child, he fell and injured his knee. I took him to the hospital and he underwent an operation. The stitches near his knee became an identifying mark as his face was completely unrecognisable," Mr. Biren said, tearing up.

A long wait

Akshat's family had been at the hospital since 4 a.m. and received his body around 2 p.m. "His mother had asked him not to go and stay a little longer. But he said he had to leave for classes. Now he is no more," Mr. Biren said.

Akshat had lived on the first floor of the PG for a year and had returned to Delhi only two days earlier from his home in Madhya Pradesh. His body was recovered around 3 a.m. during the search operation.

Shrimansi Kaushik
NEW DELHI

A women's PG facility in Satya Niketan, located 300 metres from the five-storey structure that collapsed the previous day, on Monday asked all occupants to vacate their rooms immediately.

'Sealing imminent'

A student said they were told that the hostel could be sealed any time and that the facility would operate only as long as supplies last.

Of the estimated 40 occupants, only 22 currently remain in the facility. The rest left for their hometowns soon after the incident, said a student.

"My parents just left after helping me with the admission and lodging. They are now worried and want to take me away. But it will take them two days to arrive by train. What will I do until then?" said Himanshi

A civil defence volunteer with books pulled out of the rubble of the five-storey structure in Satya Niketan that collapsed on Sunday. ANI

Aggarwal, who hails from Assam.

Air of uncertainty

Thousands of outstation students who paid rent and security deposits in advance at PG facilities in the south-west Delhi locality are facing uncertainty after Sunday's incident, with the

authorities announcing a sealing drive against unauthorised structures.

'University apathetic'

"The college is still open. The administration has not shown any interest in understanding our situation. How will we attend classes if we go back to our home-

towns?" added Ms. Aggarwal, a Maitreyi College student.

Prajakta, a first-year student, said, "We have not been given an exact date. The warden has only asked us to vacate rooms as soon as possible".

'Paid security, rent'

"I rented a ₹16,000 twin-occupancy room. I paid two months' rent as a security deposit and the current month's rent in advance. In all, I have already paid ₹48,000," added Ms. Prajakta.

The women's PG, which shares the name 'Hostel Daze' with the facility in the collapsed building, is also located in a five-storey structure.

There are four rooms on each floor except the ground floor, which has three. For now, students have packed their essential belongings and made arrangements to stay with friends or relatives.

The Calcutta High Court on Monday set aside an arrest warrant issued against TMC MP Mahua Moitra by a Krishnanagar court, and ordered transfer of the case against her over alleged hate speech to the special MP/MLA court at Bidhanagar here. Ms. Moitra, in a petition before the High Court, had challenged the legality of the arrest warrant issued against her by the Krishnanagar court. The High Court had on August 24 stayed the arrest warrant, which was issued by the third judicial magistrate at Krishnanagar due to Ms. Moitra's alleged non-compliance with directions to appear before it. PTI

Ultimatum issued

A BJP delegation had recently issued an ultimatum to the State government, conveyed through the Chief Secretary, demanding the withdrawal of cases registered against students, but the State government remained silent on the matter. Following this, the BJP decided on the Statewide agitation.

Meanwhile, an Archaeological Survey of India team began examining the well found during the removal of debris on Sunday, triggering a debate over its historical significance. Congress MP Imran Masood said the well was part of the mosque and was used in earlier times to meet the requirement of water for *wuzu* (ablution) before prayers.

'Huge cost of arrears'
Meanwhile, State government sources said the huge cost of 12 years' arrears and the fact that the guest teachers were recruited on the basis of village-level merit, rather than through Statewide competitive examinations, were preventing their regularisation despite the court orders.

The protesting teachers are scheduled to meet government representatives for talks on Tuesday. A larger meeting involving several groups, including the Samyukt Kisan Morcha and municipal bodies, has also been planned for September 13, Mr. Yadav said.

BJP allows Gen Z to express themselves freely: Samik

Press Trust of India
KOLKATA

West Bengal BJP president Samik Bhattacharya on Monday said his party does not believe in treating Gen Z as a separate group and allows young people the freedom to express themselves. Addressing a press conference at the BJP office here, Mr. Bhattacharya said the party did not believe in imposing its diktat on the younger generation or isolating them as a separate group.

His comments came against the backdrop of the BJP's efforts to consider Gen Z as an important constituency ahead of the civic polls.

Mr. Bhattacharya, a Rajya Sabha MP, also said people should have the freedom to decide what they want to eat and should not be subjected to restrictions based on cultural or religious considerations.

"If someone wants to relish and savour fish or mutton, say on Nabami, what is the harm?" he said.

His comments came after some Hindu outfit leaders called upon Bengali Hindus to avoid non-vegetarian food during Navratri.

CM apologises after Bengal govt. advertisement depicts Goddess Durga with 11 hands

BJP State president Samik Bhattacharya downplays issue, says extra hand only makes Durga 'stronger'; Suwendu says govt. will be careful in future; Opposition mounts attack over 'distortion'

Shrabana Chatterjee
KOLKATA

West Bengal Chief Minister Suwendu Adhikari on Monday apologised to the people of the State after the State government published an advertisement in newspapers depicting Goddess Durga with 11 hands instead of 10.

"As the CM of West Bengal, I apologise for the error. The people responsible have received a stern warning. In future, the government will be careful," Mr. Adhikari said at a Durga Puja coordination meeting on Monday evening.

The advertisement published in several West Bengal newspapers on Monday sparked a major debate on social media and in political circles.

As Opposition leaders came down heavily on the "distortion" of the deity, BJP State president Samik Bhattacharya sought to downplay the issue, saying

Women participating in a procession to demand traditional Durga Puja celebrations, in Kolkata on Sunday. PTI

that the extra hand only makes Durga "stronger".

"This only makes Maa Durga stronger," Mr. Bhattacharya said. He also added that the slip-up was a gross error by the advertising agency and said the mistake would be rectified and that it should not be politicised.

The Trinamool Congress (TMC) and Communist Party of India (Marxist) criticised the State government. The TMC official social media page said the constant mishandling of Maa Durga and Bengali culture is an insult. "A government that claims to speak for Bengal seems increasingly discon-

nected from Bengali culture, traditions, and the festivals that define Bengal's identity," the party added.

TMC MLA Madan Mitra also criticised the advertisement and said as a Bengali he could not accept the distortion.

'Resounding slap' CPI(M) leader Shatarup Ghosh also posted a picture of the advertisement on his social media and said that it is a "brilliant" ad by the State government.

"The gods had armed her with ten hands to slay the Asura (demon). The BJP government, however, has bestowed an extra hand upon the Goddess – specifically to deliver a resounding slap to anyone who might issue a decree forcing Bengalis to eat vegetarian food during the Puja," Mr. Ghosh wrote.

Netizens took to social media to criticise the advertisement and called it "dis-respect" of Bengali tradition and culture.

K. Muralitharan
CHENNAI

With the Election Commission (EC) notifying the by-election schedule for two out of the seven vacant Assembly constituencies in Tamil Nadu, the question on everyone's mind is whether the AIADMK MLAs who had resigned from Madurantakam and Dharapuram (both reserved seats) and joined the ruling TVK would get an opportunity to contest

the bypolls.

Soon after the formation of the TVK-led government, 25 rebel AIADMK MLAs voted in favour of the motion of confidence moved by Chief Minister C. Joseph Vijay.

Subsequently, six AIADMK MLAs resigned and joined the TVK. However, the losing candidates filed election pleas challenging the results in five constituencies. As per law, the EC cannot notify bypolls in these seats.

Consequently, the EC announced bypolls only to Madurantakam and Dharapuram. P. Sathyabama, who resigned as Dharapuram MLA, said she will seek a ticket for the bypoll.

"However, the party leadership will take the final call," she added.

Maragatham Kumaravel, who resigned as Madurantakam MLA, declined to comment. Former Minister R.B. Udhayakumar of the AIADMK said the party will definitely contest the polls.

Patna Municipal Corporatio
NIT No. 28/CME/PMC/2026
Tender Notice

Patna Municipal Corporation invites online bids through www.eproc2.bihar.gov.in for following works from the bidders fulfilling eligibility criteria's.

SL. No.	Name of Work	Cost of Tender (Non-Refundable) (Paid Through www.eproc2.bihar.gov.in)	EMD (Paid Through www.eproc2.bihar.gov.in)
1	Request For Proposal Through E-Procurement From Reputed Entities Request For Proposal (Rfp) For Selection Of An Event Management Agency (EMA) For Conceptualizing, Curating & Executing The Cultural Event At Patliputra Mahotsav – 2026 In Patna, Bihar.	Rs. 11,800/-	Rs 30,00,000/- (Rupees Thirty lakh only) (Refundable).

Key Dates:
Start of online bid/downloading of bid documents :05-09-2026, 11:00
Pre-bid Meeting :12-09-2026 11:00 hrs
Last date of submission of Pre-bid Query :11.09.2026 at 16:00 Hrs.
Last date of Online Bid Submission :21-09-2026, 15:00 hrs.
Technical Bid Opening date :22-09-2026 at 11:00 hrs
The preferred Company/ agency would be selected through bidding process based on evaluation of bid proposal. The bidders are expected to submit their proposal in accordance with the instruction provided in the RFP. Detailed Request for Proposal (RFP) incorporating instructions for submission of bid and other relevant information's will be available on www.eproc2.bihar.gov.in and www.pmc.bihar.gov.in from bid start date. Amendment/Corrigendum/ any information to NIT, if any would be published on website www.eproc2.bihar.gov.in only.

Notice for Inviting Tender (NIT)
(Roc.No.616/2026/UPA, Date:02.09.2026)

1. Tenders are invited from eligible bidders for engaging a Manpower Outsourcing Agency for the hiring of one State Mission Manager and 83 City Mission Managers.
2. The tender value from is Rs.2313.60 lakhs.
3. The details of tender can be obtained from web portal: <https://tntenders.gov.in>
4. The tender document can be downloaded from 10.09.2026 to 14.10.2026 through the E-tendering Website <https://tntenders.gov.in>
5. Pre-Bid meeting will be held on 23.09.2026 at 3.00 P.M at the Directorate of Municipal Administration office.
6. The last date for uploading / submission of filled up tender is up to 3.00 P.M on 14.10.2026.
7. The tenders will be opened through online at 3.30 P.M on 14.10.2026 at the Directorate of Municipal Administration office.
8. The value of tender of Earnest Money Deposit and the eligibility of bidders can be had from tender document.

CHIEF GENERAL MANAGER

Bihar Medical Services & Infrastructure BMSICL Corporation Limited, Patna
(A Govt. of Bihar Undertaking)
2nd & 3rd Floor, Swasthya Bhawan, Behind IGIMS Campus, Sheikhpura, Patna, Bihar
Phone: +91 612 2283287, Fax: - +91 612 2283289

NOTICE
Investor Consultation Workshop Notification
Operation, Maintenance and Management of Brownfield Medical Colleges and Hospitals on Public Private Partnership Mode in Bihar.

Bihar Medical Services & Infrastructure Corporation Limited, Government of Bihar proposes to explore Public Private Partnership (PPP) models for establishment, development, operation and management of Brownfield Medical Colleges and Hospitals in the State. The proposed initiative aims to leverage private sector investment, expertise and operational efficiency to strengthen medical education and healthcare infrastructure.

An Investor Consultation Workshop is proposed for the organisations who submitted their Expression of Interest in response against Request for Expression of Interest (REoi) uploaded on BMSICL site. (<http://bmsicl.gov.in>)
The workshop will seek participants' views and recommendations on suitable PPP structures, project viability, risk allocation, regulatory requirements, and the proposed implementation framework.

Workshop Details
Date: 15.09.2026 Time: 11:30 AM
Venue: Chanakya Hotel, Bir Chand Patel Marg, opposite Rabindra Bhawan, R-Block, Patna, Bihar – 800001
Eligible organisations are requested to nominate up to two representative(s) for participation in the workshop and submit their nomination in the prescribed format including name, designation, organisation name, mobile number and email address of the nominated participant(s) uploaded on BMSICL site. (<http://bmsicl.gov.in>)
Confirmation of participation may be sent by email to ppmchbmsicl@gmail.com latest by 14.09.2026 until 1:00 PM.
The consultation is non-binding in nature and is intended solely for obtaining market feedback and stakeholder input. It shall not be construed as an invitation to bid, tender notice, or commitment on the part of the Government of Bihar or any of its agencies to proceed with any specific procurement process. The Government reserves the right to modify, defer, cancel, or proceed with the proposed initiative at its discretion.
For any query, please contact -9836687770, during office hours on working days.
For further details please visit : www.state.bihar.gov.in/prdbihar

India and Belgium are building ties across sectors despite differences

In terms of size and engagement, Belgium is not one of India's most important partners. However, the visit of the Belgian Prime Minister to Delhi is part of a larger puzzle of India's ties with European countries. These have now gained salience with focus areas for India: in economic relations, defence relations and strategic ties. At the top of the agenda in talks between Prime Ministers Bart De Wever and Narendra Modi was bilateral trade opportunities once the India-European Union Free Trade Agreement (FTA) is signed – which is expected in December. India-Belgium trade is about \$13 billion, a third of which is from over a century of collaboration in the diamond industry. Antwerp is a global hub for diamond trading, while Mumbai and Surat provide the biggest cutting and polishing services. However, once the EU FTA is signed, they hope to benefit from collaboration in other areas including renewable energy and food processing; the Prime Ministers agreed to set a target of doubling bilateral trade in the next five years. Despite being surrounded by friendly European allies, Belgium has a robust high-tech defence industry – small arms, drone and counter-drone technology, ammunition and naval defence – and is keen to make inroads in the Indian market, with India seeking to diversify its procurement beyond global powers. The two sides agreed on an MoU for co-development of military hardware, and signed a letter of intent on defence cooperation. India will appoint a resident defence attaché to Brussels, complementing Belgium's move.

Statements by the two leaders, however, indicated that the visit went beyond the bilateral to a more geopolitical framing of strategic ties, both bilateral as well as between India and Europe. At a business event, Mr. De Wever said that Europe is now realising the truth of India's "warnings" on strategic autonomy from global powers and over dependence in trade and industrial production, in particular referring to China. After the talks, Mr. Modi said that democratic values, a market economy, and people-to-people ties make India and Belgium "natural partners", a theme he has promoted this past year, as he has stepped up visits to Europe and received a number of European leaders in Delhi, in the run-up to his Brussels visit later this year for the FTA. It is also significant that Mr. De Wever's visit comes in the same week that New Delhi is preparing to welcome Russian President Vladimir Putin for the BRICS summit in Delhi. The engagement with Belgium demonstrates a new maturity for both European countries and India. This shows sensitivity to their respective positions on the Russia-Ukraine conflict, indicating that ties outweigh Europe's enmity and India's deep friendship with Moscow.

Ground control

ISRO must focus on space technology as a tool for development

The irony was evident: on the day the Indian Space Research Organisation (ISRO) had its greatest success of the year – the launch of its first geosynchronous imaging satellite (EOS-05) on a temperamental GSLV – its employee organisations demanded clarity on its long-term plans. But this grievance was long in the making. Since the Indian Space Policy of April 2023, the message has been clear that ISRO would, one day in the unspecified future, stop making commercial satellites and launch rockets. Clearly inspired by NASA, it expects to focus on ambitious exploratory missions and, literally, moonshots. Why would a space agency ramping up space missions upset a section of employees? This is not the paradox it presents. The letter, co-signed by nine employee associations, and addressed to the chairman, seeks clarity on staff-strength, recruitment and the outsourcing of core functions. ISRO says that it will "not be privatised or reduced"; IN-SPaCE, set up to facilitate private participation, says the agency will "not be diminished", only that the industry's role must grow. Both are silent on the core concern – potential job losses. This brings up an underlying tension that ISRO must deal with: does its vision of India's space sector align with its founding principles, of not being enamoured of space races and being laser-focused on space technology as a tool for social development? Or is the image of power, where India is one of a handful of space-faring countries with a mushrooming of 'space startups', now the bedrock of that vision?

With a budget 16 times the Department of Space's – \$24.4 billion against ₹13,705 crore – NASA too has scaled back since the 1960s: from 0.7% of American GDP in 1966 to 0.1% now, and from 36,000 civil servants at Apollo's peak to about 14,000 today. Unlike NASA, which in its early years designed and made every nut and bolt, ISRO has always had a manufacturing relationship with the private sector (Walchandnagar, L&T). What is different is that the buzz is not about established companies building on experience but new entrants with fleeting foreign capital, most interested in satellite data as a service. No sector can hope to be static; survival can mean significant changes to how it operates. There is yet no serious reckoning with the might of China's space programme. If India's space sector in 2035 is to be known as a source of export earnings, a nucleus of value-added services that brings in jobs and absorbs skilled labour, then hard choices taken today may be worth it. But jumping onto a bandwagon of space – as fuel for the science fiction fantasy of billionaires and colonial notions of conquest, to align with some misplaced notion of an 'exclusive' club – is foolhardy. ISRO must have a transparent policy that spells this out.

BRICS has strayed quite far from where it started. To be held this weekend (September 12-13, 2026) the 18th BRICS Summit, in New Delhi, gives India a huge opportunity to bring coherence back to the expanded group and give it direction if it is to be an effective body in shaping global events.

BRICS was formed to give a greater voice to Brazil, Russia, India, China and South Africa, the emerging economies, in global governance and institutions, particularly financial and economic institutions, and to aim for a more equitable multilateral order. India was initially an enthusiastic participant, seeing the group as a vehicle for genuine reform of multilateral institutions. The first summit hosted by India (the fourth BRICS summit), in 2012, focused on the theme "Global Stability, Security and Prosperity," tacitly reflecting a much broader geopolitical canvas. The Indian presidency helped lead the establishment of the BRICS Bank, the New Development Bank. Other Indian initiatives followed, including the integration of a counter-terrorism architecture into BRICS' work.

The emergence of the China challenge

However, China had other plans. At the time, even if it was not anti-West, China saw BRICS as a counterpoise to western domination – a view that India also initially shared in the context of reform. More importantly, China needed a group such as BRICS, consisting of emerging economies, to amplify its global ambitions, given that BRICS countries accounted for nearly 20% of world GDP in 2010. Further, China wanted to use BRICS mechanisms such as BRICS-Plus and BRICS Outreach to reach out to the Global South and consolidate their profile as a second pole in a future bipolar world.

Suddenly, India not only had a reform agenda on its hands but also had to act as a counterweight to China's larger designs on BRICS. India, Brazil and South Africa soon realised that Chinese support for the reform of multilateral institutions was selective. For example, China resisted supporting the three countries' bid for permanent seats on the United Nations Security Council. Consequently, India started focusing more on BRICS consolidation and intra-BRICS matters to resist Chinese grandstanding. In fact, this year's theme for India's chairship has four pillars – Resilience, Innovation, Cooperation and Sustainability – and draws on Prime Minister Narendra Modi's vision of "Humanity First" and a "people-centric" approach to BRICS cooperation.

In addition, there was a real danger that the principle of consensus, which had kept BRICS a cohesive group, would be bypassed and that BRICS would go the way of the Shanghai Cooperation Organisation (SCO), where the majority can bulldoze their views through. India and Brazil resisted these efforts. The 2019 BRICS Summit in Brasilia was held without any other invited guest countries – just the five original members. But in 2020, under the Russian presidency, probably the first non-consensus chair's statement on COVID-19 was issued,

T.S. Tirumurti

Chair, Steering Committee, Deccan Centre for International Relations, former Permanent Representative of India to the United Nations, New York, and former Sherpa of BRICS

The Delhi summit offers India an opportunity to restore BRICS's original purpose

bypassing the sacred principle of consensus. If non-consensus documents are increasingly resorted to, as we saw at the BRICS Foreign Ministers' meeting in May 2026 in New Delhi due to the inability of the new members to agree, then BRICS will cease to be effective.

Membership expansion tests BRICS cohesion

But then, it was difficult to resist the Chinese juggernaut. China pushed for the expansion of the New Development Bank and then for the expansion of BRICS itself. India resisted, as did Brazil. But that was not to be, and BRICS now has 11 members, following the addition of Egypt, Ethiopia, Iran, Saudi Arabia, the United Arab Emirates and Indonesia, as well as 10 partner countries.

India's sagacity has now been vindicated, as the new members of BRICS have started fighting among themselves. While the original five have their differences, some of them serious, they know how to address them with maturity for the greater good of the group. The new members do not have any such compunctions and are subverting BRICS through their bilateral conflicts. BRICS should not go the way of the South Asian Association for Regional Cooperation (SAARC), with bilateral disputes paralysing the group.

In addition, the tussle over the direction BRICS should take has begun. India has tried to keep BRICS as a "non-West" group, as opposed to the increasing pressure from some members to turn BRICS into an anti-West group. An anti-West slant is becoming increasingly difficult to avoid, with China competing with the United States for global leadership, Russia at war with Ukraine with the full backing of Europe, and Iran being bombarded by the U.S. and Israel. It becomes even harder to maintain the "non-West" line when Brazil and India have been subjected to punitive tariffs by U.S. President Donald Trump, and the U.S. Congress is considering legislation that would give the President the power to levy punitive tariffs on countries importing Russian oil. The question being asked is: how can India stop BRICS from becoming anti-West at a time when the Quad (Australia, India, Japan, the U.S.) is being emasculated by the U.S., India-U.S. relations are under great pressure, Pakistan is being courted by the U.S. at India's expense, and global institutions are being made dysfunctional by the West? The more erratic the U.S. is *vis-à-vis* BRICS, the greater the chances of BRICS going in the wrong direction. Fortunately, India's effort to prevent an anti-western drift is shared by many other BRICS members, since they too have much to gain by engaging with multiple actors from different camps in their national interest. They want change, but not geopolitical realignment with China and Russia. This is the direction of BRICS's future.

But there is a much larger question. Both the U.S. and China are enunciating parallel visions of the world and playing by their own rules, rather than internationally negotiated ones. Both are, in effect, challenging existing international norms and global institutions and setting up parallel

structures and standards in emerging areas such as Artificial Intelligence, digital and Internet governance, data ownership, state control, 5G/6G and telecom, satellite navigation, and electric vehicles. Neither is looking for reform of existing institutions. China has just set up a new World AI Cooperation Organisation in Shanghai, in addition to other parallel initiatives such as the Asian Infrastructure Investment Bank, the Belt and Road Initiative and the Digital Silk Road, which challenge the Bretton Woods institutions and their governance and financing models. They see BRICS as one of the vehicles through which to pursue their broader goals. For example, the push for de-dollarisation through the establishment of a parallel BRICS currency is receiving a lukewarm response, since many members are uncomfortable with a renminbi-dominated currency and would prefer merely interlinking payment systems, central bank digital currencies and national-currency transactions. Nevertheless, after the success of its pilot project, China is formally launching its ambitious mBridge, an alternative financial payment system. The last thing India wants is an alternative Bretton Woods system dominated by China.s

India can course correct BRICS

The 2026 Summit in Delhi provides an opportunity for course correction, and India has worked hard to persuade the new members to overcome their political differences. In a world in flux, India has to revive the original *raison d'être* of BRICS and shape the expanded grouping into a vehicle for reform and stability, while stopping others from hijacking it.

At the 2018 BRICS Summit in South Africa, Mr. Modi first articulated his vision of "reformed multilateralism" at the leaders' retreat. By 2019, this vision had found its way into the BRICS Summit document in Brasilia, with India, Brazil and South Africa pushing for it. The time has come to revive this agenda and make BRICS a strong voice for the "non-West" middle powers – and, by extension, for the Global South.

In Davos, the Canadian Prime Minister spoke about broadly West-centric middle powers coming together. A Global South middle power is very different. And if there is a credible organisation of Global South middle powers, it is BRICS. It has its problems. To begin with, China is hardly a middle power and has disproportionate influence within BRICS. India and China need to find greater synergy on emerging global issues, even as their bilateral differences are being contained. Further, some middle powers that ought to be there are not represented in BRICS. However imperfect its composition may be, it is clear that BRICS has great geopolitical and geo-economic potential.

At a time when the profile of BRICS is only increasing, with many countries wanting to join it, India should proactively embrace the BRICS reform agenda to serve its larger interest of multi-alignment. If India does not, others will take BRICS in a different direction.

U.S. tariffs are not what is holding back Indian research

Tariff wars with the United States have ebbed and flowed for years. After months of escalation, Washington and New Delhi stepped back a few months ago. The penalty tied to India's purchases of Russian oil went, the reciprocal tariff was cut, and medicines and most electronics stayed exempt. Exporters treated it as relief. But an old worry in policy circles is worth testing: that high American tariffs will choke research in the industries that they touch, and set back India's move into higher-value production.

The reality

That worry rests on a mistaken assumption that the sectors exposed to American tariffs are the sectors where India does its research.

Consider the impact of the 2019 loss of duty-free access and the 2025 tariff hit on sectors such as organic chemicals, plastics, base metals, machinery, auto components, and leather. Now consider how much these industries do in research. Indian metals firms spend about 0.4% of sales on R&D, compared with a global average of nearly 1.6%. Auto and parts makers spend a little over 2%, versus a global average of 5%, while electrical equipment firms spend less than 2%, against the same 5% global benchmark. These industries were research-thin long before any tariff arrived. The sectors most exposed to trade shocks and the sectors that invest in research barely overlap. India's research effort is concentrated in pharmaceuticals and automobiles, and almost everything else does little. A tariff on chemicals or steel cannot cut research spending that was never there.

This also takes the air out of the claim that tariffs are holding back Indian innovation. Patenting and research spending in the exposed sectors show no clear break during the tariff years that can be attributed to the duties. These sectors had been on a low-research path well

Arindam Goswami

Research Analyst at the Takshashila Institution, Bengaluru

The sectors most exposed to trade shocks barely overlap with those that invest in research

before 2018 and stayed on it. The tariffs are a symptom of a trading relationship under strain.

Research is a fixed and risky investment that pays off only when a product sells at scale. A firm facing a smaller export market can retreat to cheaper, undifferentiated goods, or invest in products that a tariff cannot easily replace. Indian industry has chosen the first path for decades, and a tariff does not change that habit.

Where tariffs do matter is narrow. Of the two sectors that account for most of India's research, pharmaceuticals secured an exemption in the February deal, while automobiles did not. The 25% U.S. duty on auto parts remains, and metal tariffs raise input costs for downstream engineering and component firms. So, the live risk to India's research base runs through autos – not the broad manufacturing economy that fills the headlines.

The real problem

The problem to worry about predates this trade fight and will outlast it. India spends a very small percentage of its output on research, a figure that remains well below that of the countries it wants to compete with. The private industry share is also well below the global leaders. What industry does spend tends to go toward routine development and testing rather than research that creates new products. By one comparison, Nvidia alone spends nearly as much on research as all of Indian industry combined.

This is the backdrop for the government's ₹1 lakh crore Research, Development and Innovation scheme, launched late last year. It offers long-tenure, low-cost capital to firms in sunrise and strategic areas such as artificial intelligence, semiconductors, quantum technology and biotechnology. The ambition is overdue. But the money is pointed at the frontier, while the industries most exposed to trade shocks

and most in need of moving up the value chain are older sectors that the scheme is not designed for. A chemicals or auto-parts maker that has never run a research programme will not start now because of a loan aimed at deep tech.

That is the opportunity the tariff episode offers. A trade shock tells an exposed industry that its products are vulnerable. The useful response is to move those firms into differentiated products that a tariff cannot easily undercut, which means investing in research. Incentives can be weighted towards core research rather than routine testing and aimed at exposed sectors instead of being spread thin. The higher costs that metal tariffs cause on downstream engineering firms can be offset for those that keep up research spending. Pharmaceuticals and autos also deserve protection in any further negotiations, because tariffs in these sectors can affect innovation. Sheltering an exposed industry without asking anything in return preserves low-value production. Support should be tied to research effort, so that relief rebuilds capability rather than freezing the status quo.

Time to measure research better

None of this works without better measurement. India's official research figures arrive years late and undercount private spending. A country that cannot see where its research is going cannot steer it. A faster, firm-level record linking research spending to exports would let policymakers act before the damage shows.

The tariff truce gives India time. The tariffs were never the main thing holding back Indian research. The task is to fix what is: an economy whose exposed industries do too little research, while its research strength is in a few sectors that could be vulnerable to the next trade shock.

The views expressed are personal

LETTERS TO THE EDITOR

A dam, the concerns

China's proposed colossal dam on the Yarlung Tsangpo has precipitated profound geopolitical and ecological apprehensions. The region's pronounced seismicity renders such an enormous hydraulic structure particularly

disquieting. The absence of an enforceable transboundary water-sharing mechanism further exacerbates India's predicament. China must institutionalise hydrological transparency. **Nagarajamani M.V.,** Hyderabad

Assembly proceedings

Of late, the Tamil Nadu Assembly appears to have become more of a shooting spot than a place for serious debate. Members shout at the top of their voices, while 'cheerleaders' from the respective political parties

enthusiastically thump the tables — often without even understanding what is actually being discussed. There was much hype surrounding the Chief Minister's response to the points raised by the Leader of the Opposition. But in the end, it turned out to be

nothing more than a damp squib. Allegations were made without producing evidence, while the much-talked-about 'files' are still waiting to be opened. Only a handful of members appear to be focusing on people's welfare and the real issues affecting

them. Meanwhile, the larger concern remains the deterioration of law and order in Tamil Nadu.

Teen agency beyond Meta’s reckoning

Meryl is 13. She describes YouTube Shorts as “so addicting”; holding her attention “just long enough” that she loses track of everything else. She is one of dozens of teens who have participated in the research at the Teens, Family, and Technology Lab at Rutgers University. While the 13-year-old’s language is not unusual, teen voices are still largely missing from broader debates about social media use.

Meta’s \$17.1 billion settlement with U.S. States is making headlines as a reckoning over addictive platform design. However, not much has been said about how teen agency emerges in a media environment built to predict the most tempting feed. Debates about youth and technology have historically focused on media effects: either what teens do with media, or what media does to teens. Nearly 100 years ago, the Payne Fund Studies marked the first systematic exploration of this dynamic, examining the impact of movies on children. With every new wave of technology, the storyline persists. Youth audiences are typically spoken for – cast as passive, trapped or targeted by new tech.

This framing misses the point. It ignores how the experience of adolescence itself shapes media use, and why certain types of media design captivate teens. Teens’ media use resonates with a powerful framework from developmental psychology: a race car that can go very fast, but whose brakes are still being built. That speed creates both opportunities and risks. Teens are primed to learn

Nikhila Natarajan

Co-founder of the Teens, Family, and Technology Lab at Rutgers University

more rapidly than at any other stage of development. Yet that power makes teens more vulnerable to negative stimuli. This heightened sensitivity exists alongside a crucial asymmetry: their ability to plan and prioritise (what to do first, what next) develops gradually, even as teens exhibit heightened sensitivity to “rewards” (easily persuaded by things that are pleasing). In today’s media, these rewards arrive via personalised recommendations. When short-form video loops shrink the gap between media experiences to 15 or 30 seconds, the onus of decision-making becomes the young person’s problem at a time when the braking system is still getting built.

Whistleblowers, Silicon Valley defectors, and documentaries such as *The Social Dilemma* have laid bare how platform design choices erode human agency. What remains absent from public commentary is what teens’ vocabularies reveal about their developmental needs. Across the 13-to-16 age group, teens say that short-form videos are shrinking their attention spans. But their reflections point to a persistent entry point: boredom.

Boredom, peer dynamics
Boredom is a developmental driver. As adolescents shift their orientation toward peers and crave greater independence, they continue to live under adult restrictions. They then open an app seeking a quick distraction, only to find themselves stuck for hours on platforms such as YouTube Shorts or TikTok.

Peer dynamics drive how teens move across different apps, with platform design acting as an amplifier. On platforms such as Instagram and Snapchat, where popularity is quantified

through public likes and follower counts, every interaction gets a scoreboard. For an adolescent hyper-sensitive to social inclusion and exclusion, this design is incredibly stressful. Early evidence from Australia’s social media ban bears this out. Two systematic surveys by Bursztyń and colleagues found that Australian teens report needing roughly 70% of their peers to quit social media before they’re willing to quit themselves.

Research at the Teens, Family, and Technology Lab shows that adolescents navigate an average of 7 to 12 different platforms daily. Instagram and Facebook exist within a competitive teen media inventory alongside Snapchat, YouTube, Pinterest, Discord, Spotify, and more. Here, teens’ recalibration of media practices, and parents’ concerns for their children’s wellbeing act as powerful competitive forces.

While Meta and other platforms chase topline revenues, some teens are crafting micro-frictions to push back. Pinterest is a big hit with girls who want to escape performative sociality; music streaming competes with short-form video apps; and some teens are deleting apps intermittently. These are behavioural signatures of adolescent metacognition – literally, thinking about thinking. Yet AI-fuelled media design continues to operate at the limits of adolescent development, exacerbating tensions between the intentional and accidental. Understanding the contradictions of adolescent development invites us to reconsider teen media use in a new light – as a striving for agency.

The incongruity of caste and science

All humans must be treated equally. That is a moral and constitutional position. It is not a scientific position because science does not carry moral or constitutional authority.

The normative system laid out in the ‘Manusmriti’ expresses the ‘principle’ that the birth of a person says something essential about who that person is supposed to be, with persons born into specific social categories to be assigned a place in the division of labour and a set of permitted relationships and social rights. Modern constitutional thinking is radically different. Per the Magna Carta, the English Bill of Rights and the constitutional democracies of today, individuals possess rights that depend on more than their place in a social hierarchy. After all, the fundamental rights of the Indian Constitution are attached to persons and citizens, not to inherited social functions.

Yet a poster that turned up at IIT-Mandi on September 4 said the role of “Brahmanas” is to “spread god’s message”, that of “kshatriyas” to “protect society and spirituality”, of “vaishyas” to “drive economy, support others”, and of “shudras” to “serve higher classes”.

Science, which underlies the technologies the IITs are primarily concerned with, offers another conception paralleling the constitutional view, rooted in a different kind of authority.

The authority of science
While some defenders of the caste system have claimed that it is based on inherited biological differences, the system is really the cause of the differences, rather than their inheritor. The human

Vasudevan Mukunth

organism develops as its genes interact with its environment, and caste-based discrimination affects these environments. Studies on the social determinants of health have revealed caste-related inequities in healthcare and access to healthcare while social epigenetics has found that social circumstances can induce biological changes via mechanisms that affect the way genes are regulated.

People of Black African heritage and Indigenous peoples in Asia, say, have non-identical genomes for this reason. By applying science’s methods, we know the differences between these peoples do not excuse a caste-like system. Instead, the differences in these people’s social circumstances through history – including societies of which they were part practising a hereditary, hierarchical system at any point – affected the way they developed.

In a landmark 2009 study, geneticists reported that most present-day Indians descended from two differentiated ancient populations, which mixed extensively before endogamy took root, and present Indian groups contain mixes of these ancestries. The team also said there are substantial genetic differences between various communities today thanks to a long history of endogamy. Other studies of Indian populations have also reported strong founder effects (when a new population emerges from a small group of individuals and inherits the lack of genetic diversity) due to endogamy. The genome does not announce that these people were ordained

to marry one another but records the fact that they elected to do so for reasons beyond scientific wisdom.

The human nervous system is also very plastic: it constantly rewires itself in response to every experience in a life-long process. Not everyone is good at everything, but plasticity means the neurological system develops together with each human’s environment, interests, temperament, and individual choice, giving rise to a variety of abilities among people.

No matter how well-equipped, the practice of science could never say whether all humans are equal. That is a political and ethical proposition it cannot test or prove. However, it does say that all humans are members of one species, that their development is shaped by their experiences, and that social environments can become embodied.

Just as caste constrains the plasticity of the human brain, it also constrains the human capacity for culture. *Homo sapiens* can accumulate knowledge and pass it on so that other *H. sapiens* do not have to learn from scratch. Caste-based discrimination, however, restricts the spread of knowledge and narrows the social range over which one of the defining capacities of our species can operate – as if a student’s ability to solve a differential equation has anything to do with the status of their ancestors.

This clash of possibilities is what makes the appearance of a message reinforcing the caste system at a centre of scientific learning particularly tragic.

Nearly 8,000 people died due to collapse of structures in 5 years

While the incident in Satya Niketan in Delhi has sparked outrage, hundreds of people have been dying due to laxities in enforcing building safety norms.

DATA POINT

Pon Vasanth B.A

The collapse of a five-storey building in Satya Niketan in Delhi on September 6, in which six people have been confirmed dead as of Monday morning, has turned out to be yet another grim reminder of the laxity in cracking down on buildings violating safety norms.

While collapses like the one in Satya Niketan have caught the public’s attention, because of the high death toll and the fact that it was a PG for students, many such isolated incidents which happen across the country go largely unnoticed.

An analysis of the annual Accidental Deaths and Suicides in India (ADSI) reports showed that a total of 7,874 people were killed in building collapses across the country between 2020 and 2024. Delhi recorded 169 deaths in the same period.

The ADSI 2024 report – the latest available from the National Crime Records Bureau – stated that while such deaths showed a marginal decline in the country in 2024, the deaths in the National Capital Territory (NCT) have increased since 2020 (**Chart 1**).

The ADSI includes five sub-categories under deaths due to collapse of structures – Collapse of Dwelling House/Residential Building, Collapse of Official/Commercial Building, Collapse of Dam, Collapse of Bridge, and Others. The data discussed in this article excludes the numbers reported under the categories of ‘Collapse of Dam’ and ‘Collapse of Bridge’.

Uttar Pradesh, the most populous State in the country, recorded 223 deaths due to building collapses in 2024, the highest in the country. It was followed by the second most populous State, Maharashtra (as per Census 2011) with 220 deaths. **Chart 2** shows the 15 States and UTs that reported the

highest number of deaths due to building collapses.

Delhi reported the 12th highest number of deaths (42) in the country in 2024. Despite being geographically smaller, the densely-populated NCT has been among the top 15 States every year since 2020. Moreover, the deaths recurring every year in the capital are more worrying when seen in relation to its population. Deaths from building collapses per million population, calculated using mid-year population estimates from the ADSI reports every year, show that Delhi recorded the second- or third-highest deaths per million population in 2022, 2023, and 2024 (**Chart 3**).

Recent numbers

While the ADSI report for 2025 is yet to be released, a compilation of incidents reported in the media showed that at least 70 people have died in 20 incidents since January 2025, which means that at least three people have died every month in such incidents.

Map 1 shows the incidents reported in the media since 2024, including the one in Satya Niketan on Sunday. There have been at least 34 incidents, killing more than 90 people since 2024.

Acting in predictable haste, as most government agencies do after such incidents, the Municipal Corporation of Delhi, has said that it will seal all illegal five-storey and taller buildings “immediately”.

However, data discussed in this article indicates that the underlying systemic problem demands well-thought-out long-term strategies that keep in mind the growing need for affordable housing to end such avoidable deaths.

Note on map: The incidents and death toll were compiled from news reports. Though each incident has been verified from at least three news reports, there may be some inaccuracies in the numbers. Incident locations are geocoded to locality level, and not the precise spot of the incident.

Accountability collapse

The data for the charts were sourced from annual Accidental Deaths and Suicides in India reports. DataMeet’s Delhi municipal spatial data was used to plot the map. Incidents plotted in the map were sourced from media reports. With inputs from Gauri Singavarapu and Gandla Sneha, who are interning with The Hindu’s Data team

CHART 1: Deaths due to building collapses have increased in Delhi. Y-axis scales are different for All India and Delhi

CHART 2: The 15 States (or UTs) with the highest number of deaths due to building collapses in 2024

Despite being geographically smaller, Delhi with its highly dense population has always been among the top 15 States with the highest number of deaths in the last five years

CHART 3: Delhi recorded the second or third highest deaths per million due to building collapses since 2022

MAP 1: In at least 34 incidents of building collapses since 2024 in various parts of Delhi, over 90 people were killed

Bhutto lays claim to Kohinoor diamond

London, September 7: Pakistan has asked Britain to return the fabulous Kohinoor diamond which is the central stone in the Queen Consort’s crown and has been in British possession since 1849.

A Government spokesman said to-day the request was made in a personal letter to the Prime Minister, Mr. James Callaghan by the Pakistani Premier, Z. A. Bhutto. It was “being considered”.

The 100 carat gem now stored in the Tower of London is acknowledged as the finest diamond in the world and became part of the crown jewels of Queen Victoria after the British annexed Punjab. The 1,000-year-old diamond was last worn by the Queen Mother at the Coronation of King George VI in 1937.

A spokesman for Queen Elizabeth to-day would not comment on the monarch’s authority to accede to President Bhutto’s request.

The palace spokesman said Prime Minister Callaghan was likely to discuss the request with the Queen.

Informed sources said the Pakistani Premier wrote in his letter that the return of the stone would be a demonstration of the spirit that moved Britain to shed its imperial emburances.

The request for the coveted Kohinoor – ‘Mountain of Light’ – might become another chapter in the turbulent history of the stone.

A HUNDRED YEARS AGO SEPTEMBER 8, 1926

South Africa’s status

Capetown, September 7: General Hertzog’s speech at a meeting in the City Hall on the eve of his departure to attend the Imperial Conference dealing with the Flag Bill has foreshadowed a compromise and he declared that if the Committee on the flag should recommend the inclusion of a crown in it he was confident that the Government would approve it.

Gen. Hertzog denied that he intended at the conference to demand a written constitution and said he intended to urge that steps should be taken so that South Africa’s national status which was equal to that of Britain and other dominions be entitled to an international recognition and should be so published and declared to the world.

Can air-cooling handle the heat from a 1-GW data centre?

Air-cooling uses less water and is cheaper and well-established, but it cannot practically handle the heat load of a 1-GW data centre on its own; while liquid-cooling imposes higher costs upfront, air-cooling imposes a performance and efficiency tax

Vasudevan Mukunth

The story so far:

Following sustained local protests and pressure from civil society groups, Google has reportedly said its planned 1-GW data centre in Visakhapatnam district will use air-cooling technology to cool its servers. While air-cooling requires less water, it comes with its own trade-offs.

Why does a large data centre generate heat?

A large data centre will have several million processors, each with billions of transistors. Each transistor manipulates the electrical current flowing through it to perform operations on data. As it does, the resistance the transistor's material poses to the flow of current will release some heat, as will the charging and discharging of transistors. Across trillions of transistors, the amount of heat thus generated can be considerable.

A 1-GW data centre will in principle produce 1 GW of heat. The planned Google 'hyperscaler' near Visakhapatnam and the newly announced Tata Consultancy Services (TCS) 'HyperVault' will each be 1-GW facilities. How much of that power is for the data centre alone is unclear. Assuming it is 1 GW: each facility will effectively have to remove 1 GW of heat out of and into the environment. In the very first step, the heat from each chip is moved from the silicon die holding it to a designated heat sink, such as a cooling plate. But what happens from the heat sink depends on which cooling technology the facility uses.

How does a data centre move heat?

Since the heat comes from transistors, it helps to understand the architecture first. Billions of transistors make a processor. One or more processors make up a server. Multiple servers fill a rack. Multiple racks are combined into clusters. Multiple clusters make up one data centre.

There are several cooling options depending on economic feasibility, scale of operations, and local conditions.

In air-cooling, fans push cool air through or around the server racks, and the hot air at the end is collected and cooled. Some common configurations include computer-room ACs (CRACs), which use ACs with refrigerants; computer-room air-handlers (CRAHs), which use chilled water to cool the air; hot-aisle/cold-aisle containment, where hot and cool air are kept physically separate; and free-cooling, where heat from servers is simply expelled into naturally cooler outside air. A related version is the rear-door heat exchanger: air leaving the servers passes through a heat-exchanger attached to the back of each rack, where chilled water absorbs the heat, and the cooler air is reflowed to the servers.

Another popular option is direct liquid cooling, where a specific liquid is brought in contact with the components generating heat. In one version called cold-plate cooling, a metal plate embedded with channels to carry the liquid is placed directly against a processor. The liquid draws the heat via the plate and flows from there via tubes to a heat-exchanger, where it loses the heat, before returning. Liquid-cooling is usually more effective than air-cooling because water-based liquids typically have higher

Close encounters: An Amazon Web Services data centre adjacent to single-family homes in Stone Ridge, Virginia, U.S. AFP

heat capacity than air, for the same volume. The heat capacity of a substance is the amount of heat it has to be given to raise its temperature by, say, 1° C. So the higher its heat capacity, the more heat it can absorb before itself warming up.

That said, the server can still air-cool those components that do not merit liquid-cooling. Third is an option called immersion cooling, where the electronics themselves are immersed in a non-conductive liquid. In single-phase immersion, the liquid draws heat, which is pumped away through a heat-exchanger. In two-phase immersion, the liquid boils as it draws heat; the heat is drawn away, e.g., by a fan, and the vapour condenses back. The latter is useful because heat transfer is more efficient at higher temperatures.

Because the heat-sink of a liquid is in contact with the electronics, the heat is moved more efficiently, and so immersion cooling can handle very high power densities. However, it requires specialised hardware and maintaining the coolant through complex processes.

Fourth is evaporative cooling: the heat is removed from the servers, e.g., using air-cooling, then transferred to water, which is then allowed to evaporate in cooling towers or evaporative condensers. If the local air isn't very humid, evaporative cooling can be highly energy-efficient. However, it requires large quantities of water.

Another similar option is dry-cooling, where a heat-exchanger is simply exposed to the ambient air and fitted with large fins to encourage the heat to leave. While this avoids the water demand of evaporative cooling, it also incurs larger heat-exchange surfaces, especially in places with warm weather.

Then there are chilled-water systems that use a central chilled water plant; geothermal heat rejection, an experimental technology where the heat is pumped into heat-exchangers underground; natural water cooling, where a large, natural water body like a nearby lake is used as the heat sink; and

heat reuse, where the heat is moved to serve applications like industrial processes or desalination.

All of them come with trade-offs. E.g. the geothermal option is hard to scale up while reusing heat is hard without heat pumps because the heat usually needs to be at a higher temperature to be useful.

Is air-cooling good?

Generally, air-cooling imposes lower infrastructure costs up front than a liquid-cooling setup. Current construction benchmarks suggest liquid-cooled facilities will incur a 7-10% premium on the total project cost due to the demand for complex piping and leak detection systems and special coolant distribution units.

Air-cooling is also a proven technology by now and comes with a deep and mature pool of technicians and maintenance protocols. In fact, irrespective of the cooling technology used in a cluster's heat hotspots, engineers often prefer to air-cool racks producing 20 kW or less of heat. It is an added bonus if the ambient conditions are naturally cool or arid, in which case air-side economisers that pull in outside air for cooling purposes can reduce the energy diverted to mechanical cooling by 70%. But all this said, as of 2026, using air-cooling alone to cool a 1-GW data centre is considered impractical, both physically and economically. While liquid-cooling imposes higher costs upfront, air-cooling levies a performance and efficiency tax, so to speak, that can increase the total cost of ownership for an air-cooled 1-GW facility within a few years of operation.

The most important reason is the 'thermal wall': air-cooling can remove at best around 40 kW per rack. However, modern artificial intelligence (AI) chips like the Nvidia Blackwell generate 700-1,000 W per GPU, so a rack could emit around 120-150 kW. At this scale, air-cooling the racks will require them to be installed inside a wind tunnel, with the power consumption skyrocketing.

Air-cooling will also demand acoustic control as the number of fans and chillers required will create large amounts of noise.

In fact, air-cooling chillers and air-handling units can produce up to 100 dB, and if the resulting low-frequency hum is not quickly dampened, it can travel several kilometres if atmospheric conditions are also favourable, disturbing the sleep of people in the way. For this mix of pros and cons, many 1-GW data centres today use hybrid cooling: air-cooling for low-density servers and other areas, rear-door heat-exchangers to push air-cooling to remove up to 50 kW, and direct-to-chip (DTC) liquid-cooling for high-density AI clusters, including the Nvidia Blackwell.

What have Google and TCS committed to?

After concerns were raised about the water demands of the Google hyperscaler data centre, Visakhapatnam MP M. Sriharat said, "Google has confirmed it will use air-cooling technology... there is no question of impact to water supply."

The tech giant has also said it will replenish 120% of water consumed for non-cooling needs across its operations by 2030, quantified under the Volumetric Water Benefit Accounting standard. *Hindustan Times* also quoted Alexander Smith, principal of Global Infrastructure and Energy, Asia Pacific, Google, as saying "Google is also planning integrated watershed-management measures, including rainwater catchment systems on data-centre buildings, groundwater recharge infrastructure, water pumps, and water ATMs".

Likewise, *Mint* quoted HyperVault CEO Deepesh Kiran Nanda saying, "We are building infrastructure for where AI is going: higher density, liquid cooling, larger power blocks, and faster deployment". Per news agency ANI, the HyperVault will also feature DTC cooling as well as use renewable energy.

THE DAILY QUIZ

Following the 'Correct the Map' resolution adopted by the UN last week, a quiz on maps and geography

V.V. Ramanan

QUESTION 1

Which African country sponsored the resolution for the 'Equal Earth projection', and which was the lone nation to vote against the resolution, as against 164 supporting the same?

QUESTION 2

What is the scientific study of maps called and which entity is the principal agency in India responsible for all national map publications?

QUESTION 3

What is the name given to the network of latitude and longitude lines drawn on a map or globe?

QUESTION 4

The Prime Meridian passes through five African countries. Two of them are Togo and Ghana. Name the other three.

QUESTION 5

What remote point in the South Pacific, formally called the oceanic pole of inaccessibility, is farther from land than any other location in the world's oceans?

QUESTION 6

Map-makers sometimes use 'trap streets' (or 'fake towns') while designing maps. What are they?

QUESTION 7

Why is the term 'atlas' used for a book containing maps?

Visual question:

What is the term used for this projection of the world, where it is deliberately broken into lobes, giving it an appearance sometimes compared to an orange peel? WIKIMEDIA COMMONS

Questions and Answers to the previous day's daily quiz: 1. Childhood - Public speaker - Pune ashram - Arrival in the United States - 1984 bioterror attack. **Ans: Osho (Rajneesh)** 2. Early life - Mathematics career - Life in Montana - Mail bombings - Manifesto. **Ans: Ted Kaczynski, aka the Unabomber**

3. Early life - Founding a blood-testing startup - Self-made female billionaire - Downfall - Fraud charges. **Ans: Elizabeth Holmes, founder of Theranos** 4. Early life - Career - Photography hobby - Later years - Death - Discovery and recognition - Legacy. **Ans: Vivian Maier, American street photographer** 5. Early religious and political influences -

Founding a new religious organisation - Relocation to South American country - Mass murder-suicide. **Ans: Jim Jones**

6. Early life - Led her own gang - Massacre - Surrender - Political career - Assassination. **Ans: Phoolan Devi** Visual: Identify the African leader and fill in the blank. Early life - Rise in Army - Seizure of power - Expulsion of _____ - War with Tanzania - Exile - Death - Erratic behaviour, self-bestowed titles and media portrayal. **Ans: Idi Amin; Ugandan Asians** **Early Birds:** Sekar S. | A.C. Vineeth Kumar | Piyali Tuli | Aryan Wari | Siddhartha Viswanathan

Know your English

S. Upendran

What is the meaning of "fly by night" operators? (M.K.B. Nambiar, Mahe)

Every month we read in the papers that the manager of some chit fund company has disappeared with the hard-earned money of his clients.

Such people can be called fly by night operators. They set up a company, do roaring business for about six months and then they suddenly disappear. They are there one day and then perform the disappearing act overnight.

The word "fly" in the expression means to "flee", that is, to run away. Since the shady characters who run such businesses leave town during the dead of night when everyone else is sound asleep, they are called "fly by night operators". All this build-up should have given you a fairly good idea as to what the expression means.

It means "undependable, dishonest". The expression can be used with people as well as with organisations.

There are many fly by night characters staying in that hotel.

Did you know that you could refer to a person as "fly"? When you say that someone is "fly", it means he/she is very knowledgeable about something. This use of the word "fly" is considered slang. So do not use it in formal contexts.

Amrit is fly, there's no doubt about it. The word also means "stylish, nice-looking".

Some of the girls think that the present Vice Chancellor is really fly.

What is the collective noun for tigers? (G. V. Chalapathi Rao, Nellore)

Tigers are solitary animals; therefore, there is no specific collective noun to refer to them. Here are some interesting ones, however: pride of lions, school of fish, pod of whales, gaggle of geese, and rag of colts.

How is the word "pandemonium" pronounced? (M. Venkatesan, Srivaikuntam)

This is a word that many people in our country have begun to associate with Parliament sessions. The first syllable is pronounced like the word "pan", while the "e" in the second syllable and the "u" in the final syllable are pronounced like the "a" in "China". The "mon" rhymes with "bone", "phone", and "cone". The "i" in the fourth syllable is like the "i" in "it", "bit", and "fit". The main stress is on the third syllable, "mon". Any idea what the word means? When there is pandemonium, there is usually a lot of shouting and screaming because people are angry or frightened about something.

What is the difference between "leave" and "holiday"? (P. Maheswari, Venkatagiri)

A "leave" is something that you take on your own; it is something that you apply for and when it is granted, you are allowed to be away from work for some time.

The word "holiday" comes from "holy day"; originally, it was a day of rest from work for everyone. Nowadays, there's nothing holy about a holiday. If you say that tomorrow is a holiday, what you are saying is that everyone, not just you, is getting the day off. Unlike "leave" one needn't apply for "holiday". *Published in The Hindu on November 20, 2001*

Word of the day

Alacrity:

liveliness and eagerness

EC announces byelections to six seats on October 6

Two Assembly constituencies in T.N., two in Bengal, one in Puducherry, and a Lok Sabha seat in Assam are going to the polls; focus on Rejinagar and high-profile Nandigram, vacated by Suvendu

Sreeparna Chakrabarty
NEW DELHI

The Election Commission on Monday announced that byelections in five Assembly constituencies in West Bengal, Tamil Nadu, and Puducherry, and one Lok Sabha constituency in Assam would be held on October 6.

The nomination process will remain open until September 16, and counting will be held on October 9. The election process would be completed by October 11.

The byelections were necessitated following the resignations of elected legislators across the three States and the Union Territory for various reasons.

In Tamil Nadu, vacancies arose in Madurantakam (SC) and Dharapuram (SC) following the resignations of Maragatham Kumaravel and P. Sathyabama, respectively. Ms. Kumara-

A file photo shows people waiting to exercise their franchise in the Tamil Nadu Assembly polls in Chennai in April. B. JOTHI RAMALINGAM

vel and Ms. Sathyabama both had been elected on AIADMK ticket in the 2026 Assembly polls and resigned to join Chief Minister C. Joseph Vijay's Tamilaga Vettri Kazhagam.

In Puducherry, the Thattanchavady constituency opened up after the resignation of N. Rangasamy. The Chief Minister had won from both Thattanchavady and Mangalam seats and decided to give up the former.

In West Bengal, Rejinagar and the high-profile Nandigram are up for election following the resignations of Humayun Kabir and Chief Minister Suvendu Adhikari, respectively. Mr. Adhikari decided to retain the Bhabanipur seat, where he had defeated then incumbent Chief Minister Mamata Banerjee.

Offered to Mamata
Mr. Kabir, a former Trinamool Congress leader who

floated the AJUP after his expulsion from the party, won from both Nowda and Rejinagar and decided to retain the former. He has offered the Rejinagar seat to Ms. Banerjee to contest. It remains to be seen whether Ms. Banerjee will choose either Nandigram or Rejinagar to make a return to the Assembly.

In Assam, the Nagaon Lok Sabha constituency is going to the polls following the resignation of Pradyut Bordoloi. He had won on Congress ticket in 2024. He subsequently joined the BJP and won from Dispur in the Assembly polls.

Two other Lok Sabha seats—Shillong in Meghalaya and Basirhat in West Bengal – remain vacant, and polls have not been scheduled there yet.

The Model Code of Conduct will come into effect immediately in the districts encompassing the poll-bound constituencies, the EC said in a statement.

Rahul seeks accountability for Delhi building collapse

The Hindu Bureau
NEW DELHI

Accusing the BJP government of evading accountability for the Satya Niketan building collapse in Delhi, Leader of the Opposition in the Lok Sabha Rahul Gandhi on Monday targeted Prime Minister Narendra Modi, saying Mr. Modi puts labels such as “dimagi Naxal” (intellectual Naxal) and “naraaz phooph” (angry uncle) on anyone who asks questions.

“There is no accountability,” Mr. Gandhi said in a post on X, asking what explained the “helplessness” of a “triple engine” government in Delhi.

The lack of action stemmed from a “lack of intent”, Mr. Gandhi alleged, adding that the government followed a “shameful pattern” of taking no preventive action before accidents, followed by grandstanding and attempts to fix responsibility on lower-level officials after tragedies.

“The collapse of the building packed with students at Satya Niketan is no

Rahul Gandhi

isolated tragedy,” he said, referring to six deaths in a building collapse in Saidulajab and 22 deaths in a fire in Hauz Rani in the last four months. Those demanding accountability were instead being “shamed, defamed and silenced”.

‘Four-engine govt.’

At a press conference, Congress leader Kanhaiya Kumar, accompanied by National Students’ Union of India (NSUI) president Vinod Jhakhar, stepped up the attack, calling the BJP’s “four-engine government” in Delhi a “killing machine”.

Mr. Kumar pointed out that apart from the Union

and Delhi governments, the Municipal Corporation of Delhi was also controlled by the BJP and the Lieutenant-Governor with executive powers was appointed by the Centre. He also questioned the Prime Minister’s absence from the site, pointing out that Mr. Modi had addressed students at Delhi University’s Shri Ram College of Commerce on Saturday. “Narendra Modi went to SRCC for his PR, so why didn’t he go to Satya Niketan?” Mr. Kumar asked.

The Congress demanded inspection of all paying guest accommodations, construction of hostels within Delhi University, a rent control law for hostels and paying guest accommodations, and compensation of at least ₹1 crore to each bereaved family.

Party leader Abhishek Dutt alleged that the scrapping of Section 466(A) of the Delhi Municipal Corporation Act through the Jan Vishwas Act had weakened criminal action against builders undertaking illegal or dangerous construction.

Inflation puts festive cheer under strain, says Congress

The Hindu Bureau
NEW DELHI

The Congress on Monday said rising prices of essential commodities had put a strain on household budgets ahead of the festive season, and accused the Union government of resorting to “statistical jugglery” instead of containing inflation.

Congress general secretary (communications) Jairam Ramesh said inflation’s “high-voltage shock” was weighing on the joys of festivals, with prices of several food items rising sharply. “Wholesale prices of onions have doubled in just three weeks. Sugar has risen by 25%,” Mr. Ramesh said in a post on X. Prices of arhar, urad, mustard and refined oil had also increased, while almonds, cashews, pistachios, raisins and walnuts had become costlier ahead of Deepavali, he said.

“Statistical jugglery cannot hide the impact of inflation. The public is watching everything,” he said.

13 lakh voters deleted from Delhi’s electoral rolls in pre-SIR phase

Suruchi Kumari
Aroon Deep
NEW DELHI

Pooja Devi, 38, has been living at the same address in Kalkaji for the past two decades, employed in domestic work. When the special intensive revision of electoral rolls began in the national capital in June, however, she did not get any enumeration form. Once the draft roll was published, she hoped to find her name in the list of those removed because they were absent, shifted, dead, or with duplicate names, but her name was missing there too.

“My husband and children received their forms but I did not. I had also voted in the 2025 polls with them. My name is nowhere,” she said, flummoxed by the booth-level officer’s claim that no form was generated in her name.

Ms. Devi seems to be among the 13.39 lakh voters whose names were deleted from the electoral roll in Delhi this year, even before the SIR process started in June, according to *The Hindu’s* analysis of data available on the website of Delhi’s Chief Electoral Officer (CEO).

At the time of Assembly elections in February 2025, Delhi’s electorate stood at 1.56 crore. By June 16 this

year, when the electoral roll was frozen before the SIR started, this had dropped to 1.45 crore, a decrease of 11.01 lakh names.

After the SIR started, a further 47.56 lakh names have been deleted in the draft roll published on August 31, meaning that so far, 37.6% or well over a third of the voters in the roll during the 2025 Assembly polls are no longer part of Delhi’s electorate.

Delhi CEO Ashok Kumar and his office did not respond to *The Hindu’s* queries, including whether notices were served on those whose names were deleted during the pre-SIR mapping exercise.

According to the Election Commission’s rules, continuous updation of the electoral roll happens through individual applications for new enrolments or objections, with BLO field verification required in cases of unregistered deaths and shifting of voters, only after receiving Form-7. In all such cases, a notice must be issued. The Electoral Registration Officer can also take up deletions, corrections, or shifting of names *suo motu*, based on the BLO’s field report. There is no draft roll or claims and objections period for such routine updating exercises, unlike for special revisions.

Rahul Gandhi interviews candidates for AICC posts

The Hindu Bureau
NEW DELHI

Congress leader Rahul Gandhi on Monday interviewed several party workers as the party’s high command looks to appoint new All India Congress Committee (AICC) secretaries.

Though the exact number of candidates is not known, sources said that 30 to 40 people were interviewed in separate batches.

The move is part of the high command’s attempt to bring in new faces and give representation to Scheduled Castes, Scheduled Tribes and Other Backward Classes.

AICC secretaries are attached to general secretaries handling different States and departments.

India’s carbon credit scheme receives U.K. recognition: official

Press Trust of India
NEW DELHI

In a major breakthrough, the U.K. has recognised India’s Carbon Credit Trading Scheme (CCTS) as a qualifying criterion for pricing relief under its carbon border adjustment mechanism (CBAM), a move that would reduce the tax burden on domestic exporters, an official said on Monday.

In a communication addressed to the Bureau of Energy Efficiency, Ministry of Power, the U.K.’s His Majesty’s Treasury confirmed that the CCTS has been included in the U.K.’s published indicative list of overseas carbon pricing schemes assessed as qualifying criteria under a provision of the Carbon Bor-

The recognition is expected to reduce tax burden on Indian exporters. GETTY IMAGES

der Adjustment Mechanism (Calculation of CBAM Rate and Determination of Carbon Price Relief) Regulations 2026, the official said.

“This will reduce the effective CBAM liability on Indian goods, directly benefiting Indian exporters,” the official said.

Gujarat to host National Film Awards for first time

The Hindu Bureau
NEW DELHI

The National Film Awards ceremony will take place in Gujarat for the first time on September 22, with the 72nd edition scheduled in Ekta Nagar. President Droupadi Murmu will present the awards, government officials said on Monday.

The move to Ekta Nagar marks a departure from the awards’ traditional venue in Delhi. The first National Film Awards ceremony was organised here in 1954, and Delhi has hosted most of the subsequent ceremonies. The Awards have been presented outside Delhi before – the 17th and 18th editions were held in Madras (now Chennai) in 1970 and 1971, as per reports.

The winners of the 72nd National Film Awards, announced in July, include *Article 370* as the best feature film. Yami Gautam has been named as the best actress for the same film. Mammootty and Kartik Aaryan will share the best actor award for their performances in *Bramayugam* (Malayalam) and *Chandu Champion* (Hindi) respectively.

Randeep Hooda has won the best debut director award for *Swatantrya Veer Savarkar*.

Quota will put more women in political leadership: Om Birla

The Hindu Bureau
NEW DELHI

Lok Sabha Speaker Om Birla on Monday said the proposed 33% reservation for women in the Lok Sabha and Legislative Assemblies would open new avenues for women’s political leadership, stressing that the role of women must move beyond receiving support, to shaping policies and laws.

Inaugurating a two-day all-India capacity building workshop on gender-responsive governance”, organised by the National Commission for Women (NCW), in Faridabad, Mr. Birla said the day was not far when women would account for more than 50% of those in public services.

The focus should shift from merely providing women with support and opportunities to enabling them to actively determine policies, programmes, and legislation addressing their concerns and aspirations, he said.

Women legislators in Parliament, Assemblies, panchayats and municipalities could play a decisive

Lok Sabha Speaker addresses participants at a workshop in Faridabad on Monday. ANI

role in ensuring that laws reflected ground-level realities. Institutions such as the NCW also had an important role in identifying emerging challenges and facilitating solutions.

India could not achieve the goal of becoming a developed nation without the economic and social empowerment of women, who constitute nearly half the population, he said.

He also urged women legislators to share successful initiatives and strengthen awareness among women, especially those in vulnerable sections, about laws and institutional mechanisms available to address their concerns.

Congress SC, ST MPs to petition President over ‘purification’ row

The Hindu Bureau
NEW DELHI

Thirty-two Congress MPs belonging to the Scheduled Caste and Scheduled Tribe communities on Monday decided to petition President Droupadi Murmu over the alleged “purification yajna” held in Uttarakhand’s Haldwani following a rally addressed by party president Mallikarjun Kharge.

In a meeting at the Congress headquarters, the MPs described the incident as a grave assault on the dignity and self-respect of SCs and STs and a direct af-

front to the constitutional values of equality and abolition of untouchability.

“We discussed the shocking purification incident in Haldwani following Congress president Mallikarjun Kharge’s rally. We have decided to form a parliamentary forum to fight this at all levels. We will be submitting a representation to the President of India on Tuesday,” Lok Sabha member Mallu Ravi said.

The MPs finalised a memorandum seeking the President’s intervention and appropriate action. They also decided to con-

stitute a parliamentary forum to take up issues concerning SC and ST communities.

Congress leaders K. Raju and Rajendra Pal Gautam also attended the meeting. Mr. Raju said the proposed forum would discuss a strategy for raising issues concerning SCs and STs in Parliament.

Congress leader Rahul Gandhi had condemned the incident that happened on August 11 and demanded an FIR be registered under the Scheduled Castes and Scheduled Tribes (Prevention of Atrocities) Act against those responsible.

SC questions U.P. police over journalist’s digital data

The Supreme Court on Monday asked the Uttar Pradesh Police why they needed the digital footprint of Abhishek Upadhyay, an independent journalist who flagged the alleged misappropriation of donations to the Ayodhya Ram temple, in order to investigate a road-rage case registered against him. The Bench, headed by CJI Surya Kant, and comprising Justices V. Mohana and Joymalya Bagchi, directed the Ghaziabad Police Commissioner to file an affidavit detailing the information sought from social media platform X for investigating the FIR registered against Mr. Upadhyay.

Assam woman’s severed head found in fridge; husband held

The Assam police recovered a partially decomposed and headless body of a woman in Guwahati on Sunday night. The severed head was found, wrapped in a polythene bag, in the refrigerator at the apartment she had been living in since her marriage in September 2025. Her fingers were allegedly cut off. The police identified the woman as 25-year-old Riya Talukdar, who worked in a boutique. Her cab driver husband, Ramanujan Goswami, was arrested after he surrendered to the police. The murder came to light after neighbours complained of a foul smell emanating from the flat and informed the police.

Those who assault doctors do not deserve to roam free: SC

Top court issues notice on Maharashtra’s appeal challenging bail granted to Shiv Sena corporator in connection with alleged assault on three doctors; court allows corporator to withdraw petition

Aaratrika Bhaumik
NEW DELHI

The Supreme Court on Monday said those who assault doctors and hospital staff “do not deserve to roam on the streets even for a minute”, prompting a Maharashtra corporator accused of attacking three municipal doctors in Thane to withdraw his plea after the Bench indicated that it could examine the cancellation of his bail.

A Bench of Justices Vikram Nath and Sandeep Mehta was hearing a plea filed by Shiv Sena corporator Ramesh Sukrya Mhatre challenging the Bombay High Court’s July 18 order staying the bail granted to him by the trial court, as well as its August 7 order imposing stringent conditions on his release, including that he remain outside Maharashtra until the commencement of the trial.

The court also referred to a recent incident in Palghar, where 17 Shiv Sena workers were booked for allegedly assaulting staff at a hospital on September 5 following a dispute

pute over the treatment of a 19-year-old man injured during a Dahi Handi celebration.

“We are going to issue notice on the State’s appeal. Yesterday, again the same group of people have assaulted doctors and hospital staff in Palghar,” the Bench said, adding that there appeared to be a “propensity to do these things”.

Senior advocate Mukul Rohatgi, appearing for Mr. Mhatre, clarified that those booked in the Palghar incident were not the same persons accused in the Thane case. He then sought permission to withdraw Mr. Mhatre’s plea, saying he wanted to “put a quietus to this here”.

Justice Nath, however,

said the court needed to send a larger message against attacks on medical professionals. “A message needs to go, not only to these people but to everyone, as a deterrent. Such people do not deserve to roam freely on the streets even for a minute,” he said.

Accordingly, the Bench issued notice on the Maharashtra government’s appeal challenging the bail granted to Mr. Mhatre and three other accused and directed that it be listed on September 28. It also allowed Mr. Mhatre to withdraw his petition.

The case stems from an alleged assault on three doctors at the Kalyan Dombivli Municipal Corporation-run Shastri Nagar Hospital in Dombivli, Thane

district, on July 6. Mr. Mhatre and others allegedly attacked the doctors after they advised that a pregnant woman be shifted to another hospital as all beds in the neonatal intensive care unit (NICU) were occupied.

The Bombay High Court subsequently initiated suo motu proceedings and, on July 18, stayed the bail granted to Mr. Mhatre and the other accused by the trial court. They surrendered the following day and were lodged at Aadharwadi Jail in Kalyan.

On August 7, however, the High Court granted bail to Mr. Mhatre and some of the other accused, subject to stringent conditions. It directed them to remain outside Maharashtra until the commencement of the trial, while allowing them to enter the State for the framing of charges. They were also directed to stay away from the complainant doctors.

The High Court had further directed the Maharashtra government to provide adequate protection to the three doctors who were allegedly assaulted.

SC refuses extension for Aravali panel to submit final report

Aaratrika Bhaumik
NEW DELHI

The committee has been tasked with evolving a uniform definition of the Aravali hills.

While rejecting a six-month extension sought by a Supreme Court-appointed high-powered committee tasked with defining the Aravali hills and range, Chief Justice of India Surya Kant on Monday questioned whether it was “waiting for his retirement”. The court directed the panel to submit its final report by November 30.

“They should have clearly asked for a date after my retirement... It appears they are waiting for my retirement. We are not going to allow this,” the CJI told Additional Solicitor-General Aishwarya Bhati, appearing for the Centre.

CJI Kant is due to demit office on February 9, 2027.

The Bench, also comprising Justices Joymalya Bagchi and V. Mohana, made it clear that no further extension would be granted, and directed the five-member panel, headed by Indian Council of Forestry Research and Education Director General Kanchan Devi, to “work day and night” to finalise its recommendations. The committee has been tasked

with evolving a uniform definition of the ecologically fragile Aravali hills and range, and recommending measures to regulate future mining.

The court asked the committee to submit interim reports on specific issues requiring immediate consideration, without waiting for the entire exercise to be completed. It also directed the panel to hear all stakeholders, including tribal communities in Rajasthan and Gujarat, before finalising its recommendations.

The matter will be heard next on December 2, by which time the committee is expected to have submitted its final report.

States told to furnish details of facilities for senior citizens

The Hindu Bureau
NEW DELHI

The Supreme Court on Monday directed all States and Union Territories to file fresh status reports detailing the number of old-age homes and the facilities available to senior citizens across the country.

A three-judge Bench headed by CJI Surya Kant asked Attorney General R. Venkataramani to communicate the direction to the Advocates General and standing counsel of all States and Union Territories, requiring them to furnish the latest information within four weeks.

The Bench was hearing a public interest litigation petition filed in 2016 by former Union Minister and senior advocate Ashwini Kumar concerning the welfare of senior citizens, particularly those living without adequate shelter, food or medical care.

Civil Service candidates await Centre’s word on foundation course amid case in top court

Abhinav Lakshman
NEW DELHI

The 958 candidates recommended by the Union Public Service Commission in the 2025 Civil Services Examination (CSE) are now in limbo over their service allocation and the starting date of their foundation course.

While the course was expected to begin in August, several candidates told *The Hindu* they have received no communication regarding the way forward.

The delay follows the Centre’s application to the Supreme Court asking permission for the Department of Personnel and Training (DoPT) to allocate services without implementing the court’s March 11 *Rohith Nathan* judgment. That ruling found the DoPT was incorrectly excluding certain Other Backward Classes (OBC)

The delay follows the Centre’s application to the Supreme Court regarding the Rohith Nathan judgment

candidates from reservation by concluding they belonged to the creamy layer based only on their parents’ salary income. The court directed corrective measures within six months. The CSE 2025 results were declared on March 6, days before the judgment.

Now, while the Supreme Court is set to hear the Centre on September 17, candidates recommended for the Civil Services told *The Hindu* they have “no idea” what their future pathway looks like. “The foundation course has not started. I have received no communication from the DoPT or the academy

about when the foundation course will start. There was a schedule that said it was to start on August 24 tentatively, but since the Supreme Court became seized of the matter, we have not heard anything,” one candidate said.

Another candidate said that they have not been able to see any updates regarding the next steps on the website of the DoPT or the website of the Lal Bahadur Shastri National Academy of Administration, where they will be trained.

A third candidate said that they are now waiting to see how the next hearing in the Supreme Court goes. “I believe the government is also waiting for the Supreme Court,” the candidate said, adding that since the court is going to look at the issue of service allocation, no news of the foundation course can be expected until then.

New script unfolds as Kashmir hosts its inaugural international film festival

Peerzada Ashiq
SRINAGAR

Kashmir, where all 15 cinema halls had closed down in the wake of militancy over three decades, on Monday hosted its first-ever four-day international film festival with the screening of the Lebanese film *Dead Dog*, a drama on the reunion of an estranged couple.

Under a multi-layer security cover, director Sarah Francis’ movie, the first among 135 films to be screened from 41 countries, was shown at the Inox theatre in Srinagar’s Shiv Pora area. The multiplex is the first functional cinema hall to reopen in the valley after 23 years in 2022.

Jammu & Kashmir Chief Minister Omar Abdullah addressed a gathering at Sher-i-Kashmir International Convention Centre (SKICC) in Srinagar and called the festival “a new

Chief Minister Omar Abdullah at the inauguration of the International Film Festival Jammu and Kashmir in Srinagar. IMRAN NISSAR

chapter in the long-standing relationship between J&K and cinema”.

“To stand here today under the majestic shade of the chinar trees, surrounded by the sentinel peaks of the Himalayas, is to be reminded that some places on earth do not merely boast stories. They are born of them,” said Mr. Abdullah.

He said the festival’s clear message is about “Kashmir’s potential as a

celebration of cinema, it is a declaration of intent,” he added.

‘Landmark initiative’
Inaugurated by Jammu & Kashmir Chief Secretary Atal Dulloo and Directorate of Information and Public Relations director Shreya Singhal, the festival will screen movies at venues in Srinagar’s SKICC and Inox, Gulmarg, and Jammu city. It is tipped to be a major “landmark cultural initiative that celebrates the universal language of cinema”.

“We received around 1,100 entries for the festival. After screening, 135 entries were shortlisted, including more than 60 foreign films. This is an opportunity to reconnect J&K with the world of cinema and invite the film industry not only from the country but also from abroad, and make Kashmir once again a prominent film destination,” said Mr. Dulloo.

FAITH

Attaining liberation

If a person does not use his birth as a human being to attain liberation, then he may be said to have wasted his life. Being a human being has many advantages, which aid liberation, said R. Narayanan in a discourse. We can use our hands to offer flowers to God. We should see our legs as the means to walk to temples, and to circumambulate the sanctum. Our eyes are intended for looking at the images of God in temples. Our mouths are for singing His praises. The head is given to us to bow prayerfully before the Lord. Appar says to his head, *Thalaiye nee thalai vanangai* (Oh head, bow before Lord Siva). But if we do not use our faculties as they should be used, then of what use is this life? If we pursue pleasures and have no time for God, how can we attain moksha?

Something negative can be countered only by something positive. Birth leads to problems and unhappiness. Repeated births take place because of our ignorance. This ignorance is the negative aspect of our lives, and can be banished only if we worship God. Tirukkural verse 358 talks about getting rid of ignorance. Thiruvachagam says there are 84,000 possible births an atma can have. Manickavachagar says in Thiruvachagam that he has taken birth as a blade of grass, a worm, many kinds of animals and birds, snakes, stones, human beings, ghosts, sages and devas and has suffered in consequence. Avvaiyar says it is rare good fortune to take birth as a human being. She advises that we spend our time in the company of virtuous people. It is imperative that we pay attention to the words of principled people. We must talk about their good qualities and emulate them.

INBRIEF

RBL Bank to raise up to \$1 bn from overseas investors

Private lender RBL Bank on Monday said its board approved the mobilisation of up to \$1 billion from overseas investors through bond issuance. The board approved the establishment of a Euro Medium Term Note Programme (EMTN Programme) in accordance with Regulation S of the US Securities Act, 1933, subject to regulatory, statutory and other approvals, RBL Bank said in a stock exchange filing.

Govt. spurs coal rake loading by 20% to strengthen stock

Loading of coal rakes for supply to the power sector has grown about 20% between September 3 and 6, the Union Coal Ministry said on Monday, adding that it was also closely monitoring thermal plants with stocks below 25% of their normal requirements with measures being taken to ease their supply position. According to data from the Central Electricity Authority, 53 domestic coal-fired plants were operating at the critical normative level as on September 5.

Copper prices head to record high; tight supplies outside U.S.

Copper prices headed toward a record high on Monday, as the prospect of shortages outside the U.S. spurred buying, while the softer dollar reinforced positive sentiment. Traders said that a U.S. holiday meant volumes were likely to be muted, but added that focus was firmly on copper and zinc. Benchmark copper on the London Metal Exchange was up 0.1% at \$14,430 a metric tonne at 0931 GMT, the highest since the all-time peak of \$14,527.50 hit in January.

In a first, alternative fuel vehicles outsell petrol cars in India

CNG, hybrid and electric together overtook petrol in the PV market at 41.95% against the latter's 40.85% in August 2026, FADA data showed

Lalatendu Mishra
MUMBAI

The Indian automobile industry retailed 24,23,201 units in August 2026, registering a 17.51% growth year on year (YoY).

However, compared with July 2026, retail sales fell by 6.48% due to the lull in seasonal monsoon and a festival calendar that shifted Ganesh Chaturthi and the spillover of Onam-led buying into September.

Growth was led by Wheeled Construction Equipment at 31.45%, Two-wheelers 19.69%, Passenger Vehicles 16.14%, and Commercial Vehicles 14.45%, while Three-wheelers grew 8.64% and Tractors sales were effectively flat at 0.84%, as per data released by the Federation of Automobile Dealers Association (FADA), Monday.

For the first time in India, alternative fuels – CNG, hybrid and electric combined – overtook petrol in the passenger vehicle (PV) market, at 41.95% against petrol's 40.85%.

“Two-wheelers, passenger vehicles, commercial vehicles, tractors and three-wheelers each set fresh August records, and overall registrations were the highest ever for the month,” said Sai Giridhar, president, FADA.

Two-wheeler retail sales

Ethanol effect

An analysis of automobile retail sales data shows beyond the volume record, fuel mix has reached an inflection point

CNG vehicle sales stood at 25.28%, Hybrids 9.04%, and EVs 7.63%

Electric CV share rose to an all-time high of 5.18% from 2.06% a year ago

Dealers attribute shift to running-cost economics, consumer hesitation around E20 transition

stood at 17,14,610 units, up 19.69% YoY – the best August since 2018 – but down 5.70% MoM.

Share of e-TWs crossed the 10% mark (10.68%) in a non-festival month for the first time, against 7.66% a year earlier.

Commercial vehicle retails came in at 90,769 units, up 14.45% YoY – the best-ever August – though 8.93% lower MoM.

LCVs grew 15.32% YoY, HCVs 13.98% and MCVs 10.38%, with dealers citing infrastructure execution, mining and e-commerce-linked logistics alongside steady financing.

Electric CV share rose to an all-time high of 5.18% from 2.06% a year ago, with e-CV volumes setting a fresh monthly record.

Passenger vehicles retailed at 4,02,398 units, up 16.14% YoY. For the first time, the PV segment has crossed the four-lakh mark in an August though MoM

sales was lower at 3.40%.

Beyond the volume record, the fuel mix reached an inflection point – alternative fuel vehicles (CNG 25.28%, Hybrid 9.04%, EV 7.63%) together touched 41.95%, surpassing petrol vehicles (40.85%) for the first time, though petrol remains the single largest individual fuel.

“Dealers attribute the shift to running-cost economics and continuing consumer hesitation around the E20 transition, nudging petrol buyers towards CNG, hybrids and EVs,” Mr. Giridhar said.

PV inventory rose by a further five days over July-end to about 38-40 days, well above FADA's recommended 21-day benchmark, with 56% of PV dealers reporting higher stock MoM, he added.

With three-wheeler EV penetration at 65.30% – the segment is now structurally electric.

JLR to slash 4,000 jobs worldwide in 2 years to save £1.7 bn

Lalatendu Mishra
MUMBAI

Jaguar Land Rover (JLR), a wholly owned subsidiary of Tata Motors Passenger Vehicles Limited (TMPV), has announced reduction of its global workforce by about 4,000 roles over the next two years as part of a “strategic transformation programme.”

“The reduction, which is not expected to impact direct manufacturing jobs, will be achieved through voluntary means wherever possible,” TMPV said in an exchange filing. “JLR is today beginning consultation on the first round of reductions and will provide support to all colleagues affected by the changes and engage with Trade Unions and employee representatives throughout the transition,” it added in the statement.

“We recognise this will be difficult news for colleagues affected, and are committed to supporting everyone with care, fairness and respect,” JLR CEO P.B. Balaji said in a statement.

JLR said that the “strategic transformation programme” was designed to “simplify the organisation, improve operational performance and support long-term sustainable growth.”

“As per JLR's “Growth Reimagined” strategy announced at its Investor Day on 19 June 2026, JLR is targeting approximately £1.7 billion of savings over the next two years to reduce its break-

The reduction is not expected to impact direct manufacturing jobs, according to the company

evens towards 3,00,000 units,” the company said.

The savings, it said, were designed to enhance JLR's ability to deliver sustainable profitable growth, against the backdrop of an increasingly competitive and rapidly changing market and continuing geopolitical uncertainty.

“The programme will reduce organisational complexity, and underpin the commitment to invest between £15-18 billion in electrification, digital technologies, advanced manufacturing and enhanced customer experiences over the next five years,” Mr. Balaji said.

“The automotive industry faces significant challenges, with technological change amidst intense competition and ongoing geo-political uncertainty. Through our Growth Reimagined strategy, JLR is moving decisively to strengthen our competitiveness and position the business for long-term success,” he said.

Over the next 12 months, the company will launch five new products, continue to leverage the strength of its brands, and renew its focus on North America, amongst other markets, to help it deliver double digit revenue growth, he stated.

RBI mops up ₹6 lakh crore in 2 auctions with mixed response

Press Trust of India
MUMBAI

The Reserve Bank of India (RBI) on Monday mopped up over ₹6 lakh crore of excess funds from the banking system in two auctions, which saw an underwhelming response from banks despite surplus liquidity.

The 30-day variable rate reverse repo (VRRR) auction announced last week received a tepid response from banks, and the central bank announced another auction in the first half of the day.

As against ₹7 lakh crore of notified amount, the first auction received a tepid response, with bids of just over ₹2.59 lakh crore being received for the 30-day VRRR, according to an official statement.

The bids for the 30-day VRRR were accepted at the cut-off and weighted average rate of 5.24%, according to the RBI. Soon afterwards, the RBI announced an overnight VRRR auction with a notified amount of ₹5 lakh crore, which was completed at 11:30 hrs.

Market response to the second auction was a tad better, with bids of ₹3,53,390 crore received, which amounts to over 70% of the notified amount, indicating that lenders are comfortable parking funds for a shorter tenure. For the overnight, the RBI accepted the full amount at a cut-off rate and weighted average rate of 5.24%.

There are large inconsistencies between GDP and other economic indicators: says Garg

Kunal Shankar
Santosh V. Perumal

Former Finance Secretary Subhash Chandra Garg has questioned the credibility of India's latest GDP estimates. In an email response to *The Hindu*, he argued the sharp downward revisions to the size of the economy need a far more transparent explanation than the government's invocation of a new methodology, wider coverage and improved data.

At the centre of his concern is the absence of a transparent bridge between the 2011-12 base series and 2022-23 series. Mr. Garg said MoSPI must publish a back-series from 2011-12 to 2021-22 and set a timetable for doing so. “Perfectly valid demand,” he said, arguing absence of such a programme suggested that the government was “not very serious” about resolving the issue.

He was particularly concerned about the reduction in the estimated nomi-

Subhash Chandra Garg

nal size of the economy. The revision in Q1 FY26, he said, was part of a much larger change with GDP for 2024-25 reduced by ₹12.70 lakh crore. The Centre did not adequately explain why the revisions resulted in a smaller economy.

The standard explanation – new series incorporates wider coverage, new data sources and indices – was, in his view, insufficient. “Any better coverage leads to nominal GDP getting increased, not decreased,” he reasoned.

Mr. Garg offered two

possibilities for the revisions: the earlier system overstated GDP on errors such as double counting or the GDP was deliberately overstated to produce stronger growth numbers, and later, written down under the cover of the new series. He gave no evidence of deliberate manipulation but said the scale of the revision made essential a detailed explanation.

He also questioned the price architecture underpinning the latest real-growth estimate. With consumer inflation over 4% and producer-price inflation about 9%, he said, the about 2.5% GDP deflator implied by the latest numbers appeared difficult to reconcile. “There is definitely a serious internal inconsistency,” he said, calling for the underlying price data to be disclosed and explained.

Mr. Garg was equally sceptical of the application of double deflation to manufacturing, arguing international best practices can-

not simply be transplanted without sufficiently granular Indian data. Until the new methodology stabilises, he suggested the older system be run in parallel.

His concerns extend beyond methodology to the independence of the statistical system. India's data infrastructure needs “massive modernisation,” he said, but the statistical system could still produce reliable numbers if there was no “political interest to produce results in a certain direction.” Statisticians needed greater freedom from political control.

No statistical noise

The broader problem, Mr. Garg argued, was the divergence between GDP and other indicators of economic well-being. Weakness in household incomes, employment, consumption and sentiment cannot always be dismissed as statistical noise, he said, particularly when particular data outcomes turn politically sensitive.

GDP itself, he stressed, was not a measure of welfare. India does not adequately publish the “income leg” of national accounts showing how value added is divided between labour, corporations and government. With per-capita GDP still low, he argued India must target 9-10% growth while redistributing income more effectively and reducing unproductive government expenditure.

For Mr. Garg, the government's technical responses have therefore failed to close the credibility gap. Its explanation for the reduction in GDP, he said, remained “officialese, obfuscatory” and “sheds no light.”

He was unequivocal about the central issue: the downward revision in GDP was real and, in his assessment, must ultimately be explained either by an earlier overstatement or by acknowledging earlier growth was artificially inflated. “Nothing can falsify my argument,” he said.

‘50% of Indian firms say macro growth isn’t fully translating’

T.C.A. Sharad Raghavan
NEW DELHI

Half of Indian businesses reported the country's strong macroeconomic performance either has not translated into improved business performance or has done so partially, as per the latest Confederation of Indian Industry's (CII) Business Outlook Survey.

This finding comes at a time when questions have been raised about whether the Centre's GDP growth numbers are reflective of the ground situation.

However, the composite business confidence score in the CII Business Outlook Survey for July-September 2026, looking at the current situation as well as future expectations, rose to 66 in Q2 from 60.8 in the first quarter of FY27. The score in Q2 of this year was the same as in Q2 last year.

“The sharp improvement reflects strengthening in business sentiments, primarily supported by the easing of disruptions stem-

A sizeable number of firms saw higher demand.

ming from the West Asia conflict,” the survey stated.

The survey covered 238 public sector and private firms from “all industry sectors”, including micro, small, medium and large enterprises, from different regions, the CII said.

The data shows 13.4% of the respondents said “on ground conditions were subdued despite strong macro data” while 36.6% said they saw some improvement in business conditions “but weaker than indicators suggest”.

However, 11.3% of the respondents said business growth “matches or ex-

ceeds macro momentum”.

Another 29.4% said they saw “clear benefits, though somewhat below headline growth”. The survey does not mention how the balance 9.3% voted.

The demand aspect of the survey showed 29.4% of the respondents expect no change in local demand in Q2 vis a vis Q1. Also, another 3.5% expect demand to be more than 20% lower than in Q1 while 6.1% expect demand to be 5-20% lower than in Q1.

The other side of this data is a sizeable number of firms saw higher demand.

“For Q2FY27, 61% of respondents expect demand to rise, while only 9.6% foresee a moderation, a widening of the positive margin over Q1 that signals sustained confidence in end-market conditions,” the survey showed.

“The share expecting demand growth above 20% rises from 12.9% in Q1FY27 to 16% in Q2FY27, indicating that optimism is not just holding but intensifying at the upper end.”

Thousands turn out in Serbia for funeral of convicted war criminal

Bosnian Serb war criminal Ratko Mladic was buried in Belgrade on Monday, in a service attended by thousands, sparking accusations from European Union of the “glorification” of a man who died while serving a life sentence for genocide. Despite his conviction, Serb nationalists continue to paint Mladic as a hero and protector. AFP

U.S. energy facilities in Gulf remain exposed to retaliation, warns Iran

Tehran issues threat after latest clashes with the U.S.; new Hormuz passage maps to be approved soon, ships entering new restricted zone will be added to sanctions list, says Iran’s security head; oil prices near six-week highs after attacks on ships

Reuters
DUBAI

Iran threatened on Monday to retaliate against any new U.S. attacks on its assets, warning that the energy production chain in the region was “sprawling, accessible and exposed” and that U.S. oil and gas companies there shared that exposure.

“Strike our assets and you get struck,” Iranian Parliament Speaker Mohammad Baqer Qalibaf said after U.S. and Iranian strikes on shipping at the weekend that pushed oil prices up to six-week highs at one point on Monday.

On Sunday, senior Ira-

Persian tides: People ride in a boat near vessels in the Gulf waters off the coast of Iran’s port city of Bandar Abbas on Monday. AFP

nian security official Mohsen Rezaei said Iran would announce plans for a new restricted zone in the Gulf in the coming days, and that it would soon approve maps of a new shipping

corridor through the Strait of Hormuz.

Mr. Rezaei said the new restricted zone would begin from where a U.S. naval blockade of Iran starts and extend into areas of the

Gulf. Any ship entering the new zone would be added to an Iranian sanctions list, he said. “We will only commit to the Strait of Hormuz being open when they (the Americans) stop the sabotage, threats and attacks on Iran,” Mr. Rezaei said.

Underlining Iran’s defiance, Mr. Qalibaf issued a new threat to respond to any U.S. strikes, in what appeared to be a response to a warning by U.S. Defence Secretary Pete Hegseth that Iran’s oil tanker fleet was “defenceless”.

“It’s simple: the oil and gas production chain here is sprawling, accessible, and exposed. American oil and gas companies across these waters and facilities

share that exposure,” Mr. Qalibaf, who is Iran’s top negotiator, wrote on X.

Meanwhile, Iran’s Foreign Ministry spokesperson Esmail Baqaei on Monday warned South Korea against military deployment or involvement in U.S. operations in the Strait of Hormuz, saying such a move would have “serious consequences”.

On Friday, Seoul said it was considering “contributions” to U.S. security efforts in the Strait of Hormuz. South Korea said it would consider the move provided that its own military readiness was not compromised, but added that no decision had been made.

German far-right AfD wins big in State poll, falls short of majority

Reuters
BERLIN

The Alternative for Germany (AfD) appealed on Monday to lawmakers from Chancellor Friedrich Merz’s conservatives to support its bid to rule Saxony-Anhalt after the far-right party surged into first place in the eastern German State’s election.

The AfD won 43.8% of the vote, official results showed. However, the party fell a little short of winning a majority in its quest to form the country’s first far-right State government since the Second World War. The party has won 39 of the 83 seats in the State legislature, and hopes to win over individual conservative lawmakers.

The election result rais-

es serious questions about the longstanding refusal of Germany’s mainstream parties, including Mr. Merz’s Christian Democrats (CDU), to work with the AfD, a policy known as the “firewall”.

“Politics always means compromise,” AfD leader Tino Chrupalla said, appealing to CDU lawmakers to make a “centre-right conservative majority” in Saxony-Anhalt possible.

German Chancellor Friedrich Merz said on Monday he was “deeply shocked” by his party’s State election defeat at the hands of the far-right AfD.

“This is the heaviest electoral defeat the (CDU party) has suffered in years, in decades,” Mr. Merz said. His party scored just 17.2% of the vote.

An eight-year-old Lebanese boy receives treatment in Nabatieh, after he was injured in the strike.

12 killed in Israeli strikes in southern Lebanon

Agence France-Presse
BEIRUT

Israel conducted a wave of airstrikes in south Lebanon killing 12 people including women and children, the Lebanese Health Ministry said on Monday, in an intensification of violence after a weeks-long lull.

One of the overnight strikes hit a building in the town of Kfar Rumman, killing 11 people, including two children and four women. Another attack in the same town killed a rescuer and wounded another, according to the Ministry.

The Israeli military in a statement said it had struck Hezbollah “infrastructure sites” across southern Lebanon after the launch of two explosive drones towards its troops.

The Army said it “will continue to operate to remove threats while remaining committed to the ceasefire agreement”.

Hezbollah has not claimed any attack since June 20.

Israeli airstrikes and a ground invasion of Lebanon have killed more than 4,300 people since March, according to Beirut.

U.K. govt. slams anti-migrant protests

Sriram Lakshman
LONDON

The U.K. government condemned protests by hundreds of people in Portsmouth, who had gathered until the early hours of Monday morning to protest the arrival of illegal migrants on a dinghy from France. Protesters faced off with police, as they sought to block buses carrying migrants for processing in Kent.

“We condemn the intimidating and thuggish behaviour we saw in Portsmouth last night,” a Home Office spokesperson said in a statement emailed to *The Hindu* and other news organisations.

A migrant tries to board a dinghy from France in an attempt to cross the English Channel.

The words were echoed by government Ministers. The way the protesters behaved “crosses a line”, Treasury Secretary Emma Reynolds said. Police and Crime Com-

missioner for Hampshire and the Isle of White, Donna Jones, who is affiliated to the Conservative Party, said 140 migrants arrived in one boat early on Sunday morning from France.

The Home Office declined to comment on whether any of the migrants who had arrived were Indian nationals.

A day earlier, some 200 protesters took to the streets in the coastal port town of Dover, with visuals of masked men boarding trains and marching along the road chanting, “Whose streets? Our streets.”

Business Secretary Jonathan Reynolds said: “I condemn it. I mean, peaceful protest – essential part

of British life, but that’s not dressing up in costumes like this and disrupting people’s lives.”

Commissioner Jones said the U.K. government had “lost control” of the 100s of miles of British coastline in an interview with Sky News.

The number of protesters had grown to 400-500 by midnight on Sunday, and they stayed on till about 3 a.m. in Eastney, in Portsmouth, Ms. Jones said “when a legal position was agreed” and protesters agreed they had made their point. She said the incidents were a “real wake up call” for the U.K. government over the lack of border control.

Suruchi brimming with excitement ahead of maiden Asiad appearance

SHOOTING

Uthra Ganesan
BHOPAL

Suruchi Phogat first held a pistol in 2019, at the age of 13. She did so because there were no rifles at the Guru Dronacharya Shooting Academy in Bhiwani; and because her father was determined to make her a sports person.

The 20-year-old will be one of the favourites to medal for India in 10m air pistol at the Asian Games later this month, as much because of her performance streak over the past 18 months as her ability to keep things simple.

“Excitement. No ner-

Suruchi. R.V. MOORTHY

vousness, no challenge, nothing. There is only excitement inside me because it is my first Asian Games,” she said, a permanent wide smile on her

face exuding an openness that only accentuates her clarity of thought.

The ‘baby’ of the Indian shooting contingent, Suruchi insisted that everyone was equal in the squad but admitted that certain members of the coaching and sports science staff are slightly more protective, telling her what to do and expect while travelling.

It is a throwback to the time she took the local trains for a 100-km journey from Sasroli village in Jhajjar district of Haryana to the academy.

“My father and brother accompanied me. At that time, of course no one knew but once the results and medals started coming, the regulars on the

train would recognise me.

“They would say they had seen my face in the local newspapers and be curious. I would tell them that I am a shooter.

“It’s not like I suddenly became famous or anything but yes, it was the beginning of a realisation that I am doing something,” she laughed.

Eventful journey

Making the cut for Aichi-Nagoya has been an eventful journey that has seen her win four consecutive World Cups and the World Cup Final, set a National record in 10m air pistol and a World junior record in the process and rise to World No. 3. It is only the beginning.

Priyanka upbeat despite the challenge

ATHLETICS

Ashwin Achal
BENGALURU

Tempted by the prospect of winning a prize, Priyanka Goswami ventured into race walking.

As a young gymnast at the K.D. Singh Babu Stadium Sports Hostel in Lucknow, Priyanka found that she had a flair for track and field.

After taking the big leap of faith, her first test came at a district athletics meet.

“We used to get a bag as a prize at the meet. I tried a few running events, but I could not do well. I did not get even a single bag,” Priyanka said at a media interaction facilitated by the Sports Authority of India here.

Priyanka then noticed

Aiming high: Race walker Priyanka wants to finish on the podium at the Asian Games. K. MURALI KUMAR

that her chances of winning a bag were substantially higher in another event. “There were only three girls in the race walking event. I figured that I could defeat at least one of them,” she said with a laugh.

Priyanka finished third, won her bag and, in the

process, embarked on a new career path.

“As a gymnast, my body was flexible and my technique was good. From there, God took me all the way to the Olympics,” she said, referring to her appearances at the 2020 Tokyo and 2024 Paris Games. In 2022, Priyanka made

history, winning silver, to become the first Indian woman to clinch a race walking medal at the Asian Games.

Priyanka fell just short of another medal at the recent 2026 Commonwealth Games, where a time penalty saw her finish fourth.

The 30-year-old is confident about her chances at the upcoming Asian Games, where the competition from Japan and China pose a mighty challenge.

“It is true that race walking is dominated by Japan and China. If I can get a medal, it will be a big achievement in my life,” Priyanka said.

LEARNING CURVE

The captaincy process leads to immense personal growth: Kishan

R. RAGU

When you are the captain, the first thing is situational awareness, you have to stay alert the entire day on the field to understand what is happening and what isn't. Going through this whole process leads to immense personal growth, and while you might not realise it immediately, your mindset shifts completely — Ishan Kishan.

TEAM FIRST

‘When you are the skipper, it becomes a duty to help players’

R. RAGU

There are many small things we often overlook in our daily routines. You don't look at your players or try to help them figure out how they can get better. But when you are the skipper, it becomes your duty to help them, because if your teammates are improving, ultimately you will achieve the team's goals — Ishan Kishan.

SMOOTH START

Maaya storms into second round of junior singles at New York

FILE PHOTO

Maaya Rajeshwaran outclassed Emery Combs of USA 6-2, 6-2 in the first round of the girls singles at the US Open. The 15th-seeded Indian will take on Arina Malygina in the second round. In the doubles event, Maaya and Antonina Sushkova will meet the American duo of Combs and Olivia De Los Reyes in the first round.

‘SPECIAL MENTOR’

Pietersen joins England coaching team ahead of World Cup

FILE PHOTO

Kevin Pietersen has joined England's white-ball coaching team as a “specialist mentor” in the build-up to next year's World Cup in southern Africa. The former England captain will be part of Brendon McCullum's coaching group for the upcoming T20 and ODI series at home to Sri Lanka later this month, as well as subsequent series.

A thorn in the flesh: Kishan made the South bowlers toil for a second successive day. R. RAGU

Kishan puts South under the pump

The southpaw's blistering double century takes East past the 700-run mark; Kushagra joins the party with a hundred against a hapless attack

DULEEP TROPHY FINAL

S. Dipak Ragav
CHENNAI

Ishan Kishan has been on a rollercoaster ride over the last few years. From being part of all three formats in 2023, he hit rock bottom by early 2024 when he was dropped from the BCCI central contract list, partly for his refusal to turn up for the Ranji Trophy.

Since then, the Jharkhand wicketkeeper-batter has been making amends, putting in the hard yards in domestic cricket to forge his way back into India's T20 and ODI squads.

Now, the 28-year-old is showing that he is ready to do the same in the longest format as well. He hammered 270 (334b, 30x4, 7x6) for East Zone against South Zone on day two of the Duleep Trophy final at the MAC Stadium on Monday.

Resuming at 385 for four, East posted a gargantuan total of 708 with Kumar Kushagra (101, 132b,

8x4, 5x6) completing his century. Kishan and Kushagra added 230 for the fifth wicket, pummelling a hapless South attack into submission.

Kishan set the tone with a brace of boundaries off Mohammed Siraj and M.D. Nidheesh. Kushagra soon joined in the act, lofting C.V. Milind and driving Nidheesh down the ground. He raced through his 90s by taking on Shreyas Gopal and brought up his hundred.

South's only hope of staging a comeback was with the second new ball, but Siraj, who bowled just three overs in his first spell, was off-colour yet again.

Post lunch, Kishan tore into Shreyas, smashing the leggie for three boundaries in an over. What stood out in the captain's knock was the way he shunned risks even when he used his feet, often drilling the ball past the bowler all along the ground. He raised his second First Class double century with a searing cover drive off Devdutt Padikkal. After the milestone,

Kishan switched to T20 mode and unleashed a barrage of sixes, lofting spinners Shreyas and T. Vijay with disdain. He needed just 30 more deliveries to raise his bat again – for a 250 – despite battling cramps.

Barring a miracle over the last three days, Kishan has ensured East has one hand on its third Duleep Trophy title.

The scores: East Zone — 1st innings: Abhimanyu Easwaran run out 72, Vaibhav Sooryavanshi c sub (Tanay) b Milind 44, Shikhar Mohan b Milind 85, Sudip Kumar Gharani c Milind b Vijay 6, Ishan Kishan c Smaran b Vijay 270, Kumar Kushagra c Milind b Vijay 101, Anukul Roy lbw b Rasheed 45, Md. Kounain Quraishi c Siraj b Shreyas 40, Mohammed Shami b Shreyas 28, Abhijit Sarkar (not out) 0, Mukesh Kumar c & b Vijay 0; Extras (b-8, lb-2, nb-6, w-1): 17; Total (in 163 overs): 708.

Fall of wickets: 1-100, 2-133, 3-147, 4-241, 5-471, 6-626, 7-680, 8-698, 9-708.

South Zone bowling: Siraj 25-3-140-0, Nidheesh 15-2-58-0, Vijay 42-4-180-4, Milind 21-2-88-2, Shreyas 42-7-165-2, Rasheed 13-0-46-1, Padikkal 4-0-18-0, Bhui 1-0-3-0.

‘Captaincy has helped me become a better batter’

S. Dipak Ragav
CHENNAI

One of the hardest tasks for an international cricketer is how they respond to being dropped from the national squad and fight their way back.

And over the last year, Ishan Kishan has shown the way to do it.

“Sometimes, when we play regularly for the Indian team, you just keep playing in a flow. You may be a very good player, which is why you're playing for India, but your growth stagnates at a certain point.

“When you take one step back and go back to

Kishan... in full flow. R. RAGU

domestic cricket, you start from zero again,” said Kishan after smashing 270 for East Zone against South in the Duleep Trophy final

here on Monday.

“You start thinking, ‘I need to get even better,’ because today, there are so many players scoring runs. To get back into the team, your only option is to perform much better than them.

“You get time to reflect on what you missed earlier, why you couldn't convert your starts into big scores. I mean, the batting doesn't change that much; it's just the mindset that changes over time.”

Last year, Kishan led Jharkhand to a convincing Syed Mushtaq Ali title triumph and felt that captaincy had helped him become a better batter.

Alcaraz crushes Paul, runs into Shelton in quarterfinal

US OPEN

Agence France-Presse
NEW YORK

Defending champion Carlos Alcaraz posted his most convincing win in his injury return at the US Open, downing Tommy Paul in straight sets on Sunday to line up a quarterfinal clash with Ben Shelton.

Second-seeded Alcaraz looked closer to his brilliant best in a 6-4, 6-3, 6-4 victory over Paul, the 20th seed. Alcaraz will face red-hot Shelton, a 6-2, 6-3, 6-4 winner over Stefanos Tsitsipas, for a place in the semifinals.

In the women's section, Linda Noskova reached the quarterfinals, edging Ukraine's Marta Kostyuk in three sets. The Czech, who has largely flown under the radar in New York despite winning Wimbledon, beat

THE RESULTS

Men: Fourth round: 2-Alcaraz (Esp) bt 20-Paul (USA) 6-4, 6-3, 6-4; Michelsen (USA) bt 27-Etcheverry (Arg) 7-6(6), 6-4, 6-4; 11-Tiafoe (USA) bt 7-Medvedev 7-6(1), 6-4, 7-6(6); 8-Shelton (USA) bt Tsitsipas (Gre) 6-2, 6-3, 6-4.

Women: Fourth round: 5-Andreeva bt 24-Potapova (Aut) 5-7, 6-4, 6-3; Zheng (Chn) bt 8-Swiatek (Pol) 7-5, 6-3; 6-Noskova (Cze) bt 11-Kostyuk (Ukr) 7-5, 5-7, 6-4; 3-Pegula (USA) bt 16-Cirstea (Rou) 6-3, 6-4; 26-Navarro (USA) bt 21-Kalinskaya 6-4, 6-2.

Kostyuk 7-5, 5-7, 6-4, finally sealing the win on her sixth match point when Kostyuk netted a backhand return.

“I am more than relieved,” Noskova said after booking a last-eight showdown with defending champion Aryna Sabalenka.

American Frances Tiafoe, the 11th seed, booked

his quarterfinal berth with a 7-6(1), 6-4, 7-6(6) victory over former champion Daniil Medvedev. Tiafoe will face compatriot Alex Michelsen, who defeated Argentina's Tomas Martin Etcheverry 7-6(6), 6-4, 6-4, for a place in the semifinals.

Women's third seed Jessica Pegula, one of the players with a chance to supplant Sabalenka atop the rankings in New York, reached the last eight with a 6-3, 6-4 victory over Romanian Sorana Cirstea.

On Monday, Paris Olympics gold medallist Zheng Qinwen, who had to come through qualifying, stunned six-time Grand Slam champion Iga Swiatek 7-5, 6-3 to reach the quarterfinals.

Fifth-seeded French Open champion Mirra Andreeva beat Anastasia Potapova 5-7, 6-4, 6-3 to seal a last-eight berth.

Knights beat Pipers despite Anand's loss

GLOBAL CHESS LEAGUE

P.K. Ajith Kumar
BENGALURU

Viswanathan Anand rarely plays these days: he is more of a mentor and now the interim president of FIDE. Magnus Carlsen, who dethroned Anand as the World champion in 2013, has relinquished his crown.

Still, when the two all-time greats come across a chessboard, there is a buzz. That was quite palpable at the Lalit Ashok on Monday. They played some interesting chess too, on the third day of the Tech Mahindra Global Chess League, but Anand was unlucky, as he lost on time from an equal position. The five-time World champion, however, could afford to forget his defeat, as his team, PBG Alaskan Knights, won the match against Alpine APL Pipers 9-7. That, in fact, was the first loss in the tournament for Carlsen's team after winning both their matches.

A little later, however, the defending champion bounced back, scoring a crushing 15-3 win against Fyers American Gambits. Carlsen was held to a draw by Javokhir Sindarov, but K. Humpy, Vidit Gujrathi and Volodar Murzin won their

games, with black pieces, to ensure that their team would score heavily.

The Pipers top the table after four rounds. It has nine match points, and 43 game points. As many as four teams are on six points – Mumbai Masters (36 game points), American Gambits (34), Alaskan Knights (30) and Ganges Grandmasters (28). Two-time champion Triveni Continental Kings, which finally managed a victory, has three points.

The results: PBG Alaskan Knights bt Alpine APL Pipers 9-7 (Anand lost to Carlsen; Arjun drew with Anish; Yagiz Kaan bt Vidit; Lagno drew with Divya; Batsiashvili bt Humpy; Abhimanyu drew with Murzin).

Cheq Mumbai Masters bt Ganges Grandmasters 12-3 (Vachier-Lagrave drew with Nepomniachtch; Pranesh bt Aronian; Mamedyarov drew with Dominguez Perez; Harika drew with Shuvalova; Yip bt Tsolakidou; Abhimanyu bt Daneshvar).

Fyers American Gambits lost to Alpine Pipers 3-15 (Sindarov drew with Carlsen; Nihal drew with Anish; Dubov lost to Vidit; Bibisara drew with Divya; Sarasadat lost to Humpy; Maurizzi lost to Murzin).

Triveni Continental Kings bt Alaskan Knights 11-6 (Firouzja drew with Anand; Yi bt Arjun; Aravindh bt Yagiz Kaan; Jiner lost to Lagno; Kosteniuk bt Batsiashvili; Pranav drew with Abhimanyu).

Clash of titans: Anand was involved in an interesting game with Carlsen before losing on time. SUDHAKARA JAIN

Chess in India is massive, says Carlsen

P.K. Ajith Kumar
BENGALURU

Ahead of the Global Chess League, Magnus Carlsen had joked about how his team, Alpine APL Pipers, had done during his absence last year and hoped that it would not do worse this time. He should be pleased now.

Pipers have gone top of the table despite Carlsen not being at his best so far.

He has won only one of his four games – against his old rival Viswanathan Anand, and that too on time – but his teammates K. Humpy and Vidit Gujrathi have been doing rather well.

The two Indians are, in fact, the best performing players in the league at the moment, both winning three of their games.

“The team is doing fantastic,” Carlsen said. “Three wins out of four is great. My performance has been a bit underwhelming, but since the team is doing well. I am happy. It is nice to see good crowds here. Chess in India is massive.”

INBRIEF

Abhinandh wins title in WTT Youth Contender

India's P. B. Abhinandh, the top seed, clinched the boys' u-19 singles title, defeating Damian Floro of Slovakia 11-5, 11-8, 11-9 in final of the WTT Youth Contender Tunis II on Sunday.

Champions League fixtures to honour Nepal flood victims

European football will pause before the 18 Champions League games this week to honour victims of flash floods and landslides in Nepal. "A moment of silence will be held and a banner will be displayed as a sign of solidarity and support ahead of all UEFA Champions League matches," the European football body said Monday. The banner will say: "You are not alone, Nepal."

The schedule: AEK Athens vs. LASK Linz; Club Brugge vs. Aston Villa (both at 10.15 p.m. on Tuesday); Borussia Dortmund vs. Villarreal; FC Porto vs. Manchester City; Lille vs. Real Betis; Real Madrid vs. Inter Milan (all at 12.30 a.m. on Wednesday). Barcelona vs. Feyenoord Rotterdam; VfB Stuttgart vs. Viking FK (both at 10.15 p.m. on Wednesday); Liverpool vs. Atletico Madrid; Napoli vs. Arsenal; Paris Saint-Germain vs. Slovan Bratislava; Sporting CP vs. Galatasaray (all at 12.30 a.m. on Thursday). Fenerbahce vs. AS Roma; PSV Eindhoven vs. Shakhtar Donetsk (both at 10.15 p.m. on Thursday); Bayern Munich vs. Bodo/Glimt; Como vs. RB Leipzig; Manchester United vs. Sabah FK; Slavia Prague vs. Lens (all at 12.30 a.m. on Friday). All times in IST.

Fiorentina sacks Grosso after just three games in charge

Fiorentina coach Fabio Grosso has been sacked after just three Serie A matches and as many defeats. Fiorentina has made a disastrous start to its Serie A campaign, having also struggled early last season before eventually avoiding relegation.

In a sporting crossover, Venkatesh and Sindarov play a game of chess

Sports Bureau

BENGALURU

Cricket met chess on Sunday night. Royal Challengers Bengaluru all-rounder Venkatesh Iyer, who has played for India in both short formats, took on the World No. 4 Javokhir Sindarov in a game of chess.

After the match against the Uzbek, played at RCB Bar & Cafe, Venkatesh said: "I got the opportunity to play with the world's No. 4 chess player. I managed to survive five minutes without losing."

Sindarov, who will challenge India's D. Gukesh for

Game-time: Sindarov and Venkatesh faced off on Sunday. SPECIAL ARRANGEMENT

the World championship this year, is in the city for the Global Chess League, in which he is playing for

Fyers American Gambits. He was joined by his teammates Daniil Dubov, Nihal Sarin, Bibisara Assaubayeva,

Sarasadat Khademalsharieh, and MarcAndria Maurizzi.

Venkatesh also spoke of Bengaluru's passion for multiple sports. "I've been to a lot of cities in the country, but the love for sports here is just amazing, and it goes well beyond cricket," he said.

"Whether it is football, athletics, chess, pickleball or paddle, people here take their sport seriously, both in playing and supporting it."

There was also an exchange of shirts between RCB and American Gambits.

Super-sub Gatti helps Juventus hold Milan

EURO LEAGUES

Agence France-Presse

ROME

Federico Gatti came off the bench and scored an injury-time equaliser as Juventus snatched a 1-1 draw with AC Milan in Serie A on Sunday.

Both teams arrived at the

Allianz Stadium after starting the season with back-to-back wins and remained unbeaten after a hard-fought affair.

Meanwhile, Arsenal manager Mikel Arteta said his side's performance in Sunday's statement 2-1 Premier League victory over Chelsea showed that it can become even better than

last season's title-winning model. Goals by Kai Havertz and Martin Odegaard, after Morgan Rogers had scored for Chelsea in the second minute, ensured a third win from three games for Arsenal. "It was an exceptional performance. I enjoyed every minute of it from the beginning to the end, and the beginning was tough," Arteta said.

The results: LaLiga: Alaves 5 (Boye 27, 51, 68, Mariano 36, Ibanez 90) bt Osasuna 2 (Budimir 46, 64-pen); Malaga 0 drew with Levante 0; Espanyol 1 (Fernandez 90+8) drew with Sevilla 1 (Stassin 85). **Serie A:** Bologna 2 (Piccoli 50, Dovbyk 90+1) drew with Sassuolo 2 (Doig 19, Adzic 56); Juventus 1 (Gatti 90+2) drew with AC Milan 1 (Cisse 68).

Nonpareil lives up to the billing in Khammam Plate

HYDERABAD: Trainer D. Netto's ward Nonpareil, ridden by Akshay Kumar, won the Khammam Plate, the chief event of Monday's (Sept. 7) races.

The winner is owned by Mr. Rajendran rep. Rapar's Galloping Stars LLP, M/s. Tripuranivenkata Aditya Chowdary & P. Ranga Raju. Akshay Kumar rode two more winners on the day.

1. CHAITANYA CHAKRAM PLATE (1,400M): CLASSY TOUCH (Neeraj Rawal) 1, French Lieutenant (Antony Raj) 2, Ashwa Jaffna (Gaurav) 3 and Evansville (P. Sai K) 4. 1-1/2, 4 3/4 and 1-1/2. Jackpot: 70%: ₹6, 295 (77 tkts.) & 30%: 252 (823 tkts.) Mini Jackpot: 3,145 (21 tkts.). Treble: (i) 70 (483 tkts.), (ii) 656 (56 tkts.).

Encore beckons? This will be the Indian cricket team's second appearance at the Asian Games, having pocketed gold in 2023. FILE PHOTO

For cricket to grow, it has to be played everywhere: Gavaskar

The continental competition provides a unique opportunity for India's stars to mingle with athletes from other sports; the 77-year-old hopes that the Men in Blue savour the experience

ASIAN GAMES

Vivek Krishnan

In an unrelenting cricket calendar where monotony can set in over run-of-the-mill bilateral assignments, a multi-disciplinary event like the Asian Games holds the promise of a novel offering.

The competition provides a unique opportunity for India's high-profile cricketers to mingle with athletes from other sports whilst attempting to win gold for the nation. Shreyas Iyer & Co. will be looking to do just that when they travel to Japan for the continental spectacle's T20 tournament from September 24 to October 3.

Gavaskar. FILE PHOTO

This will be the Indian cricket team's second appearance at the Asian Games, having pocketed gold in Hangzhou, China, in 2023.

Sunil Gavaskar hopes the Men in Blue savour the experience of a multi-sport carnival. "You get to know

and talk to athletes from other sports, and get to know what makes them tick. It will be a wonderful experience," he said during a virtual media interaction.

Though reports have emerged of the arrangements in Japan for the cricketers not being up to scratch, Gavaskar emphasised that such obstacles shouldn't dissuade the game's stakeholders from exploring newer markets.

"If cricket has to become a global sport, it has to be played in different parts of the world. At the Olympics, for example, you could play in a city where cricket isn't generally played. You might not always get the best facilities," the 77-year-old opined.

"For the game to grow, I

would encourage them to play wherever possible."

If cricket is to pique the curiosity of spectators at the Asian Games, the boy wonder that is Vaibhav Sooryavanshi will have to show up. The spunky 15-year-old, who cracked two half-centuries against Zimbabwe after a baptism by fire against England, will hope to continue his upward flight.

"Look in T20 cricket, you can't expect consistency. Vaibhav is the kind of batter who can win you three or four out of 10 games. But he's somebody with whom we need to have patience," assessed Gavaskar.

(Watch cricket at Asian Games 2026 on Sony Sports and Sony LIV from September 17).

Arshi, Zidaan, Hridaan, Akshat drive to glory

MOTORSPORTS

Sports Bureau

Nine-year-old Arshi Gupta continued her impressive run, securing maximum points in the Mini Max class in the fifth round, to win the MECO-FMSCI Indian National karting championship RMC India 2026 in Bengaluru on Sunday. Zidaan Arshaan Anees and Akshat Misra, both of Peregrine Racing, topped the Micro Max and Senior Max categories respectively. Hridaan Sanadhya of Crest Motorsports emerged winner in the Junior Max class.

Provisional results: Senior Max: Finals (17 laps): 1. Akshat Misra (Peregrine Racing) 15mins, 51.277secs, 2. Eshanth Vengatesan (MSPORT) 15:56.416, 3. Aahil Mecklai (Rayo Racing) 15:57.954. **Pre-Finals (14 laps):** 1. Akshat 13:11.439, 2. Rohaan Madesh

(Peregrine) 13:12.760, 3. Eshanth (13:13.459). **Best Rookie:** Eshanth.

Junior Max: Finals (16 laps): 1. Hridaan Sanadhya (Crest Motorsports) 14:58.444, 2. Rivaan Dev Preetham (MSPORT) 15:02.265, 3. Hamza Balasinarwala (Crest) 15:04.813.

Pre-Finals (14 laps): 1. Hridaan 13:12.488, 2. Swarnav Das (Crest) 13:15.148, 3. Rishik Rohit Reddy (MSPORT) 13:15.975. **Best Rookie:** Rivaan.

Mini Max: Finals (14 laps): 1. Arshi Gupta (Leapfrog Racing) 13:31.660, 2. Ridhaan Anil Kumarr (Red Rabbit Racing) 13:39.733, 3. Shivneel Karthikeyan (MSPORT) 13:39.854.

Pre-Finals (12 laps): 1. Arshi 11:34.763, 2. Ridhaan 11:41.565, 3. Shiv Tummala (Peregrine) 11:42.876. **Best Rookie:** Arshi.

Micro Max: Finals (12 laps): 1. Zidaan Arshaan Anees (Peregrine) 12:09.957, 2. Rudrapratap Singh Shekhawat (Leapfrog) 12:10.710, 3. Ayansh Patil (MSPORT) 12:14.196.

Pre-Finals (12 laps): 1. Zidaan 12:08.459, 2. Ayansh 12:08.797, 3. Rudrapratap 12:16.055. **Best Rookie:** Shriyan Rao Thakkallapelly (Peregrine).

Happy bunch: Young champs Hridaan, Arshi, Zidaan and Akshat.

CYK A ND-NDE

R. Kaushik

The Cambridge Dictionary defines *introspection* as the *examination of and attention to your own ideas, thoughts, and feelings*.

Introspection must be a ruthlessly honest endeavour. It's not an exercise to impress others but to look inwards, reflect on what one is and what needs to be done to become the best version of oneself. It calls for taking ownership of one's actions, of accepting mistakes and errors, if any, and of zealously working towards eradicating those mistakes and making amends, if so required.

There is no better example in Indian cricket of the use of introspection as a self-betterment tool than Ishan Kishan, the pocket-sized dynamite who has embarked on a sensational journey of reinvention that has made him one of the hottest properties, if only in the white-ball ecosystem for the time being.

To say that, at the beginning of 2026, his international career was at a crossroads will be a mild understatement. The destructive left-hander had worked himself out of favour as he allowed frustration, if not petulance, to get the better of him.

Overlooked from all three international playing XIs in the interest of team requirements and balance despite having done little wrong, Kishan took a leave of absence midway through the tour of South Africa in 2023-24, citing the need for a mental reset.

In choppy waters

But when he refused to obey the dictates of the Board of Control for Cricket in India and made himself unavailable to play domestic cricket for Jharkhand despite practising for IPL 2024, which was imminent, he found himself in choppy waters. In an unequivocal warning, the BCCI stripped him of his central contract - as it did with current T20I captain Shreyas Iyer. The unsaid message was clear - don't take anything for granted.

Kishan had one of two paths to choose - wallow in self-pity, rail at the injustice of it all and allow himself to go to seed, or smell the coffee, accept that he had done himself no favours and wake up to the reality that if he aspired to represent the country again, he would have to not just produce the runs expected of him but to reiterate without any scope for doubt that he had learned his lesson.

The Jharkhandi did all that and more. He was outstanding in domestic cricket

across formats, not just batting with flair and keeping with assurance but also slipping effortlessly into the role of a leader. His tactical acumen revealed itself time and again, manifesting in a maiden domestic title - the 20-over Syed Mushtaq Ali Trophy - last season with the captain himself starring in the final with a brazen century.

As India grappled with opening woes ahead of the home T20 World Cup, where they would be defending the title won in Bridgetown under Rohit Sharma in June 2024,

Kishan suddenly emerged as a very obvious and viable option. That the mandarins occupying the corridors of power had forgiven him became obvious when Suryakumar Yadav, the skipper, called up the younger man and asked him if he would win the team the World Cup.

Clearly, it wasn't a call Suryakumar made on his own. He would have consulted his bosses before approaching Kishan during a brief but very pithy chat. "*Chhotu, World Cup jitayega?*" the captain asked the wicketkeeper-batter, who responded with, "*Bharosa karogey?*" (Will you trust me?). Suryakumar's reply was instantaneous - "*Chal, kiya*" (Done). And just like that, Kishan was back in favour, back in business, back doing what he loves the most.

Celebrating the reintegration

Needless to say, Kishan kept up his end of the bargain. He celebrated his reintegration with international cricket with scores of 76, 28 and 103 in his second, third and fourth outings back, against New Zealand in India's final engagement before the World Cup. All these knocks came at No. 3, but with Sanju Samson suddenly blowing cold, he was thrust into the role of the opener-wicketkeeper at the World Cup, where he reeled off 20, 61, 77, 18 and 0 in the first five fixtures.

However, India were unable to get off to meaningful starts as opponents started to exploit the all-left opening salvo with off-spinners of varying quality.

Abhishek Sharma was in the middle of a horror run and therefore to break up the monotony of two left-handers, the think-tank took a punt on Samson, brought him back as opener and stumper and pushed Kishan down to No. 3 from the Super Eight fixture against Zimbabwe onwards. Samson came to the party with breathtaking knocks in the last three matches, including in the semis against England and the final against New Zealand, but Kishan didn't seem the drop

Listening to Kishan speak over the past few months is an eye-opening experience. One can see the deep impact of losing the central contract and finding himself in the dumps, but one can also easily make out that he has now become a more mature, grounded and realistic human being

Kishan 2.0 – a sensational reinvention

Having made giant strides, the southpaw, who struck a double-hundred in the Duleep final, could not have asked for a better start to the First Class season

R.V. MOORTHY

to one-down with 38 (24b), 10 (6), 39 (18) and a whirlwind 25-ball 54 in the title clash.

Chhotu did help Suryakumar lift the World Cup, but while his fortunes have continued to be on the upswing, the man who created history by becoming the first to oversee a successful title-retention campaign was immediately dumped without so much as a thank you.

His T20I heroics have brought Kishan back into the ODI mix as well. In June, he marked his comeback with a frenetic 125, off a mere 79 deliveries, against Afghanistan in Lucknow, in what was just his second 50-over international in 32 months. By this time, he had led Sunrisers Hyderabad for the first half of IPL 2026, with regular skipper Pat Cummins travelling with the squad but not cleared to enter the fray by Cricket Australia.

Even though he knew that he was only keeping the seat warm for the Australian Test and ODI skipper, Kishan wasn't a stand-in captain in the strictest sense. He brought his tactical acumen and man-management skills into play, led from the front and left the team in a good space - and handily placed to make a charge for the playoffs - when the Aussie reassumed charge.

Cummins was quick at every opportunity to laud Kishan's leadership skills in his absence, their mutual respect apparent from the repeated discussions the nominated captain had with the man who had led in his absence when the two were reunited on the field of play for the second half of the season.

Distinct and stated desire

Kishan isn't merely content with white-ball laurels, though. At least among Indian batters, there is a distinct and stated desire to represent the country in

Test cricket. Tilak Varma, the gifted 23-year-old, said as much on the eve of the ongoing Duleep Trophy final, where he is leading South Zone against Kishan's East.

Tilak has made a name for himself as an exuberant, new-age T20 player, a reputation that has landed him the vice-captaincy of the national side, and it won't be long before he becomes a 50-over certainty too. But he is consumed by the ambition to play for the country in the five-day format.

Since debuting in the Ranji Trophy for Hyderabad when he was only 16 years old, the rangy left-hander has stacked up an average of 55.77 from 24 First Class matches. He has often been unable to represent his state in the red-ball game because invariably, India's players are involved in some T20 outing or the other during the Ranji Trophy, but it's only a matter of time before Tilak gatecrashes the Test side as well.

In that race, he has Kishan for company and competition. Obviously, the shorter man is considerably older than Tilak and has greater experience of first-class cricket - 66 matches before the Duleep final, an average of just under 40 and nine hundreds with a best of 273. Kishan's red-ball quest is anything but straightforward.

The effervescent Rishabh Pant is the designated wicketkeeper-batter who is relishing his second coming at the international level after a long break following his terrible car accident in December 2022, while Dhruv Jurel has stolen a significant march as the gloveman-in-waiting.

Jurel's Test debut came when Pant was recuperating from a series of surgeries, and he immediately caught the eye with his agility and compactness behind the sticks and his composure and technique

R. RAGU

in front of it. In only his second Test, he steered the team to a tense victory in Ranchi in the company of current skipper Shubman Gill and has stacked up two centuries in his last seven Tests.

How highly he is rated by the leadership group is evidenced by the fact that he is in the Test XI as a specialist batter, occupying the No. 6 position so that he can split left-handers Pant and Ravindra Jadeja.

His last Test knock was a flowing unbeaten 115 in Colombo a fortnight back and even though he is widely regarded as a terrific player of spin, it is hard to see him being dislodged when India play their next Test, in seam-friendly Wellington in November.

Work cut out

Kishan knows therefore that he has his work cut out, but no one also knows better than him that hard work can take you places you had never imagined were accessible. His statement-making double-hundred in the Duleep final in Chepauk is exactly the kind of start to the domestic First Class season he would have envisaged, and one can rest assured that when he is not on India white-ball duty, he will torment bowlers whilst masterminding Jharkhand's fortunes in a leadership capacity.

Listening to Kishan speak over the last few months is a refreshing, eye-opening experience. One can see the deep impact of losing the central contract and finding himself in the dumps, but one can also easily make out that he has now become a more mature, grounded and realistic human being who has still retained his innate impishness and the slant towards mischief. Clarity of thought is evident every time he opens his mouth, a clarity that is a spillover from his awareness in the middle.

In Ishan Kishan's fall from grace and his willingness to not just climb back on the horse but become a champion jockey again is a shining example of the wonders self-belief and commitment to the cause can catalyse. The intelligent young man is no longer chasing shadows or slaying inner demons. More power to him.

THE GIST

Kishan's T20I heroics have brought him back into the ODI mix. In June, he marked his comeback with a frenetic 125 against Afghanistan in Lucknow, in what was just his second 50-over international in 32 months

The southpaw isn't merely content with white-ball laurels, though. He knows that he has his work cut out, but no one knows better than him that hard work can take you places you had never imagined

In recent times, one can see the deep impact of the batter losing the central contract and finding himself in the dumps, but one can also easily make out that he has now become a more mature, grounded and realistic human being
