Sub-registrars appointed across 39 subdivisions

The Hindu Bureau
NEW DELHI

The Delhi government has appointed sub-registrars across all 39 subdivisions through a technology-based randomisation process for the first time, the Chief Minister's Office said on Friday.

“For the first time, the Delhi government has adopted an information technology-based randomisation process for the posting of sub-registrars. The objective is to complete the posting process through a clear, transparent and fair system,” an official statement said.

Airport waterlogged, flights affected as rain lashes Delhi

Commuters wade through flooded underpasses near the airport to reach on time; Palam receives heaviest rainfall in city — 72.2 mm in 3 hours; waterlogging, traffic snarls reported across Capital

The Hindu Bureau
NEW DELHI

Heavy afternoon showers led to waterlogging in many parts of the city and disrupted traffic movement.

At the Indira Gandhi International (IGI) Airport, passengers were seen wading through stagnant water, even as commuters were seen navigating through flooded underpasses near the airport to reach on time. The downpour also caused flight delays and diversions.

“Delhi Airport witnessed heavy rainfall this afternoon; as a result, the approach road and forecourt areas experienced water accumulation. The accumulated water was cleared within some time,” read a post from the Delhi airport's official X handle.

In a subsequent release, the airport operator stat-

Inundated: Passengers at IGI Airport on Friday afternoon; waterlogged stretch near the Yamuna Bazar underpass. ANI/ SUSHIL KUMAR VERMA

ed, “The inclement weather also impacted flight operations, which led to the delays and diversion of some flights. Our on-ground teams are diligently working with all stakeholders to ensure a seamless and efficient passenger experience.”

A Public Works Department official said, “We deployed pumps to clear out

floodwaters. The catchment area of the underpass [near Terminal I] is big, and due to flooding in Mehrauli, waterlogging was reported in the tunnel, which was cleared later.”

As per the India Meteorological Department, Palam received 72.2 mm of rainfall in the three hours between 2.30 p.m. and 5.30 p.m., the highest

among the city's weather stations, followed by 34.6 mm at Lodhi Road, 32.6 mm at Safdarjung (Delhi's representative weather station), 20 mm at the Ridge and 12 mm at Ayanagar.

Waterlogging and traffic snarls were reported from Sadar Bazar, Kamla Nagar, ITO, Mahipalpur, Dwarka, Subroto Park, Saket, Hamdard, Patparganj and C.P.

Seeing IPS officers beating protesters very distressing, says Justice Bhuyan

Press Trust of India
NEW DELHI

Supreme Court judge Justice Ujjal Bhuyan on Friday expressed concern over the alleged assault of protesters by police personnel during the recent youth-led protests at Jantar Mantar, saying the detachment expected of police officers appears to be disappearing and terming it a “matter of grave concern”.

Speaking at the launch of retired Indian Police Service officer Yashovardhan Azad's book ‘Policing the Republic’, Justice Bhuyan said, “All of us are dismayed when we see young officers of the Indian Police Service personally going and assaulting protesters. This is something very, very distressing to observe.”

Congress MP P. Chidambaram and former Maharashtra police chief D. Sivanandhan were among those present at the event.

“For most common people, a policeman on the street wearing a whistle and a lathi represents the power and authority of the

‘2,873 hits via facial scans at Jantar Mantar under check’

The Hindu Bureau
NEW DELHI

Verification of 2,873 people who were *prima facie* identified as having criminal antecedents through the facial recognition system at the Jantar Mantar protests is under way, a senior police officer said on Friday. The officer added that field visits are being

conducted to verify whether the 2,873 names generated by their facial recognition system were at the protest site between July 20 and 26. Another officer said they are reaching out to jail authorities to establish whether any of the flagged individuals were in prison or out on bail or parole during the six-day period.

state. When they feel wronged, they seek the help of the police. It is, therefore, of utmost importance that the police force maintains its credibility,” said the apex court judge.

Following Constitution

He added, “It can do so only by strictly adhering to the Constitution, by functioning as a truly professional force, acting impartially, displaying courage

and conviction, and adhering to secular principles.”

Question of rights

Invoking the Supreme Court's judgment in the 1997 *D.K. Basu v. State of West Bengal* case, he said the court had posed a fundamental question — does a citizen shed his fundamental rights the moment he is arrested? “The answer indeed has to be an emphatic no,” he said.

Journalists to move HC seeking police assault footage

Lavpreet Kaur
NEW DELHI

The two women journalists, who accused Delhi Police of assaulting them inside the Saket police station, said on Friday they would move the Delhi High Court seeking directions to release CCTV footage of the incident.

Speaking at a press conference, Shaheen Khan, who works with 4PM News Network, and independent journalist Nafeesa Khan al-

leged they were forcibly taken to the police station on Thursday while they were covering an event attended by Chief Minister Rekha Gupta and Union Home Minister Amit Shah.

They said they were beaten up in a closed room by a plain-clothes woman police officer.

In a representation submitted to the President of India, Sanjay Sharma, Editor of 4PM News Network, a digital news platform, sought an independent in-

The two women journalists were not provided with a memo of the ‘arrest or the grounds for their detention’, said the Editor of 4PM News Network

quiry into the incident and action against the police personnel involved.

“The two journalists were engaged in newsgathering near Max Hospital in

Saket around 11.30 a.m. on September 3. They were recording visuals and commentary on cleaning work being carried out in the area ahead of an expected VVIP visit by the Union Home Minister. Police personnel arrived at the spot and forcibly took the two journalists away,” he alleged.

Mr. Sharma also alleged that the two women journalists were subjected to derogatory, communal and casteist remarks, in-

cluding comments targeting Ms. Khan's religious identity.

The two journalists were not provided with a memo of the “arrest or the grounds for their detention”, he said.

The Editor of the digital platform also sought an independent and time-bound inquiry into the incident and requested that the Station House Officer of Saket police station be removed or suspended pending the inquiry.

BRICS Summit: command centre set for launch today

The Hindu Bureau
NEW DELHI

The New Delhi Municipal Council will launch a 24x7 command centre on Saturday, which will operate till September 14 to monitor civic services and ground-level issues during the two-day BRICS Summit starting on September 12, an official said on Friday.

Nodal officers from the agencies concerned, including Delhi Police and the Central Public Works Department, will be deputed round the clock at the centre located in Palika Kendra, the official added.

Meanwhile, a senior officer said traffic movement is likely to be affected in central, south and south-

Workers painting a sidewalk near Bharat Mandapam on Friday. SHASHI SHEKHAR KASHYAP

west Delhi for four days from September 10. Nearly 4,800 traffic personnel will be deployed to manage the movement of delegates.

Court rejects B&B owner's bail petition

Press Trust of India
NEW DELHI

A Delhi court has rejected the interim bail plea filed by the owner of Flourish Stay, a bed-and-breakfast (B&B) facility where a fire killed 23 people on June 3.

Additional Sessions Judge Samar Vishal was hearing Lovkesh Bajaj's plea on Wednesday seeking four weeks interim bail on medical grounds, during which he said the medical exigency cited by the accused had already been addressed through surgery at Ram Manohar Hospital. The court also said a person in judicial custody is entitled to adequate treatment and that cannot be ignored.

Three persons rescued from bonded labour

The Hindu Bureau
KOLKATA

Three persons, including two minors, were rescued from bonded labour in Alipurduar district of West Bengal on Thursday, the police said on Friday. The victims, comprising an adult male and two children, were working at a cold storage facility. Two accused, Shiburam Mondal and Abbas Sk., have been booked in the case. The children are both 16 years old, while the adult victim, Kalipada Mondal, is about 50, the rescuers said.

Jharkhand BJP plans to lay siege to DC, SP offices from Sept. 8

JMM govt. has not withdrawn cases filed against student protesters despite ultimatum, says party; programme to be extended phase-wise

Amit Bhelari
PATNA

The Bharatiya Janata Party (BJP) in Jharkhand on Friday announced that it would launch a *gherao* (siege) of the offices of the Superintendent of Police (SP) and the Deputy Commissioner (DC) in all 24 districts from September 8, after the 48-hour ultimatum given to the State government to withdraw police cases against the protesting students ended.

On September 2, a BJP delegation, led by BJP State president Aditya Sahu and Leader of the Opposition in the Assembly Babulal Marandi, met Chief Secretary Avinash Kumar and submitted a memorandum to withdraw cases filed against students during the protests over alleged irregularities in several examinations conducted by the Jharkhand Public Service

Jharkhand BJP president Aditya Sahu in Ranchi on Friday. ANI

Commission and the Jharkhand Staff Selection Commission.

The BJP had also demanded a Central Bureau of Investigation probe.

Mr. Sahu announced the phase-wise *gherao* during a press conference in Ranchi. “The 48-hour ultimatum has now ended. BJP workers will now raise the students’ voices by staging protests and *gherao* DC and SP offices over four consecutive days. The programme will be conducted in six dis-

tricts each day,” he said. According to the schedule, on September 8, protests will take place in Ranchi, Dumka, Hazaribagh, Giridih, Jamshedpur, and Garhwa; on September 9, in Koderma, Sahibganj, Bokaro, Palamu, Simdega, and Chaibasa. September 10 will see protests in Serai-kela, Pakur, Dhanbad, Gumla, Latehar, and Chhota, and on September 11 in Ramgarh, Deoghar, Lohardaga, Khunti, Godda, and Jamtara.

‘Students beaten’
Mr. Sahu said never has such treatment of students been witnessed.

“Cases have been registered against students. They were beaten by Jharkhand Mukti Morcha (JMM) workers, yet cases were filed against the students. The public wants to know why no cases have been registered against the JMM workers,” he said.

Several rivers breach danger mark in five Bihar districts; CM surveys affected areas

Press Trust of India
PATNA

Five districts in Bihar are experiencing a flood-like situation as several rivers are flowing above the ‘danger level’ in the State following incessant rain in the upper riparian nation of Nepal and neighbouring Jharkhand.

With the swelled Ganga, Gandak, Kosi, Burhi Gandak, Bagmati, Punpun and Ghaghra rivers inundating several places, Chief Minister Samrat Choudhary conducted an aerial survey of the affected areas on Friday and reviewed relief and rescue operations.

In a post on X, Mr. Choudhary said, “I instructed officials to take swift and effective action to ensure that the public in the affected areas receives all possible assistance promptly, faces no difficulties, and that the safety of lives and property is ensured.”

Several low-lying areas of Patna, Vaishali, Muzaffarpur, Bhagalpur, Bhojpur, Khagaria, Purnea,

An aerial view of the partially submerged area in floodwater as swollen Ganga river conditions persist in Vaishali on Friday. ANI

Madhepura, Saharsa and Katihar districts witnessed a flood-like situation on Friday. No casualties have been reported yet and people residing in the river floodplains have been moved to safety, an official said.

According to the Water Resources Department, almost all rivers have been showing a rising trend.

In Patna, the Ganga river was flowing above the danger level at Digha Ghat, Gandhighat, Hathidah and Maner. The river is also above the danger level in Buxar, Munger, Bhagalpur,

and Kahalgaon.

The Punpun river was flowing above the danger level in Sripalpur and Punpun areas in Patna, while the Ghaghra river has breached the mark in Darauli and Siwan, the department said.

“Patna, Bhojpur, Vaishali, Lakhisarai, and Bhagalpur are experiencing a flood-like situation, and people living in low-lying areas have been affected by rising water levels of the river Ganga and Kosi, following torrential rain,” said a senior official of the Water Resources Department.

‘Rajasthan’s BJP govt. shortchanged ULBs, misused power’

Press Trust of India
JAIPUR

Rajasthan Congress president Govind Singh Dotasra on Friday accused the Bharatiya Janata Party (BJP) government of weakening urban local bodies (ULBs) by withholding grants and misusing official machinery during the nomination process for the upcoming

elections.

Mr. Dotasra also alleged that the government has reduced the representation of backward classes in the delimitation and reservation exercise.

Addressing a press conference here, he alleged that no SC or ST reservation had been provided in any seat across 10 municipal corporations and that

only one seat had been reserved for an OBC woman in a municipal corporation. “The reservation available to OBCs has been reduced from 21% to 18% in these elections,” he alleged.

On Congress’s picks, he said nearly half of the candidates contesting the elections are below 40 years of age and more than one-third are women.

He accused the State government of not releasing the full grants due to ULBs. Citing figures, he claimed ₹1,220.06 crore was provided against ₹1,800.47 crore due in 2025-26.

Mr. Dotasra also accused the BJP of misusing power during the ULB nominations claiming that it allowed its candidates to file papers after the deadline.

HC seeks Delhi govt., DJB stand on plea to regularise contractual sewer workers

The Hindu Bureau
NEW DELHI

The Delhi High Court has sought the stand of the government and the Delhi Jal Board (DJB) on a public interest litigation seeking the regularisation of all contractual sewer workers as permanent employees.

A Bench recently issued a notice to the authorities on the petition by Dalit Adivasi Shakti Adhikar Manch and sought a response in six weeks. The plea said DJB has thousands of contractual sewer workers, who come from the most marginalised and economically weaker sections of society

and are engaged on contractual basis without any security of tenure or statutory benefits. The plea said these workers perform “hazardous duties” that expose them to “grave risks to life, health and human dignity”. The matter would be heard next on November 20.

Warning on warming

India must shed its victim mindset while acting on climate change

The United Nations Environment Programme’s report, Limiting Overshoot, is a reminder that breaching the 1.5°C global warming limit would bring irreversible losses that adaptation cannot undo. Were all countries to deliver on their climate pledges today, the globe is still poised to heat 1.8°C and on current policies, 2.6°C. Given that the limit has already been breached – and, with the ongoing heating in the central equatorial Pacific expected to burgeon into one of the strongest El Niños in recent history, likely again in 2027 – the report is an acceptance of the scientific reality that we are in a 1.5°C world, while resisting the conclusion that nothing more can be done. The authors describe an “overshoot, peak and decline” pathway under which average global temperatures rise above 1.5°C but countries collectively hold the peak as low as possible and then bring them back below the limit by the end of the century. Neutralising the heating effect of even a tenth of a degree, the report argues, is far harder than preventing that rise in the first place. This in itself is nothing new. What is new is the emphasis on greenhouse gases beyond carbon dioxide. Action on methane, responsible for about 0.5°C of current warming, is considered the most effective way to slow warming in the near-term. Over 155 countries – India is not among them – have joined the Global Methane Pledge to cut anthropogenic methane at least 30% below 2020 levels by 2030.

That absence reflects the familiar tension between reports of this nature, which emphasise mitigation, and major developing economies such as India. They stress that they are already en route to moving away from fossil fuels and, being vulnerable to the impacts of historical stocks of carbon, deserve greater financial support and affordable technology from richer developed countries responsible for the crisis. The latest report unfortunately has little to say on adaptation finance, though there are previous assessments on the topic. With countries set to convene in Türkiye in November for COP31, familiar disagreements are likely to surface – but in the aftermath of the Bhotekoshi disaster in Nepal, India’s position too has been complicated. Nepal’s Foreign Affairs Minister, Shisir Khanal, has said that major industrial emitters such as China, the United States and India must consider the impact of rising temperatures on small countries such as Nepal. For India, this list means that a section of the world – despite India’s position as a victim of climate change with below-world-average per capita emissions – sees it as part of the problem. India must take such perceptions seriously and, rather than ignore the reality of a 1.5°C world, should calibrate its messaging to adapt to it.

Out of neglect bin

The perimenopausal policy will ease access to care for women in midlife

Women’s health care can be accused of being focused entirely on the reproductive age group. Menopause, for instance, is a natural transition phase, but even when its symptoms are severe and debilitating, women seldom have access to health care, and are forced to ‘just endure’. Given the huge care gap that exists here, it is appreciable that Tamil Nadu and Karnataka have taken the step to move ahead with the announcement of a perimenopause/menopause policy. Both the States made the announcement within a short while of each other, in August. The primary benefit, besides retrieving women’s mid-life care from the neglect bin it has been languishing in so far, is that the physical and mental-health needs of women in this stage of life will become part of routine government health care, making access to care easier. Tamil Nadu Health Minister K.G. Arunraj made the announcement of a perimenopausal care policy in the Assembly on August 17. He said the aim was to facilitate early identification of physical and mental health needs of perimenopausal women, with screening, counselling and treatment services through PHCs and higher centres. On August 4, Karnataka Health and Family Welfare Minister U.T. Khader, introduced ‘Ruthu Thare’ as the country’s first dedicated women’s health policy with a strong focus on perimenopause and menopause, at a meeting in Bengaluru. Menopause is the permanent end of menstrual periods and reproductive ability, confirmed after 12 consecutive months without a cycle. It happens when the ovaries naturally slow down and produce lower levels of the hormones oestrogen and progesterone. The transition time, leading up to menopause, is the perimenopausal period which can bring irregular periods and bodily changes over several years. Common symptoms include hot flashes, sleep trouble, extreme mood changes, joint pain, debility and fatigue, and for many women these can be disruptive.

Both States are planning outreach screening and counselling at the community level, women’s-health clinics, district-level well-women screening, and community outreach, besides referrals to district hospitals and government medical colleges. No doubt, this is a progressive measure which will also give legitimacy to the complaints of menopausal women, but the proof of any pudding is in the eating. How effective these policies are will be measured only during implementation. Among the critical points today is that the symptoms of menopause are not treated with adequate seriousness even by the medical community; so, adequate awareness generation among medical professionals and the beneficiaries and their families as well is a must.

For decades, India’s relationship with West Asia operated under a doctrine of deliberate ambiguity and even of some strategic distance. Delhi treated the “Middle East” primarily as an economic hinterland: a critical source of crude oil, a reliable destination for outbound labour, and a vital conduit for remittances. When regional crises flared, Indian foreign policy defaulted to hedging, balancing relations between competing power centres such as Riyadh, Tehran, Tel Aviv, and Abu Dhabi without tying itself to the security obligations of any single capital. Of late, we called that approach “multi-alignment”.

What worked until now

But while India was careful to be friendly to all, it was not too friendly to any, in an effort not to offend any of the various capitals in the mix. The logic was clear: there was much to be gained from all parties in what was widely seen to be a likely West Asian economic renaissance. The region was seen through a macroeconomic vision that highlighted its convenient geographic features, its immense natural resources of oil and gas, massive capital accumulation, and its receptivity to imported labour and skills, of which India has a surplus. In this framing, the global economic centre of gravity was seen as inexorably shifting away from an aging, debt-burdened West toward a highly dynamic Asia, positioning West Asia as the ultimate maritime and terrestrial bridge between a declining West and a rising East.

This defensive and essentially transactional posture served India well in an era when the United States stood as the undisputed guarantor of West Asian security, keeping sea lines of communication open and maintaining regional stability. However, the geopolitical bedrock of West Asia is undergoing a violent structural shift. As Washington recalibrates its global commitments and retreats into an unpredictable “selective engagement” posture, a profound security vacuum has emerged, sparking a scramble among regional states for durable security guarantees. Here, has India been caught napping, continuing a business-as-usual approach that risks early obsolescence?

West Asian capitals no longer view distancing, whether called non-alignment or multi-alignment, as a virtue. They are actively seeking alternative, dependable security partners who can offer more than diplomatic platitudes and routine economic cooperation. This structural reality was highlighted by the signing of the Mecca Joint Defence Agreement, bringing together Saudi Arabia, Türkiye, and Pakistan into a collective defence arrangement. While framed as a defensive effort to manage shared

He currently chairs the Parliamentary Standing Committee on External Affairs

A changing West Asia requires a more assertive Indian role in pursuing real, hard-power security partnerships

vulnerabilities, the pact signals a broader security realignment. By linking Gulf capital with Turkish defence technology and Pakistani military manpower and skill, the agreement creates a powerful new security architecture right at India’s western maritime doorstep.

A clear signal of change

For New Delhi, the Mecca Agreement is not an isolated diplomatic transaction; it is a clear structural signal that West Asia’s security framework is being fundamentally rewritten, often by actors whose strategic interests directly run counter to India’s own long-term objectives. While India’s strategic silence on this development is understandable, it still begs the question: what next? The growing influence of external powers and hostile regional pacts directly threatens India’s trade routes, energy security, and the welfare of millions of Indian citizens living in the Gulf. Is India going to build its own partnerships, or become irrelevant to the region’s security?

If India continues to rely on legacy diplomatic processes and transactional commerce, it risks being marginalised in a region essential to its national survival. The challenges are formidable. The eruption of hostilities involving Iran demonstrated that modern, highly integrated economic infrastructure remains profoundly fragile when subjected to grey-zone, asymmetric warfare. State-of-the-art port facilities, energy networks, and logistics corridors proved highly vulnerable to low-cost drones, showing that capital-intensive infrastructure cannot fully compensate for localised security vacuums. Hyper-secure economic enclaves will remain perpetually exposed to the spillover effects of surrounding instability in the region. Since the modern Gulf model relies heavily on foreign corporations and expatriate labour, regional stability is intimately tied to global perception. If security risks cross a certain psychological threshold, the talent and capital that flowed in seamlessly can exit just as rapidly. And when narrow naval chokepoints or overland trade routes face active disruption, global supply chains inevitably stall, revealing that these ambitious trade corridors are only as strong as their most unstable geographic link.

Against this critical background, the assumption that trade ties and diaspora diplomacy alone can preserve Indian influence is rapidly unravelling. A region grappling with maritime threats in the Red Sea, drone strikes on critical infrastructure, involvement in conflicts in Iran, Yemen, Sudan, the Strait of Hormuz and now the Bab el-Mandab, requires partners capable of providing tangible security assets.

West Asian powers are hungry for hard-power options such as naval patrols, intelligence sharing, defence-industrial collaboration, and credible counter-terrorism capabilities. If India Delhi-dallies over stepping into such a role, others will fill the void, as Türkiye has already demonstrated in Mecca.

The hard moves India must make

To protect its strategic space, New Delhi must contemplate a decisive doctrine change, evolving from a passive beneficiary of regional stability into an active guarantor of it. This requires moving beyond high-level bilateral visits and economic summits to actively project hard power into the western Indian Ocean and the broader West Asian region. India’s immediate focus must be the rapid expansion of naval and maritime security partnerships across key choke points, including the Strait of Hormuz, the Gulf of Oman and the Gulf of Aden, the waters off the Somali coast and the Bab-el-Mandeb. By embedding its naval footprint more deeply through joint maritime patrols, permanent logistics access arrangements, and interoperable surveillance networks with friendly Gulf states, India can establish itself as a, if not the, premier net security provider in its immediate neighbourhood.

Furthermore, India must leverage its growing defence manufacturing ecosystem to offer West Asian states a reliable alternative for hardware and technology. Collaborative defence ventures, joint military exercises with real operational teeth, and deep intelligence-sharing mechanisms must replace mere procurement discussions. Developing robust bilateral and “minilateral” security frameworks with partners such as the United Arab Emirates or Israel, and separately even with Saudi Arabia, will allow Delhi to build a counterweight against hostile axes without succumbing to rigid Cold-War style alliances. The goal is not to entangle India in foreign quagmires, but to build a strategic deterrence web that safeguards Indian interests and reassures regional allies.

The era of passive presence in West Asia has reached its natural end. The Mecca Agreement serves as a stark reminder that regional security arrangements will coalesce with or without Indian participation. If Delhi wishes to secure its economic destiny, safeguard its energy arteries, and claim its rightful place as a leading global power, it must act with urgency and ambition. Moving decisively beyond routine diplomatic engagement to construct real, hard-power security partnerships in West Asia is no longer just a strategic choice for India. It is an imperative for its national security.

A BIT of a reset, with a wider debate

It has been widely reported that India is revising its model bilateral investment treaty (BIT) and that the revised text will soon be placed before the Union cabinet. The seeds of this were sown when Finance Minister Nirmala Sitharaman said in the Union Budget speech in 2025, that India was considering revamping its 2015 Model BIT. The treaty was adopted as part of a broader appraisal process launched after several foreign investors sued India for BIT breaches. The two key outcomes of this appraisal were the unilateral termination of BITs and the adoption of a new model BIT as the basis to launch new negotiations.

A model that is out of balance

In the last decade or so, India has managed to conclude only a handful of BITs based on its 2015 model. This reveals the many limitations of the 2015 model, which many scholars, including this writer, have repeatedly pointed out. If investment treaties aim to balance the two competing objectives of investment protection (one end of the spectrum) and the state’s right to regulate (the other end), the Indian model BIT tilts heavily towards the latter. This creates doubts among countries that export capital to India about the legal protection afforded to their investments. These doubts are exacerbated by high regulatory risks, not-so-well-developed governance models, and an agonisingly tardy judicial system. As these concerns have grown louder, India has rightly decided to revisit the model, apparently with the objective of pulling the pendulum back towards the centre.

Any process of review of BITs has two core components. The first is on what substantive and procedural changes need to be made to the law; and the second is about what processes need to be followed to ensure the robustness of the outcome. The first aspect has attracted considerable attention, with experts pointing out

Prabhash Ranjan

Professor and Vice Dean (Research), Jindal Global Law School, and was part of the team of experts assembled by the Law Commission of India to study the 2015 draft model bilateral investment treaty (BIT)

Revising India’s bilateral investment treaty (BIT) requires consultation and stronger democratic accountability

the necessary legal reforms, such as making it easier for foreign investors to use international arbitration for treaty claims, enhancing the substantive protections for foreign investment, and having more investment facilitation measures. However, the second issue has not been deliberated much.

Concerns about democratic deficit

Since international economic treaties, including those on foreign investment, have a conspicuous impact on citizens, it brings into play the all-affected principle in democracy. In other words, whether those affected by, say, an investment treaty should have a right to participate in decision-making. If those affected are not able to participate effectively in decision-making, say, through their elected representatives or other civil society organisations, it raises concerns about ‘democratic deficit’ in the treaty-making process. Originating in debates in Europe, ‘democratic deficit’ refers to the insufficient oversight of technocrats and bureaucracies, or the executive in general, including the political executive, who negotiate and evolve treaty frameworks behind closed doors. The lack of oversight may take many forms, such as a lack of or inadequate parliamentary supervision of the treaty-making process, and an absence of an external consultative process with other stakeholders, including subject-matter experts and civil society organisations.

To overcome the charge of ‘democratic deficit’, many countries, such as the United Kingdom and Australia, mandatorily place the text of the negotiated treaty before ratification on the floor of the Parliament, enabling it to express its views. Specifically, in the context of model BITs, Norway held two rounds of public consultations – in 2008 and 2015 – on an updated draft. Likewise, Colombia released its model BIT for public

consultation. India, too, in March 2015, circulated its draft 2015 model BIT for public comment. This provided an opportunity for the Law Commission of India (LCI) to assemble a team of experts to study the draft model BIT. The LCI, in its 260th report, made recommendations on how to improve the draft model BIT. India finally adopted the revised version in December 2015, though not all of the LCI’s recommended changes were reflected in it.

Have a consultative process

Presumably, the government must have already undertaken widespread internal consultations, i.e., intra-governmental deliberations on the model BIT. As regards external consultation, the following may be considered. First, form a core team of experts, external to the government, who have demonstrated proficiency in international investment law or foreign investment, and engage with them. This would ideally include international lawyers and economists drawn from universities, research institutions and think tanks. This core team could act as the sounding board for the government. Second, invite industry bodies, arbitrators, law firms, and other civil society organisations to offer their views on the model BIT.

Following these first two steps, the third step will be to prepare a draft and place it in the public domain, inviting comments from the public at large, as done in March 2015. In the fourth step, or simultaneously, the draft model BIT should be placed on the floor of Parliament for discussion. The relevant department-related parliamentary committees can also be roped in for the same. Most notably, this consultative process should not be carried out merely as a box-ticking exercise, but as a meaningful activity that upholds the spirit of participatory democracy, which would necessarily include engagement with dissenting views.

New Secretariat in Chennai

The report, “New Secretariat to come up in Chennai at ₹1,200 crore: Vijay” (Front page, September 4), has highlighted three possible sites. Having been involved in the site-selection process in 2003 as tahsildar, Mylapore-Triplicane taluk, I would like to suggest the Madras Race Course as another option. Several sites, including the Government Data Centre, Anna University Campus,

Directorate of Technical Education, Highways Research Station and Anna University’s Taramani Campus, were surveyed at the time. The Madras Race Course could be ideal, given its accessibility, scope for wider road approaches, suitability for VIP visits and convenient access for the public.

S. Dharmarajan, Chennai

GROUND ZERO

The government middle school in Hirapur, Sehore district, Madhya Pradesh. The school is located in a dilapidated building. It is in the same premises as the village panchayat office and a community centre ground. MEHUL MALPANI

Missing: boundary walls, bathrooms, blackboards

Across north and central India, government school education, especially in rural areas, is a challenge, both in terms of the number of teachers in every school and the state of the building that houses children. Reporters from four States track the state of school education. **Amarnath Tewary, Ashna Butani, Mayank Kumar, and Mehul Malpani** examine teaching quality and infrastructural support

In August 10, Abhijeet Dipke, founder of the Cockroach Janta Party (CJP), said in a video that since Independence, no government has been able to provide students in rural areas with the same facilities as those available to students in urban areas. He pledged to begin checking schools in the district from which he hails, Hingoli in Maharashtra, and request sarpanchs to improve the situation.

“We have constructed a new Parliament and a new residence for the Prime Minister. Why, then, are we not able to construct new schools in our villages? Do we not consider the children of farmers and labourers as the future of our country,” he asked.

Since August 15, the CJP’s ‘School thik karo (reform schools)’ campaign has shone a spotlight on the condition of schools across States, with issues ranging from broken roofs to a lack of washrooms and drinking water. It asked locals to participate in a three-step audit of schools: ‘download a checklist, conduct the audit, and submit and tag us’. The checklist includes questions about whether the school has drinking water, boundary walls, wash rooms, and midday meals.

Bihar
At Dumri Kewat Tola primary school, in Muzaffarpur district in north Bihar, the plaster sometimes falls in the corridor outside the two classrooms. “We dread walking on this veranda,” says one teacher.

All the 119 students crowd into the pink building, which was painted six months ago but is already peeling. They share space with two goats, which play on the corridor, and occasionally wander in to be petted. Under the crumbling roof of the corridor stand two motorcycles – they belong to the teachers.

“The school was established in 1982, but there is no boundary wall, no wash room, no sports ground, and no space to store the midday meal supplies,” says the headmaster, Sanju Kumar. He travels 15 kilometres daily, one way, to reach the village. The six teachers of the school use the neighbours’ bathrooms, they say, but the children must simply go in the open, or not at all. The school has no space to build, say the teachers.

At the middle school, a kilometre away, at Budhnagra Jagannath Malikana Tola, established in 2002, there are 10 teachers and 283 students. The principal, Umesh Ram, is sad that the school has only two rooms. Students of Class 8 sit on the veranda, and those of Classes 1 and 2 under a tree behind the kitchen.

The teachers complain about space constraints and the fact that the area floods in the rains. The students say their midday meal is tasteless. “Sometimes there are insects in it. We want our food to be better,” says one student.

The district education officer says he has written to his superiors in Bihar’s Education Department about the schools’ demands.

In the adjoining Vaishali district, the primary school at Mirpur Pathad Rajdeo Rai Ka Tola does not even have a building of its own. It runs in a community centre, established in 2014.

The school, from Classes 1 to 5, runs in a single

The school has no playground, no wash room, no kitchen shed, nothing at all

UDAY KUMAR
Teacher, Bihar

room, which is also stuffed with rows of department almirahs and midday meal utensils, tables, and broken chairs. The students sit on new benches. There are 91 students and three teachers, including the headmaster, Vinod Kumar.

“The school has no playground, no wash room, no kitchen shed, nothing at all,” says Uday Kumar, a teacher who travels about 40 km every day to reach the school by motorcycle.

“You can imagine the difficulties we face here every day. When more students come to school than the space allows, they have to sit under a huge banyan tree nearby to study,” says Kumar.

The Block Education Department of Rajaparak could not be reached. On its department website, the Bihar government reads, “Education is the pillar upon which the fate of a country depends.”

Rajasthan
In Unchki village in Rajasthan’s Deeg district, there is no public road to the Rajkiya Prathamik Vidyalaya, which is blocked by a graveyard on one side and high boundary walls on the other. Locals say students have no option but to walk through the graveyard. From there, they traverse a thin, muddy path, surrounded by overgrown plants and shrubs, to go to school. A student of Class 3 says, “*Bach bach ke aana padhta hai. Keechar bohut hai* (We have to come cautiously; it is very muddy).”

Students say corridors are their classrooms. One student says, “The teacher teaches both Class 4 and 5 together.” This is either because there are not enough rooms in the building to accommodate all of them or no electricity. The district falls under the National Capital Region and is only 165 km from Delhi.

“My children come home during the middle of the day and then go back to school,” explains Sakira Khan, a mother of two children who study in this school. This is because there are no wash rooms. Behind the school there are two brick structures with overgrown shrubs. They open onto the fields and have no doors. In Rajkiya Prathamik Vidyalaya in Amrooka village in the same district, again students say they sit on a corridor outside the classroom which does not have electricity. There are 85 students enrolled in the school. The Rajkiya Prathamik Vidyalaya, in Bas Bolkheda village in Deeg, is located on a hill and caters to students from the neighbourhood. As they leave, students say they have had fun, running around the classroom. They say there are two teachers; neither had come that day. A temporary teacher assigned from another school visits them after finishing his day at the school where he is posted.

The teachers in all the three schools say they have received orders from their supervisors not to speak to the media. One says, on the condition of anonymity, “We keep writing to the district authorities about the shortage of classrooms, but they say they do not have the budget.”

There is one empty teaching post in one of the schools. “We are forced to manage,” explains another teacher. “We all take turns to teach students from another class.”

The teachers also admit that many students

do not attend class because of infrastructural issues. While there is no permanent principal, a nodal officer in each block frequently visits the school, serving as the principal. In all three schools, the teachers say 50-60% of the total enrolled students come to school daily.

Locals sitting under a tree near the school say children do not learn much in government schools compared to private schools. Aas Mohammad, whose granddaughter skipped school for the day, says, “It is not possible to send all my grandchildren to private schools. They may have all the facilities, but they cost some ₹18,000 a year.”

Locals also allege that governments do not pay attention to their requests because they live in predominantly Muslim areas.

District Magistrate Mayank Manish says if Education Department officials receive complaints from schools, they act on them quickly. “The government is focused on education. It is trying to increase or convert funds wherever possible. Teachers’ vacancies are filled regularly, and online materials are made available in case of a shortage of teachers,” he says. On specific concerns such as the lack of toilets and pathways to schools, he says officials will look into the matter.

Uttar Pradesh
Aworried Digvijay Narayan (name changed), 44, asks his wife which non-essential expenses they can cut to reduce their monthly spending.

Narayan, who lives in an urban settlement near Dayal Chauraha in Gomti Nagar, Lucknow, is a cab driver. He is considering moving his daughter, Payal Gautam (name changed), 11, from the Government Primary School Gwari in Vikas Khand in Lucknow to a private school after she suffered a prolonged illness due to a urinary tract infection. “We believe the dirty wash room at the government school caused the infection. She had symptoms for more than 10 days,” he says.

He is anxious about arranging an additional ₹1,000 per month for the move. “My son goes to a private school; now both will go together. I will ask the management to give me some concession,” he says.

Payal says she travels over a kilometre by foot to go to school every day. Drinking water, she says, comes “in fits and starts.” About the wash room, she says she will never use it again. “The water facilities in the wash room are dysfunctional at times, so we have to arrange for water from the houses nearby.”

Narayan feels the dismal infrastructure also impacts productivity. “A peaceful atmosphere, like what you find in a private school, will help the student focus on their studies,” he says.

Madhya Pradesh
Around 1 p.m., five teachers sit in two classrooms at the government middle school in Hirapur village of Madhya Pradesh’s Sehore district, about 40 km from the State capital, Bhopal. Students are absent; they have not returned to classes after the festival of Raksha Bandhan.

The school is located in a dilapidated building. It is in the same premises as the village panchayat office and a community centre ground. The four-room school, which includes a small principal’s office, has only 22 students enrolled across eight classes. While teachers have chairs and tables, there are no benches for students. The classrooms have mats on the floor, dim lighting, and broken almirahs. While one classroom does not have fans, the other two have fans that are out of order. The walls and the roofs have rainwater seeping through during the monsoon.

Next to the school building is a small pit filled with dirty water covered by green moss and surrounded by bushes. The community centre ground is filled with cattle dung. Stray dogs roam

around. There are two wash room complexes on the opposite sides of the ground – one for the staff and the other for students. However, in the students’ complex, only one of the two wash rooms is functional, forcing female and male students to use the same toilet.

The school in-charge, Mahendra Singh Sisodia, says students from eight classes are being accommodated in three classrooms after the primary school building on the same premises was abandoned about six months ago because of its poor condition.

Most of the 22 students at the school are from marginalised communities, he says. “Other dominant communities in the village send their children to private schools, so this school does not get much attention,” he says. Since the premises do not have a gate, some people also use the ground for drinking at night, he adds.

A small room is used as the kitchen to prepare the midday meal for the children. Sisodia says that the self-help group designated to prepare the meal stopped its services about three months ago. “I have informed Education Department officials at the district level and they have instructed me to make arrangements for now. So, I have been buying ration for the school. Hopefully the money will be reimbursed soon,” he says, adding that the school also does not have drinking water supply and the students bring bottles from home.

The school falls under the Ichhawar Assembly segment, the constituency of the State Revenue Minister, Karan Singh Verma.

About 20 km from Hirapur is Sarvar village in Bhopal’s rural outskirts. The government middle school here appears clean and well maintained. There is a boundary wall and a gate, and the campus has plants. However, a conversation with the students reveals a different story. The classrooms don’t have an electricity connection and many do not have fans or lights. The switchboards have been removed and the wires taped shut.

A Class 8 student says, “Since there is no light in the classrooms, it is difficult to study here, especially during the monsoon when we have to shut the windows. The summer heat is intolerable. While I like my school and teachers, this is one thing that we all want fixed at the earliest.”

The school has a strength of 104 students. All the three teachers for Classes 6-8 are on leave, while the principal, Suresh Malviya, is at an official training exercise. There are only two teachers of the primary classes present.

Over the phone, Malviya says that the school building has been in poor condition for about five years. The electricity connection had to be cut since water was leaking through the ceiling and there was risk of it reaching the wires, he says.

“We have been sending annual proposals for repairs for five years but no one has taken cognisance of it. The school gets ₹25,000 annually for miscellaneous works. It’s not enough to repair the building. The money is utilised for hiring a worker once a month to clean the wash rooms,” Malviya says.

Another teacher says, “The floor, the boundary wall, and the gate – or anything that appears in a good condition – was built by the village panchayat after a school alumnus became its head a few years ago. There is barely any attention on such matters from the department.”

Students complain of poor quality of food and say that many prefer to bring food from home. “The dal is watery and the rotis are often burnt or not properly cooked,” says a Class 7 student.

At both schools, the worried staff asked if this was an inspection by the CJP or whether permission had been obtained from senior officials.

An official at the School Education Department highlights a gap in the government’s approach towards different kinds of schools in the State. “Over the past few years, the focus has been on flagship institutions like Sandipani (earlier known as CM Rise) Schools and Excellence schools, so small rural schools, which were already not in a very good condition, have been struggling even for basic infrastructure.”

One terrorist was killed on Friday during a joint operation by the Army and Jammu and Kashmir Police deep inside a forest area in Budgam district, officials said. The operation was launched based on information about the movement of a suspected group of terrorists from Pulwama district towards Budgam, the officials said. "Based on specific intelligence input, a joint search operation was launched by the Indian Army, J&K Police and CRPF in Ashdar Gali, Budgam," the Srinagar-based Chinar Corps posted on X. The operation is under way as the forces are still looking for another terrorist, who is believed to be holed up in the same area. PTI

A fire broke out at Asian Hospital in Chhatrapati Sambhajnagar in Maharashtra, following which 58 patients, including nine newborns, were rescued. According to the hospital authorities, the newborns were shifted to the nearby Ghati Hospital, MGM Hospital, and Sanjeevani Hospital. The incident occurred around 2.15 a.m. due to a short circuit in an AC unit in the NICU. "The duty staff noticed smoke coming out of AC and immediately activated the code red, using their presence of mind, and evacuated the newborns," said Shoab Hashmi, managing director, Asian Hospital, adding that they managed to avoid a big tragedy because the hospital fire system is intact.

Press Trust of India
GAYAJI (BIHAR)

Jan Suraaj Party founder Prashant Kishor on Friday urged the Narendra Modi government at the Centre to bring out a 'White Paper' on alleged financial irregularities in Ayodhya's Ram Temple and "fix accountability".

Speaking to reporters in Gayatri, Mr. Kishor also waded into the controversy over GDP figures, alleging that hardships suffered by the people belied the claims of a high growth rate by the government.

"What will merely appointing a CEO achieve if the people who were previously involved in managing the affairs are let off the hook? The government must bring out a White Paper on the financial irregularities that have taken place," Mr. Kishor said.

NEW DELHI

The National Testing Agency (NTA) has sought the help of the All India Council for Technical Education (AICTE) to map IT infrastructure and vacant spaces in government institutions to establish standard testing centres (STCs). These centres will facilitate computer-based testing (CBT) for NTA examinations, including the high-stakes National Eligibility-cum-Entrance Test (NEET).

The NTA plans to shift NEET to CBT mode next year. Nearly 22 lakh students appeared for the NEET-UG, 2026, which was held in a pen-and-paper format. The examination became embroiled in a paper leak controversy and had to be re-conducted, leading to widespread protests and the resignation of Dharmendra Prad-

Top court says it is 'crying need of the hour' to stop attrition of experienced judicial talent otherwise access to justice would remain a mere chimera; only 7 States have responded positively to SC's call, while others are hesitant or plain fence-sitting

Krishnadas Rajagopal
NEW DELHI

As 5.18 crore cases lie pending in district courts across the country, the Supreme Court has sent a distress call to States to enhance the retirement age of experienced judicial officers from 60 to 62 years.

The court said the “crying need of the hour” is to stop the attrition of the experienced judicial talent lest access to justice remain a mere chimera due to unfilled posts.

Only seven States have so far responded positively to the SOS from the Supreme Court. Chhattisgarh, Karnataka, Madhya Pradesh, Maharashtra, Sikkim, Tamil Nadu and West Bengal have agreed to enhance the retirement age of their judicial officers.

A three-judge Bench headed by Chief Justice of India Surya Kant, in a September 1 order published on Friday, directed these State governments to amend the service rules within two months. The State High Court concerned would enhance the age of superannuation to 62 years of judicial officers,

 Most of the recruitment drives undertaken in the various States have not resulted in optimum recruitment or in the filling up of the sanctioned cadre strength, and a yawning gap between the sanctioned and working strength persists across the board

SUPREME COURT

subject to their suitability assessment, on their attainment of 60 years of age.

The other States and Union Territories have varied between a direct negative response to plain fence-sitting.

The court has directed them to take a decision on enhancement of retirement age of their judicial officers to 62 years in two weeks. These States include Andhra Pradesh, Arunachal Pradesh, Assam, Bihar, Goa, Gujarat, Haryana, Himachal Pradesh, Jharkhand, Kerala, Manipur, Meghalaya, Mizoram, Nagaland, Odisha, Punjab, Rajasthan, Telangana, Tripura, Uttarakhand, Uttar Pradesh, NCT of Delhi, Jammu and Kash-

Their hesitation, the court discovered, was fuelled by a sense of insecurity over the financial burden the move would entail. Plus, these States apprehend that employees in other State services would also demand parity.

The Bench said the apprehensions of these States were entirely misconceived. Judicial officers do a specialised service.

Benefit to society
“The alleged financial burden that would be thrown on the State exchequer on account of the enhancement of the superannuation age as a result of the payment of the maximum salary in the pay scale to the officers for a further

An asteroid hunter. A Maths wizard. A trailblazer in a coal mining community. A Special Olympics hockey coach. These are among the 82 educators from across the country who will receive the National Teachers' Awards on Saturday. President Droupadi Murmu will confer the awards.

Among the awardees are 48 school teachers, 21 faculty members in higher education, and 13 trainers from the Union Ministry of Skill Development and Entrepreneurship. Among the faculty in higher education are proponents of Indian Knowledge Systems, including Vaastu Shastra, Bhagavad Gita, and others.

One of the awardees, Haryana-based Anil Kaushik, known as the 'Math Wi-

Among the awardees are 48 school teachers, 21 faculty members in higher education, and 13 trainers from MSDE

zard', built a state-of-the-art physical Maths lab containing over 40 original learning models, alongside a 12-section virtual mathematics lab with 30 'Harbans puzzles'.

He has co-authored textbooks on Vedic Mathematics and published 22 teaching modules on the national DIKSHA portal.

Divyendu Sen from Rajasthan, another recipient of the award, is a teacher in a government school who bridged rural classrooms with deep-space science by training local students to track and hunt asteroids. He has pioneered low-cost solutions, including an AI-

enabled Biology education model, a Virtual Biology Laboratory, and 'Tree Talk', a QR-based botanical learning system.

Rajasthan-based teacher Vartika Gulati is an awardee who teaches at the Government Girls Upper Primary School in Jaipur. She turns abstract concepts into everyday experiences – teaching Algebra with groundnuts and geometry with kites. Her initiative, *Prashno Se Vigyan* (Science through questions), replaces rote learning with student-led inquiry.

Odisha-based teacher Padaraj Nayak, based at the Government High School, Alipaling, is receiving the award for guiding students to build over 50 prototypes, including a low-cost automatic plate-washing machine that earned a Government of India patent.

The NTA plans to shift NEET to CBT mode next year. The NEET-UG 2026 was held in a pen-and-paper format. ANI

Infrastructure audit
Following the NTA's request, the AICTE wrote to Vice-Chancellors of government-run technical universities and heads of AICTE-approved government institutes on August 31 to assess their infrastructure.

engineering colleges, polytechnics, university departments, and technical institutes to submit comprehensive data regarding their facilities by September 15.

The move follows an NTA directive issued on August 5 to address the progressive migration of national-level examinations to online and CBT modes. "By establishing

STCs in government institutions, the NTA seeks to create a wider, highly secure, and geographically distributed network of testing hubs," the NTA officials said.

tion is strictly restricted to government-owned and approved institutes.

To ensure seamless exam delivery without technical glitches, the NTA and AICTE are assessing local and external networks for Internet connectivity.

Power failures during high-stakes exams lead to the risk of re-conducting exams. Hence, AICTE has stated that institutes must detail their electrical backup capabilities. Furthermore, details on surveillance systems are sought, requiring information on existing CCTV coverage across all labs and connecting corridors.

Solution to previous puzzle

Solution to yesterday's Sudoku

Gugga Navami

Janmashtami falls on the Ashtami thithi of Krishna Paksha in the month of Bhadrapada during the Rohini nakshatra. Sri Krishna is regarded as the eighth avatar of Vishnu. It commemorates the birth of Bala Gopal, which is believed to have taken place with miraculous celestial intervention, said Prof. Kumool Abbi.

Kamsa, the king of Mathura was the brother of Devaki. It had been prophesised that the eighth child of Devaki would lead to the death of the evil Kamsa. Therefore, Devaki and her husband Vasudev were imprisoned and all children born to them were killed. Spiritual literature states that divine intervention put Mathura to sleep and Vasudev saved baby Krishna after birth from Kamsa's clutches and handed him over to the care of Yashoda and Nanda, eventually paving the way for the destruction of Kamsa.

Usually, the day after Janmashtami is observed as Gugga Naumi (Navami), a popular folk religious festival celebrated across Rajasthan, Haryana, Punjab, Jammu and Kashmir, Uttar Pradesh and other parts of north India. Gugga Naumi reflects the syncretic and fluid traditions of India, where He is worshipped by people of different religions and sects.

The celebration of Gugga Naumi begins on the day of the Rakhi and continues for nine days, beginning with pilgrimage to Gugga Medi village in Hanumanagar district of Rajasthan. Devotional songs called 'pir ke solle' are sung by the *gugga mandlis*, prayers and fairs take place at Gugga's shrines, called *marhis*, dotted across villages in north India, reflecting Gugga's affinity with the subalterns.

Mature Gurindervir battles stopwatch, questions, injuries

India's fastest man has endured a challenging few months since breaching the 10.1-second barrier. Ahead of the Asian Games, he is determined to take control of his life and his running

Uthra Ganesan

Two years ago, Gurindervir Singh stamped his return to the top rung of sprinters in India by winning the National Inter-State Athletics Championships in the fading light at Panchkula. It was only 10.32 seconds, but it brought him the spotlight and support needed to kick his almost stagnant career back into gear. In time, it led to him becoming the fastest Indian on the track, raising expectations of a historic sub-10 run in the most glamorous event in athletics.

Familiar situation

As the 25-year-old prepares for the upcoming Asian Games, the parallels between 2024 and now are hard to miss, even for the man himself. Back then, Gurindervir was the meet record holder at the Nationals, but, in the three years since he had clocked 10.27s (Patiala, 2021), others had raced far ahead. Coupled with injuries, lack of sufficient nutrition and uncertainty over his sporting future, he had been forced to play catch-up. Now, with the all-important continental meet looming large, Gurindervir is again battling the stopwatch on the track and questions and injuries off it. The only Indian to go under 10.1s has had a torrid few months ever since the incredible two days in May when the national record switched hands thrice, Gurindervir eventually making it his own in 10.09s. He injured his hamstring, crashed out in the first round at the Commonwealth Games and finished a lowly seventh at the World Athletics Con-

That Gurindervir took pressure. This one has evolved, he has learnt from all this

tinental Tour in Bhubaneswar. The big difference now, however, is the support he has access to. Picked up by the Reliance Foundation after the 2024 outing and working under the watchful eyes of its athletics director James Hillier at the high performance centre in Navi Mumbai, Gurindervir is already back to peak training ahead of his biggest outing of the year. "He's had a good couple of weeks of training. He's getting back into good shape but he's looking to get into peak 100m shape within the next two weeks. That's what I'm hoping for," Hillier said before getting into the details of Gurindervir's technical strengths and weaknesses. "CWG... there were certain elements of his race that were quite good from a coaching perspective. I'm very happy with the first 60-70 meters of his race. What we've been working on in the last few weeks is getting him to extrapolate that speed over the full 100m. "We've been working pretty hard to get that last bit of the race sorted. I've put some specific training in place for that. We have a competition in Delhi on September 10 and that's going to be a key competition. We'll get to see exactly where he is, where the training is going and how well he finishes the race there, that'll give us very good information," Hillier explained. The transformation The man himself has gone from being an emotional and often-stressed youngster to a more confident and mature professional who is determined to take control of his life and his running, something Hillier also acknowledged. The transformation began in March last year, when he

broke the national record for the first time with a 10.20s run at the Indian Grand Prix 1. Gurindervir had been battling stomach ulcers that weakened his body and naysayers who tried to break his spirit. Both were spillovers from his time in obscurity before 2024 – when a poor diet and dirty water stripped away his gut lining. He could barely keep anything in and lost almost 15kgs in a fortnight even as people, known and unknown, sniggered that he was finished. "If you had asked last year's Gurindervir about handling the pressure, maybe he would have been in stress. That time too, all this happened with me – interviews, phone calls, questions, expectations. I was not sleeping at night," he said. "Back then, I couldn't get out of it. I was thinking about what to say in the next interview when I should have been thinking about how to improve. When I ran in the Fed Cup [in 2025], I cramped and it stressed me even more because I had claimed I would do a lot in the interviews. That Gurindervir took pressure. This one has evolved, he has learnt from all this." A large part of the credit for that, he insisted, went to Hillier for keeping him away from a lot of negativity. "If it wasn't for him, I would have been in a very bad, stressful situation. The coach motivated me a lot. He gave me the right guidance on how to deal with it." A lot of people had been critical of his inclusion for Glasgow, questioning his fitness, but Hillier has already clarified that the problem was not carrying an injury into competition but the lack of sufficient races before the CWG because of the injury. That issue has been addressed although the Continental Tour event highlighted the issues that continue to plague his race plan. "At the Bhubaneswar event, you'll see he was in a really good position at 60-70m and then sort of fell away, which I expected to happen based on what's been happening in training. It's just how he's put together," Hillier said. "Many 100m athletes run the race in different ways. Guri is a very good accelerator and that's just his natural strength. He won

I'm very happy with the first 60-70 meters of his race. What we've been working on in the last few weeks is getting him to extrapolate that speed over the full 100m JAMES HILLIER Athletics director, Reliance Foundation the national indoor 60m earlier in the year, broke the national record in that with a very fast time of 6.60s. Someone like an Animesh [Kujur] or an Amlan [Borgohain], these guys tend to finish strong, that's their natural strength. We must train them to their strengths and then work alongside that to manage their weaknesses." Listening to his body Gurindervir has also learnt to listen to his body. "I have worked on everything. What I eat and how much, how much I travel. If I am feeling any pain, how much effort do I have to put into the workout? If I am doing an endurance workout, how do I do it? "In weight training, I have set levels I must achieve every month. It's the same on track as well. I will train as much as my body needs. I discuss with the dietician how much food I need. I had some lack of mobility before, so sitting with the physio, knowing which muscles and joints I have to work on so that I can run better." The one thing that hasn't changed, however, is Gurindervir's conviction. The reason he was stressed, he explained, was because what he says matters to him. "If I say something, it has to have meaning. Words are important for me. "If I claim or promise something and I cannot do it, it affects me. That's my nature. My father had a dream, I started running to fulfil that dream. People said Indians can't be competitive in 100m, I was determined to do it. It will take some time, but it will definitely happen."

I have a choice to live with gratitude or anger; I choose gratitude

Shannon Rowbury will have waited 16 years by the time she receives her Olympic bronze at LA28. The former middle-distance runner talks about competing in an era when many of her competitors were doping, her emotions when she heard she would finally get justice, her passion to advocate for clean sport and the switch from athlete to commentator

INTERVIEW

Shannon Rowbury

Y.B. Sarangi

Born about a month after the 1984 Los Angeles Olympics, former American middle-distance runner Shannon Rowbury is eagerly awaiting her women's 1500m bronze medal at LA28. She richly deserved a podium finish 14 years ago, but was robbed of the honour due to the drug-induced performances of some competitors. Thanks to the International Olympic Committee's (IOC) ceaseless war against doping, the tainted athletes, who finished ahead of her, have been disqualified, and Rowbury stands to formally receive her medal more than a decade-and-a-half after winning it.

As part of an Athletics Federation of India (AFI) initiative, Rowbury, now a commentator who also actively participates in anti-doping drives, was in India to train the country's athletics commentators and work during the World Athletics Continental Tour Silver meet at the Kalinga Stadium in Bhubaneswar last month. She shared her compelling story, full of mixed emotions. Excerpts:

How was your first visit to India?

I was so excited for my first trip to India to be for such a meaningful event – to be part of the Indian meet, to do the in-stadium commentary, and to work with aspiring Indian broadcasters. It has been a really magical first visit. Hopefully not my last.

Could you tell us how you shifted from athletics to broadcasting?

I started while I was still competing. I stopped competing in 2021, but I had started broadcasting in 2017 for smaller meets, mostly distance events where I had experience. I could provide analysis and colour commentary, with insight into what might be going through the athlete's head and the tactics. Over the years my roles have grown. I get tingles when I smell the track and hear the sounds. It has helped me stay connected to the sport.

There is always a gap between the broadcaster/media and the athletes. Do you think misunderstanding creates a gap?

My experience as an athlete helps me be a better broadcaster, not just because I understand what it's like to be in those races, but because I have compassion. Our athletes work for 365 days, but they only get maybe 15 or 20 opportunities to race. It's hard to maintain a high level year after year. When I cover a race, I try to share the effort and the meaning within the season, and to understand that these are humans who seem like superheroes.

BISWARANJAN ROUT

If I could change the past, I would make that race fair. Since I cannot, I channel those hard moments into advocacy, change and hopefully inspiration

How do you look back at your career?

I'm most proud of my longevity. I spent a decade ranked in the top ten in the world, which is not an easy feat. Unfortunately, during much of my career, many athletes who were ultimately caught for doping were competing. The story of my Olympic medal is still ongoing. I will receive it physically at the LA Olympics in 2028. It was heartbreaking to compete in a time that wasn't as clean or fair as it should have been, but it gives me passion to fight for fair sport and excitement to cheer for athletes in races that feel level.

Could you elaborate on your wait for the medal?

In London 2012, I finished sixth but in the 12-13 years since, five women from my race have been disqualified, including the gold and silver medalists [Asli Cakir Alptekin and Gamze Bulut] from Turkey and a Russian athlete [Tatyana Tomashova], who was ahead of me and was disqualified just last year. That officially moved me into bronze. The IOC's policy now is to offer medal ceremonies, so I will have a ceremony in LA. It's nothing like London, but I'm grateful to have the opportunity to celebrate in front of friends and family. I'm grateful to a system that committed it-

self to clean sport.

It will be 16 years by the time I get it. When I found out, my entire body started shaking. I started sobbing. I had carried so much frustration about the unfairness. But I am an optimistic person...I got justice and I will receive my medal in front of my two children. They'll see their mother being recognised for winning with integrity, winning the right way. Hopefully that will reinforce lessons, not only for them but for others, that truth can triumph. If I could change the past, I would make that race fair. Since I cannot, I channel those hard moments into advocacy, change and hopefully inspiration. I have a choice to live with gratitude or anger, and I choose gratitude.

At the Olympics, my highest finish after London was fourth in Rio, so it was very challenging to know London had a lot of cheats. I had a medal at the World Championships, but an Olympic medal is on another level.

How has the middle-distance field changed in the last few years?

When I cover a race, I try to share the effort and the meaning within the season, and to understand that these are humans who seem like superheroes

There has been a lot of innovation around shoe technology, kind of fuelling the way athletes train, the lifting and recovery they do. Those developments have created a new wave of world records and personal bests. In the United States we call it trackflation – times across the board are so much quicker. It's exciting because it creates new stories and exciting moments when a record is broken and an athlete improves. It's a good sign...because it means our sport is growing.

You spoke about doping. India is among the countries with the most doping-related violations. How should the AFI approach this?

Part of it for me was how I was raised – it wasn't just about winning, it was about sportsmanship and how you win. It's important to create an ecosystem that incentivises performance but prioritises fairness, and enforces penalties for those who cheat. Once there is a clear directive that cheats will lose eligibility, that will disincentivise it.

India has high-achieving athletes and international figures. There's so much more that can be done to develop younger talent and build strong foundations so they have a career not just as professional athletes but also as coaches, broadcasters or in other roles beyond their athletics career.

Since you have been affected by doping, do you do anything on education?

I work with the US Anti-Doping Agency (USADA) to share my story. I've attended conferences. It has been about explaining the human side of doping. At events about education around drug testing, I meet people working to improve testing technology and give them a sense of who they are doing it for. There's a large group committed to clean sport, and I get to thank them in person and help them understand how impactful their work is.

LA is two years away, and the World Championships is next year. How do you look forward to the middle-distance events?

The depth, especially in the 1500m on both men's and women's sides, is astonishing. It makes for great racing when more than half the field in an Olympic or World final could potentially be on the podium. I love a close, exciting race, because it makes for drama.

GAME THEORY

The US Open's greatest men's champions

With the year's final tennis Major set to enter its business end, we take a look at the most successful men in the tournament's history. The inaugural edition, featuring only men, was held in 1881. The tournament was limited to amateurs until 1968, when the Open Era began and professionals were allowed in.

Electric heels

The second edition of Australia's Electric Sports Racing Association (ESRA) Nationals was held in Coffs Harbour last month.

Electric skateboarding — shown in this photograph — electric unicycling and one-

wheeling are nascent disciplines, and the event caters to the growing community of electric racing enthusiasts.

The ESRA Nationals offers purpose-built circuits with "smooth surfaces, flowing corners, and a safe, controlled setting for riders to push their limits". Electric skateboards are

battery-run, with the speed typically controlled by a wireless hand-held throttle remote or the riders shifting their weight between the front of the board (forward motion) and the rear (braking). Riders change direction by tilting the board to one side or the other.

These boards can reportedly

reach speeds of 30-40 kmph; powerful motors can increase the speed even further.

Electric skateboards are environment-friendly, but critics have expressed concerns over their safety. The ESRA, a regulatory body, is working to enforce safety guidelines to address these worries.

POSITIVE MINDSET

We are always one step ahead of Pakistan, says Deepti

X@BCCIWOMEN

There is no advantage as such. The only thing is that whatever we have won against them (Pakistan), whether it is the Asia Cup or any other matches, we are always one step ahead of them. We just want to play good cricket. That's the mindset — India all-rounder Deepti Sharma ahead of the fixture against Pakistan.

IT'S A DATE!

Japan to host Men in Blue for a T20I on September 22

FILE PHOTO

The Indian men's team will take on Japan in their first-ever T20I meeting on September 22, marking the launch of celebrations for the 75th anniversary of India-Japan diplomatic relations. The match will be played at the Sano International Cricket Ground and the teams will compete for the Suzuki Cup.

CHANGE OF PLANS

India's friendly against Panama in Bengaluru advanced by a day

FILE PHOTO: K. MURALI KUMAR

India's international football friendly against Panama in Bengaluru has been advanced by a day from the scheduled September 26 as the Sree Kanteerava Stadium, the venue of the match, will host the Bengaluru Marathon on September 27. The football game will now be held on September 25.

JOY AND DESPAIR

Gasly stripped of Monaco podium finish, Hadjar reinstated

AFP

Alpine's Pierre Gasly has been stripped of his third place at the Monaco GP and Red Bull's Isack Hadjar was reinstated to third position. Gasly had been given a penalty, but did not serve it during the race and finished third on track. He had been demoted to seventh before an appeal overturned the decision.

India has areas to work on as it meets Pakistan

The Harmanpreet-led team, having already qualified for the semifinals, will be keen to sustain the momentum in the game against its traditional rival; Sana's side looks to seal a final-four spot

ASIA CUP

Press Trust of India
DUBAI

India will be eager to step up the intensity as it faces traditional rival Pakistan in its final Group A match of the women's Asia Cup here on Saturday.

Be it men or women, routinely scheduled India-Pakistan fixtures in multi-team tournaments have not lived up to the off-field hype for a while now. Nothing different is expected at the Dubai International Stadium, with India hoping to get the job done with ease.

The Harmanpreet Kaur-led side had qualified for the semifinals after thrashing Hong Kong by 137 runs on Thursday.

Openers Smriti Mandhana and Shafali Verma are at the top of their game. Smri-

Next target: India will hope to end the group stage with a win over Pakistan. X@BCCIWOMEN

ti broke a battery of records en route a century against Hong Kong, sending a warning to the other teams.

It is to be noted that the pitches have not been the easiest to bat on.

The likes of Pratika Rawal, Richa Ghosh and Harmanpreet will look to

spend more time in the middle, having not been able to convert starts.

Pressure is mounting on new No. 3 Pratika, who is yet to deliver an impactful knock in the competition.

The Indian team has to develop a pool of power-hitters and fast bowlers to challenge for bigger ho-

nours. The addition of Nandani Sharma to the pace attack is a step in the right direction as she is delivering on her promise while opening alongside spearhead Kranti Gaud.

Pakistan needs to make drastic improvement in batting to compete with India. In its game against

Thailand, Pakistan found itself under pressure in the PowerPlay with the loss of three wickets.

However, it later managed to defend a lowly 119.

The team relies heavily on opener Muneeba Ali and all-rounder Fatima Sana, who is the captain of the side. That will need to change if Pakistan is to seal a final-four spot.

The teams (from):
India: Harmanpreet Kaur (Capt.), Smriti Mandhana (Vice-capt.), Shafali Verma, Bharti Fulmali, Deepti Sharma, Richa Ghosh (wk), G. Kamalini (wk), Arundhati Reddy, Prema Rawat, Radha Yadav, Shree Charani, Renuka Singh, Nandani Sharma, Kranti Gaud, Pratika Rawal.
Pakistan: Fatima Sana (Capt.), Ayesha Zafar, Eman Naseer, Eymen Fatima, Gull Feroza, Momina Riasat, Muneeba Ali Siddiqui (wk), Sadaf Shamas, Nashra Sundhu, Sadia Iqbal, Saira Jabeen, Shawaal Zulfiqar, Tuba Hassan, Umm-e-Hani, Waheeda Akhtar.

Match starts at 8 p.m. IST.

Never imagined I would go past Mithali's tally: Smriti

Press Trust of India
DUBAI

Smriti Mandhana had to pinch herself after surpassing Mithali Raj to become the leading run-getter in women's internationals as she "never imagined" to go past the legendary Indian batter.

Smriti played a major part of her career under Mithali's captaincy. The former India captain was also her role model growing up.

History was created at the Dubai International Cricket Stadium on Thursday as the India vice-captain went past Mithali's tally of 10,868 international runs.

Smriti now has 10,880

Role model: Smriti says she looked up to Mithali, left, growing up. FILE PHOTO: VIVEK BENDRE

across the three formats.

"Till I was batting, I didn't know what record it was because I didn't know the exact runs. Mithali *di* has been a legend and a role model and we've all

grown up watching her.

"So, to go past her in the tally of runs, I definitely never imagined I would do that. I am happy there are two Indians in the top two," said Smriti.

Zverev survives; Khachanov knocks out Auger-Aliassime

US OPEN

Agence France-Presse
NEW YORK

Top-seeded Alexander Zverev kept his bid for a first US Open title on track with a gritty five-set victory over Quentin Halys, staying the course as a spate of upsets rocked the men's draw on Thursday.

A trio of former women's champions — Coco Gauff, Iga Swiatek and Naomi Osaka — booked third-round berths along with reigning Grand Slam champions Elena Rybakina and Mirra Andreeva.

But men's third seed Felix Auger-Aliassime tumbled out, along with sixth-seeded Alex de Minaur and 13th-seeded Lorenzo Musetti.

Zverev laboured until 2.15 a.m. on Friday at the Arthur Ashe Stadium to shake off 52nd-ranked Frenchman Halys 6-4, 4-6, 7-6(3), 6-7 (3), 6-3.

The four-hour 33-minute marathon followed his wild first-round five-setter against 89th-ranked Lorenzo Sonego that kept Zverev at it until shortly before 2 am on Wednesday.

While Zverev survived, Auger-Aliassime fell 6-7(5), 6-3, 6-2, 6-2 to 50th-ranked Karen Khachanov.

Feeling dizzy

The Russian pulled away relentlessly from the physically ailing Canadian, who said he was "dizzy and seeing spots."

De Minaur fell to Botić van de Zandschulp 6-4, 7-5, 6-2 while 123rd-ranked Australian Dane Sweeny shocked 13th seed Musetti

TOP RESULTS

Women: Third round:
16-Cirstea (Rou) bt 19-Paolini (Ita) 6-3, 6-3; 11-Kostyuk (Ukr) bt 18-Alexandrova 6-3, 6-2; 1-Sabalenska bt Rakhimova 6-3, 6-4; 3-Pegula (USA) bt 31-Fernandez (Can) 1-6, 6-4, 6-3.
Second round: 5-Andreeva bt Lys (Ger) 6-0, 6-2; 24-Potapova (Aut) bt Jeanjean (Fra) 6-4, 2-6, 6-3; 10-Anisimova (USA) bt Tagger (Aut) 6-3, 6-3, 6-1; 14-Jovic (USA) bt Jones (GBR) 6-4, 6-4; 17-Eala (Phi) bt Oliynykova (Ukr) 6-1, 6-4; 4-Gauff (USA) bt Badosa (Esp) 6-4, 7-6(5); Starodubtseva (Ukr) bt 32-Sakkari (Gre) 1-6, 7-6(4), 6-2; 2-Rybakina (Kaz) bt Maneiro (Esp) 6-2, 6-4.

Men: Second round: 1-Zverev (Ger) bt Halys (Fra) 6-4, 4-6, 7-6(3), 6-7(3), 6-3; 21-Darderi (Ita) bt Svrčina (Cze) 6-3, 6-7(5), 6-4, 6-4; Sweeny (Aus) bt 13-Musetti (Ita) 3-6, 6-1, 6-2, 6-2; 31-Bergs (Bel) bt de Jong (Ned) 7-5, 1-6, 6-2, 7-6(2); van de Zandschulp (Ned) bt 6-De Minaur (Aus) 6-4, 7-5, 6-2; Khachanov bt 3-Auger-Aliassime (Can) 6-7(5), 6-3, 6-2, 6-2; Bonzi (Fra) bt 32-Buse (Per) 6-2, 7-6(4), 6-0; 17-Mensik (Cze) bt Rodionov (Aut) 6-3, 3-6, 6-2, 6-3; 14-Tien (USA) bt Monfils (Fra) 6-3, 6-4, 6-3; 9-Fritz (USA) bt Bellucci (Ita) 6-0, 6-1, 6-1; 5-Cobolli (Ita) bt Schoolkate (Aus) 3-6, 6-3, 6-4, 7-5.

3-6, 6-1, 6-2, 6-2 to reach the third round of a Major for the first time. Fourth-seeded Gauff,

the 2023 champion, thrilled the crowd with a 6-4, 7-6(5) win over Spain's Paula Badosa.

Battle of the brains in Garden City

Galaxy of stars: Carlsen, Anand and other players at the unveiling of the GCL trophy with league chairperson Peeyush Dubey and commissioner Gourav Rakshit. K. MURALI KUMAR

GLOBAL CHESS LEAGUE

P.K. Ajith Kumar
BENGALURU

No sport is driven by information technology as much as chess. No city in India is bigger for IT than Bengaluru. It is only apt then that the Global Chess League has come to the Garden City that houses the world's leading technology firms.

The world's leading chess players have assembled here for the fourth edition of the GCL — a joint venture of Tech Mahindra and world chess governing body FIDE — that opens at the Lalit Ashok here on Saturday. It is the second time that the planet's most glamorous chess league is being held in India. Season-3 was conducted in Mumbai after Dubai and London played hosts in the first two years.

A slew of innovations — such as no increment for the first 40 moves, four points for a win with black pieces, having both men and women in the teams and the practice of toss before a match — has made the GCL unique in interna-

Making a point: Carlsen is all ears as GCL commissioner Rakshit speaks. Anand looks on. K. MURALI KUMAR

tional chess. Little wonder, the world's best players have responded enthusiastically to the tournament.

The World No. 1 Magnus Carlsen is headlining the list of superstars in the mind sport. He had missed out in Mumbai, after playing in the first two seasons, but his team, Alpine Pipers, is the defending champion.

But only one player from last year — Anish Giri — has remained with the franchise for this season. Fabiano Caruana, Hou Yifan and R. Praggnanandhaa are absent. Alpine APL

Pipers, however, has added to the squad two top female stars, Koneru Humpy and Divya Deshmukh, the World Cup champion making her GCL debut.

Chess fans in Bengaluru would be able to see from close quarters many of their favourite players including Viswanathan Anand (PBG Alaskan Knights), Alireza Firouzja (Triveni Continental Kings), Javokhir Sindarov (Fyers American Gambits), Maxime Vachier-Lagrave (CheQ Mumbai Masters) and Ian Nepomniachtchi (Ganges Grandmasters).

Carlsen glad to be back at the GCL after a break

P.K. Ajith Kumar
BENGALURU

Chess is finding newer fans. Five-time World champion Magnus Carlsen feels that has been the case for the last five or six years across the world.

"We are still finding different ways to present chess," said the Norwegian on the eve of the Global Chess League, which kicks off here on Saturday.

"For me it is interesting to be part of these innovative events (such as the GCL and the Total Chess World Championship Tour). There is a lot of enthusiasm to present chess in the best way possible."

Carlsen is glad to be back at the GCL after a year's interval. "We had a couple of really frustrating years for the team (Alpine Pipers) when I was playing," he said. "And then when I was away, the team won the title. So, this time I am just trying to do my best to not do any worse than last year."

Unlike Carlsen, Viswanathan Anand, also a five-time World champion, is playing for a new team this year — PBG Alaskan Knights. "Every year you have to come with a positive attitude," he said. "We have a great team...and my role is just that of a player (and not a mentor)."

Jovakhir Sindarov, who will be challenging D. Gukesh for the World title later this year, said he wasn't thinking about that match at the moment. "I have enjoyed playing in every season of the GCL," he said. "I am excited that I will be

Divya Deshmukh. K. MURALI KUMAR

playing on the first board this year and I will try my best to help my team (Fyers American Gambits) win the tournament."

Among the biggest attractions of the league is the Turkish prodigy Yagiz Kaan Erdogmus. He is making his GCL debut and is part of Alaskan Knights.

Amazing experience

"It is going to be an amazing experience for me to play along with Vishy (Anand) and Arjun (Erigaisi)," he said. Like him, Divya Deshmukh is also playing at the GCL for the first time. And she is looking forward to the experience of playing without increment though she is also a bit wary of it. "I would love to flag some of my opponents (in the time scramble)," said the Women's World Cup winner.

The GCL's chairman Peeyush Dubey said the GCL proved chess could also be a festival. "And we have support from some of the biggest companies in the world," he said.

The former three-time GP winner says the Mercedes sensation has a better feeling with the car this season and can go far

As Andrea Kimi Antonelli enters his home race as the championship leader for this weekend's Italian GP, former F1 driver Giancarlo Fisichella praised how the youngster has weeded out the mistakes that plagued him in his rookie campaign last year.

"Last year, it was the first season for Kimi, and he made a few mistakes and was a bit up and down. He was inconsistent, quick in some races, and not in others and made mistakes. But this year, he's got much more [better] feeling with the car and he's having an

Though Antonelli will enjoy the limelight in his backyard, the 20-year-old's chance of winning won't be easy, as he will start from the back of the grid for taking a new Power Unit for this event outside of the allotted four per year. Fisichella, though, reckoned the long straights of Monza will al-
